MENSURATION-III (SURFACE AREA AND VOLUME OF A RIGHT CIRCULAR CYLINDER)

Others

1. Find the curved surface area and total surface area of a right circular cylinder whose height is 15cm and the radius of the base is

7cm. $\left(Take \pi = \frac{22}{7} \right)$

Watch Video Solution

2. The diameter of the base of a right circular cylinder is 42cm and its height is 10cm. Find the area of the curved surfaces and total surface area.

[Watch Video Solution](#)

3. A closed cylindrical tank of radius 1.5m and height 3m is made from a sheet of metal. How much sheet of metal is required?

[Watch Video Solution](#)

4. The curved surface area of a right circular cylinder of height 14 *cm* is 88 cm^2 . Find the diameter of the base of the cylinder.

[Watch Video Solution](#)

5. Savitri had *to* make a model of a cylindrical Kaleidoscope for her science project. She wanted to use chart paper to make the curved surface of the Kaleidoscope. What should be the area of chart paper required by her, if she wanted to make a Kaleidoscope of length 25 cm with a 3.5 cm radius?

Watch Video Solution

6. The ratio between the curved surface area and the total surface area of a right circular cylinder is 1:2. Find the ratio between the height and radius of the cylinder.

[Watch Video Solution](#)

7. The radii of two right circular cylinders are in the ratio 2:3 and their heights are in the ratio 5:4. Calculate the ratio of their curved surface areas.

[Watch Video Solution](#)

8. The radius of the base of a cylindrical water-drum open at the top at the top is 35 cm and height 1.3m. Find the inner surface area of the water-drum.

[Watch Video Solution](#)

9. In a temple there are 25 cylindrical pillars. The radius of each pillar is 28cm and height 4m. Find the total cost of painting the curved

surface area of pillars at the rate of Rs.
 8perm^2

[Watch Video Solution](#)

10. A road roller takes 750 complete revolutions to more once over to level a road. Find the area of the road if the diameter of a road under roller is 91 cm and length is 1.25 m.

[Watch Video Solution](#)

11. The diameter of a roller 120cm long is 84cm. If it takes 500 complete revolutions to level a playground, determine the cost of levelling it at the rate of 30 paise per square metre.

Watch Video Solution

12. An iron pipe 20 cm long has exterior diameter equal to 25cm. If the thickness of the pipe is 1cm, find the whole surface of the pipe.

Watch Video Solution

13. A rectangular sheet of paper, $44\text{cm} \times 20\text{cm}$, is rolled along its length of form a cylinder. Find the volume of the cylinder so formed.

Watch Video Solution

14. A company packages its milk powder in cylindrical container whose base has a diameter of 14 cm and height 20 cm. Company places a label around the surface of the

container (as shown in the figure). If the label is placed 2 cm from top and bottom,

[Watch Video Solution](#)

15. Find the curved surface area and total surface area of a cylinder, the diameter of whose base is 7cm and height is 60cm.

[Watch Video Solution](#)

16. The curved surface area of a cylindrical road is 132cm^2 . Find its length if the radius is 0.35cm .

Watch Video Solution

17. The area of the base of a right circular cylinder is 616cm^2 and its height is 2.5cm . Find the curved surface area of the cylinder.

Watch Video Solution

18. The circumference of the base of a cylinder is 88cm and its height is 15cm. Find its curved surface area and total surface area.

Watch Video Solution

19. A rectangular strip $25\text{cm} \times 7\text{cm}$ is rotated about the longer side. Find the total surface area of the solid thus generated.

Watch Video Solution

20. A rectangular sheet of paper, $44\text{cm} \times 20\text{cm}$, is rolled along its length of form a cylinder. Find the volume of the cylinder so formed.

[Watch Video Solution](#)

21. The radii of two cylinders are in the ratio 2:3 and their heights are in the ratio 5:3. Calculate the ratio of their curved surface areas.

[Watch Video Solution](#)

22. The ratio between the curved surface area and the total surface area of a right circular cylinder is 1:2. Find the ratio between the height and radius of the cylinder.

Watch Video Solution

23. The curved surface area of a cylinder is 1320cm^2 and its base had diameter 21cm. Find the height and the volume of the cylinder.

Watch Video Solution

24. The height of a right circular cylinder is 10.5cm. If three times the sum of the areas of its two circular faces is twice the area of the curved surface area. Find the radius of its base.

[Watch Video Solution](#)

25. Find the cost of plastering the inner surface of a well at Rs. 9.50 *per m²*, if it is

21m deep and diameter of its top is 6m.

[Watch Video Solution](#)

26. A cylindrical vessel open at the top has diameter 20cm and height 14cm. Find the cost of tin-plating it on the inside at the rate of 50 paise per hundred square centimeter.

[Watch Video Solution](#)

27. The inner diameter of a circular well is 3.5m. It is 10m deep. Find the cost of plastering its inner curved surface at Rs. 4 per square meter.

Watch Video Solution

28. The diameter of a roller is 84 cm and its length is 120 cm. It takes 500 complete revolutions to move once over to level a playground. Find the area of the playground in m^2 .

[Watch Video Solution](#)

29. Twenty cylindrical pillars of the Parliament House are to be cleaned. If the diameter of each pillar is 0.50m and height is 4m. What will be the cost of cleaning them at the rate of Rs. 2.50 per square meter?

[Watch Video Solution](#)

30. The total surface area of a hollow cylinder which is open from both sides is 4620 sq. cm,

area of base ring is 115.5 sq. cm and height 7 cm. Find the thickness of the cylinder.

[Watch Video Solution](#)

31. The sum of the radius of the base and height of a solid cylinder is 37m. If the total surface area of the solid cylinder is 1628 cm^2 . Find the volume of the cylinder.

[Watch Video Solution](#)

32. Find the ratio between the total surface area of a cylinder to its curved surface area, given that its height and radius are 7.5 cm and 3.5 cm.

Watch Video Solution

33. A cylindrical vessel, without lid, has to be tin-coated on its both sides. If the radius of the base is 70cm and its height is 1.4 m,

calculate the cost of tin-coating at the rate of
Rs. 3.50 per 1000cm^2 .

[Watch Video Solution](#)

34. Find the volume of a right circular cylinder,
if the radius (r) of its base and height (h) are
7cm and 15cm respectively.

[Watch Video Solution](#)

35. The area of the base of a right circular cylinder is 154 cm^2 and its height is 15cm. Find the volume of the cylinder.

Watch Video Solution

36. The circumference of the base of a cylinder is 132 cm and its height 25cm. Find the volume of the cylinder.

Watch Video Solution

37. The radii of two right circular cylinder are in the ratio 2:3 and their heights are in the ratio 5:4. Calculate the ratio of their curved surface areas and also the ratio of their volumes.

Watch Video Solution

38. Two cylinder cans have bases of the same size. The diameter of each is 14cm. One of the canes is 10cm high and the other is 20cm high. Find the ratio of their volumes.

[Watch Video Solution](#)

39. A rectangular sheet of paper, $44\text{cm} \times 20\text{cm}$, is rolled along its length of form a cylinder. Find the volume of the cylinder so formed.

[Watch Video Solution](#)

40. A rectangular paper of width 14 cm is rolled along its width and a cylinder of radius

20 cm is formed. Find the volume of the cylinder (Fig 11.45)? (Take

[Watch Video Solution](#)

41. If the radius of the base of a right circular cylinder is halved, keeping the height same, what is the ratio of the volume of the reduce cylinder to that of the original.

[Watch Video Solution](#)

42. The radius and height of a cylinder are in the ratio 5 : 7 and its volume is 550cm^3 . Find its radius. $\left(\text{Use } \pi = \frac{22}{7}\right)$

Watch Video Solution

43. The volume of a solid cylinder is $448\pi\text{cm}^3$ and height 7cm. Find its lateral surface area and total surface area.

Watch Video Solution

44. The thickness of a hollow wooden cylinder is 2cm. It is 35cm long and its inner radius is 12cm. Find the volume of the wood required to make the cylinder, assuming it is open at either end.

Watch Video Solution

45. The thickness of a metallic tube is 1cm and the inner diameter of the tube is 12cm. Find the mass of 1m long tube, if the density of the metal be $7.8gm / cm^3$

[Watch Video Solution](#)

46. A cylindrical road roller made of iron is 1m wide. Its inner diameter is 54cm and thickness of the iron sheet rolled into the road roller is 9cm. Find the weight of the roller if 1 c.c. of iron weight 8 gm.

[Watch Video Solution](#)

47. A well with 10 m diameter is dug 14 m deep. Earth taken out of it is spread all around to form an embankment of width 5 m. Find the height of the embankment.

Watch Video Solution

48. How many cubic metres of earth must be dug out to sink a well 22.5m deep and of diameter 7m? Also, find the cost of plastering

the inner curved surface at Rs. 3 per square metre.

[Watch Video Solution](#)

49. A glass cylinder with diameter 20 cm has water to a height of 9 cm. A metal cube of 8 cm edge is immersed in it completely. Calculate the height by which water will rise in the cylinder. (*Take $\pi = 3.142$*)

[Watch Video Solution](#)

50. Into a circular drum of radius 4.2 m and height 3.5m, how many full bags of wheat can be emptied if the space required for wheat in each bag is 2.1 cubic m. ($Take\pi = 3.14$)

[Watch Video Solution](#)

51. The volume of metallic cylindrical pipe is $748cm^3$. Its length is $14cm$ and its external radius is $9cm$. Find its thickness.

[Watch Video Solution](#)

52. The rain water that falls on a roof of area 6160 m^2 is collected in a cylindrical tank of diameter 14m and height 10m and thus the tank is completely filled. Find the height of rain water on the roof.

Watch Video Solution

53. 2.2 cubic dm of brass is to be drawn into a cylindrical wire 0.50 cm in diameter. Find the length of the wire.

[Watch Video Solution](#)

54. A solid iron rectangular block of dimensions 4.4 m , 2.6 m and 1 m is cast into a hollow cylindrical pipe of internal radius 30 cm and thickness 5 cm. Find the length of the pipe.

[Watch Video Solution](#)

55. A solid cylinder has total surface area of 462 square cm. Its curved surface area is one-

third of its total surface area. Find the volume of the cylinder. (Take $\pi = 22/7$)

[Watch Video Solution](#)

56. A hollow cylindrical pipe is 21 dm long. Its outer and inner diameters are 10 cm and 6 cm respectively. Find the volume of the copper used in making the pipe.

[Watch Video Solution](#)

57. The difference between outside and inside surfaces of a cylindrical metallic pipe 14cm long is 44 cm^2 . If the pipe is made 99 cu centimetres of metal, find the outer and inner radii of the pipe.

Watch Video Solution

58. An iron pipe 20 cm long has exterior diameter equal to 25cm. If the thickness of the pipe is 1cm, find the whole surface of the pipe.

[Watch Video Solution](#)

59. Find the weight of a lead pipe 3.5m long, if the external diameter of the pipe is 2.4cm and the thickness of the lead is 2mm and 1 cubic cm of lead weighs 11 gm.

[Watch Video Solution](#)

60. A barrel of a fountain pen, cylindrical in shape, is 7 cm long and 5mm in diameter. A full barrel of ink in the pen will be used up when

writing 310 words on the average, if a bottle of ink containing one-fifth of a litre then the number of words that can be formed is

[Watch Video Solution](#)

61. The cost of painting the total outside surface of a closed cylindrical oil tank at 60 paise per sq. dm is Rs. 237.60. The height of the tank is 6 times the radius of the base of the tank. Find its volume correct to two decimal places.

[Watch Video Solution](#)

62. A lead pencil consists of a cylinder of wood with a solid cylinder of graphite filled into it. The diameter of pencil is 7mm, the diameter of graphite is 1 mm and the length of the pencil is 10cm. Calculate the weight of the whole pencil, if the specific gravity of the wood is $0.7(gm)/(cm)^3$ and that of graphite is $2.1(gm)/(cm)^3$

[Watch Video Solution](#)

63. Find the volume of a cylinder whose

(i) $r = 3.5\text{cm}$, $h = 40\text{cm}$

(ii) $r = 2.8\text{cm}$, $h = 15\text{cm}$

Watch Video Solution

64. Find the volume of a cylinder, if the diameter (d) of its base and its altitude (h) are:

(i) $d = 21\text{cm}$, $h = 10\text{cm}$

(ii) $d = 7\text{m}$, $h = 25\text{m}$

[Watch Video Solution](#)

65. The area of the base of a right circular cylinder is 616cm^2 and its height is 25cm. Find the volume of the cylinder.

[Watch Video Solution](#)

66. The circumference of the base of a cylinder is 88cm and its height is 15cm. Find the volume of the cylinder.

[Watch Video Solution](#)

67. A hollow cylindrical pipe is 21 dm long. Its outer and inner diameters are 10 cm and 6 cm respectively. Find the volume of the copper used in making the pipe.

Watch Video Solution

68. Find the (i) curved surface area (ii) total surface area and (iii) volume of a right circular

cylinder whose height is 15cm and the radius of the base is 7cm.

[Watch Video Solution](#)

69. The diameter of the base of a right circular cylinder is 42cm and its height is 10cm. Find the volume of the cylinder.

[Watch Video Solution](#)

70. Find the volume of a cylinder, the diameter of whose base is 7cm and height being 60cm. Also, find the capacity of the cylinder in litres.

Watch Video Solution

71. A rectangular strip $25\text{cm} \times 7\text{cm}$ is rotated about the longer side. Find the total surface area of the solid thus generated.

Watch Video Solution

72. A rectangular sheet of paper, $44\text{cm} \times 20\text{cm}$, is rolled along its length of form a cylinder. Find the volume of the cylinder so formed.

[Watch Video Solution](#)

73. The volume and the curved surface area of a cylinder are 1650cm^3 and 660cm^2 respectively. Find the radius and height of the cylinder.

[Watch Video Solution](#)

74. The radii of two cylinders are in the ratio 2:3 and their heights are in the ratio 5:3. Calculate the ratio of their volumes and the ratio of their curved surfaces.

Watch Video Solution

75. The ration between the curved surface area and the total surface area of a right circular

cylinder is 1:2. Find the volume of the cylinder, if its total surface area is 616 cm^2 .

[Watch Video Solution](#)

76. The curved surface area of a cylinder is 1320 cm^2 and its base had diameter 21cm. Find the height and the volume of the cylinder.

[Watch Video Solution](#)

77. The ratio between the radius of the base and the height of a cylinder is $2:3$, find the total surface area of the cylinder, if its volume is 1617cm^3

[Watch Video Solution](#)

78. The curved surface area of a cylindrical pillar is 264 m^2 and its volume is 924 m^3 . Find the diameter and the height of the pillar.

[Watch Video Solution](#)

79. Two circular cylinders of equal volumes have their heights in the ratio 1:2. Find the ratio of their radii.

Watch Video Solution

80. Two circular cylinders of equal volumes have their heights in the ratio 1:2. Find the ratio of their radii.

Watch Video Solution

81. The height of a right circular cylinder is 10.5 m. Three times the sum of the area of its two circular faces is twice the area of the curved surface. Find the volume of the cylinder.

Watch Video Solution

82. How many cubic metres of earth must be dug-out to sink a well 21m deep and 6m diameter?

Watch Video Solution

83. The trunk of a tree is cylindrical and its circumference is 176cm. If the length of the trunk is 3m. Find the volume of the timber that can be obtained from the trunk.

Watch Video Solution

84. A 20 m deep well with diameter 7 m is dug and the earth from digging is evenly spread out to form a platform 22 m by 14 m. Find the height of the platform.

[Watch Video Solution](#)

85. A well with 14m diameter is dug 8m deep. The earth taken out of it has been evenly spread all around it to a width of 21m to form an embankment. Find the height of the embankment.

[Watch Video Solution](#)

86. A cylindrical container with diameter of base 56cm contains sufficient water to submerge a rectangular solid of iron with dimensions $32\text{cm} \times 22\text{cm} \times 14\text{cm}$. Find the rise in the level of the water when the solid is completely submerged.

Watch Video Solution

87. A rectangular sheet of paper $30\text{cm} \times 18\text{cm}$ can be transformed into the curved surface of

a right circular cylinder in two ways i.e., either by rolling the paper along its length or by rolling it along its breadth. Find the ratio of the volumes of the two cylinders thus formed.

[Watch Video Solution](#)

88. The rain which falls on a roof 18m long and 16.5m wide is allowed to be stored in a cylindrical tank 8m in diameter. If it rains 10cm on a day, what is the rise of water level in the tank due to it?

[Watch Video Solution](#)

89. A piece of ductile metal is in the form of a cylinder of diameter 1cm and length 11cm . It is drawn into a wire of diameter 1mm . What will be the length of the wire so formed?

[Watch Video Solution](#)

90. Find the length of 13.2 kg of copper wire of diameter 4mm , when 1 cubic cm of copper weighs 8.4 gm .

[Watch Video Solution](#)

91. 2.2 cubic dm of brass is to be drawn into a cylindrical wire 0.25 cm in diameter. Find the length of the wire.

[Watch Video Solution](#)

92. The difference between inside and outside surfaces of a cylindrical tube 14cm long is

88sq. cm. If the volume of the tube is 176 cubic cm, find the inner and outer radii of the tube.

[Watch Video Solution](#)

93. Water flows out through a circular pipe whose internal diameter is 2cm, at the rate of 6 metres per second into a cylindrical tank. The water is collected in a cylindrical vessel radius of whose base is 60cm. Find the rise in the level of water in 30 minutes?

[Watch Video Solution](#)

94. A cylindrical tube, open at both ends, is made of metal. The internal diameter of the tube is 10.4cm and its length is 25cm. The thickness of the metal is 8mm everywhere. Calculate the volume of the metal.

Watch Video Solution

95. From a tap of inner radius 0.75cm, water flows at the rate of 7m per second. Find the

volume in liters of water delivered by the pipe
in one hour.

[Watch Video Solution](#)

96. A cylindrical water tank of diameter 1.4m and height 2.1m is being fed by a pipe of diameter 3.5cm through which water flows at the rate of 2 meter per second. In how much time the tank will be filled?

[Watch Video Solution](#)

97. A rectangular sheet of paper $30\text{cm} \times 18\text{cm}$ can be transformed into the curved surface of a right circular cylinder in two ways i.e., either by rolling the paper along its length or by rolling it along its breadth. Find the ratio of the volumes of the two cylinders thus formed.

Watch Video Solution

98. How many liters of water flow out of a pipe having an area of cross-section of 5cm^2 in one

minute, if the speed of water in the pipe is $30\text{cm} / \text{sec}$?

[Watch Video Solution](#)

99. A solid cylinder has a total surface area of 231cm^2 . Its curved surface area is $\frac{2}{3}$ of the total surface area. Find the volume of the cylinder.

[Watch Video Solution](#)

100. Find the cost of sinking a tubewell 280m deep, having diameter 3m at the rate of Rs. 3.60 per cubic metre. Find also the cost of cementing its inner curved surface at Rs. 2.50 per square meter.

Watch Video Solution

101. Find the length of 13.2 kg of copper wire of diameter 4mm, when 1 cubic cm of copper weights 8.4 gm.

[Watch Video Solution](#)

102. 2.2 cubic dm of brass is to be drawn into a cylindrical wire 0.25 cm in diameter. Find the length of the wire.

[Watch Video Solution](#)

103. A hollow garden roller, 63cm wide with a girth of 440 cm, is made of 4 cm thick iron. Find the volume of the iron.

[Watch Video Solution](#)

104. What length of a solid cylinder 2 cm in diameter must be taken to recast into a hollow cylinder of length 16 cm, external diameter 20 cm and thickness 2.5 mm?

Watch Video Solution
