

BIOLOGY

BOOKS - KUMAR PRAKASHAN KENDRA

BIOLOGY (GUJRATI ENGLISH)

DIVERSITY IN LIVING ORGANISMS

Activity

1. Does Desi cow look like a Jersey cow?

View Text Solution

2. Do all Desi cows look alike?

[View Text Solution](#)

3. Will we be able to identify a Jersey cow in a crowd of Desi cows that don't look like each other?

[View Text Solution](#)

4. What is the basis of our identification ?

[View Text Solution](#)

5. Soak seeds of green gram, wheat , maize, peas and tamarind . Once they become tender, try to split the seed.

Do all the seeds break into two nearly equal halves?

[View Text Solution](#)

6. Soak seeds of green gram, wheat , maize, peas and tamarind . One they become tender, try to split the seed.

Are the roots, taproots or fibrous ?

[View Text Solution](#)

7. Soak seeds of green gram, wheat , maize, peas and tamarind . One they become tender, try to split the seed.

Do the leaves have parallel or reticulate venation ?

[View Text Solution](#)

8. Soak seeds of green gram, wheat , maize, peas and tamarind . Once they become tender, try to split the seed.

How many petals are found in the flower of these plants?

[View Text Solution](#)

9. Soak seeds of green gram, wheat , maize, peas and tamarind . Once they become tender, try to split the seed.

Can you write down further characteristics of monocots and dicots on the basis of these observations ?

View Text Solution

10. Find out the names of the following animals and plants in as many languages as

you can.

View Text Solution

11. Find out the scientific names of any five common animals and plants. Do these names have anything in common with the names you normally use to identify them?

View Text Solution

1. Why do we classify organisms?

View Text Solution

2. Give three examples of the range of variations that you see in the life forms around you.

View Text Solution

3. Which do you think is a more basic characteristic for classifying organisms? (a) the place where they live. (b) the kind of cells they are made of. Why?

[View Text Solution](#)

4. What is the primary characteristic on which the first division of organisms is made ?

[View Text Solution](#)

5. On what bases are plants and animals put into different categories ?

[View Text Solution](#)

6. Which organisms are called primitive and how are they different from the so called advanced organisms?

[View Text Solution](#)

7. Will advanced organisms be the same as complex organisms? Why?

[View Text Solution](#)

8. What is the criterion for classification of organisms as belonging to kingdom Monera or Protista?

[View Text Solution](#)

9. In which kingdom will you place an organism which is single-celled, eukaryotic and photosynthetic ?

View Text Solution

10. In the hierarchy of classification which grouping will have the smallest number of organisms with a maximum of characteristics in common and which will have the largest number of organisms?

[View Text Solution](#)

11. Which division among plants has the simplest organisms?

[View Text Solution](#)

12. How are Pteridophytes different from Phanerogams?

[View Text Solution](#)

13. How do Gymnosperms and Angiosperms differ from each other?

View Text Solution

14. Write two points of differences between Gymnosperms and Angiosperms.

View Text Solution

15. How do Angiosperms differ from Gymnosperms? Give one example each

[View Text Solution](#)

16. How do poriferan animala differ from coelenterate animals ?

[View Text Solution](#)

17. How do annelid animals differ from arthropods ?

[View Text Solution](#)

18. What are the difference between amphibians and reptiles ?

View Text Solution

19. What are the difference between animals belonging to the aves group and those in the mammalia group ?

View Text Solution

Questions And Answers Answer The Following Questions

1. Into which groups did Aristotle divide the living organisms?

[View Text Solution](#)

2. Which are the largest known living organisms on the earth ?

[View Text Solution](#)

3. What is the name of the book that Charles Darwin wrote ? When did he write it?

[View Text Solution](#)

4. Which are the regions of megadiversity ?

[View Text Solution](#)

5. Who suggested two kingdom classification system?

[View Text Solution](#)

6. Who suggested five kingdom classification system?

[View Text Solution](#)

7. What are the bases of five kingdom classification systems?

[View Text Solution](#)

8. Which modification did the scientist Woese introduced in the classification system?

[View Text Solution](#)

9. Which organisms are included in Monera ?

[View Text Solution](#)

10. Which kind of organisms are included in Protista?

[View Text Solution](#)

11. Which division among plants has the simplest organisms?

[View Text Solution](#)

12. Give a difference between lizard and snake.

[View Text Solution](#)

13. Name the type of nutrition in fungi.

View Text Solution

14. Which are heterotrophic, eukaryotic organisms? What is their mode of nutrition ?

View Text Solution

15. Which is the organism that has prokaryotic cells?

[View Text Solution](#)

16. Which animal phylum has the lowest structural organization ?

[View Text Solution](#)

17. In which animal phylum, true body cavity appears for the first time?

[View Text Solution](#)

18. After which structure the phylum Echinodermata has been named ?

View Text Solution

19. Which are the egg laying mammals ?

View Text Solution

Questions And Answers Name The Following

1. Name the Reptile which has 4-chambered heart

[View Text Solution](#)

2. Name the Substance that makes cell walls in plants

[View Text Solution](#)

3. Name the Disease caused by filarial worm

[View Text Solution](#)

4. Name the Meaning of the word Echinus

[View Text Solution](#)

5. Name the Book written by Carolus Linnaeus

[View Text Solution](#)

6. Name the Cold-blooded animals that breathe through lungs only and lay eggs.

[View Text Solution](#)

7. Name the A plant body not differentiated into root, stem and leaves.

[View Text Solution](#)

8. Name the The science of classification

[View Text Solution](#)

9. Name the Different forms of living organisms found in particular region

[View Text Solution](#)

Questions And Answers Give Definition

1. Give definition of the Lichens

[View Text Solution](#)

2. Give definition of the Cryptogams

[View Text Solution](#)

3. Give definition of the Phanerogams

[View Text Solution](#)

4. Give definition of the Gymnosperms

[View Text Solution](#)

5. Give definition of the Symbiosis

[View Text Solution](#)

6. Give definition of the Diploblastic

[View Text Solution](#)

7. Give definition of the Triploblastic

[View Text Solution](#)

8. Give definition of the Notochord

View Text Solution

9. Give definition of the Genus

View Text Solution

10. Give definition of the Species

View Text Solution

Questions And Answers Give The Examples

1. Give the examples of living organisms that belong to the Protista

[View Text Solution](#)

2. Give the examples of living organisms that belong to the Fungi

[View Text Solution](#)

3. Give the examples of living organisms that belong to the Thallophyta

[View Text Solution](#)

4. Give the examples of living organisms that belong to the Bryophyta

[View Text Solution](#)

5. Give the examples of living organisms that belong to the Pteridophyta

[View Text Solution](#)

6. Give the examples of living organisms that belong to the Gymnosperms

[View Text Solution](#)

7. Give the examples of living organisms that belong to the Monocots

[View Text Solution](#)

8. Give the examples of living organisms that belong to the Dicots

[View Text Solution](#)

9. Give the examples of living organisms that belong to the Porifera

View Text Solution

10. Give the examples of living organisms that belong to the Colenterata

View Text Solution

11. Give the examples of living organisms that belong to the Platyhelminthes

View Text Solution

12. Give the examples of living organisms that belong to the Nematoda

View Text Solution

13. Give the examples of living organisms that belong to the Annelida

View Text Solution

14. Give the examples of living organisms that belong to the Arthropoda

View Text Solution

15. Give the examples of living organisms that belong to the Mollusca

View Text Solution

16. Give the examples of living organisms that belong to the Echniodermata

View Text Solution

17. Give the examples of living organisms that belong to the Protochordata

View Text Solution

18. Give the examples of living organisms that belong to the Pisces (Cartilaginous fish)

View Text Solution

19. Give the examples of living organisms that belong to the Pisces (Bony fish)

View Text Solution

20. Give the examples of living organisms that belong to the Amphibia

View Text Solution

21. Give the examples of living organisms that belong to the Reptilia

View Text Solution

22. Give the examples of living organisms that belong to the Aves

View Text Solution

23. Give the examples of living organisms that belong to the Mammalia

View Text Solution

24. Give the examples of living organisms that belong to the Aquatic mammals

View Text Solution

Questions And Answers Write Scientific Names

1. Write scientific names of the Mandarin fish

[View Text Solution](#)

2. Write scientific names of the Angler fish

[View Text Solution](#)

3. Write scientific names of the Lion fish

[View Text Solution](#)

4. Write scientific names of the Dog fish

[View Text Solution](#)

5. Write scientific names of the Rohu

[View Text Solution](#)

6. Write scientific names of the Flying fish

[View Text Solution](#)

7. Write scientific names of the Sea-horse

[View Text Solution](#)

8. Write scientific names of the Common frog

[View Text Solution](#)

9. Write scientific names of the House wall
lizard

[View Text Solution](#)

10. Write scientific names of the Cobra

View Text Solution

11. Write scientific names of the White Stork

View Text Solution

12. Write scientific names of the Ostrich

View Text Solution

13. Write scientific names of the Male Tufted Duck

View Text Solution

Questions And Answers Write The Division Phylum Class

1. Write the division / phylum /class to which following organisms belong Spirogyra

View Text Solution

2. Write the division / phylum /class to which following organisms belong Horse-tail

[View Text Solution](#)

3. Write the division / phylum /class to which following organisms belong Deodar

[View Text Solution](#)

4. Write the division / phylum /class to which following organisms belong Paphiopedilum

[View Text Solution](#)

5. Write the division / phylum /class to which following organisms belong Nereis

[View Text Solution](#)

6. Write the division / phylum /class to which following organisms belong Tapeworm

[View Text Solution](#)

7. Write the division / phylum /class to which following organisms belong Wuchereria

[View Text Solution](#)

8. Write the division / phylum /class to which following organisms belong Centipede

[View Text Solution](#)

9. Write the division / phylum /class to which following organisms belong Octopus

[View Text Solution](#)

10. Write the division / phylum /class to which following organisms belong Starfish

View Text Solution

11. Write the division / phylum /class to which following organisms belong Herdmania

View Text Solution

12. Write the division / phylum /class to which following organisms belong Sea-horse

View Text Solution

13. Write the division / phylum /class to which following organisms belong Torpedo

View Text Solution

14. Write the division / phylum /class to which following organisms belong Climbing perch

View Text Solution

15. Write the division / phylum /class to which following organisms belong Salamander

View Text Solution

16. Write the division / phylum /class to which following organisms belong King cobra

View Text Solution

17. Write the division / phylum /class to which following organisms belong Penguin

View Text Solution

18. Write the division / phylum /class to which following organisms belong Dolphin

View Text Solution

19. Write the division / phylum /class to which following organisms belong Bat

View Text Solution

Questions And Answers Answer The Questions In One Word Or One Sentence

1. Which scientist introduced scientific naming (nomenclature) system?

[View Text Solution](#)

2. Which scientist proposed five kingdoms classification ?

[View Text Solution](#)

3. What is the scientific name of human?

[View Text Solution](#)

4. What is the function of cilia or flagella in organisms of kingdom Protista?

[View Text Solution](#)

5. How do bryophytic plants differ from pteridophyte plants and other higher plants ?

[View Text Solution](#)

6. In which plant group do seed and fruits develop ?

[View Text Solution](#)

7. What are the divisions of Cryptogams?

[View Text Solution](#)

8. In plants of which group are the seeds develop Inside an organ that is modified to

become a fruit?

[View Text Solution](#)

9. The plants of which division are known as amphibians of the plant kingdom?

[View Text Solution](#)

10. Of which class is a chameleon an animal ?

[View Text Solution](#)

11. In which class of vertebrate animals is the heart three-chambered ?

View Text Solution

12. What are the animals called whose body temperature is dependent on the temperature of surrounding?

View Text Solution

13. Which class of vertebrate animals was first to lay eggs on the land?

View Text Solution

14. The animals of which classes are warm-blooded?

View Text Solution

15. Which glands are there in the skin of mammals?

[View Text Solution](#)

16. Which gland is there in the skin of amphibia ?

[View Text Solution](#)

17. Which reptile has four-chambered heart?

[View Text Solution](#)

18. In adult vertebrate, by what is notochord replaced ?

[View Text Solution](#)

19. Which animals possess pseudopod and pseudocoelom respectively?

[View Text Solution](#)

Questions And Answers Choose The Correct Option

1. Nephrolepis (Fern) belongs to :

A. Gymnosperm

B. Angiosperm

C. Pteridophyta

D. Bryophyta

Answer: C

View Text Solution

2. Which group has seeds enclosed in fruits ?

A. Bryophyta

B. Pteridophyta

C. Angiosperms

D. Gymnosperms

Answer: D

View Text Solution

3. Binomial nomenclature was given by

A. Robert Whittaker

B. Robert Hooke

C. Carolus Linnaeus

D. Schleiden and Schwann

Answer: C

View Text Solution

4. In the categories of classification, which level comes just after (below) the kingdom ?

A. Genus

B. Division / Phylum

C. Class

D. Species

Answer: B

View Text Solution

5. Who gave 'Five kingdom classification ' ?

A. Carolus Linnaeus

B. Ernst Haeckel

C. Robert Whittaker

D. Carl Woese

Answer: C

View Text Solution

6. Kingdom Monera includes:

A. Unicellular eukaryotic organisms

B. Prokaryotic bacteria

C. Multinucleate higher fungi

D. Multicellular animals

Answer: B

View Text Solution

7. State the name of the animal shown in the figure given and the phylum there of.

- A. Sea lily, Echinodermata
- B. Sea lily. Mollusca
- C. Octopus, Mollusca
- D. Octopus, Echinodermata

Answer: D

 [View Text Solution](#)

8. Which group of animals belongs to Mollusca ?

A. Chiton, Crab, Ascaris

B. Planaria, Pila, Butterfly

C. Chiton, Pila, Bivalve

D. Leech, Octopus, Nereis

Answer: C

View Text Solution

9. Animals of which class are not cold blooded ?

A. Fishes

B. Amphibia

C. Reptilia

D. Aves

Answer: D

View Text Solution

10. Used for moving around in animals of phylum Echinodermata :

- A. Digestive system
- B. Circulatory system
- C. Water-driven tube system
- D. Nervous system

Answer: C

View Text Solution

11. Which glands are located in the skin of amphibian animals?

- A. Sweat glands
- B. Sebaceous glands
- C. Mucous glands
- D. Milk glands

Answer: C

View Text Solution

12. P: Amphibia Q: Reptilia R: Aves S: Mammalia

The animals of which class of division

Vertebrata are cold blooded ?

A. P and Q

B. Q and R

C. R and S

D. P and R

Answer: A

[View Text Solution](#)

13. Which of the following statement is false ?

A. Scorpion have jointed legs

B. Earthworm has true body cavity

C. Jellyfish is a diploblastic animal

D. Octopus belongs to phylum coelenterata

Answer: D

View Text Solution

14. Mycoplasma is included in the kingdom:

A. Protista

B. Monera

C. Fungi

D. Plantae

Answer: B

View Text Solution

15. Lichens have symbiotic relationship between:

A. Algae and Fungi

B. Fungi and Bryophytes

C. Algae and Bryophytes

D. Fungi and Bacteria

Answer: A

View Text Solution

16. Adventitious fibrous root system is present

in:

A. Dicot plants

B. Monocot plants

C. Bryophytes

D. Pteridophytes

Answer: B

View Text Solution

17. While moving from kingdom towards species respectively...

A. the variations decreases and similarities
increases

B. the variations increases and similarities
decreases

C. both the variations and similarities
increases

D. both the variations and similarities
decreases

Answer: A

View Text Solution

18. Which is the correct alternative in the descending order of the levels of classification ?

A. Kingdom → Family → Order →
Class → Species

B. Kingdom → Class → Order →
Genus → Species

C. Kingdom → Order → Class →
Species → Genus

D. Kingdom → Class → Division →

Family → Order

Answer: B

View Text Solution

19. Which scientist have given the system of binomial nomenclature for naming organisms?

A. Lamarck

B. Leeuwenhoek

C. Linnaeus

D. Darwin

Answer: C

View Text Solution

20. Which character is seen in the 'Angiosperms division of Phanerogams?

A. Ovules enclosed in ovary

B. Ovules not enclosed in ovary

C. Ovary enclosed in ovules

D. Ovary not enclosed in ovules

Answer: A

View Text Solution

21. Members of which taxon of classification are capable of interbreeding ?

A. Genus

B. Species

C. Family

D. All the given

Answer: B

View Text Solution

22. introduced by dividing the Monera into Archaeobacteria and Eubacteria.

A. Linnaeus

B. Ernst Haeckel

C. Robert Whittaker

D. Woese

Answer: D

View Text Solution

23. According to Binomial nomenclature, which name of an organism cannot be repeated for the nomenclature of any other organism?

A. Specific

B. Generic

C. Local name

D. All the Given

Answer: B

View Text Solution

24. Isolate the irrelevant pair:

A. Unicellular organisms- Protista

B. Prokaryotic organisms-Monera

C. Eukaryotic multicellular organisms

without cell wall - Fungi

D. Unlimited growth-Plants

Answer: C

View Text Solution

25. In which kingdom are the protozoa, lichens and algae included ?

A. Monera

B. Protista

C. Plantae

D. Cyanophyta

Answer: B

View Text Solution

26. To which division does marchantia belong:

A. Thallophyta

B. Bryophyta

C. Pteridophyta

D. Gymnosperms

Answer: B

View Text Solution

27. Which of the following plant is a gymnospermic plant?

A. Pinus

B. Marchantia

C. Riccia

D. Fern

Answer: A

View Text Solution

28. Which statement is false for the organisms of kingdom Fungi?

- A. The mode of nutrition can be saprophytic
- B. Their cell wall contains chitin
- C. They can be prokaryotic
- D. They can be symbiotic.

Answer: C

View Text Solution

29. Find mis-matched pair.

A. Spirogyra, ulothrix, chara - Thallophyta

B. No specialised tissue for conduction-

Bryophyta

C. Gymnosperms and angiosperms -

Pteridophyta

D. Covered seeds - Gymnosperms

Answer: D

View Text Solution

30. Between which two groups of plants, do the Gymnosperms occupy their position?

A. Pteridophyta and Dicots

B. Thallophyta and Monocots

C. Pteridophyta and Angiosperms

D. Monocots and Dicots

Answer: C

View Text Solution

31. Which is the proper alternative for the characters of a monocot plant?

A. Adventitious fibrous root system and parallel venation in leaves.

B. Normal tap root system and reticulate venation in leaves.

C. Adventitious fibrous root system and reticulate venation in leaves.

D. Normal tap root system and parallel venation in leaves.

Answer: A

View Text Solution

32. It is a non-motile, though it is an animal :

A. Crab

B. Unio

C. Spongilla

D. Pila

Answer: C

[View Text Solution](#)

33. The animals of which phylum are diploblastic (body of two layers of cells)?

A. Platyhelminthes

B. Coelenterata

C. Nematoda

D. Annelida

Answer: B

34. Which animal phylum possesses stinging cells (cynidoblasts)?

A. Coelenterata

B. Arthropoda

C. Porifera

D. Nematoda

Answer: A

35. To which phylum does jellyfish belong?

A. Mollusca

B. Annelida

C. Coelenterata

D. Echinodermata

Answer: C

View Text Solution

36. To which phylum do the first triploblastic animals of the animal kingdom belong?

A. Coelenterata

B. Porifera

C. Platyhelminthes

D. Arthropoda

Answer: C

View Text Solution

37. Which group of animals is not included in non-chordata ?

- A. Arthropoda
- B. Coelenterata
- C. Echinodermata
- D. Pisces

Answer: D

View Text Solution

38. In the animals of which phylum, is the circulatory system met with for the first time?

A. Nematoda

B. Annelida

C. Arthropoda

D. Mollusca

Answer: B

View Text Solution

39. Recognize the group of phyla of animals possessing open type of circulatory system?

A. Arthropoda-Mollusca

B. Mollusca-Annelida

C. Annelida-Arthropoda

D. Annelida -Echinodermata

Answer: A

View Text Solution

40. Shark has heart, while Whale has heart.

A. 2-chambered, 4-chambered

B. 2-chambered, 3-chambered

C. 3-chambered, 2-chambered

D. 3-chambered, 4-chambered

Answer: A

View Text Solution

Questions And Answers Fill In The Blanks

1. A peculiar water-driven tube system, that is used for moving around, is seen in the phylum.....

[View Text Solution](#)

2. The coelomic cavity in the animals of phylum..... is filled with blood.

[View Text Solution](#)

3. The animals of phylum Arthropoda have... appendages.

[View Text Solution](#)

4. Soft foot is found in phylum for locomotion.

[View Text Solution](#)

5. Starfish belongs to phylum.....

[View Text Solution](#)

6. Whale belongs to class.....

[View Text Solution](#)

7. is the largest phylum of the animals.

[View Text Solution](#)

8. is the highest and is the lowest category of classification of living organism.

[View Text Solution](#)

9. The binomial nomenclature is made up of two words, first word is name and second is name.

[View Text Solution](#)

10. The system of scientific naming (nomenclature) was introduced for the first time by.....

[View Text Solution](#)

11. The plants of group are the first to have specialised tissue for conduction of water and other substances

[View Text Solution](#)

12. The division is divided into two classes on the basis of the number of cotyledon, present in the seed.

View Text Solution

13. Maize is plant belonging to class.....

View Text Solution

14. In animals, separates the nervous tissue from the gut.

View Text Solution

15. The classification of life forms are closely related to their..... . (evolution, inter-relationship, behavior)

View Text Solution

16. Due to the study of various organisms becomes simple and easy. (evolution, classification, geography)

View Text Solution

17. Scientist wrote the book "The Origin of Species' (Whittaker, Charles Darwin, Linnaeus)

View Text Solution

18. A includes all organisms that are similar enough to breed and perpetuate.

(Phylum, Class, Species)

View Text Solution

19. is included in the group Protista.

(Mucor, Diatoms, Funaria)

View Text Solution

20. Lichen is a living form. (parasitic, symbiotic, autotrophic)

[View Text Solution](#)

21. Fern is included in group (Fungt. Bryophyta, Pteridophyta)

[View Text Solution](#)

22. Euplectelea is an animal of phylum..... .

(Porifera, Coelenterata. Platyhelminthes)

[View Text Solution](#)

23. Ascaris, wuchereria, roundworm are the

examples of phylum (Platyhelminthes,

Nematoda, Annelida)

[View Text Solution](#)

24. is a characteristic of phylum Nematoda. (Pseudocoelom, True coelom, Blood coelom)

[View Text Solution](#)

25. is an animal of division Protochordata. (Amphlopus, Chiton, Echinus (sea urchin))

[View Text Solution](#)

26. There is some degree of tissue formation in the phylum..... . (Porifera, Platyhelminthes, Coelenterata)

View Text Solution

27. animals show locomotion by creeping.
(Frog. Salamander, House wall lizard)

View Text Solution

28. The animals of phylum have a true cavity. (Annelida, Mollusa, Coelenterata)

[View Text Solution](#)

Questions And Answers True Or False

1. Rohu is a protochordata animal

[View Text Solution](#)

2. In animals of superclass Pisces, their hearts have three chambers.

[View Text Solution](#)

3. Lizard is an animal of class Reptilia.

[View Text Solution](#)

4. The animals of class Amphibia respire by gills in larva stage and through slimy skin and

lungs in the adult stage.

[View Text Solution](#)

5. The skeleton of shark is entirely made of cartilage.

[View Text Solution](#)

6. Lichen is a symbiotic relation between fungi and blue-green algae.

[View Text Solution](#)

7. Bryophyta are called amphibians of the plant kingdom.

[View Text Solution](#)

8. Moss (Funaria) is an example of Bryophyta.

[View Text Solution](#)

9. Bryophyta and Pteridophyta plants are Cryptogams (non-flowering plants).

[View Text Solution](#)

10. Angiospermic plants are Phanerogams (flowering plant) without bearing fruit.

[View Text Solution](#)

11. Pinus is an Angiospermic plant.

[View Text Solution](#)

12. Angiospermic plant can be monocot or dicot.

[View Text Solution](#)

Questions And Answers Answer The Questions In Short

1. How would you choose between two characteristics to be used for developing a

hierarchy in classification ?

View Text Solution

2. List any two benefits of classification.

View Text Solution

3. Why bryophytes and pteridophytes grow in moist and shady places ?

View Text Solution

4. Why are Bryophytes called amphibians of the plant kingdom ?

[View Text Solution](#)

5. What is bilateral symmetry ?

[View Text Solution](#)

6. Name the animal phylum to which the cockroach belongs. Also state two phylum

features of cockroach.

[View Text Solution](#)

7. Why whales are not grouped in fishes ?

[View Text Solution](#)

8. Thallophyta, Bryophyta and Pteridophyta are classified as Cryptogamae whereas gymnosperms and angiosperms are classified as Phaenerogamae, why?

[View Text Solution](#)

9. What is evolution? How is classification connected to evolution ?

[View Text Solution](#)

10. What is the scheme of classification for plants and animals?

[View Text Solution](#)

Questions And Answers Give Scientific Reasons

1. Give scientific reasons for the statements :

Spiders and scorpions are very different from each other but are placed in the same phylum - Arthropoda.

[View Text Solution](#)

2. Give scientific reasons for the statements :

Platyhelminthes and Nematodes possess a pseudocoelom.

[View Text Solution](#)

3. Give scientific reasons for the statements :

Amphibians lay eggs in water.

[View Text Solution](#)

4. Give scientific reasons for the statements :

Classification of living organisms is necessary.

[View Text Solution](#)

5. Give scientific reasons for the statements :

On moving from the level of species towards the kingdom, gradually the similarities decreases and dissimilarities increases.

[View Text Solution](#)

6. Give scientific reasons for the statements :

It is necessary to give scientific names to the organisms.

[View Text Solution](#)

7. Give scientific reasons for the statements :

The system of scientific naming (nomenclature) gives a distinct (separate) identity to each organism.

[View Text Solution](#)

8. Give scientific reasons for the statements :

In Whittaker's five kingdom classification, the fungi are shown separately from Protista.

[View Text Solution](#)

9. Give scientific reasons for the statements :

Lichens are symbiotic type of organisms.

View Text Solution

10. Give scientific reasons for the statements :

All vertebrates are chordates but all chordates are not vertebrates.

View Text Solution

11. Give scientific reasons for the statements :

The body of fish is well-adapted for aquatic life.

View Text Solution

12. Give scientific reasons for the statements :

Crocodile and turtle can live on the land as well as in water. Yet they are not amphibians.

View Text Solution

13. Give scientific reasons for the statements :

Bat is not a bird and whale is not a fish.

View Text Solution

Questions And Answers Write A Short Note

1. Write a short note on the Monera

View Text Solution

2. Write a short note on the Protista

[View Text Solution](#)

3. Write a short note on the Fungi

[View Text Solution](#)

4. Write a short note on the Pteridophyta

[View Text Solution](#)

Questions And Answers Match The Column

1. Match the following properly:

Column I	Column II
1. Bryophyta	a. Sunflower
2. Pteridophyta	b. Marchantia
3. Monocot	c. Fern
4. Dicot	d. Maize

[View Text Solution](#)

2. Match the following properly:

Column I	Column II
1. Protozoa	a. Mucur
2. Fungi	b. Spirogyra
3. Algae	c. Amoeba
4. Symbiosis of Blue-green algae and Fungi	d. Lichen

[View Text Solution](#)

3. Match the following properly:

Column I	Column II
1. Annelida	a. Soft foot
2. Echinodermata	b. Differentiation
3. Coelenterata	c. Water-driven system
4. Mollusca	d. Tentacles

[View Text Solution](#)

4. Match the following properly:

Column I	Column II
1. Wuchereria	a. Reduced coelomic cavity
2. Tapeworm	b. Flattened body
3. Pila	c. Jointed legs (appendages)
4. Prawn	d. Pseudocoelom

[View Text Solution](#)

5. Match the following properly:

Column I	Column II
1. Monera	a. Ulothrix
2. Protista	b. Cynobacteria
3. Fungi	c. Euglena
4. Thallophyta	d. Aspergillus

[View Text Solution](#)

6. Match the following properly:

Column I	Column II
1. Cavity in body (Coelenteron)	a. Tapeworm
2. Without coelom	b. Hydra
3. Pseudocoelom	c. Leech
4. True body cavity	d. Ascaris

Questions And Answers Distinguish Between The Following

1. Distinguish between the monocots and dicots

[View Text Solution](#)

2. Distinguish between the platyhelminthes and nematods

[View Text Solution](#)

3. Distinguish between the mollusca and echinodermata

[View Text Solution](#)

4. Distinguish between the reptilia and mammalia

[View Text Solution](#)

5. Distinguish between the cartilaginous fish and bony fish

[View Text Solution](#)

6. Distinguish between the Invertebrates and vertebrates

[View Text Solution](#)

7. Distinguish between the thallophytes and bryophytes

 [View Text Solution](#)

8. Distinguish between the bryophytes and pteridophytes

 [View Text Solution](#)

9. Distinguish between the algae and fungi

[View Text Solution](#)

10. Distinguish between the cryptogams and phanerogams

[View Text Solution](#)

11. Distinguish between the plant kingdom and animal kingdom

[View Text Solution](#)

Questions And Answers Answer The Questions In Brief

1. What are the advantages of classifying organisms?

[View Text Solution](#)

2. Give scientific terms for the following: (a) True internal body cavity of animals. (b) Cold blooded animals that breathe through lungs

only and lay eggs. (c) A plant body not differentiated into root, stem and leaves.

[View Text Solution](#)

3. Write the given statement in your answer books after filling in the blanks : (a) Pila and Unio have an external shell and belong to the phylum (b) Free living marine animals with water driven tube system are in the phylum..... (c) To which phylum do sponges belong?

[View Text Solution](#)

4. To which group does the following organism belong and give one reason for each : (a) Cyanobacteria (b) Euglena (c) Ulothrix

[View Text Solution](#)

5. Identify the phylum of the following two organisms and write two characteristic

features of each.

[View Text Solution](#)

6. Why is there a need for systematic naming of living organisms?

[View Text Solution](#)

7. What are the conventions followed while writing a scientific name?

[View Text Solution](#)

Questions And Answers Write A Brief

1. Write a brief account of the distinguishing characters of each of the Porifera animal group. Mention their respective examples.

[View Text Solution](#)

2. Write a brief account of the distinguishing characters of each of the Coelenterata animal group. Mention their respective examples.

[View Text Solution](#)

3. Write a brief account of the distinguishing characters of each of the Platyhelminthes animal group. Mention their respective examples.

[View Text Solution](#)

4. Write a brief account of the distinguishing characters of each of the Nematoda animal group. Mention their respective examples.

 [View Text Solution](#)

5. Write a brief account of the distinguishing characters of each of the Annelida animal group. Mention their respective examples.

 [View Text Solution](#)

6. Write a brief account of the distinguishing characters of each of the Arthropoda animal group. Mention their respective examples.

[View Text Solution](#)

7. Write a brief account of the distinguishing characters of each of the Mollusca animal group. Mention their respective examples.

[View Text Solution](#)

8. Write a brief account of the distinguishing characters of each of the Echinodermata animal group. Mention their respective examples.

View Text Solution

9. Write a brief account of the distinguishing characters of each of the Protochordata animal group. Mention their respective examples.

[View Text Solution](#)

10. Write a brief account of the distinguishing characters of each of the Pisces animal group. Mention their respective examples.

[View Text Solution](#)

11. Write a brief account of the distinguishing characters of each of the Amphibia animal group. Mention their respective examples.

[View Text Solution](#)

12. Write a brief account of the distinguishing characters of each of the Reptilia animal group. Mention their respective examples.

[View Text Solution](#)

13. Write a brief account of the distinguishing characters of each of the Aves animal group. Mention their respective examples.

[View Text Solution](#)

14. Write a brief account of the distinguishing characters of each of the Mammalia animal group. Mention their respective examples.

**Questions And Answers Answer The Questions In
Details**

1. Explain the basis for grouping organisms into five kingdoms

[View Text Solution](#)

2. How are the criteria for deciding divisions in plants different from the criteria for deciding the sub-groups among animals?

[View Text Solution](#)

3. What are the major divisions in the Plantae ?
What is the basis for these divisions ?

View Text Solution

4. What are the common characters of the Chordata ?

View Text Solution

5. Explain how animals in Vertebrata are classified into further sub-groups.

[View Text Solution](#)

6. Draw a chart showing five kingdom classification method

[View Text Solution](#)

7. Draw a chart showing classification of plants

[View Text Solution](#)

8. Draw a chart showing classification of animals

[View Text Solution](#)

Questions And Answers Draw The Labelled Diagram

1. Draw the labelled diagram : amoeba

[View Text Solution](#)

2. Draw the labelled diagram : paramoecium

[View Text Solution](#)

3. Draw the labelled diagram : euglena

[View Text Solution](#)

4. Draw the labelled diagram : spirogyra

[View Text Solution](#)

5. Draw the labelled diagram : Hydra

[View Text Solution](#)

6. Draw the labelled diagram : Balanoglossus

Question Based On Practical Skills With Answers
Select The Appropriate Option And Complete
The Sentence

1. Non-flowering plants belong to..... .

A. Cryptogam

B. Phanerogams

C. Dicots

D. Monocots

Answer: A

View Text Solution

2. Which of the following is not an amphibian?

A. Sea anemone

B. Frog

C. Toad

D. Hyla

Answer: A

[View Text Solution](#)

3. Non-green saprophytic plant is....

A. Marsilea

B. Marchantia

C. Paramoecium

D. Rhizopus

Answer: D

[View Text Solution](#)

4. Which of the following show aquatic adaptation ?

A. Snake

B. Fish

C. Bacteria

D. Toad

Answer: B

View Text Solution

5. Cells of bacteria contain..... .

A. cell wall

B. chromatin fibre

C. Both (a) and (b)

D. may be (a) or (b)

Answer: A

View Text Solution

6. Which of the following is warm-blooded animal ?

A. Liverfluke

B. Human being

C. Draco

D. Salamander

Answer: B

View Text Solution

7. Trees with fine needle-like leaves are usually found in the hilly areas. They are called :

A. mosses

B. conifers

C. algae

D. fungi

Answer: B

View Text Solution

8. The plants which have naked seeds belong to the group :

A. Angiosperms

B. Gymnosperms

C. Algae

D. Fungi

Answer: B

View Text Solution

9. What are (i) and (ii) respectively, in the given diagram?

- A. Gills and annulus
- B. Pileus and gills
- C. Stipe and annulus
- D. Gills and pileus

Answer: B

View Text Solution

10. To which group would a plant that produces flowers belong?

- A. Bryophyta
- B. Pteridophyta
- C. Gymnosperms
- D. Angiosperms

Answer: D

View Text Solution

11. On which types of fishes are the gills covered with operculum ?

- A. Bony fish
- B. Cartilaginous fish
- C. Both (a) and (b)
- D. Neither (a) nor (b)

Answer: A

View Text Solution

12. Jointed appendages are characteristic feature of

A. Cockroach

B. Earthworm

C. Bony fish

D. Pigeon

Answer: A

 [View Text Solution](#)

13. Two specimens (A) and (B) were observed by a child for spotting as shown below:

(A)

(B)

After identifying the given specimens, in which of the following groups should he place them ?

No.	A	B
(a)	Bryophyta	Pteridophyta
(b)	Pteridophyta	Gymnosperms
(c)	Algae	Gymnosperms
(d)	Gymnosperms	Algae

 [View Text Solution](#)

14. Which one of the following is not an adaptive feature of bony fish?

A. It has stream-lined body

B. Presence of anal cerci

C. Presence of fins

D. Presence of gills

Answer: B

View Text Solution

15. The umbrella-like spherical part of the button mushroom is

A. Stipe

B. Pileus

C. Sporangiphore

D. Sporangium

Answer: B

View Text Solution

16. Ribbon-shaped and spiral chloroplast is present in which of the following organisms?

A. Ulothrix

B. Agaricus

C. Spirogyra

D. Chalmydomonas

Answer: D

View Text Solution

17. Seeds are naked in

A. Angiosperms

B. Gymnosperms

C. Both of these

D. None of these

Answer: B

View Text Solution

18. Arun was provided with two plants to study the external features of root and leaf. He found that root of one plant is tap root and leaf of other plant has parallel venation. The type of plants respectively are..... .

A. dicot plant, monocot plant

B. monocot plant, dicot plant

C. both are dicot plants

D. both are monocot plants

Answer: A

[View Text Solution](#)

19. A teacher in a laboratory period asked a student to identify the organ used by a female *Anopheles* mosquito to suck animal blood and the student correctly identified it as :

A. Wings

B. Proboscis

C. Spiracles

D. Antennae

Answer: B

View Text Solution

20. The characteristic not common between bony fish and pigeon is....

- A. vertebral column
- B. stream-lined body
- C. warm-blooded
- D. lay eggs

Answer: C

View Text Solution

21. In the figure of the earthworm given below, the horizontal lines throughout the body represent the ...

A. cells of the body.

B. cell walls separating the cells of the body.

C. vertically arranged muscles of the body.

D. septa separating the segments of the body.

Answer: D

View Text Solution

22. The features which places them in the same phylum is

A. pointed-head

B. bulky thorax

C. presence of scales

D. post anal tail

Answer: D

View Text Solution
