SQUARES AND SQUARE ROOTS

Exercise 6 3

1. 2025 plants are to be planted in a garden in such a way that each row contains as many plants as the number of rows. Find the number of rows and the number of plants in each row.

A. 44

B. 46

C. 45

D. 40

Answer: C

 [Watch Video Solution](#)

2. Find the smallest square number that is divisible by each of the numbers 4, 9 and 10.

 [Watch Video Solution](#)

3. For each of the following numbers, find the smallest whole number by which it should be divided so as to get a perfect square. Also find the square root of the square number so obtained.

(i) 252	(ii)			
2925	(iii) 396	(iv) 2645	(v) 2800	(vi) 1620

 [Watch Video Solution](#)

4. The students of Class VIII of a school donated $Rs.$ 2401 in all, for Prime Ministers National Relief Fund. Each student donated as many rupees as

the number of students in the class. Find the number of students in the class.

A. 64

B. 49

C. 36

D. 69

Answer: *B*

[Watch Video Solution](#)

5. Find the square roots of the following numbers by the Prime Factorisation Method.

(i) 729

(ii) 400

(iii) 1764

(iv) 4096

(v) 7744

(vi) 9604

(vii) 5929

(viii) 9216

(ix) 529

(x) 8100

Watch Video Solution

6. For each of the following numbers, find the smallest whole number by which it should be multiplied so as to get a perfect square number. Also find the square root of the square number so obtained. (i) 252 (ii)

180

(iii) 1008

(iv) 2028 (v) 1458

(vi) 768

Watch Video Solution

7. Without doing any calculation, find the numbers which are surely not perfect squares.

(i) 153

(ii) 257

(iii) 408

(iv) 441

Watch Video Solution

[Watch Video Solution](#)

8. Find the square roots of 100 and 169 by the method of repeated subtraction.

[Watch Video Solution](#)

9. What could be the possible 'one's' digits of the square root of each of the following numbers? (i) 9801 (ii) 99856 (iii) 998001
(iv) 657666025

[Watch Video Solution](#)

10. Find the smallest square number that is divisible by each of the numbers 8, 15 and 20.

[Watch Video Solution](#)

1. Find the least number that must be subtracted from 5607 so as to get a perfect square. Also find the square root of the perfect square. find the greatest 4 digit number which is a perfect square .

 [Watch Video Solution](#)

2. Find the greatest 4-digit number which is a perfect square.

 [Watch Video Solution](#)

3. Find the least number that must be added to 1300 so as to get a perfect square. Also find the square root of the perfect square.

 [Watch Video Solution](#)

4. Find the square root of 12.25.

[Watch Video Solution](#)

5. Area of a square plot is $2304m^2$. Find the side of the square plot.

[Watch Video Solution](#)

6. There are 2401 students in a school. P.T. teacher wants them to stand in rows and columns such that the number of rows is equal to the number of columns. Find the number of rows.

[Watch Video Solution](#)

7. Find the square root of : (i) 729 (ii) 1296

[Watch Video Solution](#)

8. Find the smallest square number which is divisible by each of the numbers 6, 9 and 15.

 [Watch Video Solution](#)

9. Find the smallest number by which 9408 must be divided so that the quotient is a perfect square. Find the square root of the quotient.

 [Watch Video Solution](#)

10. Is 2352 a perfect square? if no, find the smallest multiple of 2352 which is a perfect square. also find the square root of the new number?

 [Watch Video Solution](#)

11. Is 90 a perfect square?

 [Watch Video Solution](#)

12. Find the square root of 6400.

Watch Video Solution

13. Find a Pythagorean triplet in which one member is 12.

Watch Video Solution

14. Write a Pythagorean triplet whose smallest member is 8.

Watch Video Solution

15. Find the square of the following numbers without actual multiplication.

(i) 39

(ii) 42

Watch Video Solution

Watch Video Solution

Exercise 6 2

1. Write a Pythagorean triplet whose one member is.
- (i) 6 (ii) 14
(iii) 16 (iv) 18

Watch Video Solution

2. Find the square of the following numbers.

- (i) 32 (ii) 35 (iii) 86 (iv) 93 (v) 71 (vi) 46

Watch Video Solution

Exercise 6 4

1. There are 500 children in a school. For a P.T. drill they have to stand in such a manner that the number of rows is equal to number of columns. How many children would be left out in this arrangement.

[Watch Video Solution](#)

2. A gardener has 1000 plants. He wants to plant these in such a way that the number of rows and the number of columns remain same. Find the minimum number of plants he needs more for this.

A. 25

B. 24

C. 26

D. 21

Answer: *B*

[Watch Video Solution](#)

3. In a right triangle ABC , $\angle B = 90^\circ$. (a) If $AB = 6\text{cm}$, $BC = 8\text{cm}$, find AC (b) If $AC = 13\text{cm}$, BC , find AB .

 [Watch Video Solution](#)

4. Find the length of the side of a square whose area is 441m^2 .

 [Watch Video Solution](#)

5. Find the least number which must be added to each of the following numbers so as to get a perfect square. Also find the square root of the perfect square so obtained. (i) 525 (ii) 1750 (iii) 252 (iv) 1825 (v) 6412

 [Watch Video Solution](#)

6. Find the least number which must be subtracted from each of the following numbers so as to get a perfect square. Also find the square root of the perfect square so obtained. (i) 402 (ii) 1989 (iii) 3250 (iv) 825 (v) 4000

 [Watch Video Solution](#)

7. Find the square root of the following decimal numbers. (i) 2.56 (ii) 7.29 (iii) 51.84 (iv) 42.25 (v) 31.36

 [Watch Video Solution](#)

8. Find the number of digits in the square root of each of the following numbers (without any calculation). (i) 64 (ii) 144 (iii) 4489 (iv) 27225 (v) 390625

 [Watch Video Solution](#)

9. Find the square root of each of the following numbers by Division

method.(i) 2304

(ii) 4489

(iii) 3481

(iv) 529(v)

3249

(vi) 1369

(vii) 5776

(viii) 7921(ix) 576

Watch Video Solution

Exercise 6 1

1. Observe the following pattern and find the missing digits.

$$11^2 = 121$$

$$101^2 = 10201$$

$$1001^2 = 1002001$$

$$100001^2 = 1\dots .2\dots\dots 1$$

$$10000001^2 = \dots\dots\dots .$$

Watch Video Solution

2. Observe the following pattern and supply the missing numbers.

$$11^2 = 121101^2 = 1020110101^2 = 1020302011010101^2 = \dots\dots\dots 2 = 10203040$$

[Watch Video Solution](#)

3. Using the given pattern, find the missing numbers. $1^2 + 2^2 + 2^2 = 3^2$

$$2^2 + 3^2 + 6^2 = 7^2$$

$$3^2 + 4^2 + 12^2 = 13^2$$

$$4^2 + 5^2 + [_ ?]^2 = 21^2$$

$$5^2 + [_ ?]^2 + 30^2 = 32^2$$

$$6^2 + 7^2 + [_ ?]^2 = [_ ?]^2$$

[Watch Video Solution](#)

4. Without adding, find the sum.

(i) $1 + 3 + 5 + 7 + 9$

(ii) $1 + 3 + 5 + 7 + 9 + 11 + 13 + 15 + 17 + 19$

[Watch Video Solution](#)

5. What will be the unit digit of the squares of the following numbers?(i)

- 81 (ii) 272 (iii) 799 (iv) 3853 (v) 1234 (vi)
26387 (vii) 52698 (viii) 99880 (ix) 12796 (x) 55555

 [Watch Video Solution](#)

6. The following numbers are obviously not perfect squares. Give reason.

- (i) 1057 (ii) 23453 (iii) 7928 (iv) 222222 (v)
64000 (vi) 89722 (vii) 222000 (viii) 505050

 [Watch Video Solution](#)

7. The squares of which of the following would be odd numbers?

- (i) 431 (ii) 2826 (iii) 7779 (iv) 82004

 [Watch Video Solution](#)

8. (i) Express 49 as the sum of 7 odd numbers. (ii) Express 121 as the sum of 11 odd numbers.

[Watch Video Solution](#)

9. How many numbers lie between squares of the following numbers?

(i) 12 and 13

(ii) 25 and 26

(iii) 99 and 100

[Watch Video Solution](#)
