

BIOLOGY

NEET & AIIMS

Mock test 34

Example

1. The correct order of different RNAs w.r.t. their lengths is

A. mRNA gt tRNA gt rRNA

B. mRNA gt rRNA gt tRNA

C. tRNA gt rRNA gt mRNA

D. tRNA gt mRNA gt rRNA

Answer: B

Watch Video Solution

2. The expressed sequences in processed RNA are called

A. HnRNA

B. Snurps

C. Sense strands

D. Exons

Answer: D

Watch Video Solution

3. A transcription unit is defined by three regions in DNA as

A. Promoter, terminator and inducer

B. Promoter, structural gene and terminator

C. Inducer, Structural gene and Operator

D. Promoter, Operator and Structural gene

Answer: B

Watch Video Solution

4. In transcription unit, the promoter sequence is located

A. Towards 5' end upstream of the structural gene

B. Towards 5' end downstream of the structural gene

C. Towards 3' end upstream of the structural gene

D. Towards 3' end downstream of the coding strand

Answer: A

Watch Video Solution

5. The Terminator in transcription unit is located at

A. 3' end downstream of the coding strand

B. 5' end downstream of the coding strand

C. 5' end upstream of the coding strand

D. 3' end upstream of the coding strand

Answer: A

Watch Video Solution

6. Selected the correct option

A. Genes are located on DNA and protein

B. Gene is the functional unit of inheritance

C. A segment of DNA coding for a polypeptide is called a cistron

D. Both (2) and (3)

Answer: D

View Text Solution

7. Which is mismatched?

A. RNA Polymerase I - 18S rRNA synthesis

B. RNA Polymerase II - HnRNA synthesis

C. RNA Polymerase III - ScRNA synthesis

D. RNA Polymerase II - 5.8S rRNA synthesis

Answer: D

View Text Solution

8. _____ play structural and catalytic role during translation.

A. tRNAs

B. rRNAs

C. mRNAs

D. DNA Polymerase

Answer: B

Watch Video Solution

9. Small nuclear RNA is transcribed by

A. RNA Polymerase I

B. RNA Polymerase III

C. RNA Polymerase II

D. Both (1) and (3)

Answer: B

Watch Video Solution

10. In eukaryotes, RNA Polymerase III transcribes

A. tRNA

B. 18S rRNA

C. 5S rRNA

D. Both (1) and (3)

Answer: D

Watch Video Solution

11. In capping, _____ is added to 5' end of _____

A. Unusual nucleotide, rRNA

B. Methyl guanosine triphosphate, hnRNA

C. Guanosine monophosphate, hnRNA

D. Unusual nucleotide, tRNA

Answer: B

Watch Video Solution

12. In tailing, about _____ adenylate residues are added at 3' -end in a template independent manner on hnRNA

A. 1000 – 2000

B. 10 – 15

C. 200 – 300

D. 3000 – 3500

Answer: C

Watch Video Solution

13. During RNA splicing, which one of the following is removed?

A. Primary transcripts

B. Exons

C. Introns

D. Both (2) and (3)

Answer: C

Watch Video Solution

14. Which one of the following factors is not a part of prokaryotic RNA Polymerase?

A. beeta

B. alpha

C. sigma

D. rho

Answer: D

Watch Video Solution

15. Who coined the term 'genetic code'?

A. H.G. Khorana

B. Marshall Warren Nirenberg

C. George Gamow

D. Shine Dalgarno

Answer: C

View Text Solution

16. Which genetic codon has dual functions?

A. UUU

B. AUG

C. UGG

D. Both (1) and (3)

Answer: B

Watch Video Solution

17. Select the incorrect option w.r.t. salient features of genetic code.

A. One codon overlaps the next codon

B. The code is nearly universal

C. The codon is read in mRNA in a contiguous fashion

D. The codon is triplet

Answer: A

Watch Video Solution

18. Select the ambiguous codon

A. GUG

B. AUG

C. UUU

D. AAG

Answer: A

Watch Video Solution

19. DHU loop in tRNA is referred as

A. Aminocyl synthesis binding loop

B. Ribosomal binding loop

C. Anticodon loop

D. Both (2) and (3)

Answer: A

Watch Video Solution

20. For prokaryotic, select the incorrect option w.r.t. recognition sequence present at the promoter region for binding of RNA Polymerase.

- A. Pribnow box
- B. Hogness box
- C. CAAT box
- D. All except (1)

Answer: D

Watch Video Solution

21. Select odd one w.r.t. rRNA found in eukaryotes.

A. 18 S

B. 5 S

C. 16 S

D. 5.8 S

Answer: C

Watch Video Solution

22. Statement A: All tRNA molecules have a guanine residue at its 5' terminal end.

Statement B: There are several tRNAs for stop codons.

A. Statement A is correct and Statement B is incorrect

B. Both the statement A and statement B
are incorrect

C. Both the statement A and statement B
are correct

D. Statement A is incorrect and Statement
B is correct

Answer: A

View Text Solution

23. Out of 64 codons, how many of them code for stop signal?

A. 3

B. 2

C. 5

D. 4

Answer: A

Watch Video Solution

24. Which of the following mutations prove(s) that codon is a triplet and it is read in a contiguous manner?

- A. Frame - shift insertion mutation
- B. Frame- shift deletion mutation
- C. Substitution mutation
- D. Both (1) and (2)

Answer: D

Watch Video Solution

25. The genetic code is

- A. Specific, unambiguous and degenerate
- B. Ambiguous, specific and degenerate
- C. Triplet, universal and non-degenerate
- D. Universal, ambiguous and non-degenerate

Answer: A

Watch Video Solution

26. Which of the following structure of adapter molecule looks like a clover leaf?

A. Secondary

B. Tertiary

C. Primary

D. Quaternary

Answer: A

Watch Video Solution

27. The concept of "Biological species " was proposed by :

A. Davis and Heywood(1963)

B. Mayr(1942)

C. Simpson(1961)

D. Professor A.D. Bradshaw

Answer: B

Watch Video Solution

28. Which of the following can produce fertile hybrids in captivity?

- A. *Panthera leo* and *Panthera tigris*
- B. Mallard and the Pintail Duck
- C. Polar bear and Alaskan brown bear
- D. All of these

Answer: D

Watch Video Solution

29. Which of the following is the basic unit of classification?

A. Individual

B. Population

C. Species

D. genus

Answer: C

Watch Video Solution

30. If two species have different flowering time, this is known as

- A. Ecological isolation
- B. Temporal isolation
- C. Behavioural isolation
- D. Gametic isolation

Answer: B

Watch Video Solution

31. Correct the match

A. Devonian — Seed fern

B. Triassic — Cycads, conifers, ferns

C. Carboniferous — Reptiles

D. Silurian — Dicotyledons

Answer: C

View Text Solution

32. Choose the correct sequence of evolution of plants

A. Rhynia to Psilophyton to

Progymnosperm to Seed fern

B. Rhynia to Psilophyton to Seed fern to

Progymnosperm

C. Progymnosperm to Rhynia to

Psilophyton to seed fern

D. Progymnosperm to Psilophyton to
Rhynia to Seed fern

Answer: A

Watch Video Solution

33. Choose the correct statement

A. Invertebrates evolved about 700 mya

B. Jawless fishes probably evolved about
500 mya

C. The lobe fin fishes like Coelacanth are thought to have evolved into the first amphibians

D. First eukaryotic probably evolved one billion year ago

Answer: C

View Text Solution

34. Which is considered as the common ancestor of apes and man?

A. Shivapithecus

B. Homo habilis

C. Australopithecus

D. Dryopithecus

Answer: D

Watch Video Solution

35. Which of the following human ancestor started the use of fire?

A. First Ape-man

B. Handy man

C. Java ape man

D. Neanderthal man

Answer: C

Watch Video Solution

36. Choose the correct statement w.r.t.

Australopithecus africanus

A. It had a height of about 1.5 meters

B. Quadrapedal locomotion

C. Only vegetarian food habit

D. Raymond Dart (1924) discovered to the

fossil from pliocene rocks near Tuang in

Heidelberg, Germany

Answer: A

[Watch Video Solution](#)

37. Which of the following was first human like ancestor?

A. Australopithecus afarensis

B. Homo erectus

C. Homo habilis

D. Homo sapiens

Answer: C

[Watch Video Solution](#)

38. Read the following (a) Discovered by L.S.B. Leaky (b) Probably did not eat meat (c) Was capable of making tool (d) Started community life in caves The above features are of

A. Homo habilis

B. Australopithecus

C. Sinanthropus pekinesis

D. Homo sapiens

Answer: A

[Watch Video Solution](#)

39. Choose the incorrect match

A. Peking man — W.C. Pei

B. Neanderthal man — C. Fuhlrott

C. Java ape man — Eugene Dubois

D. Cro-magnon man — Mary Leaky

Answer: D

[View Text Solution](#)

40. Cro-magnon man emerged about

A. 34000 years ago in Pleistocene epoch

B. 25000 years ago in Pleistocene epoch

C. 1500 years ago in Pleistocene epoch

D. 34000 years ago in Holocene epoch

Answer: D

Watch Video Solution

41. Origin of human started in

A. Asia

B. South America

C. Africa

D. India

Answer: C

Watch Video Solution

42. Lock jaw is a characteristic feature of which of the following disease?

A. Tetanus

B. Leprosy

C. Cholera

D. Bubonic plague

Answer: A

Watch Video Solution

43. Which of the following disease is not caused by RNA virus?

A. Measles

B. Dengue

C. Poliomyelitis

D. Chicken pox

Answer: D

Watch Video Solution

44. Assertion : Chicken pox is a mild disease however it leaves scars and marks.

Reason : Chicken pox results in rashes which appear first on face and spread on stomach and chest later.

A. both assertion and reason are true and reason is correct for assertion

B. both assertion and reason are true and reason is not correct for assertion

C. assertion is true but reason is false

D. both assertion and reason are false

Answer: D

Watch Video Solution

45. Which of the following is an incorrect match between virus, genome and its mode of transmission?

A. Hepatitis A virus — ss RNA — Fecal-oral route

B. Hepatitis B virus — ds RNA — Sexual
contact

C. Polio virus — ss RNA — Fecal-oral route

D. Paramyxovirus — ss RNA — Saliva of
infected person

Answer: B

Watch Video Solution

46. Which of the following is not a viral disease?

A. Chikungunya

B. Hepatitis-B

C. Mumps

D. Hansen's Disease

Answer: D

Watch Video Solution

47. Which of the following is correct statement?

A. Mumps is a bacterial infection which causes swelling in parotid glands

B. Widal test is used for confirmation of infection by *Salmonella typhi*

C. Koch's disease is mainly caused by toxin tuberculin which is released by *Yersinia pestis*

D. Polio is caused by ds RNA virus which infect the CNS

Answer: B

Watch Video Solution

48. In which of the following infection occur in alveoli of the lungs?

A. Rhinitis

B. Pneumonia

C. Common cold

D. Both (2) and (3)

Answer: B

Watch Video Solution

49. Which of the following is not included in symptoms of tuberculosis?

A. Sputum containing blood

B. Excessive fatigue

C. Night sweating and rapid pulse

D. Appearance of red patches on skin which turn black and ultimately leads to death

Answer: D

Watch Video Solution

50. Among the following diseases Poliomyelitis, Chikungunya, Hansen's disease, cholera, Mumps, Hepatitis A. How many of the above, mentioned disease is caused by virus?

A. 6

B. 3

C. 4

D. 2

Answer: C

Watch Video Solution
