PHYSICS

BOOKS - DHANPAT RAI & CO PHYSICS (HINGLISH)

Physical world

Problem

1. if the velocity of light c, the constant of gravitation G and plank,s constant h be chosen os fundamentad units , find the dimensions of mass , length and time in terms of c , G and h.

Watch Video Solution

2. The velocity of a freely falling body changes as $g^p h^q$where g is acceleration due to gravity and h is the height. The values of p and q are

Watch Video Solution

3. A gas bubble , from an explosion under water , oscillates with a period T proportional in $P^a D^b E^c$, where p is the static pressure , d is the density of water and E is the total energy of the explosion . Find the value of a, b and c .

Watch Video Solution

4. A small steel ball of radius r is allowed to fall under gravity through a column of a viscous liquid of coefficient of viscosity η. After some time the velocity of the ball attains a constant value known as terminal velocity v_T. The terminal velocity depends on (i) the mass of the ball m (ii) η, (iii) r and (iv) acceleration due to gravity g . Which of the following relations is dimensionally correct?

Watch Video Solution

5. Derive dimensionally the relation :$S = ut + \frac{1}{2}at^2$.

Watch Video Solution

6. Assuming that the vibration frequency v of atoms in a crystal depends on the atomic mass m , the atomic spacing α and compressibilty β, find an expression for frequency.

Watch Video Solution

7. The pressure on a square plate is measured by measuring the force on the plate and the length of the sides of the plate . If the maximum error in the measurement of force and length are , respectively , 4% and 2%. Find the maximum error in the measurement of pressure.

Watch Video Solution

8. An experiment measures quantites a, b, c and X is calculated from the formula

$$X = \frac{ab^2}{c^3}$$

If the percentage errors in a, b, c are $\pm 1\,\%$, $\pm 3\,\%$, $\pm 2\,\%$ respectively, the perentage error in X can be

Watch Video Solution

9. The specific heats of a gas are measured as $C_p = (12.28 \pm 0.2)$ units and C_(upsilon =(3.97 +- 03)` units. Find the value of gas constant R and percentage error in R.

Watch Video Solution

10. The heat generated in a circuit is given by $Q = I^2Rt$, where I is current , R is resistance , and t is time . If the percentage errors in measuring $I, R,$ and $tare2\,\%$, $1\,\%$, and $1\,\%$, respectively , then the maximum error in measuring heat will be

Watch Video Solution

Problem For Self Practice

1. Write the order of magnitude of the following :

(i) 8 (ii) 49 (iii)52 (iv) 999 (v) 1001 (vi) 753000 (vii) 0.05 (viii) 0.99

Watch Video Solution

2. What is one astronomical unit ? Express it in metres . Write its order og magnitude .

Watch Video Solution

3. What is the order of magnitude of second in a day ?

Watch Video Solution

4. IF the size of an atom (= 1Å) were enlarged to the tip of a sharp pin $\left(\cong 10^{-5} m \right)$, how large would the height of mout everest $\left(\cong 10^{4} m \right)$ be?

Watch Video Solution

5. If an atom of size 10^{-10}m were enlarged to the size of the earth $\left(\cong 10^{7} m \right)$, how large would its nucleus be ? Take size of nucleus $= 10^{-14}$m.

Watch Video Solution

6. if the universe were shrunk to the size, of earth, how large would the earth be on this scale?

Watch Video Solution

7. A 35 mm wide slide with 24 mm $\times$ 36 mm picture is projected ona screen placed 12 cm from the slide. The image of the slide picture on the screen measures $1.0m \times 1.5m$. What is the linear magnification of the arrangement ?

Watch Video Solution

8. In a submarine fitted with a SONAR, the time between the genretaion of an ultrasonicwave and the reciept of its echo is 200 s. What is the dsistance of the enemy sun=bmrine ? The speed of the sound in water is $1.450kms^{-1}$

Watch Video Solution

9. A radar signal is beamed towards a planet and its echo is recived 7 minutes later. If the distance between the planet and earth is $6.3 \times 10^{10}m,$ calculate the speed of the signal.

Watch Video Solution

Watch Video Solution

10. A rock under water is 1595 m deep. Find the time in which an ultrasonic signal returns after reflection from the rock. Speed of ultrasonic waves in water = $1450 m / s$.

Watch Video Solution

11. The angle of elevation of the top of a hill is 30° from a point on the ground. On walking 1 km towards the hill, angle is found to be 45°. Calculate the height of the hill.

Watch Video Solution

12. Find the distance of the moon from the earth if the parralrtic angle as measured from two places locaterd 6.4×10^{6}m apart is 1°.

Watch Video Solution

13. The parallex of a heavenly body measured ffrom two points diametrically opposite on equater of earth is 1.0 minutes. If the radius of the earth is 6400 m, find the distance of the heavenly body from the centre of the earth in AU. Given $1AU = 1.5 \times 10^{11}$m.

Watch Video Solution

14. The angular diameter of the sun is 1920". If the distance of the sun from the earth is 1.5×10^{11}m, what is the linear diameter of the sun ?

Watch Video Solution

15. The moon is observed from two diametrically opposite points A and B on earth. The angle θ substended at the moon by the two directions of observation is $1^{\circ}54'$. Given the diameter of earth to be about $1.276 \times 10^{7}m,$ calculate the distance of moon from earth.

Watch Video Solution

16. The radius of a muonic hydrogen atom is $2.5 \times 10^{-13} m$. What is the total atomic volume in m^3 of a mole of such hydrogen atom.

Watch Video Solution

17. A drop of olive oil of radius 0.3 mm spreads into a rectangular film of $30cm \times 15cm$ on the water surface. Calculate the size of the oil molecule.

Watch Video Solution

18. Consider a white dwarf and a nutron star beach of one solar mass. The radius of the white dwarf is same as that of the eartyh (=6400km) and the radius of the neutron star is 10 km. Determine the densities of the two types of the stars. Take mass of the sun $= 2.0 \times 10^{30}$kg.

Watch Video Solution

19. A neutron star has a density equal to that of nuclear matter $\left(\cong 2.8X0^{17} kgm^{-3} \right)$. Assuming the star to be spherical, find the radius of the neutron star whose mass is $4.0X10^{30} kg$.

Watch Video Solution

20. Assume that trhe mass of the nucleus is given by M=Am_p, where A in the mass number and radius of a nuclear r=$r_0 A^{1/3}$, where r_0=1.2 f. Estimate the density of the nuclear matter in kg m^{-3}. Given $m_p = 1.67 \times 10^{-27}$kg.

Watch Video Solution

21. Find the number of seconds in 1 year. Express them in order magnitude.

Watch Video Solution

22. Human heart beats one in 0.8s. Calculate how many times the human heart beats in the life of a person of 60 years.

Watch Video Solution

23. Two atomic clocks allowend to run for a average life of an indian (say 70 years) differ by 0.2 s only. Calculate the accuracy of standard atomic clock in measuring a time interval of 1 sec.

Watch Video Solution

24. If two celsium clocks differ only by 0.02 s in 200 yaers, what is the accuracy of cesium clock in measuring time intervals ?

Watch Video Solution

25. Age of the universe is about 10^{10} years whereas the mankind has existed for 10^{6} years. How many seconds would the man have existed if

age of universe were one day.

Watch Video Solution

26. Deduce dimensional formulae for (i) angle (ii) angular velocity (iii) angular acceleration (iv) torque (v) angukar momentum and (vi) moment of inertia.

Watch Video Solution

27. Obtain dimensions of (i) impulse (ii) power (iii) surface energy (iv) cofficent of viscecity (v) bulk modules (vi) force constant.

Watch Video Solution

28. By the use of dimensions, show that energy per unit volume is equal to pressure.

Watch Video Solution

29. Show that angular momentum has the same dimensions as the Planck's constant.

Watch Video Solution

30. If force (F), length(L) and time (T) as chosen as the fundamental quantities, then what would be the dimensional formula for the density?

Watch Video Solution

31. Calculate the dimensions of ther force and impulse taking velocity, density and frequency as basic quantities.

Watch Video Solution

32. Calculate the dimensions of linear momentum and surface tension in terms of velocity (v), density (ρ) and frequency (V) as fundamental units.

Watch Video Solution

33. If $E, M, J,$ and G , respectively , denote energy , mass , angular momentum , and gravitational constant , then EJ^2/M^5G^2 has the dimensions of

Watch Video Solution

34. If 'slap' times speed equals power, what is the dimensional formula for 'slap' ?

Watch Video Solution

35. By the method of dimensions, show that $1N = 10^5$ dynes .

Watch Video Solution

36. The value of acceleration due to gravity at a place is $9.8ms^{-2}$. Find its value in kmh^{-2}

Watch Video Solution

37. Suppose the acceleration due to gravity at a place is $10\frac{m}{s^2}$. Find its value in cm / $(\text{ min } ute)^2$.

Watch Video Solution

38. A body has a uniform acceleration of 5 kmh^{-2}. Express it in CGS units.

Watch Video Solution

39. The density of mercury is 13.6 g cm^{-3} in CGS system. Find its value in SI units.

Watch Video Solution

40. The surface tension of water is 72 dyne/cm. Express is in SI units.

Watch Video Solution

41. An electriv bulb has a power of 500 W. Express it in CGS units.

Watch Video Solution

42. If the value of atmospheric pressure is 10^6 dyne cm^{-2}, find its value in SI units.

Watch Video Solution

43. The value of Stefan's constant is $\sigma = 5.76 \times 10^{-8} Js^{-1} m^{-2} K^{-4}$. Find its value in cgs system.

Watch Video Solution

44. Find the value of 100 J on a system which has 20 cm, 250g and half minute as fundamental units of length, mass and time.

Watch Video Solution

45. If the unit of force energy and velocity are 20 N, 200J and 5m//s, find the units of mass, length and time.

Watch Video Solution

46. When 1m, 1kg and 1min. Are taken as the fundamental units, the magnitude of force is 36 units. What will be the value of this force is CGS system?

Watch Video Solution

47. If the units of length and force be increased three times, show that the unit pof energy is increased by 9 times.

Watch Video Solution

48. If velocity of light is taken as the unit of velocity and an year is taken as the unit of time, what is the unit of length? What is it called?

Watch Video Solution

49. Test the dimensional consistency of the following equations :

$(i) v = u + at \qquad (ii) v^2 = u^2 + 2as \qquad (iii) E = mc^2 \qquad (iv) \frac{1}{2}mv^2 =$

Watch Video Solution

50. Use principle of homogenity of dimensions to find which one of the following relations is correct : (i) $T^2 = 4\pi^2 r^2$

(ii) $T^2 = \frac{4\pi^2 r^3}{G}$

(iii) $T^2 = \frac{4\pi^2 r^3}{GM}$

Watch Video Solution

51. A student conclude that the velocity v of a body falling freely under gravity from a height is equal to $\sqrt{gh}$. Using the method of dimensions, verify whether his coclusion is correct.

Watch Video Solution

52. The viscous force 'F' acting on a small sphere of rtadius 'r' moving with velocity v through the liquid is gib=ven by F= $6\pi nrv$. Calculate the dimensions of n , the cofficent of viscosity.

Watch Video Solution

53. The dimensions of $'k'$ in the relation $V = k$ avt (where V is the volume of a liquid passing through any point in time t, $'a'$ is area of cross section, v is the velocity of the liquid) is

Watch Video Solution

54. The cirtical velocity (v) of flow of a liquied through a pipe of radius (r) is given by $v = \frac{\eta}{\rho r}$ where ρ is density of liquid and η is coefficient of visocity of the liquied. Check if the relaiton is correct dimensinally.

Watch Video Solution

55. The rate of flow (V) of a liquid flowing through a pipe of radius r and pressure gradient (P/l) is given by Poiseuille's equation$V = \frac{\pi}{8}\frac{Pr^4}{\eta I}$ Chack the dimensional correctness of this relation.

Watch Video Solution

56. Test if the following equations are dimensionally correct: (a) $h = \frac{2S\cos\theta}{\rho r g}$ (b) $\nu = \sqrt{\frac{P}{\rho}}$, (c) $V = \frac{\pi P r^4 t}{8\eta l}$, (d) $v = \frac{1}{2\pi}\frac{\sqrt{mgl}}{I}$ where h = height, S= surface tension, ρ= density, P= pressure, V=volume, η = coefficient of viscosity, v= frequency and I = moment of inertia.

Watch Video Solution

57. The time period of a compound pendulum is given by

$$T = 2\pi\sqrt{\frac{I}{mgl}}$$

where I=moment of inertia about the centre of the suspension, g=acceleration due to gravity , m=mass of the pendulam l=distance of the centre of the gravity from the centre of the susp

Watch Video Solution

58. Find the dimensions of the quantity q from the expression $T = 2\pi\sqrt{\frac{ml^3}{3Yq}}$, where T is time period of a bar of length l, mass m and Young's modulus Y.

Watch Video Solution

59. An artificial satellite of mass m is revolving in a circualr orbit around a planet of mass M and radius R. If the radius of the orbit of satellite be r, then period of satellite is

$$T = \frac{2\pi}{R}\sqrt{\frac{r^3}{g}}$$

Justify the relation using the method of dimensions.

Watch Video Solution

60. Check by the method of dimensions, the formula $v = \frac{1}{\lambda}\sqrt{\frac{K}{d}}$, where v is velocity of longitudinal waves, λ is wavelength of wave, K is coefficient of volume elasticity and d is density of the medium.

Watch Video Solution

61. Check the correctness of the equation : $y = a\sin(\omega t + \phi)$, where y = displacement , a = amplitude , ω = angular frequency and ϕ is an angle .

Watch Video Solution

62. Find the dimension of (a/b) in the equation : v = a + bt , where v is velocity and t is time

Watch Video Solution

63. Write the dimensions of $a \times b$in the relation $E = \frac{b - x^2}{at}$, where E is the energy , x is the displacement , and t is the time.

Watch Video Solution

64. The dimension of $\frac{a}{b}$ in the equation $p = \frac{a - t^{-2}}{bx}$ where P is pressure, x is distance and t is time are ----------?

Watch Video Solution

Based On Deriving Relationship

1. The wavelength λ associated with a moving electron depends on its mass m , its velocity v and Planck's constant h . Prove dimensionally that $\lambda \propto \frac{h}{mv}$.

Watch Video Solution

2. Obtain an expression for the centripetal force F acting on a particle of mass m moving with velocity v in a circle of radius r . Take dimensionless constant K = 1 .

Watch Video Solution

3. The orbital velocity v of a satellite may depend on its mass m , the distane r from the centre of the earth and acceleration due to gravity g .

Obtain an expression for its orbital velocity .

Watch Video Solution

4. A small spherical ball of radius r falls with velocity v through a liquid having coeffiecinet of viscosity η. find viscous darg F on the wall if it depends or r, v, η. $TakeK = 6\pi$

Watch Video Solution

5. The velocity of a freely falling body is a function of the distance fallen through (h) and acceleration due to gravity g . Show by the method of dimensions that $v = K\sqrt{gh}$.

Watch Video Solution

6. Using the method of dimensions , derive an expressions for the energy of a body executing SHM , assuming this energy depends upon its mass m

, frequency v and amplitude of vibration r .

Watch Video Solution

7. A body of mass m hung at one end of the spring executes simple harmonic motion . The force constant of a spring is k while its period of vibration is T. Prove by dimensional method that the equation $T = 2\pi m / k$ is correct. Dervive the correct equation , assuming that they are related by a power law.

Watch Video Solution

8. Assuming that the critical velocity of flow of a liquid through a narrow tube depends on the radius of the tube, density of the liquid and viscosity of the liquid, find an expression for critical velocity.

Watch Video Solution

9. By the method of dimensions, obtain an expression for the surface tension S of a liquid rising in a capillary tube. Assume that S depends on mass m of liquied, Pressure p of liquid and radius r of the capillary tube. Take $K = 1/2$.

Watch Video Solution

10. The depth x to which a bullet penetrates a human body depends on (i) coeffeicint of elasticity, η and (ii) KE (E_k) of the bullet, By the method of dimensions, show that

$$x \propto \left(\frac{E_k}{\eta}\right)^{1/3}$$

Watch Video Solution

11. A U - tube of uniform cross section contains mercury upto a height h in either limb. The mercury in one limbe is depressed a little and then

relased. Obtain an expression for time period (T) of oscillation, assuming that T depends on h,ρ and g, where ρ is density of mercury.

Watch Video Solution

12. The cirtical angular velocity ω_c of a cylinder inside another cylinder containing a liquied at which its turbulance occurs depends on visocisity η density ρ and disntac d between wall of the cylinder. Obtain an expression for ω_c using method of dimensios.

Watch Video Solution

Based On Significant

1. Statement the number of significant figures in the following

(i)

$2.653 \times 10^4 \quad (ii) 0.00368 \quad (iii) 653 \quad (iv) 0.368 \quad (v) 0.0300 \quad (vi) 876.00$

Watch Video Solution

2. State the number of significant figures in the following measurements :

(i)

$0.009m^2 \quad (ii)5.049Nm^{-2} \quad (iii)0.1890gcm^{-3} \quad (iv)1.90 \times 10^{11}kg \quad (v)$

Watch Video Solution

3. Round off the following numbers as indicated :

(i) 15.654 upto 3 digits $\quad (ii)15.\ 75$ upto 3 digits $\quad (iii)15.654$ upto 4 digits $\quad (iv)15.65$ upto 3 digits (v) 142667 upto 5 digits (vi) 5.996×10^5 upto 3 digits . (vii) 0.7995 upto 1 digit (viii) 2.5946×10^{-4} upto 2 digits .

Watch Video Solution

4. Solve the following to the appropriate number of significant figures :

(i) $0.58 + 324.65$

(ii) 3.124×4.576

(iii) $\dfrac{324 \times 0.08666}{5.006}$

$$\frac{1.35 \times 10^{-6} \times 0.4}{5.6}$$

(v) $\frac{2.03 \times 10^{-5} \times 3.5 \times 10^{-7}}{0.6423}$

(vi) $\sqrt{3.5 - 3.31}$

Watch Video Solution

5. (a).Add $3.8 \times 10^{-6} \rightarrow 4.2 \times 10^{-5}$ with due regard to significant figures.

(b). Subtract $3.2 \times 10^{-6} om 4.7 \times 10^{-4}$ with regard to significant figures.

(c). Subtract $1.5 \times 10^{3} om 4.8 \times 10^{4}$ with due regard to significant figures.

Watch Video Solution

6. (a).Add $3.8 \times 10^{-6} \rightarrow 4.2 \times 10^{-5}$ with due regard to significant figures.

(b). Subtract $3.2 \times 10^{-6} om 4.7 \times 10^{-4}$ with regard to significant figures.

(c). Subtract $1.5 \times 10^3 om 4.8 \times 10^4$ with due regard to significant figures.

Watch Video Solution

7. A jewaller puts a diamond weighing 5.42g in a box weighing 1.2kg. Find the total weight of the box and the diamond to correct number of significant figures.

Watch Video Solution

8. The mass of a box measured by a grocer's balance is 4.2 kg . Two additional masses 10.20 g and 15.25 g are added to the box . What is the total mass of the box ?

Watch Video Solution

9. The length , breadth and thickness of a metal block are $4.327m, 2.825m$ and 4.32 cm respectively . Calculate its (i) surface area and (ii) volume and express the results to an appropriate number of significant figures .

Watch Video Solution

10. The diameter of a circle is 2.486 m. Calculate the area with due regard to significant figures.

Watch Video Solution

11. The diameter of a sphere is 4.24 m . Calculate its surface area with due regard to significant figures .

Watch Video Solution

12. The diameter of a sphere is 2.78 m . Calculate its volume with due regard to significant figures .

Watch Video Solution

13. Each side of a cube is measured to be 7.203 m . What is (i) the total surface area and (ii) the volume of the cube to appropriate significant figures ?

Watch Video Solution

14. A thin wire has a length of 21.7 cm and radius 0.46 mm. Calculate the volume of the wire to correct significant figures.

Watch Video Solution

15. A substance weight 5.74 g occupies a volume of $1.2cm^3$. Caluclate its density with due regard to significant digits.

Watch Video Solution

Based On Errors In Measurements

1. The diameter of a wire as measured by a screw gauge was found to be 0.026 cm, 0.028 cm, 0.029 cm, 0.027cm, 0.024cm and 0.027 cm. Calculate

(i) mean value of diameter

(ii) mean absoulte error

(iii) relative error (iv) percentage error. Also express the result in terms of absolute error and percentage error.

Watch Video Solution

2. The refractive index of water as measured by the relation $\mu = \frac{\text{Real depth}}{\text{Apparent depth}}$ was found to have the values $1.29, 1.33, 1.34, 1.35, 1.32, 1.36, 1.30, 1.33.$

Calculate (i) mean value of μ (ii) mean value of absolute error (iii) relative error (iv) percentage error .

Watch Video Solution

3. In an experiment to measure focal length of a concave mirror , the value of focal length in successive observations turns out to be 17.3 cm , 17.8 cm , 18.3 cm , 18.2 cm , 17.9 cm and 18.0 cm . Calculate the mean absolute error and percentage error . Express the result in a proper way .

Watch Video Solution

Based On Combination

1. The length of two rods are recorded as $l_1 = (25.2 \pm 0.1)$ cm and $l_2 = (16.8 \pm 0.1)$ cm . Find their combined length .

Watch Video Solution

2. Two resistance $(200 \pm 4)\Omega$ and $(150 \pm 3)\Omega$ are connected in series . What is their equivalent resistance ?

Watch Video Solution

3. The initial and final temperature of water were recorded as $(56.3 \pm 0.4)^\circ C$ and $(27.5 + 0.3)^\circ C$. Determine the fall in the temperature of water .

Watch Video Solution

4. If $l_1 = (10.0 \pm 0.1)$ cm and $l_2 = (9.0 \pm 0.1)$ cm , find the their sum , difference and error in each .

Watch Video Solution

5. A capacitor $C = (2.0 \pm 0.1)\mu F$ is charged to a voltage $V = (20 \pm 0.5)$ volt. Calculate the charge Q with error limits.

Watch Video Solution

6. The resistance R of a conductor is defind as the ratio of the potential difference applied across it to the current flowing through ti . If V = $(100 \pm 5)V$ and I = $(5 + 0.1)$ A , what is the percentage error in R ?

Watch Video Solution

7. The relative density of a material is found by weighing the body first in air and then in water . If the weight in air is $(10.0 \pm 0.1)gf$ and the weight in water is $(5.0 \pm 0.1)gf$, then the maximum permissible percentage error in relative density is

Watch Video Solution

8. The length and breadth of a rectangular block are 25.2 cm and 16.8 cm, which have both been measurd to an accurancy of 0.1 cm find the area of the rectangular block.

Watch Video Solution

9. While measuring the volume of a sphere , an error of 1.2% is commited in the measurement of radius . What percent error is introduced in the measurement of its volume ?

Watch Video Solution

10. The voltage across a lamp is $(6.0 \pm 0.1)V$ and the current passing through it is (4.0 ± 0.2) ampare. Find the power consumed by the lamp.

Watch Video Solution

11. The radius of a sphere is measured to be (2.1 ± 0.5) cm. Calculate its surface area with error limits .

Watch Video Solution

12. The radius of a sphere is (5.3 ± 0.1)cm` The perecentage error in its volume is

Watch Video Solution

13. The measure of the diameter of a cylinder is (1.60 ± 0.01) cm and its length is (5.0 ± 0.1) cm . Calculate the percentage error in its volume .

Watch Video Solution

14. The measured mass and volume of a body are 2.00 g and $5.0cm^3$ respectively . With possible errors of 0.01 g and $0.1cm^3$, what would be the percent error in density ?

Watch Video Solution

15. Two resistance R_1 and R_2 are connected in (i) series and (ii) parallel. What is the equivalent resistance with limit of possible percentage error in each case of $R_1 = 5.0 \pm 0.2\Omega$ and $R_2 = 10.0 \pm 0.1\Omega$

Watch Video Solution

16. A body travels uniformly a distance of $(13.8 \pm 0.2)m$ in a time $(4.0 \pm 0.3)s$. Find the velocity of the body within error limits and the percentage error.

Watch Video Solution

17. The centripetal force acting on a body of mass m moving with speed v along a circular path of radius r is given by

$$F = \frac{mv^2}{r}$$

If the values of m , v and r are measured as 0.5 kg , $10ms^{-1}$ and 0.4 m respectively to the accuracies of 0.005 kg , $0.01ms^{-1}$ and 0.01 m respectively , calculate the percentage error in the force acting on the body.

Watch Video Solution

18. The period of oscillation of a simple pendulum is $T = 2\pi\sqrt{\frac{L}{g}}$. L is about $10cm$ and is known to $1mm$ accuracy . The period of oscillation is about $0.5s$. The time of 100 oscillation is measured with a wrist watch of $1s$ resolution . What is the accuracy in the determination of g ?

Watch Video Solution

19. Calculate the percentage error in specific resistance , $\rho = \pi r^2 R/l$, where r = radius of wire $= 0.26 \pm 0.02cm$, l = length of wire $= 156.0 \pm 0.1cm$, and R = resistance of wire $= 64 \pm 2\Omega$.

Watch Video Solution

20. The Young's modulus Y is determined by stretching a wire by using the formula ,

$$Y = \frac{4FL}{\pi d^2 l}$$

where F is the streching force , L is length of wire , l is extension in length and d is its diameter . If F is of the order of 500 N and known to 1 part in 1000 L , is of the order of 3 m and measured with an accuracy of 1 mm , l is of the order of 5 mm measured to 0.1 mm and d is of the order of 1 mm measured correct upto 0.01 mm , estimate the percentage error in the measurement of Y .

Watch Video Solution

21. A physical quantify X is related to three observations a , b, c as $X = \sqrt{a}b^2 / c^2$. The errors of measurement in a ,b and c are 2% , 1% and 3% respectively . What is the percentage error in the quantity X ?

Watch Video Solution

Example

1. Write the order of magnitude of the following measurements:

(i) 25,710,000 m

(ii) 0. 00000521 kg

Watch Video Solution

2. Express 1 light year in terms of metre. What is its order of magnitude?

Watch Video Solution

3. Express 1 parsec in terms of meters . What its order of magnitude .

Watch Video Solution

4. A student measures the thickness of a human hair by looking at it through a microscope of magnification 100. He makes 20 observations and findsd that the average width of the hair in the field of view of the microscope is 3.5mm. What is his estimate on the thickness of hair?

Watch Video Solution

5. If the size of a nucleus $\left(\approx 10^{-15} m \right)$ is scaled up to the tip of a sharp pin $\left(\approx 10^{-5} m \right)$, what roughly is the size of an atom?

Watch Video Solution

6. The photograph fo a house occupies an area of $1.7 cm^2$ on a 35 slide. The slide is projected on to a screen, and the area of the house on the

screen is $1.55m^2$ What is the liner magnification of the projector screen arrangement?

Watch Video Solution

7. What is the distance in km of a quaser from which ligth takes 3.0 billion years to reach us ?

Watch Video Solution

8. A SONAR (sound navigation and ranging) uses ultrasonic waves to detect and locate object under water. In a submarine equaipped with as SONAR, the time delay between genration of a probe wave and the recption of its echo after refection from an enemy submarine is found to be 77.0 s. What is the distance of the enemy submarine ? (speed of sound in water $= 1450ms^{-1}$

Watch Video Solution

9. A laser light beamed at the moon the takes $2.56s$ to return after reflection at the moon 's surface . How much is the radius of the lunar obit around the earth ?

Watch Video Solution

10. The shadow of a tower standing on a level plane is found to be 50m longer when sun's altitude is 30° then when it is 60°. Find the height of tower.

Watch Video Solution

11. The moon subtends an angle of 57 minutes at the base line equal to radius of earth. What is the distance of moon from earth. Given radius of earth is 6400 km.

Watch Video Solution

12. When planet Jupiter is at a distance of 824.7 million km from earth, its angular diameter is measured to be 35.72'' of arc. Calculate the diameter of Jupiter.

Watch Video Solution

13. It is a well known fact that during a total solar eclipes the disc of the moon almost completely covers the disc of the sun. From this fact and from the information you can gather from Solved Examples 3 and 4 on page 1//44, determine the approximate diameter of the moon.

Watch Video Solution

14. The nearest star to our solar system is 4.29 light years away. How mcuh is this distance in terms of par sec ? How mcuh parallax would this star show when viewed from two locations of the earth six months apart in its orbit around the sun?

Watch Video Solution

Watch Video Solution

15. The radius of a hydrogen atom is about 0.5Å . What is the total atomic volume in m^3 of a mole of hydrogen atoms ?

Watch Video Solution

16. One mole of an ideal gas at NTP occupies 22.4 liters (molar volume). What is the ratio of molar volume to atomic volume to atomic volume of a mole of hydrogen ? Take size of hydrogen molecule to be 1 Å. Why is this ratio so large?

Watch Video Solution

17. A drop of olive oil of radius 0.25 mm spreads into a circular film of diameter 20cm on the water surface. Estimate the size of the oil molecule.

Watch Video Solution

18. The sun is a hot plasma (ionised matter) with its linner core at a temperature excedding 10^7 K, and its outer surface at a temperature of about 6000K. At such high temps, no substance remains in a solid or liquid phase. In what range do you expect the mass density of the sun to be? In the range of densities of solids, liquieds or gases ? Check if your guess is correct from the following data : mass of sun $= 2.0 \times 10^{30} kg$, radius of the sun $= 7.0 \times 10^8 m$

Watch Video Solution

19. Estimate the averaage atomic mass density of a sodium atom, assuming its size ot be 2.5 Å. Compare it with density of sodium in its crystalline phase $\left(970 kgm^{-3}\right)$. Are the two denities of the same order of magnitude ? If so, why ?

Watch Video Solution

20. The unit of length convenient on nuclear scale is a fermi, $1f = 10^9 - 15)$m. Nuclear sizes obey rougholy the following empricial relation : $r = r_0 A^{1/3}$, where r is radius of the nucleus and r_0 is a constant equal to 1.2 f. show that the rule implies that nuclear mass density in nearly constant for different neclei. Estimate the mass density of sodium nucleus. Compare it with avarge mass density of sodium atom is Q. 27 $\left(4.67 \times 10^3 kg/m^3\right)$.

Watch Video Solution

21. The avarage life of an Indian is 56 years .Find the number of times the human heart beats in the life of an Indian ,If the heat beats once in 0.8 s.

Watch Video Solution

22. It is claimed that two cesium clocks, if allowed to run for 100 years, free from any disturbance, may differ by only about 0.02s. What does this

imply for the accuracy of the standard cesium clock in measuring a time interval of 1s ?

Watch Video Solution

23. The mean life of an elementary particle pion is 2×10^{-7} ns. The age of the univers is about 4×10^{9} years. Identify a physically meaning time that is approximately half way between these two on a logarithmic scale.

Watch Video Solution

24. Deduce the dimensinal formulae for the ollowing physical quantites: Graviatinal constant (ii) Powr (iii) Young's modulus (iv) Coeffcient of viscosity (v) Surface tension (vi) Planck,s constant .

Watch Video Solution

25. Deduce the dimensinal formulae for the ollowing physical quantites:

(i) Heat (ii) Specific heart (iii) Latent heat (iv) Gas constant (v) Boltzmann's constant (vi) Coffcient of thermal conductivity (vii) Meachanical equivalent of heart .

Watch Video Solution

26. Find the dimensionalformulae of (i) charge (ii) potential (iii) resistance (iv) capacitance.

Watch Video Solution

27. Name the physical quantites whose dimensional formulae are as follows:

(i) $ML^2T^{-2}(ii)ML^2T^{-3}(iii)MT^{-2}(iv)ML^{-1}T^{-1}(v)ML^{-1}T^{-2}$,

Watch Video Solution

28. Taking velocity , time and force as the fundamental quantities , find the dimension of mass .

Watch Video Solution

29. If density (D), acceleration due to gravity (g) and frequency (v) are taken as base quantities , find the dimensions of force.

Watch Video Solution

30. If C (the velocity of light) g , (the acceleration due to gravity), P (the atmospheric pressure) are the fundamental quantities in MKS system , then the dimensions of length will be same as that of

Watch Video Solution

31. Number of particles is given by $n = -D\frac{n_2 - n_1}{x_2 - x_1}$ crossing a unit area perpendicular to X-axis in unit time, where n_1 and n_2 are number of

particles per unit volume for the value of x meant to x_2 and x_1. Find dimensions of D called as diffusion constant

Watch Video Solution

32. Fill in the blanks by suitable conversion of units :

(a) $1kgm^2s^{-2} = gcm^2s^{-2}$ (b) 1m = ... Light year (c) $3ms^{-2} = \ldots . Kmh^{-2}$

(d) $G = 6.67 \times 10^{-11} Nm^2kg^{-2} = \ldots . . cm^3s^{-2}g^{-1}$

Watch Video Solution

33. The value fo universal gravitationla constant G in CGS system is 6.67×10^{-8} dyne cm^2g^{-2}. Its value in SI system is

Watch Video Solution

34. Convert an energy of 1 joule into ergs.

Watch Video Solution

35. Find the value of 60 J per min on a system that has 100g, cm and 1 min. as the base units.

Watch Video Solution

36. A calorie is a unit of heat or energy and it equals about $4.2J, where 1J = 1kgm^2s^{-2}$. Suppose we employ a system of units in which the unit of mass equals αkg, the unit of length equals is βm , the unit of time is γs. Show tthat a calorie has a magnitude $4.2\alpha^{-1}\beta^{-1}\gamma^2$ in terms of the new units.

Watch Video Solution

37. Relative density of an oil is 0.8.Find the absolute density of oil in CGS and SI units.

Watch Video Solution

Watch Video Solution

38. The Young's modulus of steel is $1.9 \times 10^{11} Nm^{-2}$. Calculate its value in dyne cm^{-2}.

Watch Video Solution

39. The value of Stefan's constant is $\sigma = 5.76 \times 10^{-8} Js^{-1} m^{-2} K^{-4}$. Find its value in cgs system.

Watch Video Solution

40. A new unit of length is chosen such that the speed of light in vecuum is unity. What is the distance between the sun and the earth in terms of the new unit, if light takes 8 min and 20 sec. to cover the distance ?

Watch Video Solution

41. If the unit of force is 1 kN, unit of length 1 km and unit of time is 100s, what will be the unit of mass?

Watch Video Solution

42. If the fundamental units are the velocity of light in air $\left(3 \times 10^{10} cms^{-1}\right)$, the acceleration due to gravity $\left(981 cms^{-1}\right)$, the density of mercury $\left(13.6 gcm^{-3}\right)$, fing the units of mass , length and time.

Watch Video Solution

43. Check the correctness of following equation by the method of dimensions :

$S = ut + \frac{1}{2}at^2$.

where S is the distance covered bu a body in time t, having initial velocity u and acceleration a.

Watch Video Solution

Watch Video Solution

44. Check the correctness of the equation,

$$FS = \frac{1}{2}mv^2 - \frac{1}{2}\mu^2$$

where F is the force acting on a body of mass m and S is the distacne moved by the body when its velocity changes from u to v.

Watch Video Solution

45. Check the correctness of the relation $\pi = I\alpha$ whare π is torque acting on the body, I is moment of inertia and α is angular acceleration.

Watch Video Solution

46. Check the dimensional consistency of the following equations :

(i) de-Broglie wavelength , $\lambda = \frac{h}{mv}$ (ii) Escape velocity ,$v = \sqrt{\frac{2GM}{R}}$.

Watch Video Solution

47. Check by the method of dimensions whether the following relations are true.

(i)$t = 2\pi\sqrt{\frac{l}{g}}$, (ii)$v = \sqrt{\frac{P}{D}}$ where v= velocity of sound P=pressure D=density of medium .

(iii)$n = \frac{1}{2l} = \sqrt{\frac{F}{m}}$ where n= frequency of vibration l=length of the string, F=stretching force m=mass per unit length of the string .

Watch Video Solution

48. By the method of dimensions, test the accuracy of the equation : $\delta = \frac{mgl^3}{4bd^3Y}$ where δ is depression in the middle of a bar of length l, breadth b, depth d, when it is loaded in the middle with mass m. Y is Young's modulus of material of the bar.

Watch Video Solution

49. The distance covered by a particle in time t is given by $x = a + bt + ct^2 + dt^3$, find the dimensions of a,b,c and d.

Watch Video Solution

50. Write the dimensions of a/b in the relation $F = a\sqrt{x} + bt^2$ where F is force x is distance and t is time.

Watch Video Solution

51. Write the dimensions of a and b in the relation $P = \frac{(b-x)^2}{at}$ Where P is power, x is distance and t is time.

Watch Video Solution

52. In Vander Wall's equation $\left(P + \frac{a}{V^2}\right)(V - b) = RT$ What are the dimensions of a and b ? Here, P is pressure, V is volume, T is temperature

and R is gas constant.

Watch Video Solution

53. When white light travels through glass, the refractive index of glass (μ =velocity of light in air/velocity of light in glass) is found to vary with wavelength as $\mu = A + \frac{B}{\lambda^2}$. Using the principle of homogeneity of dimensions, Find the SI units in which the constants A and B expressed.

Watch Video Solution

54. Find the dimensions of the quantity v in the equation,

$$v = \frac{\pi p\left(a^2 - x^2\right)}{2\eta l}$$

where a is the radius and l is he length of the tube in which the fluid of coefficient of viscosity η is flowing , x is the distacne from the axis of the tube and p is the pressure differnece.

Watch Video Solution

55. A particles of mass m moving in a circle of radius r with unform speed v. The force F acting on a particle is proportional to $m^a v^b r^c$. Find the values of a, b and c.

Watch Video Solution

56. In the equation $y = A\sin(\omega t - kx)$, obtain the dimensional formula of ω and k. Given x is distnace and t is time.

Watch Video Solution

57. A book with many printing errors contains four different forumlae for the displacement y of a particle undergoing a certain periodic motion : (i) $y = a\frac{\sin(2\pi t)}{T}$ (ii) $y = a\sin vt$ (iii)$y = \frac{a}{T}\frac{\sin(t)}{a}$ (iv) $y = \frac{a}{\sqrt{2}}\left[\frac{\sin(2\pi t)}{T} + \frac{\cos(2\pi t)}{T}\right]$ Here, a is maximum displacement of particle, v is speed of particle, T is time period of motion. Rule out the wrong forumlae on dimensinal grounds.

Watch Video Solution

Watch Video Solution

58. A famous relation in phyics relates the moving mass m to the rest mass m_0 of a particle in terms of its speed v and the speed of light c.(This relation first arose as a consequence of the special theory of relativity due to Albert Einstein). A body recalls the relation almost correctly but forgets where to put the constant c . He writes $m = \frac{m_0}{(1 - V^2)^{1/2}}$. Guess where to put the missing c.

Watch Video Solution

59. A man wlaking briskly in rain with speed v must slant his umbrella forward making an angle θ with the vertical . A student derives the following relation between θ and v :

$\tan \theta = v$

and checks that the relations has a correct limit : as $v \to 0, \theta \to 0$, as expected . (We are assuming there is no string wing and that the rains

falls vertically for a stationary man). Do you think this relation can be correct ? If not, guess at the correct relation .

Watch Video Solution

60. Derive an expression for time period (t) of a simple penduleum, which may depend upon : mass of bob (m), length of pendulum (I) and acceleration due to gravity(g).

Watch Video Solution

61. The velocity of water wave v may depend on their wavelength λ, the density of water ρ and the acceleration due to gravity g. The method of dimensions gives the relation between these quantities as

Watch Video Solution

62. The time period 'T' of a body executing SHM may be supposed to depend upon (i) the amplitude 'A' , (ii) the force constant 'k' and (iii) the mass 'm' . Deduce by the method of dimensions the formula for T.

Watch Video Solution

63. Assuming that the mass m of the largest stone that can be moved by a flowing river depends upon the velocity v, of water, its density ρ and acceleration due to gravity g, then m is directly proportional to

Watch Video Solution

64. The velocity of sound waves 'v' through a medium may be assumed to depend on :

(i) the density of the medium 'd' and (ii) the modulus of elasticity 'E' .

Deduce by the method of dimensions the formula for the velocity of sound . Take dimensional constant K=1.

Watch Video Solution

Watch Video Solution

65. The frequency of vibration (v) of a string may depend upon length (I) of the string, tension (T) in the string and mass per unit length (m) of the string. Using the method of dimensions, derive the formula for v.

Watch Video Solution

66. A planet moves around the sun in nearly circular orbit. Its period of revolution 'T' depends upon :

(i) radius 'r' or orbit (ii) mass 'M' of the sum and

(iii) the gravitational constant G.

Show dimensionally that $T^2 \propto r^2$.

Watch Video Solution

67. Reynold number N_R a dimensionless quantity determines the condition of laminar flow of a viscous liquied through a pipe. N_R is a

function of density ρ of liquid, average speed v and coeff. Of viscosity η. Given that $N_R \propto D$, diameter of pipe. Show by the method of dimensions that $N_R \propto \frac{\rho v D}{\eta}$

Watch Video Solution

68. Derive by the method of dimensions, an expression for the volume of a liquid flowing out per second through a narrow pipe. Asssume that the rate of flow of liwquid depends on

(i) the coeffeicient of viscosity η of the liquid

(ii) the radius 'r' of the pipe and

(iii) the pressure gradient $\frac{P}{l}$ along the pipte. Take $K = \frac{\pi}{8}$.

Watch Video Solution

69. The period of vibration of a tunign fork depends on the length I of its prong, density d and Young's modulus Y of the meterial. Deduce an expression for the period of vibration (T) using dimensional analysis.

Watch Video Solution

70. The frequency (V) of an oscillating drop may depends upon radius (r) of the drop density (ρ) of liquid and the surface tension (S) of the liquid. Deduce of formula dimensionally.

Watch Video Solution

71. The rate of volume of flow of water (V) through a canal is found to be a function of the area of cross section A of the canal and velocity of water v. Show that the rate of volume flow is proportional to the velocity of flow of water.

Watch Video Solution

72. The escape velocity v of a body depends upon the acceleration due to gravity of the planet and the radius of the planet R. Establish dimensionally the relationship between v, g and R.

Watch Video Solution

73. State the number of significant figures in the following:

(i) 453.5 (ii) 53,000,000 (iii) 400.08

(iv) 0.000243 (v) 0.0650 (vi) 2.43×10^5

Watch Video Solution

74. State the number of significant figures in the following:

(i) $0.007m^2$ (ii) $2.64 \times 10^{24}kg$ (iii) $0.2370cm^{-3}$

(iv) 6.320J (v)$6.032nM^{-2}$ (vi) 0.0006032

(vii) 2.000m (viii) 5100kg (ix) 0.050cm.

Watch Video Solution

75. Round off the following numbers as indicated:

(i) 18.35 upto 3 digits (ii) 143.45 upto 4 digits

(iii) 18967 upto 3 digits (iv) 12.653 upto3 digits

(v) 248337 upto 3 digits (vi) 321.135 upto 5 digits

(vii) 101.55×10^{6}upto 4 digits (viii) $31.325 \times x10^{-5}$upto 4 digits.

Watch Video Solution

76. Add 7.21, 12.41 and 0.0028, and express the result the rsult to an appropriate number of significant figures.

Watch Video Solution

77. Subtract 4.27153 from 6.807 and express the result to an appropriate number of significant figures.

Watch Video Solution

78. Subtract 2.5×10^{4}from3.9×10^{5} with due regard to significant figures.

Watch Video Solution

79. Subtract $2.5 \times 10^6 \text{from} 4.0 \times 10^4$ with due regard to significant figures.

Watch Video Solution

80. Express the result of the following calcultaeion to an appropriate number of significant figures:

(i) 943.0.00345 (ii) $\frac{3.24 \times 0.08666}{5.006}$.

Watch Video Solution

81. Solve the following and express the result to an appropriate number of significant figures:

(i) Add 6.2g, 4.33g, and 17.456g.

(ii) Subtract 63.54kg, from 187.2kg. (iii) 75.5 xx 125.2 xx 0.51.

(iv) $\frac{2.13 \times 24.78}{458.2}$ (v) $\frac{2.51 \times 10^{-4} \times 1.81 \times 10^7}{0.4463}$

Watch Video Solution

82. The mass of a box measured by a grocer's balance is 2.300kg. Two gold pieces of masses 20.15 g and 20.17 g are added to the box. What is (a) the total mass of the box, (b) the difference in the masses of the pieces to correct significant figures?

Watch Video Solution

83. Each side of a cube is measured to be 6.203m. What is the total surface area and volume of the cube to appropriate significant figures?

Watch Video Solution

84. The length , breath and thickness of a metal sheet are $4.234m$, $1.005m$, and $2.01cm$ respectively then the volume of the sheet is

Watch Video Solution

85. The diameter of circle is 1.06m. Calculate the area enclosed by the circle in correct number of significant figures.

Watch Video Solution

86. The radius of a sphere is 1.41. its volume to an appropring number of significant figure is

Watch Video Solution

87. The length and the radius of a cylinder measured with a slide cllipers re found to be 4.54 cm and 1.75 cm respectively. Calculate the volume of the cylinder.

Watch Video Solution

88. The mass of a body is 275.32g and its volume $is 36.41 cm^3$. Express its density upto appropriate significant figures.

Watch Video Solution

89. The radius of the earth is $6.37 \times 10^6 m$ and its mass is $5.975 \times 10^{24} kg$. Find the earth's average density to approopriate significant figures.

Watch Video Solution

90. The length of a rod as measured in an experiment was found to be 2.48m, 2.46 m, 2.49 m, 2.50 m and 2.48m. Find the average length, absolute arror in each observation and the percentage error.

Watch Video Solution

91. In successive measurement, the reading of the period of oscillation of a simple pendulum were found to be 2.63s, 2.56s, 2.71s and 2.80s in an experiment. Calculate (i) mean value of the period oscillation (ii) absolute errer in each measurement (iii) mean absolute error (iv) releative error (v) percentage error and (vi) express the result in proper form.

Watch Video Solution

92. In an experiment the refractive index of glass was observed to be $1.45, 1.56, 1.54, 1.44, 1.54, \text{ and } 1.53$. Calculate

(a). Mean value of refractive index

(b). Mean absolute error

(c) Fractional error

(d) Percentage error

(e) Express the result in terms of absolute error and percentage error

Watch Video Solution

93. Two resistance $R_1 = 100 \pm 3\Omega$ and $R_2 = 200 \pm 4\Omega$ are connected in seriesg. What is their equivalent resistance?

Watch Video Solution

94. Two differences masses are determined as (23.7 ± 0.5) g and $(17.6 \pm 0.3)g$. What is the sum of their masses?

Watch Video Solution

95. The initial and final temperatures of a water bath are $(18 \pm 0.5).^\circ C$ and $(40 \pm 0.3).^\circ C$. What is the rise in temperature of the path

Watch Video Solution

96. A capacitor of capacitance $(2.0 \pm 0.1)\mu F$ is charged to a voltage V= $(2.0 \pm 0.2)\text{volt}$. What will be the charge on the capcitor?

Watch Video Solution

97. The length and breadth of a rectangular block are 25.2 cm and 16.8 cm, which have both been measurd to an accurancy of 0.1 cm find the area of the rectangular block.

Watch Video Solution

98. A force of (2500 ± 5)N is applied over an area of $(0.32 \pm 0.02)m^2$ Calculate the pressure exerted over the area.

Watch Video Solution

99. The resistance $R = \frac{V}{I}$, whereV=$100 \pm 5V$ and $I = 10 \pm 0.2A$. The pressure error in V is 5% and in I is 2%. What is the total percentage error in R?

Watch Video Solution

100. If the error involved in the measurement of mass and length of one side of a cube are 4% and 3% respectively. What is the maximum permissible relative error in calculation of density of meterail of the cube?

Watch Video Solution

101. The error in the measurement of radius of a sphere of radius of a sphere is 2%. What would bet the volume of sphere?

Watch Video Solution

102. The percentage errors in the measurement of mass and speed are 2% and 3%, respectively. How much will be the maximum error in the estimation of KE obtained by measuring mass and speed?

Watch Video Solution

103. the length, breadth and heigth of a rectangular block of wood wre measured to be :

$l = 12.13 \pm 0.02cm, b = 8.16 \pm .01cm, h = 3.46 \pm 0.01cm$

Determine the percentage error in the volume of the block.

Watch Video Solution

104. To find the value of 'g' by using a simple pendulum, the following observations were made: Length of the thread, $I = (100 \pm 0.1)cm$ Time period of oscillation, $T = (2 \pm 0.1)s$ Calculate the maximum permissible in measurement of 'g' which quanitiy should be measured more accurately and why ?

Watch Video Solution

105. A physcial quantity P is realted to four observables a, b, c and d as follows : $P = a^3b^2 / \left(\sqrt{c}d\right)$ The percentage errors of measurement in a, b,c, and d are 1 % 3%, 4% and 2%, respectively. What is the percentage error in the quantity P ? If the value of P calculate using the above relation turns out to be 3.763, to what value should you round off the result ?

Watch Video Solution

106. In an experiment , the following observations were recorded:

$L = 2.820m, M = 3.00kg, l = 0.087cm, diameter, D = 0.041cm.$

Taking $g = 9.81ms^{-2}$ and using the formula , $Y = \frac{4MgL}{\pi D^2 l}$, find the maximum permissible error in Y.

Watch Video Solution

107. The specific resistance ρ of a thin wire of radius r cm, resistance R ohm and length L is given by $\rho = \frac{\pi r^2 R}{L}$. $IfL = 78 \pm 0.01cm$ $r = 0.26 \pm 0.02$ and $R = 32 \pm 1\Omega$, What is the percentage error in ρ?

Watch Video Solution

108. 108 . If two resistors of resistances $R_1 = (4 \pm 0.5)\Omega$ and $R_2 = (16 \pm 0.5)\Omega$ are connected (i) in series and (ii) in parallel, find the equivalent resistance in each case with limits of percentage error.

135. State the law of conservation of linear momentum. Give some examples in which this law is obeyed.

Watch Video Solution

136. State the law of conservation of angular momentum. Give some examples in which this law is obeyed.

Watch Video Solution

137. State the law of conservation of charge. Give some examples in which this law is obeyed.

Watch Video Solution

138. Are conservation of mass and conservation of mechanical energy fundamental laws of nature?

Watch Video Solution

139. Why do we call Physics an exact science?

Watch Video Solution

140. Why is physics regarded as basic science?

Watch Video Solution

141. Why was science called natural philosophy in earlier days?

Watch Video Solution

142. Should a scientific discovery which has nothing but dangerous consequences for mankind be made public?

Watch Video Solution

143. Does imagination play any role in Physics?

Watch Video Solution

144. What is gravitational force?

Watch Video Solution

145. What is electromagnetic force?

Watch Video Solution

146. What is nuclear force?

Watch Video Solution

147. Discuss the relation of physics to chemistry.

Watch Video Solution

148. PHYSICS AND TECHNOLOGY

Watch Video Solution

149. What is the role of physics in your daily life?

Watch Video Solution

150. Some of the most profound statements on the nature of science have come from Albert Einstein, one of the greatest scientist of all time. What do you think did Einstein mean when he said : "The most incomprehensible thing about the world is that it is comprehensible"?

Watch Video Solution

151. 'Every great physical theory starts as a heresy and ends as a dogma". Give some examples from the history of science of the validity of this incisive remark.

Watch Video Solution

152. It is often said that the world is witnessing now a second industrial revolution, Which will transform the society as radically as did the first. List some key contemporary area of science and technology, which are responsible for this revolution.

153. Science, like any knowledge, can be put to good or bad use, depending on the user. Given below are some of the applications of science. Formulate your views on whether the particular application is good, bad or something that cannot be so clearly categorised :

Mass vaccination against small pox to curb and finally eradicate this disease from the population. (This has already been successfully done in India).

(b) Television for eradication of illiteracy and for mass communication of news and ideas.

(c) Prenatal sex determination

(d) Computers for increase in work efficiency

(e) Putting artificial satellites into orbits around the Earth

(f) Development of nuclear weapons

(g) Development of new and powerful techniques of chemical and biological warfare).

(h) Purification of water for drinking

(i) Plastic surgery

(f) Cloning

Watch Video Solution

162. Though the law gives women equal status in India, many people hold unscientific views on a woman's innate nature, capacity and intelligence, and in practice give them a secondary status and role. Demolish this view using scientific arguments, and by quoting examples of great women in science and other spheres, and persuade yourself and others that, given equal opportunity, women are on par with men.

Watch Video Solution

163. Textbooks on science may give you a wrong impression that studying science is dry and all too serious and that scientists are absent-minded introverts who never laugh or grin. This image of science and scientists is patently false. Scientists, like any other group of humans, have their share of humorists, and many have led their lives with a great sense of fun and adventure, even as they seriously pursued their scientific work. Two great

physicists of this genre are Gamow and Feynman. You will enjoy reading their books listed in the Bibliography.

Watch Video Solution

164. "The task of science is both to extend the range of our experience and to reduce it to order." This statement was made by the scientist

A. Albert Einstein

B. Issac Nbewton

C. Bertrand Russel

D. Niels Bohr

Answer:

Watch Video Solution

165. Electrons were discovered by

A. E. Rutherford

B. J.J. Thomson

C. G.P.Thomson

D. W.H. Bragg

Answer:

Watch Video Solution

166. The man responsible for the discovery of nucleus in an atom was

A. Faraday

B. Rutherford

C. Chadwick

D. Bohr

Answer:

Watch Video Solution

167. The physicist who unified electromagnetism and optics was

A. James Clerk Maxwell

B. Albert Einstein

C. Abdus Salam

D. Issac Newton

Answer:

Watch Video Solution

168. Law of conservation of angular momentum

A. Homogeneity of time

B. Homogenerity of space

C. Isotropy of space

D. None of these

Answer:

Watch Video Solution

169. What type of intermolecular attractive interaction exits in the pair of methanol and acetone

Watch Video Solution

170. Should a scientific discovery which has nothing but dangerous consequences for mankind be made public?

Watch Video Solution

Exercise

1. Origin of the word 'Science' is from

Watch Video Solution

2. What is the basic aim of science?

Watch Video Solution

3. What is the difference between physical and biological sciences?

Watch Video Solution

4. What is Physics?

Watch Video Solution

5. Origin of the word 'Physics' is from

Watch Video Solution

6. Name two Indian physicists who have won Noble Prize in Physics.

Watch Video Solution

7. Who discovered X-rays ?

Watch Video Solution

8. Who discovered electron?

Watch Video Solution

9. In Bohr 's model of the hydrogen atom

Watch Video Solution

10. Name the scientists responsible for the development of quantum mechanics.

Watch Video Solution

11. Who first gave the concept of antiparticle ?

Watch Video Solution

12. Name the scientist who won twice the Nobel Prize in Physics.

Watch Video Solution

13. Name two Indian physicists who have won Noble Prize in Physics.

Watch Video Solution

14. What is the discovery of CV Raman?

Watch Video Solution

15. Name the strongest fundamantal force.

Watch Video Solution

16. Name the weakest fundmental force in nature.

Watch Video Solution

17. Write the names of the four fundamental forces in nature.

Watch Video Solution

18. The law of conservation of energy states that, _____ .

Watch Video Solution

19. State the law of conservation of liner momentum.

Watch Video Solution

20. Law of conservation of angular momentum

Watch Video Solution

21. Explain the law of conservation of charge with the help of a suitable example.

Watch Video Solution

22. The scope of physics covers almost

Watch Video Solution

23. Which of the following forces is not fundamental force in nature ?

Watch Video Solution

24. A thought experiment in Physics is one which is

A. which is theoretically possible but experimentally not feasible.

B. which is neither theoretically nor experimentally fesible.

C. which is performed by non-physicist.

D. none of the above.

Answer:

Watch Video Solution

25. The most incomprehensible thing about the world is that it is comprehensible. 'Who made these remarks? Given some evidence in

support of it.

A. Aristotle

B. Newton

C. Galileo

D. Einstein.

Answer:

Watch Video Solution

26. The country, which awards the prestigious Nobel prize is

A. U.S.A.

B. U.K.

C. Sweden

D. France.

Answer:

Watch Video Solution

27. Name two Indian physicists who have won Noble Prize in Physics.

A. Sir J.C.Bose

B. H.J.Bhaba

C. M.N. Saha

D. Sir C.V. Raman.

Answer:

Watch Video Solution

28. Name the scientist who won twice the Nobel Prize in Physics.

A. Einstein

B. Bardeen

C. Heisenberg

D. Faraday.

Answer:

Watch Video Solution

29. Madam Marie Curie won Nobel Prize twice which were in the field of

A. Physics and chemistry

B. Chemistry only

C. Physics only

D. Biology only.

Answer:

Watch Video Solution

30. The value of universal gravitational constant 'G' was first experimentally determined by

A. Newton

B. Galileo

C. Kelvin

D. Cavendish.

Answer:

Watch Video Solution

31. Charge on an electron was first dertermined by:

A. Millikan

B. Bohr

C. Thomson

D. Rutherford.

Answer: A

Watch Video Solution

32. J.D. Van der Walls discovered equation of gases and liquids. He was a

A. English scientist

B. French scientist

C. Dutch scientist

D. German scientist.

Answer:

Watch Video Solution

33. X-rays were discovered by

A. Coolidge

B. Roentgen

C. Maxwell

D. Fermi.

Answer:

Watch Video Solution

34. Working of Aeroplane

A. Newton's thrid law of motion

B. Bernoulli's principle

C. Newton's law of gravitation

D. Law of conservation of momentum

Answer:

Watch Video Solution

35. Chandrasekhar, an America based Indian scientist was awarded Nobel prize in physics on the subject covering

A. Geophysics

B. Astronomy

C. Superconductivity

D. Laser Technology.

Answer:

Watch Video Solution

36. The phenomenon of radioactivity was discovered by

A. Chadwick

B. Rutherford

C. Becquerel

D. Roentgen

Answer:

Watch Video Solution

37. Abdus Salam, an America based Pakistani physicist won Nobel Prize in

A. Inelastic scttering of light by molecules

B. Unification of weak and electromagnetic forces

C. Super conductivity

D. Laser Technology.

Answer:

Watch Video Solution

38. Viroids were discovered by

A. Fermi

B. Yukawa

C. Dirac

D. Chadwick.

Answer:

Watch Video Solution

39. Louis do-Broglie is credited for his work on

A. Theory of relativity

B. Electromagnetic theory

C. Matter waves

D. Law of distribution of velocities.

Answer:

Watch Video Solution

40. The country to which de-Broglie belongs to

A. Germany

B. England

C. France

D. America.

Answer:

Watch Video Solution

41. Lightning was discovered by

A. Faraday

B. Franklin

C. Ohm

D. Edison.

Answer:

Watch Video Solution

42. The man who is known as the Father of Experimental Physics is :

A. Newton

B. Albert Einstein

C. Galileo

D. Rutherford.

Answer:

Watch Video Solution

43. The person who has beeen awarded the title of the Father of Physics of 20th Century is

A. Madame Curie

B. Sir C.V. Raman

C. Neils Bohar

D. Albert Einstein.

Answer:

Watch Video Solution

44. It has been postulated that there may be some particles moving with speed greater than the speed of light. Such particles are known as

A. Electrons

B. Neutrons

C. Nucleons

D. Tachyons.

Answer:

Watch Video Solution

45. The book "Pisces of Physics" has been written by

A. Einstein

B. Newton

C. Archimedes

D. Galileo.

Answer:

Watch Video Solution

46. Sir C.V. Raman was awarded Nobel Prize for his work on :

A. dispersion of light

B. reflection oflight

C. defelction of light

D. scattering of light.

Answer:

Watch Video Solution

47. The idea of calculus was given by

A. Newton

B. Einstein

C. Marconi

D. Planck.

Answer:

Watch Video Solution

48. Which of the following principles is being used in Sonar Technology?

A. Reflection of ultrasonic waves

B. Newton's laws of motion

C. Reflection of electromagnetic waves

D. Laws of thermodynamics

Answer:

Watch Video Solution

49. Following process is known as $hv \rightarrow e^{+} + e^{-}$

A. Pair production

B. Photoelectric efffect

C. Compton effect

D. Zeeman effect

Answer:

Watch Video Solution
