CIRCLES

Exercise 10 6

1. In any triangle ABC, if the angle bisector of $\angle A$ and perpendicular bisector of BC intersect,

prove that they intersect on the circumcircle of the triangle ABC

[Watch Video Solution](#)

2. ABCD is a parallelogram. The circle through A, B and C intersect CD (produced if necessary) at E. Prove that $AE = AD$.

[Watch Video Solution](#)

3. AC and BD are chords of a circle which bisect each other. Prove that (i) AC and BD are diameters, (ii) ABCD is a rectangle

[Watch Video Solution](#)

4. Let the vertex of an angle ABC be located outside a circle and let the sides of the angle intersect equal chords AD and CE with the circle. Prove that $\angle ABC$ is equal to half the

difference of the angles subtended by the chords AC and DE at the centre

[Watch Video Solution](#)

5. Prove that the circle drawn with any side of a rhombus as a diameter, passes through the point of intersection of its diagonals.

[Watch Video Solution](#)

6. Two chords AB and CD of lengths 5 cm and 11 cm respectively of a circle are parallel to each other and are on opposite sides of its centre. If the distance between AB and CD is 6 cm, find the radius of the circle.

[Watch Video Solution](#)

7. The lengths of two parallel chords of a circle are 6 cm and 8 cm. If the smaller chord is at

distance 4 cm from the centre, what is the distance of the other chord from the centre?

A. 5cm

B. 3cm

C. 2cm

D. 4cm

Answer: B

Watch Video Solution

8. Prove that the line of centres of two intersecting circles subtends equal angles at the two points of intersection

Watch Video Solution

9. Bisectors of angles A , B and C of a triangle ABC intersect its circumcircle at D , E and F respectively. Prove that the angles of the triangle DEF are $90^\circ - \frac{1}{2}A$, $90^\circ - \frac{1}{2}B$ and $90^\circ - \frac{1}{2}C$

[Watch Video Solution](#)

10. Two congruent circles intersect each other at points A and B. Through A any line segment PAQ is drawn so that P, Q lie on the two circles. Prove that $BP = BQ$.

[Watch Video Solution](#)

Exercise 10 1

1. Write True or False: Give reasons for your answers.

(i) Line segment joining the centre to any point on the circle is a radius of the circle.

(ii) A circle has only finite number of equal chords.

(iii) If a circle is divided into three equal arcs, each is a major arc.

(iv) A chord of a circle, which is twice as long as its radius, is a diameter of the circle.

(v) Sector is the region between the chord and its corresponding arc.

(vi) A circle is a plane figure.

[Watch Video Solution](#)

2. Fill in the blanks:(i) The centre of a circle lies in of the circle. (exterior/ interior)(ii) A point, whose distance from the centre of a circle is greater than its radius lies in of the circle. (exterior/ interior)(iii) The longest chord of a circle is a _____ of the circle.(iv) An arc is a _____ when its ends are the ends of a diameter.(v) Segment of a circle is the region between an arc and _____ of the circle.(vi) A circle divides the plane, on which it lies, in _____ parts.

Solved Examples

1. In Fig 10.33, ABCD is a cyclic quadrilateral in which AC and BD are its diagonals. If $\angle DBC = 55^\circ$ and $\angle BAC = 45^\circ$, find $\angle BCD$

[Watch Video Solution](#)

2. Two circles intersect at two points A and B. AD and AC are diameters to the two circles

(see Fig.10.34). Prove that B lies on the line segment DC.

[Watch Video Solution](#)

3. Prove that the quadrilateral formed (if possible) by the internal angle bisectors of any quadrilateral is cyclic

[Watch Video Solution](#)

4. If two intersecting chords of a circle make equal angles with the diameter passing through their point of intersection, prove that the chords are equal

[Watch Video Solution](#)

5. In Fig. 10.32, AB is a diameter of the circle, CD is a chord equal to the radius of the circle. AC and BD when extended intersect at a point E . Prove that $\angle AEB = 60^\circ$

[Watch Video Solution](#)

6. Given an arc of a circle, complete the circle.

[Watch Video Solution](#)

Exercise 10 3

1. Draw different pairs of circles. How many points does each pair have in common? What is the maximum number of common points?

[Watch Video Solution](#)

2. If two circles intersect at two points, prove that their centres lie on the perpendicular bisector of the common chord.

[Watch Video Solution](#)

3. Suppose you are given a circle. Give a construction to find its centre.

[Watch Video Solution](#)

Exercise 10 4

1. If a line intersects two concentric circles (circles with the same centre) with centre O at A, B, C and D. then.

A. $AB=BD$

B. $CD=AC$

C. $AB=CD$

D. None

Answer: C

[Watch Video Solution](#)

2. Two circles of radii 5cm and 3cm intersect at two points and the distance between their centers is 4cm :

Find the length of the common chord.

A. 5cm

B. 4cm

C. 3cm

D. 6cm

Answer: D

Watch Video Solution

3. If two equal chords of a circle intersect within the circle, prove that the segments

of one chord are equal to corresponding segments of the other chord.

[Watch Video Solution](#)

4. If two equal chords of a circle intersect within the circle, prove that the line joining the point of intersection to the center makes equal angles with the chords.

[Watch Video Solution](#)

5. Three girls Reshma, Salma and Mandip are playing a game by standing on a circle of radius 5m drawn in a park. Reshma throws a ball to Salma, Salma to Mandip, Mandip to Reshma. If the distance between Reshma and Salma and between Salma and Mandip is 6m each, what is the distance between Reshma and Mandip?

[Watch Video Solution](#)

6. A circular park of radius 20m is situated in a colony. Three boys Ankur, Syed and David are sitting at equal distance on its boundary each having a toy telephone in his hands to talk each other. Find the length of the string of each phone.

[Watch Video Solution](#)

Exercise 10 5

1. If diagonals of a cyclic quadrilateral are diameters of the circle through the vertices of the quadrilateral, prove that it is a rectangle

[Watch Video Solution](#)

2. ABCD is a cyclic quadrilateral whose diagonals intersect at a point E. If $\angle DBC = 70^\circ$, $\angle BAC$ is 30° , find $\angle BCD$.
Further, if $AB = BC$, find $\angle ECD$.

[Watch Video Solution](#)

3. In Fig. 10.39, A, B, C and D are four points on a circle. AC and BD intersect at a point E such that $\angle BEC = 130^\circ$ and $\angle ECD = 20^\circ$. Find $\angle BAC$.

Watch Video Solution

4. In Fig. 10.38, $\angle ABC = 69^\circ$, $\angle ACB = 31^\circ$, find $\angle BDC$

Fig. 10.38

Watch Video Solution

5. In Fig. 10.37, $\angle PQR = 100^\circ$, where P, Q and R are points on a circle with centre O. Find

$\angle OPR$.

[Watch Video Solution](#)

6. A chord of a circle is equal to the radius of the circle. Find the angle subtended by the chord at a point on the minor arc and also at a point on the major arc

A. 150°

B. 180°

C. 160°

D. 170°

Answer: A

Watch Video Solution

7. In Fig. 10.36, A, B and C are three points on a circle with centre O such that $\angle BOC = 30^\circ$ and $\angle AOB = 60^\circ$. If D is a point on the

circle other than the arc ABC , find $\angle ADC$.

Fig. 10.36

Watch Video Solution

8. ABC and ADC are two right triangles with common hypotenuse AC . Prove that $\angle CAD = \angle CBD$.

Watch Video Solution

9. If circles are drawn taking two sides of a triangle as diameters, prove that the point of intersection of these circles lie on the third side

Watch Video Solution

10. Two circles intersect at two points B and C. Through B, two line segments ABD and PBQ are drawn to intersect the circles at A, D and P, Q respectively. Prove that $\angle A = \angle Q$ and $\angle C = \angle P$.

Q respectively (see Fig. 10.40). Prove that

$$\angle ACP = \angle QCD.$$

[Watch Video Solution](#)

11. If the non-parallel sides of a trapezium are equal, prove that it is cyclic.

[Watch Video Solution](#)

Exercise 10 2

1. Recall that two circles are congruent if they have the same radii. Prove that equal chords of congruent circles subtend equal angles at their centres.

[Watch Video Solution](#)

2. Prove that if chords of congruent circles subtend equal angles at their centres, then the chords are equal.

[Watch Video Solution](#)
