

BIOLOGY

BOOKS - KVPY PREVIOUS YEAR

KVPY 2021

Part I Chemistry

1. Which ONE of the following is NOT a function of the small intestine ?

A. Absorption of end products of digestion

B. Digestion of proteins

C. Digestion of lipids

D. Acidification of ingested food

Answer:

Watch Video Solution

2. Insulin stimulates the conversion of glucose

to

A. fructose

B. glycogen

C. sucrose

D. starch

Answer:

Watch Video Solution

3. Which ONE of the following statements about ecosystem energetics is INCORRECT ?

A. The metabolic requirements of poikilotherms are higher than that of homeotherms.

B. Autotrophs form the base of the food chain in natural ecosystems.

C. In terrestrial ecosystems, most of the primary production is consumed by detritivores and not herbivores.

D. Approximately 10% energy of one trophic level is transferred to the next

level.

Answer:

Watch Video Solution

4. Proton motive force is created by pumping protons across the

- A. trans - Golgi network
- B. endoplasmic reticulum
- C. mitochondrial membrane

D. early endosomal membrane

Answer:

Watch Video Solution

5. Which ONE of the following Mendelian diseases is an example of X-linked recessive disorder ?

A. Haemophilia

B. Phenylketonuria

C. Sickle cell anaemia

D. Beta - thalassemia

Answer:

Watch Video Solution

6. Which ONE of the following pairs gives rise to fruit and seed, respectively, in a typical angiosperm plant ?

A. Ovule and ovary

B. Ovary and pollen

C. Pollen and anther

D. Ovary and ovule

Answer:

Watch Video Solution

7. The concept of vaccination arose from Edward Jenner's observation that

A. injecting inactivated anthrax spores in sheep protected them from anthrax.

B. injecting humans with tuberculosis - infected lung extracts protected them from tuberculosis.

C. milk - maids previously infected with cowpox did not contract small pox.

D. injecting inactivated rabies virus in humans protected them from rabies.

Answer:

Watch Video Solution

8. A plant with genotype AABBCc is crossed with another plant aabbcc genotype. How many different genotypes of pollens is possible in an F1 plant if these three loci follow independent assortment ?

A. 8

B. 4

C. 2

D. 1

Answer:

Watch Video Solution

9. Which ONE of the following sequences of events CORRECTLY represents mitosis ?

A. Metaphase, telophase, prophase,
anaphase

B. Anaphase, prophase, metaphase,
telophase

C. Prophase, anaphase, metaphase,
telophase

D. Prophase, metaphase, anaphase,
telophase

Answer:

Watch Video Solution

10. The amount of air that is left behind in lungs after expiratory reserve volume has been exhaled is

A. inspiratory reserve volume.

B. tidal volume.

C. residual volume.

D. vital capacity.

Answer:

Watch Video Solution

11. Match the species in Column I with their respective feature of body organisation in

Column II

Column I

Column II

P. Mollusca

i. Pseudocoelom

Q. Annelida

ii. Radula

R. Nematoda

iii. Radial symmetry

S. Echinodermata

iv. Segmentation

Choose the CORRECT combination.

A. P-ii, Q-i, R-iv, S-iii

B. P-ii, Q-iv, R-i, S-iii

C. P-iii, Q-iv, R-i, S-ii

D. P-iv, Q-iii, R-ii, S-i

Answer:

Watch Video Solution

12. Who among the following scientists proposed the theory natural selection independently of Charles Drawin ?

A. Alfred Russel Wallace

B. Carl Linnaeus

C. Georges Cuvier

D. Jeans - Baptist Lamarck

Answer:

Watch Video Solution

13. The maximum concentration of harmful chemicals is expected to be found in organisms

- A. at the bottom of a food chain.
- B. at the middle of a food chain.
- C. at the top of a food chain.
- D. at any level in a food chain

Answer:

Watch Video Solution

14. The genome of SARS - Co V2 is composed of

- A. double stranded DNA.
- B. double stranded RNA.
- C. single stranded DNA.
- D. single stranded RNA.

Answer:

Watch Video Solution

Part II Biology

1. Anthropocene refers to the geological age during which

A. the earliest hominids radiated from their ancestral forms.

B. human activity significantly influenced climate the environment

C. arthropod radiation was highest

D. arthropod radiation significantly

influenced climate and environment .

Answer:

Watch Video Solution

2. Match the vitamins listed in Column I with the diseases caused due to their deficiency in Column II.

Column I

P. Vitamin A

Q. Vitamin B₂

R. Vitamin D

S. Vitamin B₁₂**Column II**

i. Pellegra

ii. Rickets

iii. Ariboflavinosis

iv. Night blindness

v. Pernicious anaemia

Choose the CORRECT combination

A. P-iv, Q-ii , R-iii , S-iv

B. P-I , Q-ii , R-iv , S-iii

C. P-iv , Q-iii, R-ii , S-v

D. P-iii , Q-iv , R-v, S-i

Answer:

Watch Video Solution

3. An adult mammal with 50 kg body weight has the following functional parameters of its lungs.

Inspiratory reserve volume = 40 ml/kg body weight

Expiratory reserve volume = 15 ml/kg body weight

Vital capacity = 60 ml/kg body weight

Breathing rate = 209/min

The volume (in litre) of air that its lungs displaces in 24 hours is

A. 72000

B. 7200

C. 3600

D. 1200

Answer:

Watch Video Solution

4. In a breed of dog, long-haired phenotype is recessive to short-hair. In a litter , one pup is short-haired and its sibling is long-haired.

Consider the following possible phenotypes of the parents.

i. both parents are short-haired

ii. Both parents are long-haired

iii. One parent is short-haired , and one is long-haired

Choose the CORRECT combination of the possible parental phenotype.

A. I only

B. ii only

C. iii only

D. I or iii

Answer:

Watch Video Solution

5. Which ONE of the following is the most likely ratio of blood groups (A: B: AB) among the progeny from heterozygous parents with B and AB blood groups?

A. 0.5 : 0.25 : 0.25

B. $0.25 : 0.25 : 0.5$

C. $0.25 : 0.5 : 0.25$

D. $0 : 0.25 : 0.75$

Answer:

Watch Video Solution

6. Match the plants in Column I with their features listed in Column II ,III & IV

Column I	Column II	Column III	Column IV
Types of plants	Types of photosynthesis	Site of Calvin cycle	Time of stomata opening
Rice	CAM	Mesophyll	Day
Pineapple	C4	Bundle sheath	Night
Sugarcane	C3		

Choose the CORRECT combination .

A. Rice -C3- Mesophyll -Day, Pineapple -CAM-Mesophyll-Night , Sugarcane-C4-Bundle sheath-Day

B. Rice-C3-Mesophyll-Day, Pineapple-CAM-Mesophyll-Night, Sugarcane-C4-Mesophyll-Day

C. Rice-C4-Mesophyll-Day, Pineapple-C3-

Bundle sheath-Night, Sugarcane-CAM-

Bundle sheath-Day

D. Rice-CAM-Mesophyll-Day, Pineapple-CAM-

Mesophyll-Day, Sugarcane-C4-Bundle

sheath Day

Answer:

Watch Video Solution

7. In the graph below. where N is population size and t is time. M represents

- A. specific growth rate.
- B. median population size.
- C. carrying capacity.

D. minimum population size without going extinct.

Answer:

Watch Video Solution

8. Match the metabolic pathways in Column I with their corresponding intermediate molecules listed in Column II

Column I

- P. Krebs cycle
- Q. Glycolysis
- R. Electron transport chain
- S. Nitrogen fixation

Column II

- i. Dihydroxy acetone phosphate
- ii. Succinate
- iii. Cytochrome c
- iv. Glutamate
- v. Glyoxylate

Choose the CORRECT combination.

A. P-ii, Q-i, R-iii, S-iv

B. P-i, Q-v, R-iv, S-ii

C. P-v, Q-i, R-iii, S-iv

D. P-ii, Q-i, R-iii, S-v

Answer:

Watch Video Solution

9. By comparing mitosis and meiosis occurring in the same organism, which ONE of the following options is CORRECT regarding the DNA content per cell?

A. Mitotic anaphase $>$ Meiotic anaphase I

= Meiotic anaphase II

B. Mitotic anaphase = Meiotic anaphase I

$>$ Meiotic anaphase II

C. Mitotic anaphase $<$ Meiotic anaphase I

= Meiotic anaphase II

D. Mitotic anaphase = Meiotic anaphase I

< Meiotic anaphase II

Answer:

Watch Video Solution

10. Which ONE of the following is likely to occur upon heating a solution of eukaryotic protein from $20^{\circ}C$ to $95^{\circ}C$

A. Breakage of disulphide bonds

B. Change in primary structure

C. Hydrolysis of peptide bonds

D. Change in tertiary structure

Answer:

Watch Video Solution

11. Which ONE of the following statements is **INCORRECT** about the hexokinase-catalysed reaction given below?

- A. This reaction takes place in the cytoplasm
- B. This is an endergonic reaction
- C. Folding of hexokinase to fit around the glucose molecule excludes water from the active site
- D. This reaction involves an induced fit mechanism in hexokinase

Answer:

Watch Video Solution

12. An ecologist samples trees in multiple forest plots to determine species richness. Which ONE of the following can help determine the adequacy of sampling effort?

A. Graph the number of new tree species in each successive sampling plot.

B. Graph the total number of tree species per total area for all plots combined

C. Graph the number of individuals per tree species in each successive sampling plot.

D. 30 sampling plots are sufficient, irrespective of the forest area.

Answer:

Watch Video Solution

Part I Biology

1. Species with high fecundity, high growth rates, and small body sizes are typically

A. endangered species

B. keystone species

C. K-selected species

D. r-selected species

Answer:

Watch Video Solution

2. When RNase enzyme is denatured by adding urea, which ONE of the following combinations of bonds would be disrupted?

- A. Ionic and disulphide bonds
- B. Ionic and hydrogen bonds
- C. Hydrogen and peptide bonds
- D. Peptide and disulphide bonds

Answer:

Watch Video Solution

3. The function of aposematic colouration is to

A. attract mates

B. camouflage

C. scare off competitors

D. warn predators

Answer:

Watch Video Solution

4. The exponent z of the species-area measured at continental scales is

A. smaller than the value of z at regional scales

B. equal to the value of z at regional scales

C. greater than the value of z at regional scales

D. unrelated to the value of z at regional scales.

Answer:

Watch Video Solution

5. The pH of an aqueous solution of $10^{-8} M HCl$ is

A. 6.0

B. between 6.9 - 7.0

C. between 7.0 - 7.1

D. 8.0

Answer:

Watch Video Solution

6. Which ONE of the following can NOT cause eutrophication of lakes?

- A. Introduction of invasive floating plants
- B. Discharge of fertilizer-rich agricultural waste
- C. Natural ageing of lakes

D. Discharge of industrial waste

Answer:

Watch Video Solution

7. Which ONE of the following polymerases transcribes 5S rRNA?

A. RNA Pol I

B. RNA Pol III

C. RNA Pol II

D. RNA Pol IV

Answer:

Watch Video Solution

8. Which ONE of the following statements about rennin is CORRECT?

A. It is secreted by adrenal glands

B. It converts angiotensinogen to
angiotensin

C. It is secreted by peptic cells of gastric glands into the stomach

D. It is a hormone

Answer:

Watch Video Solution

9. When one goes from a brightly lit area to a dimly lit room our eyes adjust slowly, thereby regaining the clarity of vision. Which ONE of the following explains this process?

- A. Regeneration of rhodopsin in the rod cells
- B. Bleaching of rhodopsin
- C. Constriction of the pupil
- D. Increase in the number of rod cells

Answer:

Watch Video Solution

10. In a diploid population at Hardy-Weinberg equilibrium, consider a locus with two alleles. The frequencies of these two alleles are denoted by p and q , respectively. Heterozygosity in this population is maximum at

A. $p = 0.25, q = 0.75$

B. $p = 0.4, q = 0.6$

C. $p = 0.6, q = 0.4$

D. $p = 0.5, q = 0.5$

Answer:

Watch Video Solution

11. An enzyme with optimal activity at pH 2.0 and $37^{\circ}C$ is most likely to be

A. lysozyme from hen egg white

B. trypsin from cattle

C. DNA polymerase from *Thermus aquaticus*

D. pepsin from humans

Answer:

Watch Video Solution

12. While adjusting to varying environmental temperature, plants incorporate in their plasma membrane

A. more saturated fatty acids in cold and more unsaturated fatty acids in hot

environment

B. more unsaturated fatty acids in cold and

more saturated fatty acid in hot

environment

C. more saturated fatty acids in both cold

and hot environment

D. more unsaturated fatty acids in both

cold and hot environment

Answer:

Watch Video Solution

13. Which ONE of the following terms is NOT used while describing human vertebra?

A. Lumbar

B. Sacral

C. Thoracic

D. Tarsal

Answer:

Watch Video Solution

14. Assume a population that has reached herd immunity for an infectious disease. If an infected individual is introduced to this population. Which of the following is most likely to occur?

A. The infection will spread exponentially across population

B. The infection will spread linearly across the population

C. A few individuals may get infected, but the infection will not spread across the population

D. No other individual will be infected by the disease

Answer:

Watch Video Solution

15. Match the type of cells in Column I with the organs they are part of, listed in

Column I

Column II

P. Chondroblast

i. Bone

Q. Osteoclast

ii. Brain

R. Microglia

iii. Cartilage

S. Pneumocyte

iv. Lung

Choose the CORRECT combination.

A. p-iii, Q-I, R-ii, S-iv

B. P-ii, Q-I, R-iii, S-iv

C. P-iv, Q-iii, R-ii,

D. P-iii, Q-ii, R-iv, S-i

Answer:

Watch Video Solution

16. A bacterial culture was started with an inoculum of 10 cells. What will be the number of cells at the end of 10 cycles of division, assuming that every progeny cell undergoes division in each cycle?

A. 100

B. 1024

C. 2048

D. 10240

Answer:

Watch Video Solution

17. The following family tree traces the occurrence of a rare genetic disease. The filled symbols signify the individuals with the disease, whereas the open symbols signify healthy individuals.

Based on this information, the disease is most likely to be

- A. autosomal, dominant
- B. autosomal, recessive
- C. X-linked, recessive
- D. X-linked, dominant

Answer:

Watch Video Solution

18. Which ONE of the following statements is CORRECT about the mechanism of action of penicillin?

- A. It inhibits transcription
- B. It hydrolyses cell wall
- C. It inhibits cell wall biosynthesis
- D. It inhibits translation

Answer:

Watch Video Solution

19. Leaf extract from an infected plant was passed through a filter with a pore size of $0.05\mu m$ diameter. The infectious agent was detected in the filtrate. Which ONE of the following is the likely infectious agent?

A. Bacteria

B. Virus

C. Nematode

D. Fungus

Answer:

Watch Video Solution
