## BOOKS - RD SHARMA MATHS (HINGLISH)

### MENSURATION-2

#### All Questions

1. Find the circumference of a circle of radius 14 cm.

[Watch Video Solution](#)

2. Find the circumference of a circle whose diameter is 42 cm.

[Watch Video Solution](#)

3. Find the diameter of a circle whose circumference is 15.7 cm.

[Watch Video Solution](#)

4. The ratio of the radii of two circles is 2:5.

What is the ratio of their circumference?

[Watch Video Solution](#)

5. A piece of wire in the form of a rectangle 8.9 cm long and 5.4 cm broad is reshaped and bent into the form of a circle. Find the radius of the circle.

[Watch Video Solution](#)

6. The diameter of a wheel of a cycle is 70 cm. It moves slowly along a road. How far will it go in 24 complete revolutions?

[Watch Video Solution](#)

7. The diameter of the wheel of a car is 77 cm. How many revolutions will it make to travel 121 km?

[Watch Video Solution](#)

**8.** There is a circular pond and foot-path runs along its boundary. A man walks around it, exactly once, keeping close to the edge. If his step is 66 cm long and he takes exactly 400 steps to go around the pond, what is the diameter of the pond?

**Watch Video Solution**

**9.** The circumference of a circle exceeds the diameter by 30 cm. Find the radius of the

circle.

[Watch Video Solution](#)

**10.** A race track is in the form of a ring whose inner circumference is 352 m, and the outer circumference is 396 m. Find the width of the track.

[Watch Video Solution](#)

**11.** The inner circumference of a circular track is 220m. The track is 7m wide everywhere. Calculate the cost of putting up a fence along the outer circle at the rate of Rs. 2 per metre.

$$\left( Use \pi \frac{22}{7} \right)$$

**Watch Video Solution**

**12.** Find the circumference of a circle whose radius is a) 14 cm (b) 10 m (c) 4 km

**Watch Video Solution**

**13.** Find the circumference of a circle whose diameter is (a) 7 cm (b) 4.2 cm (c) 11.2 km

**Watch Video Solution**

**14.** Find the radius of a circle whose circumference is (a) 52.8 cm (b) 42 cm (c) 6.6 km

**Watch Video Solution**

**15.** Find the diameter of a circle whose circumference is (a) 12.56 cm (b) 88 m (c) 11.0 km

**Watch Video Solution**

**16.** The ratio of the radii of two circles is 3:2.  
What is the ratio of their circumferences?

**Watch Video Solution**

**17.** A wire in the form of a rectangle 18.7 cm long and 14.3 cm wide is reshaped and bent into the form of a circle. Find the radius of the circle so formed.

**Watch Video Solution**

**18.** A piece of wire is bent in the shape of an equilateral triangle of each side 6.6 cm. It is re-bent to form a circular ring. What is the diameter of the ring?

[Watch Video Solution](#)

**19.** The diameter of a wheel of a car is 63 cm. Find the distance travelled by the car during the period, the wheel makes 1000 revolutions.

[Watch Video Solution](#)

**20.** The diameter of a wheel of a car is 98 cm. How many revolutions will it make to travel 6160 metres.

[Watch Video Solution](#)

21. The moon is about 384400 km from the earth and its path around the earth is nearly circular. Find the circumference of the path described by the moon in lunar month.

[Watch Video Solution](#)

22. How long will John take to make a round of a circular field of radius 21 m cycling at the speed of 8 km/hr?

[Watch Video Solution](#)

**23.** The hour and minute hands of a clock are 4 cm and 6 cm long respectively. Find the sum of the distances travelled by their tips in 2 days.

[Watch Video Solution](#)

**24.** A rhombus has the same perimeter as the circumference of a circle. If the side of the rhombus is 2.2 m. find the radius of the circle.

[Watch Video Solution](#)

**25.** A wire is looped in the form of a circle of radius 28 cm. It is re-bent into a square form. Determine the length of the side of the square.

**Watch Video Solution**

**26.** A bicycle wheel makes 5000 revolutions in moving 11 km. Find the diameter of the wheel.

**Watch Video Solution**

**27.** A boy is cycling such that the wheels of the cycle are making 140 revolutions per minute. If the diameter of the wheel is 60 cm, calculate the speed per hour with which the boy is cycling.

**Watch Video Solution**

**28.** The diameter of the driving wheel of a bus is 140 cm. How many revolutions per minute

must the wheel make in order to keep a speed of 66 km per hour?

[Watch Video Solution](#)

**29.** A water sprinkler in a lawn sprays water as far as 7 m in all directions. Find the length of the outer edge of wet grass.

[Watch Video Solution](#)

**30.** A well of diameter 150 cm has a stone parapet around it. If the length of the outer edge of the parapet is 660 cm, then find the width of the parapet.

**Watch Video Solution**

**31.** An ox in a kolhu (an oil processing apparatus) is tethered to a rope 3 m long. How much distance does it cover in 14 rounds?

**Watch Video Solution**

**32.** Find the area of a circle of radius 4.2 cm

**Watch Video Solution**

**33.** Find the area of a circle of diameter 7 cm.

**Watch Video Solution**

**34.** The circumference of a circle is 44 cm. Find its area.

[Watch Video Solution](#)

**35.** The area of a circle is  $616 \text{ cm}^2$ . Find the radius of the circle.

[Watch Video Solution](#)

**36.** A copper wire, when bent in the form of a square, encloses an area of  $484 \text{ cm}^2$ . If the same wire is bent in the form of a circle, find the area enclosed by it. (Use  $\pi = \frac{22}{7}$ ).

[Watch Video Solution](#)

**37.** A circular grassy plot of land, 42 m in diameter, has a path 3.5 m wide running round it on the outside. Find the cost of gravelling the path at Rs 4 per square metre.

**Watch Video Solution**

**38.** A paper is in the form of a rectangle  $ABCD$  in which  $AB = 20\text{ cm}$  and  $BC = 14\text{ cm}$ . A semicircular portion with  $BC$

as diameter is cut off. Find the area of the remaining part.

[Watch Video Solution](#)

**39.** Find the area of the shaded region given in Fig. 12.72.

[Watch Video Solution](#)

**40.** The circumferences of two circles are in the ratio 2:3. Find the ratio of their areas.

[Watch Video Solution](#)

**41.** The areas of two circles are in the ratio 16:25. Find the ratio of their circumferences.

[Watch Video Solution](#)

**42.** A square park has each side of 100 m. At each corner of the park, there is a flower bed in the form of a quadrant of radius 14 m as shown in Fig. 15.37. Find the area of the

remaining part of the park (Use  $\pi = 22/7$ ).

(FIGURE)

[Watch Video Solution](#)

**43.** Four equal circles are described about the four corners of a square so that each touches two of the others as shown in Fig. 15.38. Find the area of the shaded region, each side of the square measuring 14 cm. (FIGURE)

[Watch Video Solution](#)

**44.** A horse is placed for grazing inside a rectangular field 70 m by 52 m and is tethered to one corner by a rope 21 m long. On how much area can it graze?

**Watch Video Solution**

**45.**  $PQRS$  is a diameter of a circle of radius 6 cm. The lengths  $PQ$ ,  $QR$  and  $RS$  are equal. Semi-circles are drawn on  $PQ$  and  $QS$  as diameters as shown in Fig.17. Find the area of the shaded region.

[Watch Video Solution](#)

**46.** Find the area of a circle whose radius is

(a) 7 cm (b) 2.1 m (c) 7 km

[Watch Video Solution](#)

**47.** Find the area of a circle whose diameter is

(a) 8.4 cm (b) 5.6 m (c) 7 km

[Watch Video Solution](#)

**48.** The area of a circle is  $154 \text{ cm}^2$ . Find the radius of the circle.

**Watch Video Solution**

**49.** Find the radius of a circle, if its area is (a)  $4\pi \text{ cm}^2$  (b)  $55.44 \text{ m}^2$  (c)  $1.54 \text{ km}^2$

**Watch Video Solution**

**50.** The circumference of a circle is 3.14 m, find its area.

**Watch Video Solution**

**51.** If the area of a circle is  $50.24 m^2$ , find its circumference.

**Watch Video Solution**

52. A horse is tied to a pole with 28 m long string. Find the area where the horse can graze. (Take  $\pi = \frac{22}{7}$ ).

[Watch Video Solution](#)

53. A steel wire when bent in the form of a square encloses an area of  $121 \text{ cm}^2$ . If the same wire is bent in the form of a circle, find the area of the circle.

[Watch Video Solution](#)

**54.** A road which is 7 m wide surrounds a circular park whose circumference is 352 m. Find the area of road.

**Watch Video Solution**

**55.** Prove that the area of a circular path of uniform width  $h$  surrounding a circular region of radius  $r$  is  $\pi h(2r + h)$ .

**Watch Video Solution**

**56.** The perimeter of a circle is  $4\pi r$  cm. What is the area of the circle?

**Watch Video Solution**

**57.** A wire of 5024 m length is in the form of a square. It is cut and made a circle. Find the ratio of the area of the square to that of the circle.

**Watch Video Solution**

**58.** The radius of a circle is 14 cm. Find the radius of the circle whose area is double of the area of the given circle.

**Watch Video Solution**

**59.** The radius of one circular field is 20 m and that of another is 48 m. Find the radius of the third circular field whose area is equal to the sum of the areas of two fields.

**Watch Video Solution**

**60.** The radius of one circular field is 5 m and that of the other is 13 m. Find the radius of the circular field whose area is the difference of the areas of first and second field.

**Watch Video Solution**

**61.** Two circles are drawn inside a big circle with diameters  $\frac{2}{3}rd$  and  $\frac{1}{3}rd$  of the diameter of the big circle as shown in Fig. Find the area

of the shaded portion, if the length of the diameter of the big circle is 18 cm.

[Watch Video Solution](#)

**62.** In Fig. 19, the radius of quarter circular plot taken is 2 m and radius of the flower bed is 2 m. Find the area of the remaining field.

[Watch Video Solution](#)

**63.** Four equal circles, each of radius 5cm, touch each other as shown in Figure. Find the area included between them.

[Watch Video Solution](#)

**64.** The area of circle is 100 times the area of another circle. What is the ratio of their circumferences?

[Watch Video Solution](#)

**65.** The ratio of the perimeter (circumference)

and diameter of a circle is  $\pi$  (b)  $2\pi$  (c)  $\frac{\pi}{2}$  (d)  $\frac{\pi}{4}$

**Watch Video Solution**

**66.** The ratio of the area and circumference of

a circle of diameter  $d$  is (a)  $d$  (b)  $\frac{d}{2}$  (c)  $\frac{d}{4}$  (d)  $2d$

**Watch Video Solution**

**67.** The cost of fencing a circular garden of radius 21 m at Rs 10 per metre is (a)Rs 1320 (b) Rs 132 (b)Rs 1200 (d) Rs 660

[Watch Video Solution](#)

**68.** If the diameter of a circle is equal to the diagonal of a square, then the ratio of their areas is (a)7: 1 (b) 1: 1 (c)11: 7 (d) 22: 7

[Watch Video Solution](#)

**69.** A circle is inscribed in a square of side 14 m. The ratio of the area of the circle and that of the square is (a)  $\pi : 3$  (b)  $\pi : 4$  (c)  $\pi : 2$  (d)  $\pi : 1$

**Watch Video Solution**

**70.** How many times should a wheel of radius 7 m rotate to go around the perimeter of a rectangular field of length 60 m and breadth 50 m? (a) 3 (b) 4

(c) 5

(d) 6

[Watch Video Solution](#)

**71.** The minute hand of a clock is 14 cm long. How far does the tip of the minute hand move in 60 minute? (a) 22 cm (b) 44 cm (c) 33 cm (d) 88 cm

[Watch Video Solution](#)

**72.** The cost of fencing a semi-circular garden of radius 14 m at Rs 10 per metre is (a) Rs

1080

(b) Rs 1020 (c)Rs

700

(d) Rs 720

[Watch Video Solution](#)

**73.** The area of a square is equal to the area of a circle. The ratio between the side of the square and the radius of the circle is (a)  $\sqrt{\pi} : 1$   
(b)  $1 : \sqrt{\pi}$  (c)  $1 : \pi$  (d)  $\pi : 1$

[Watch Video Solution](#)

74. If  $A$  is the area and  $C$  is the circumference of a circle, then its radius is (a)  $\frac{A}{C}$  (b)  $\frac{2A}{C}$  (c)  $\frac{3A}{C}$  (d)  $\frac{4A}{C}$

[Watch Video Solution](#)

75. The area of a circle of circumference  $C$  is (a)  $\frac{C^2}{4\pi}$  (b)  $\frac{C^2}{2\pi}$  (c)  $\frac{C^2}{\pi}$  (d)  $\frac{4C^2}{\pi}$

[Watch Video Solution](#)

76. The circumference of a circle is 44 cm. Its area is (a)  $77 \text{ cm}^2$  (b)  $154 \text{ cm}^2$  (c)  $208 \text{ cm}^2$  (d)  $144 \text{ cm}^2$

Watch Video Solution

77. Each side of an equilateral triangle is equal to the radius of a circle whose area is  $154 \text{ cm}^2$ .

The area of the triangle is (a)  $\frac{7\sqrt{3}}{4} \text{ cm}^2$  (b)  $\frac{49\sqrt{3}}{2} \text{ cm}^2$  (c)  $\frac{49\sqrt{3}}{4} \text{ cm}^2$  (d)  $\frac{7\sqrt{3}}{2} \text{ cm}^2$

Watch Video Solution

**78.** The area of a circle is  $9\pi \text{ cm}^2$ . Its circumference is (a)  $6\pi \text{ cm}$  (b)  $36\pi \text{ cm}$  (c)  $9\pi \text{ cm}$  (d)  $36\pi^2 \text{ cm}$

**Watch Video Solution**

**79.** The area of a circle is increased by  $22 \text{ cm}^2$  when its radius is increased by 1 cm. The original radius of the circle is (a) 6 cm (b) 3 cm (c) 4 cm (d) 3.5 cm

**Watch Video Solution**

**80.** The radii of two circles are in the ratio 2: 3.

The ratio of their areas is (a) 2:3 (b) 4:9 (c) 3:2

(d) 9:4

**Watch Video Solution**

**81.** The areas of two circles are in the ratio

49: 36. The ratio of their circumference is (a)

7: 6 (b) 6: 7 (c) 3: 2 (d) 2: 3

**Watch Video Solution**

**82.** The circumferences of two circles are in the ratio 3 : 4. The ratio of their areas is (a) 3 : 4 (b) 4 : 3 (c) 9 : 16 (d) 16 : 9

[Watch Video Solution](#)

**83.** The difference between the circumference and radius of a circle is 37 cm. The area of the circle is (a)  $111 \text{ cm}^2$  (b)  $148 \text{ cm}^2$  (c)  $154 \text{ cm}^2$  (d)  $285 \text{ cm}^2$

[Watch Video Solution](#)
