

## BIOLOGY

### BOOKS - MTG BIOLOGY (ENGLISH)

### BIODIVERSITY & CONSERVATION

#### Mcq S

1. The term biodiversity is popularised by-

- (a) Odum
- (b) Paul Ehrlich
- (c) Edward Wilson
- (d) Tilman

A. Odum

B. Paul Ehrlich

C. Edward Wilson

**Answer: C**

**Watch Video Solution**

2. Genetic variations affect the production of the drug reserpine in the medicinal plant *Rauwolfia vomitoria* growing in different Himalayan ranges. What kind of diversity does it indicate ?

- (a) Species diversity
- (b) Genetic diversity
- (c) Ecological diversity
- (d) None of these

- A. Species diversity
- B. Genetic diversity
- C. Ecological diversity
- D. None of these

**Answer: B**

**Watch Video Solution**

3. In India, we find mangoes with different flavours, colours, fibre content , sugar content and even shelf-life. The large variation is on account of

- (a) Species diversity
- (b) Induced mutations
- (c) Genetic diversity
- (d) Hybridisation

A. species diversity

B. induced mutations

C. genetic diversity

D. hybridisation

**Answer: C**

**Watch Video Solution**

4. Study the given populations and choose the correct answer in relation to species diversity.

Population	Species	Group	Individuals
Population A	I	Mammals	3
	II	Birds	2
	III	Amphibians	2
Population B	I	Mammals	2
	II	Mammals	2
	III	Amphibians	1
Population C	I	Mammals	3
	II	Mammals	2
	III	Mammals	1

- A.

Maximum diversity  
Population B

Minimum diversity  
Population C
- B.

Maximum diversity  
Population A

Minimum diversity  
Population C
- C.

Maximum diversity  
Population A

Minimum diversity  
Population B
- D.

Maximum diversity  
Population B

Minimum diversity  
Population A

Answer: B

[View Text Solution](#)

5. Western ghats have a greater number of amphibian species than the Eastern ghats. What kind of diversity does it represent ?

- (a) Species diversity
- (b) Genetic diversity
- (c) Ecological diversity
- (d) None of these

- A. Species diversity
- B. Genetic diversity
- C. Ecological diversity
- D. None of these

**Answer: A**

[Watch Video Solution](#)

6. India has a greater ecosystem diversity than a Scandinavian country like Norway. What kind of diversity does it represent?

- A. Species diversity
- B. Ecological diversity
- C. genetic diversity
- D. None of these

**Answer: B**

**Watch Video Solution**

7. The diversity of organisms sharing the same habitat or community is termed as

- (a) alpha diversity
- (b) beta diversity
- (c) gamma diversity
- (d) delta diversity

- A. alpha diversity
- B. beta diversity
- C. gamma diversity
- D. delta diversity

**Answer: A**

**Watch Video Solution**

8. Identify different types of diversity by 1,2 and 3 in the given figure.

- |    |                 |                 |                 |
|----|-----------------|-----------------|-----------------|
|    | 1               | 2               | 3               |
| A. | Alpha diversity | Beta diversity  | Gamma diversity |
|    | 1               | 2               | 3               |
| B. | Gamma diversity | Alpha diversity | Beta diversity  |
|    | 1               | 2               | 3               |
| C. | Gamma diversity | Beta diversity  | Alpha diversity |
|    | 1               | 2               | 3               |
| D. | Beta diversity  | Alpha diversity | Gamma diversity |

Answer: D

View Text Solution

9. Alpha diversity is biodiversity present

- (a) within community
- (b) between communities
- (c) ranges of communities
- (d) none of these

A. within community

B. between communities

C. ranges of communities

D. none of these

**Answer: A**

**Watch Video Solution**

10. A more conservative and scientifically sound estimate about the total number of species present on earth, was made by

- (a) Robert May
- (b) Paul Ehrlich
- (c) David Tilman
- (d) Both A and B

- A. Robert May
- B. Paul Ehrlich
- C. David Tilman
- D. Both A and B

**Answer: A**

**Watch Video Solution**

**11.** What is the total number of species present on earth as estimated by Robert May ?

- (a) 3 million
- (b) 5 million

(c) 7 million

(d) 9 million

A. 3 million

B. 5 million

C. 7 million

D. 9 million

**Answer: C**

**Watch Video Solution**

**12.** Which of the following statements regarding the estimates of number of species found on earth is not correct ?

(a) Total number of species present on earth are considered to be about 7 million as estimated by Robert May.

(b) Plants constitute more than 70% of all the species recorded, whereas animals constitute less than 22% of the total number of species.

(c) Insects constitute more than 70% of all the animal species.

(d) None of these

A. Total number of species present on earth are considered to be about 7 million as estimated by Robert May.

B. Plants constitute more than 70 % of all the species recorded, whereas animals constitute less than 22 % of the total number of species.

C. Insects constitute more than 70 % of all the animal species.

D. None of these

**Answer: B**

**Watch Video Solution**

**13.** Which of the following are the phylum which is the largest (A) and second largest group (B)?

A. A=Insects, B=Molluscs

B. A = Molluscs, B = Insects

C. A = Insects, B = Annelids

D. A = Molluscs, B = Annelids

**Answer: A**

**Watch Video Solution**

**14.** The given pie diagram represents the proportionate number of species of major taxa of vertebrates. Identify the group A and B.

A. A = Reptiles, B = Birds

B. A - Fish, B-Birds

C. A-Birds, B - Fish

D. A-Birds, B-Reptiles

**Answer: B**

**View Text Solution**

**15.**

A. A - Bryophytes, B - Gymnosperms

B. A - Fungi, B - Gymnosperms

C. A - Fungi, B - Angiosperms

D. A - Algae, B - Angiosperms

**Answer: C**

**View Text Solution**

**16.** India constitutes\_\_\_\_\_percent of the world's land area and contributes\_\_\_\_\_percent of the global species diversity.

(a) 1.0, 5.5

(b) 5.5, 1.0

(c) 8.1, 2.4

(d) 2.4, 8.1

A. 1.0, 5.5

B. 5.5, 1.0

C. 8.1, 2.4

D. 2.4, 8.1`

**Answer: D**

**Watch Video Solution**

**17.** India is one of the 17 megadiversity countries of the world and is being divided into \_\_\_\_\_biogeographical regions.

(a) 8

(b) 10

(c) 16

(d) 18

A. 8

B. 10

C. 16

D. 18

**Answer: B**

**Watch Video Solution**

**18.** Which of the following groups does not include the countries which contribute to 12 megadiversity centres of the world?

(i) Mexico, Columbia, Brazil

(ii) Peru, Ecuador, Venezuela

(iii) Madegascar, Indonesia, Malaysia

(iv) China, Germany, Japan

(v) China, India, Australia

(a) (ii)

(b) (v)

(c) (iii)

(d) (iv)

A. (ii)

B. (v)

C. (iii)

D. (iv)

**Answer: D**

**Watch Video Solution**

**19.** Read the given statement and select the correct option.

Statement 1: Indian elephants (Elephan maximums) are confined to terai and the foothills.

Statement 2: Elephants are herbivores and require succulent grass and plenty of water.

(a) Both statement 1 and 2 are correct

(b) Statement 1 is correct but statement 2 is incorrect

(c) Statement 1 is incorrect but statement 2 is correct.

(d) Both statement 1 and 2 are incorrect.

A. Both statement 1 and 2 are correct

B. Statement 1 is correct but statement 2 is incorrect

C. Statement 1 is incorrect but statement 2 is correct.

D. Both statement 1 and 2 are incorrect.

**Answer: A**

**Watch Video Solution**

**20.** According to May's global estimates how many species of plants and animals, respectively, are yet to be discovered and described from India ?

(a) 50,000 and 90, 000

(b) 3,00,000 and 90,000

(c) 3,00,000 and 1,00,000

(d) 1,00,000 and 3,00,000

- A. 50,000 and 90, 000
- B. 3,00,000 and 90,000
- C. 3,00,000 and 1,00,000
- D. 1,00,000 and 3,00,000

**Answer: D**

**Watch Video Solution**

**21.** Species diversity\_\_\_\_\_as one moves from high to low altitudes.

- (a) increase
- (b) decreases
- (c) first increases then decreases
- (d) first decreases then increases

- A. increase
- B. decreases
- C. first increases then decreases

D. first decreases then increases

**Answer: A**

**Watch Video Solution**

22. Species diversity\_\_\_\_\_as we move away from the \_\_\_\_\_towards\_\_\_\_\_.

(a) decreases, equator, poles

(b) increases, equator, poles

(c) decreases, poles, equator

(d) none of these

A. decreases, equator, poles

B. increases, equator, poles

C. decreases, poles, equator

D. none of these

**Answer: A**

**Watch Video Solution**

23. Tropics ( $23.5^{\circ} N$  to  $23.5^{\circ} S$ ) have\_\_\_\_\_species as compared to temperature or polar regions.

- (a) less
- (b) equal
- (c) more
- (d) none of these

A. less

B. equal

C. more

D. none of these

**Answer: C**

**Watch Video Solution**

**24.** Which of the following is a reason for the greater biological diversity of tropical regions ?

- (a) Tropical latitudes have remained almost undisturbed for millions of years.
- (b) Tropical environments are less seasonal, relatively more constant and predictable.
- (c) More solar energy is available in the tropics, resulting in high productivity.
- (d) All of these

A. Tropical latitudes have remained almost undisturbed for millions of years.

B. Tropical environments are less seasonal, relatively more constant and predictable.

C. More solar energy is available in the tropics, resulting in high productivity.

D. All of these

Answer: D

Watch Video Solution

25. Which option correctly describes the equation for curves A and B, in the given graph of species - area relationship ?

A.  $S = CA^z$        $\log S = \log C + Z \log A$

B.  $\log S = \log C + Z \log A$        $S = CA^z$

C.  $\log C = \log S + Z \log A$        $S = CA^z$

D.  $S = CA^z$        $\log C = \log S + Z \log A$

**Answer: A**

**Watch Video Solution**

**26.** On a logarithmic scale, the species area relationship is a straight line described by the equation  $\log S = \log C + Z \log A$ .

What does S, C, Z and A represent in the given equation? Select the correct answer from the codes given below.

Species richness = 1

Slope of the line = 2

Y-intercept = 3

Area = 4

a) 1 2 3 4

C S Z A

b) 1 2 3 4

S Z C A

c) 1 2 3 4

Z S C A

d) 1 2 3 4

A C S Z

- A. a) 

1	2	3	4
<i>C</i>	<i>S</i>	<i>Z</i>	<i>A</i>
- B. b) 

1	2	3	4
<i>S</i>	<i>Z</i>	<i>C</i>	<i>A</i>
- C. c) 

1	2	3	4
<i>Z</i>	<i>S</i>	<i>C</i>	<i>A</i>
- D. d) 

1	2	3	4
<i>A</i>	<i>C</i>	<i>S</i>	<i>Z</i>

**Answer: B**

**Watch Video Solution**

**27.** Fill in the blanks with the most appropriate option.

The value of  $z$  lies in the range of \_\_\_\_\_ regardless of the taxonomic group or the region.

- (a) 0.1 to 0.2
- (b) 0.3 to 0.8
- (c) 0.1 to 1.0
- (d) 0.6 to 1.8

**A. 0.1 to 0.2**

B. 0.3 to 0.8

C. 0.1 to 1.0

D. 0.6 to 1.8

**Answer: A**

**Watch Video Solution**

**28.** For frugivorous birds and mammals in the tropical forests of different continents the slope is found to be

(a) 0.6

(b) 1.3

(c) 1.15

(d) 1.7

A. 0.6

B. 1.3

C. 1.15

**Answer: C**

**Watch Video Solution**

**29.** Who confirmed communities with more species tend to be more stable than those with less species ?

- (a) Alexander von Humboldt
- (b) David Tilman
- (c) Paul Ehrlich
- (d) Edward Wilson

A. Alexander von Humboldt

B. David Tilman

C. Paul Ehrlich

D. Edward Wilson

**Answer: B**

[Watch Video Solution](#)

**30.** Character of a stable community is that it

- (a) should not show too much variations in year-to-year productivity
- (b) must be resistant to occasional natural or man-made disturbances
- (c) should be resistant to invasions by alien species
- (d) all of these

A. should not show too much variations in year-to-year productivity

B. must be resistant to occasional natural or man-made disturbances

C. should be resistant to invasions by alien species

D. all of these

**Answer: D**

[Watch Video Solution](#)

**31.** Keystone species deserve protection because these

- (a) are capable of surviving in harsh environmental conditions
- (b) indicate presence of certain minerals in the soil
- (c) have become rare due to overexploitation
- (d) play an important role in supporting other species

A. are capable of surviving in harsh environmental conditions

B. indicate presence of certain minerals in the soil

C. have become rare due to overexploitation

D. play an important role in supporting other species.

**Answer: D**

**Watch Video Solution**

**32.** Match column I with column II and select the correct option from the given codes.

Column I

A) Rivet Popper hypothesis

(i)

Column

Paul El

B) Long-term ecosystem experiments using outdoor plots

(ii)

David 5

C) Species-area relationships

(iii)

Alexan

(a) A-(iii), B-(i), C-(ii)

(b) A-(i), (ii), C-(iii)

(c) A-(i), B-(iii), C-(ii)

(d) A-(ii), B-(iii), C-(i)

A. A-(iii), B-(i), C-(ii)

B. A-(i), (ii), C-(iii)

C. A-(i), B-(iii), C-(ii)

D. A-(ii), B-(iii), C-(i)

**Answer: B**

**Watch Video Solution**

**33.** Rivert popper hypothesis was given by

(a) Paul Ehrlich

(b) Alexander von Humboldt

(c) David Tilman

(d) Robert May

A. Paul Ehrlich

B. Alexander von Humboldt

C. David Tilman

D. Robert May.

**Answer: A**

**Watch Video Solution**

**34.** Organisation responsible for maintaining Red Data Book is

(a) IUCN

(b) WWF

(c) CITES

(d) IBWL

A. IUCN

B. WWF

C. CITES

D. IBWL

**Answer: A**

**Watch Video Solution**

**35. Red Data Book deals with**

A. organisms on the verge of extinction

B. endemic plants

C. organisms showing photoperiodism

D. organisms that are extinct

**Answer: A**

**View Text Solution**

**36.** How many species are documented to be extinct in last 500 years by IUCN Red List, 2004?

A. 2000

B. 87

C. 567

D. 784

**Answer: D**

**View Text Solution**

**37.** According to IUCN, some of the extinctions include

(i) Dodo

(ii) Indian gazelle

(iii) Thylacine

(iv) Steller's sea cow

(a) (i), (ii), (iii) and (iv)

(b) (ii) and (iv)

(c) (i),(iii) and (iv)

(d) (iii) and (iv)

A. (i), (ii), (iii) and (iv)

B. (ii) and (iv)

C. (i),(iii) and (iv)

D. (iii) and (iv)

**Answer: C**

**Watch Video Solution**

**38.** Bali, Javan Caspian are

(a) species of tiger

(b) species of Cheetah

(c) subspecies of cheetah

(d) subspecies of tiger

- A. species of tiger
- B. species of Cheetah
- C. subspecies of cheetah
- D. subspecies of tiger

**Answer: D**

**Watch Video Solution**

**39.** Select the correct term for the following definitions (I,ii,iii,iv).

- (i) The taxon is liable to become extinct if not allowed to realise its full biotic potential by providing protection from exotic species/human exploitation/habitat deterioration/depletion of food.
- (ii) The taxon has been completely eliminated or died out from earth. e.g Dodo
- (iii) The taxon is facing a high risk of extinction in the wild in the near future due to decrease in its habitat, excessive predation or poaching.
- (iv) They are species with naturally small populations, either localised or

thinly scattered, which are always at risk from pests/pathogens/predators/exotic species.

- A. a) *(i)* *(ii)* *(iii)* *(iv)*  
Threatened Extinct Endangered Rare
- B. b) *(i)* *(ii)* *(iii)* *(iv)*  
Endangered Extinct Threatened Rare
- C. c) *(i)* *(ii)* *(iii)* *(iv)*  
Extinct Rare Threatened Endangered
- D. d) *(i)* *(ii)* *(iii)* *(iv)*  
Threatened Extinct Rare Endangered

**Answer: A**

**Watch Video Solution**

**40.** Antelope cervicapra (blackbuck) is

- (a) of least concern
- (b) Endangered
- (c) Critically endangered
- (d) Extinct in the wild.

A. of least concern

B. endangered

C. critical endangered

D. extinct in the wild.

**Answer: A**

**Watch Video Solution**

**41. A critically endangered animal is**

(a) Passenger pigeon

(b) Dodo

(c) Great Indian bustard

(d) Zebu

A. passenger pigeon

B. dodo

C. great Indian bustard

D. zebu

**Answer: C**

**Watch Video Solution**

**42.** Match column I with column II and select the correct option from the given codes.

Column I		Column II
<i>A</i> Beta diversity	( <i>i</i> )	Tropical areas
<i>B</i> Rich biodiversity	( <i>ii</i> )	Dodo
<i>C</i> Gamma diversity	( <i>iii</i> )	Between community diversity
<i>D</i> Extinct species	( <i>iv</i> )	Great Indian bustard
<i>E</i> Critically endangered species	( <i>v</i> )	Diversity of whole geographical r

A. 1) A-(iv), B-(i), C-(iii), D-(ii), E-(iv)

B. 2) A-(iii), B-(i), C-(v), D-(ii), E-(iv)

C. 3) A-(iii), B-(i), C-(v), D-(iv), E-(ii)

D. 4) A-(v), B-(i), C-(iii), D-(iv), E-(ii)

**Answer: B**

**Watch Video Solution**

**43.** The impact of loss of biodiversity includes

- (a) decline in plant production
- (b) lowered resistance to environmental perturbations
- (c) increased variability in ecosystem processes like plant productivity, water use, pest and disease cycles
- (d) all of these

A. decline in plant production

B. lowered resistance to environmental perturbations

C. increased variability in ecosystem processes like plant productivity, water use, pest and disease cycles

D. all of these

**Answer: D**

**Watch Video Solution**

**44.** Which of the following statements describe natural extinction ?

- (i) Extinctions abetted by human activities
- (ii) Slow replacement of existing species
- (iii) Also known as background extinction
- (iv) A small population is most likely to be extinct

- (a) (i) and (ii)
- (b) (i), (ii) and (iii)
- (c) (ii), (iii) and (iv)
- (d) (i), (ii), (iii) and (iv)

A. (i) and (ii)

B. (i), (ii) and (iii)

C. (ii), (iii) and (iv)

D. (i), (ii), (iii) and (iv)

**Answer: C**

**Watch Video Solution**

**45.** The term "the evil quartet" is related with four major causes of

- (a) Forest loss
- (b) Population explosion
- (c) Air pollution
- (d) Biodiversity losses

A. forest loss

B. population explosion

C. air pollution

D. biodiversity losses

**Answer: D**

**Watch Video Solution**

**46.** Read the given statement and select the correct option.

Statement 1: Tropical rainforests are disappearing fastly from developing countries such as India.

Statement 2 : No value is attached to these forests because these are poor in biodiversity.

- (a) Both statement 1 and 2 are correct
- (b) Statement 1 is correct but statement 2 is incorrect
- (c) Statement 1 is incorrect but statement 2 is correct
- (d) Both statement 1 and 2 are incorrect.

- A. Both statement 1 and 2 are correct
- B. Statement 1 is correct but statement 2 is incorrect
- C. Statement 1 is incorrect but statement 2 is correct.
- D. Both statement 1 and 2 are incorrect.

**Answer: B**

**Watch Video Solution**

**47.** Dodo, passenger pigeon and Steller's sea cow became extinct in the last 500 years due to

- (a) Habitat destruction

- (b) Over-exploitation
- (c) Bird-flu virus infection
- (d) Pollution

- A. habitat destruction
- B. over-exploitation
- C. bird-flu virus infection
- D. pollution

**Answer: B**

**Watch Video Solution**

**48.** An exotic species that is introduced to a new area, spreads rapidly and eliminates native species is called

- (a) Immigrant species
- (b) Invasive species
- (c) Destructive species
- (d) None of these

A. immigrant species

B. invasive species

C. destructive species

D. none of these

**Answer: B**

**Watch Video Solution**

**49.** Which of the following fish led to the extinction of an ecologically unique assemblage of more than 200 species of cichlid fish in the lake Victoria of E.Africa ?

(a) Catla catla

(b) Dog fish

(c) Nile perch

(d) African catfish

A. Catla catla

B. Dog fish

C. Nile perch

D. African catfish

**Answer: C**

**Watch Video Solution**

**50.** Introduction of Nile Perch in lake Victoria of South Africa resulted in

- (a) Excessive growth of water weeds
- (b) Eliminations of water weeds
- (c) Elimination of many species of cichild fish
- (d) Excessive growth of cichild fish.

A. excessive growth of water weeds

B. eliminations of water weeds

C. elimination of many species of cichild fish

D. excessive growth of cichild fish.

**Answer: C**

**Watch Video Solution**

**51.** The exotic species, which when introduced in India became notorious weed, is

- (a) *Lantana camara*
- (b) *Eichhornia crassipes*
- (c) *Parthenium hysterophorus*
- (d) all of these

A. *Lantana camara*

B. *Eichhornia crassipes*

C. *Parthenium hysterophorus*

D. all of these

**Answer: D**

**Watch Video Solution**

52. Which one of the following fish is being illegally introduced for aquaculture purposes and is posing a threat to the indigenous catfishes of Indian rivers?

- (a) *Clarias gariepinus*
- (b) Nile perch
- (c) climbing perch
- (d) *Protopterus*

A. *Clarias gariepinus*

B. Nile perch

C. climbing perch

D. *Protopterus*

**Answer: A**

**Watch Video Solution**

**53.** Introduction of alien species into new area poses a threat to extinction of indigenous species due to

- (a) their high nutrient requirement
- (b) their symbiotic relationship
- (c) absence of their natural predators
- (d) more intraspecific competition.

- A. their high nutrient requirement
- B. their symbiotic relationship
- C. absence of their natural predators
- D. more intraspecific competition.

**Answer: C**

**Watch Video Solution**

**54.** There are four major causes of accelerated rates of species extinction, which are collectively called as 'the evil quartet'. Which one of the

following is not included in 'the evil quartet' ?

- (a) Over exploitation
- (b) Pollution
- (c) Co-extinctions
- (d) Alien species invasions

- A. Over exploitation
- B. Pollution
- C. Co-extinctions
- D. Alien species invasions

**Answer: B**

**Watch Video Solution**

**55.** Biodiversity loss occurs due to

- (i) habitat loss and fragmentation
- (ii) co-extinction
- (iii) over-exploitation

(iv) alien species invasion.

(a) (i) and (ii)

(b) (i), (ii) and (iii)

(c) (ii), (iii) and (iv)

(d) (i), (ii), (iii) and (iv)

A. (i) and (ii)

B. (i), (ii) and (iii)

C. (ii), (iii) and (iv)

D. (i), (ii), (iii) and (iv)

**Answer: D**

**Watch Video Solution**

**56.** When a species becomes extinct, the plant and animal species associated with it in an obligatory way also become extinct. This phenomenon is referred to as

(a) fragmentation

(b) alien species invasion

(c) over-exploitation

(d) co-extinction

A. fragmentation

B. alien species invasion

C. over-exploitation

D. co-extinction

**Answer: D**

**Watch Video Solution**

**57.** The reason behind conserving biodiversity have been grouped into which of the following categories ?

(a) Narrowly utilitarian

(b) Broadly utilitarian

(c) Ethical

(d) All of these

A. Narrowly utilitarian

B. Broadly utilitarian

C. Ethical

D. All of these

**Answer: D**

**Watch Video Solution**

**58.** Match column I with column II and select the correct option from the given codes.

Column I

Column II

Lungs of the planet (i)

Lantana camara

Reserpine (ii)

Amazon rainforests

Anti-cancer drug (iii)

Yew tree

Exotic species (iv)

Rauwolfia

(a) A-(ii), B-(iv), C-(iii), D-(i)

(b) A-(ii), B-(iii), C-(iv), D-(i)

(c) A-(iv), B-(iii), C-(i), D-(ii)

(d) A-(ii), B-(iv), C-(i), D-(iii)

A. A-(ii), B-(iv), C-(iii), D-(i)

B. A-(ii), B-(iii), C-(iv), D-(i)

C. A-(iv), B-(iii), C-(i), D-(ii)

D. A-(ii), B-(iv), C-(i), D-(iii)

**Answer: A**

**Watch Video Solution**

**59.** More than 25 % of drugs are derived from plants. What kind of benefit does this describe?

(a) Ethical value

(b) Aesthetic value

(c) Direct economic value

(d) Indirect economic value

A. Ethical value

B. Aesthetic value

C. Direct economic value

D. Indirect economic value

**Answer: C**

**Watch Video Solution**

60. \_\_\_\_ is the exploration of molecular, genetic and species-level diversity for gaining the products of economic importance.

(a) Exploitation

(b) Bioprospecting

(c) Co-extinction

(d) Patenting

A. Exploitation

B. Bioprospecting

C. Co-extinction

D. Patenting

**Answer: B**

**Watch Video Solution**

**61.** Amazon rainforests are considered as 'lungs of the planet' as they contribute\_\_\_\_\_of the total oxygen in the earth's atmosphere.

(a) 10 %

(b) 15 %

(c) 20 %

(d) 30 %

A. 10 %

B. 15 %

C. 20 %

D. 30 %

**Answer: C**

**Watch Video Solution**

**62.** The narrowly utilitarian arguments for biodiversity conservation include which of the following from the given list?

- (i) Industrial products like dyes, lubricants
  - (ii) Ecosystem services like photosynthesis
  - (iii) Pollinators layer of bees, birds and bats
  - (iv) Firewood, fibre and construction material
  - (v) The aesthetic pleasure of walking through thick woods
  - (vi) Products of medicinal importance
  - (vii) Watching spring flowers in full bloom
- (a) (i), (ii), (v) and (vii)
  - (b) (ii), (iii), (v) and (vii)
  - (c) (i), (iv) and (vi)
  - (d) (ii), (v), (vi) and (vii)

A. (i), (ii), (v) and (vii)

B. (ii), (iii), (v) and (vii)

C. (i), (iv) and (vi)

D. (ii), (v), (vi) and (vii)

**Answer: C**

**Watch Video Solution**

**63.** Broadly utilitarian' argument for the conservation of biodiversity does not include

- (a) bioprospecting
- (b) pollination
- (c) asethetic value
- (d) climatic regulation.

A. bioprospecting

B. pollination

C. asethetic value

D. climatic regulation.

**Answer: A**

[Watch Video Solution](#)

**64.** Waking up to a bulbul's song in the morning is related to

- (a) narrowly utilitarian
- (b) Broadly utilitarian
- (c) Ethical
- (d) both (b) and (c)

A. narrow utilitarian

B. Broadly utilitarian

C. ethical

D. both (b) and (c )

**Answer: B**

[Watch Video Solution](#)

65. Read the given statements and select the correct option regarding this.

(i) Ecosystem services provided by nature to human beings such as oxygen for respiration, aesthetic value, etc.

(ii) Direct economic benefits derived from nature by human beings such as food, medicine, etc.

(iii) Every species has an intrinsic value, even if it is not of any economic use to us.

With respect to above give codes (i), (ii) and (iii) choose the correct option.

- |       |                               |                              |                  |
|-------|-------------------------------|------------------------------|------------------|
| A. a) | Narrowly utilitarian<br>(iii) | Broadly utilitarian<br>(ii)  | Ethical<br>(i)   |
| B. b) | Narrowly utilitarian<br>(ii)  | Broadly utilitarian<br>(i)   | Ethical<br>(iii) |
| C. c) | Narrowly utilitarian<br>(i)   | Broadly utilitarian<br>(ii)  | Ethical<br>(iii) |
| D. d) | Narrowly utilitarian<br>(ii)  | Broadly utilitarian<br>(iii) | Ethical<br>(i)   |

**Answer: B**

**Watch Video Solution**

**66.** Which of the following statements regarding the ethical argument for conserving biodiversity is incorrect?

(a) We owe to millions of plant, animal and microbes species with whom we share this planet

(b) Every species has an intrinsic value only when it is of an economic value to us.

(c) It is our moral duty to care for the well-being of all species i.e., our biological legacy.

(d) All of these

A. We owe to millions of plant, animal and microbe species with whom we share this planet

B. Every species has an intrinsic value only when it is of an economic value to us.

C. It is our moral duty to care for the well-being of all species i.e., our biological legacy.

D. All of these

**Answer: B**

**Watch Video Solution**

**67.** Ex situ conservation is used for the conservation of

- (a) all plants
- (b) all animals
- (c) threatened animals and plants
- (d) both (a) and (b)

A. all plants

B. all animals

C. threatened animals and plants

D. both (a) and (b)

**Answer: C**

**Watch Video Solution**

**68.** Conservation in the natural habitat is

- (a) In situ
- (b) Ex situ
- (c) Zoo
- (d) Botanical garden.

A. in situ

B. ex situ

C. zoo

D. botanical garden.

**Answer: A**

**Watch Video Solution**

**69.** Presently, total number of biodiversity hotspots in the world is

- (a) 25
- (b) 34

(c) 37

(d) 40

A. 25

B. 34

C. 37

D. 40

**Answer: B**

**Watch Video Solution**

**70.** Which one of the these is not included in the biodiversity hotspots of India ?

(a) Western Ghats

(b) Himalayas

(c) Indo-Burma

(d) North Indian Plains

- A. Western Ghats
- B. Himalayas
- C. Indo-Burma
- D. North Indian Plains

**Answer: D**

**Watch Video Solution**

**71.** Ecological hotspots present in India are

- (a) one
- (b) two
- (c) three
- (d) five

- A. one
- B. two
- C. three

D. five

**Answer: C**

**Watch Video Solution**

**72.** Which pair of geographical area shows maximum biodiversity in our country?

- (a) Sunderbans and Rann of Kutch
- (b) Eastern Ghats and Western Ghats
- (c) Eastern Himalayas and Western Ghats
- (d) Kerala and Punjab

- A. Sunderbans and Rann of Kutch
- B. Eastern Ghats and Western Ghats
- C. Eastern Himalayas and Western Ghats
- D. Kerala and Punjab

**Answer: C**

**73.** Which of the following statements regarding biodiversity hotspots are incorrect?

(i) High endemism

(ii) High level of species richness

(iii) Total number is 34 in the world

(iv) Five of these occur in India

(v) High alien species invasion

(vi) Cover less than 2 % of the earth's land area, but if properly conserved, they can reduce extinctions by about 30 %

(a) (i) and (ii)

(b) (iv) and (v)

(c) iv), (v) and (vi)

(d) (iii), (iv), (v) and (vi)

A. (i) and (ii)

B. (iv) and (v)

C. (iv), (v) and (vi)

D. (iii), (iv), (v) and (vi)

**Answer: B**

**Watch Video Solution**

**74.** In a national park, protection is provided to

(a) flora and fauna

(b) entire ecosystem

(c) fauna only

(d) flora only

A. flora and fauna

B. entire ecosystem

C. fauna only

D. flora only

**Answer: B**

Watch Video Solution

75. Refer to the given figure representing different zones of a biosphere reserve.

Choose the correct answer as per the statements given below

- (i) Limited human activity is allowed such as for research and education.
- (ii) An active co-operation occurs between reserve management and local people for activities like cropping, settlements, etc.
- (iii) No human activity is allowed.

A. 

(i)	(ii)	(ii)
A	B	C

B. 

(i)	(ii)	(ii)
B	C	A

C. 

(i)	(ii)	(ii)
C	A	B

D. 

(i)	(ii)	(ii)
C	B	A

Answer: B

View Text Solution

76. Which of the given statements is true ?

- (a) National parks are meant for the protection of fauna only.
- (b) Wildlife sanctuaries are meant for the protection of both flora and fauna.
- (c) Activities like collection of forest products, harvesting of timber, private ownership of land, etc. are allowed in national parks.
- (d) None of these

A. National parks are meant for the protection of fauna only.

B. Wildlife sanctuaries are meant for the protection of both flora and fauna.

C. Activities like collection of forest products, harvesting of timber, private ownership of land, etc. are allowed in national parks.

D. None of these

**Answer: D**

**Watch Video Solution**

77. Biosphere reserves differ from national parks and wildlife sanctuaries because in the former

- (a) human beings are not allowed to enter
- (b) people are integral part of the system
- (c) plants are paid greater attention than the animals
- (d) living organisms are brought from all over the world and preserved for posterity.

A. human beings are not allowed to enter

B. people are integral part of the system

C. plants are paid greater attention than the animals

D. living organisms are brought from all over the world and preserved for posterity.

**Answer: B**

**Watch Video Solution**

78. India has \_\_\_\_\_ biosphere reserves, \_\_\_\_\_ national parks and \_\_\_\_\_ wildlife sanctuaries till 2018.

- (a) 20,90,500
- (b) 14,85, 348
- (c) 18, 103, 544
- (d) 11, 91, 500

A. 20,90,500

B. 14,85, 348

C. 18, 103, 544

D. 11, 91, 500

**Answer: C**

**80.** \_\_\_\_\_ National Park was the first national park of India.

(a) Jim Corbett

(b) Nanda Devi

(c) Kaziranga

(d) Jaldapara

A. Jim Corbett

B. Nanda Devi

C. Kaziranga

D. Jaldapara

**Answer: A**

**Watch Video Solution**

**81.** First biosphere reserve was established in 1986 at

(a) Nilgiri

(b) Nanda Devi

(c) Rann of Kutch

(d) Sunderbans

- A. Nilgiri
- B. Nanda Devi
- C. Rann of Kutch
- D. Sunderbans

**Answer: A**

**Watch Video Solution**

**82.** Nanda Devi biosphere reserve is found in

- (a) Uttaranchal
- (b) Assam
- (c) Himachal Pardesh
- (d) Andhra Pradesh

- A. Uttaranchal
- B. Assam
- C. Himachal Pardesh

**Answer: A**

**Watch Video Solution**

**83.** MAB Programme means

- (a) Man and biosphere programme
- (b) Man and biodiversity conservation programme
- (c) Manually aided biosphere conservation programme
- (d) None of these

A. Man and biosphere programme

B. Man and biodiversity conservation programme

C. Manually aided biosphere conservation programme

D. None of these

**Answer: A**

**Watch Video Solution**

**84.** India relishes a history of religious and culture traditions which emphasised the protection of nature. In many cultures, tracts of forest were set aside, all the trees and wildlife within were venerated and given total protection. Such areas are referred to as

- (a) hotspots
- (b) ethical groves
- (c) sacred groves
- (d) protected areas

A. hotspots

B. ethical groves

C. sacred groves

D. protected areas

**Answer: C**

**Watch Video Solution**

**85.** Select the correct option regarding sacred forests or groves.

- (a) These are forest patches which are held in high esteem by tribal communities.
- (b) Rare endemic species can be found flourishing in these areas.
- (c) These are found in several parts of India.
- (d) All of these

A. These are forest patches which are held in high esteem by tribal communities.

B. Rare endemic species can be found flourishing in these areas.

C. These are found in several parts of India.

D. All of these

**Answer: D**

**Watch Video Solution**

86. Sacred groves are found in Khasi and Jaintia hills of i, Aravalli hills of ii, Western Ghat regions of iii.

- A. a) (i) (ii) (iii)  
Meghalaya Rajasthan Karnataka and Maharashtra
- B. b) (i) (ii) (iii)  
Meghalaya and Maharashtra Rajasthan Madhya Pradesh
- C. c) (i) (ii) (iii)  
Madhya Pradesh and Maharashtra Rajasthan Meghalaya
- D. d) (i) (ii) (iii)  
Rajasthan Meghalaya Karnataka and Maharashtra

**Answer: A**

**Watch Video Solution**

87. Which of these organisms are protected by people of 'Bishnoi' community of Rajasthan?

- (a) Prosopis cineraria
- (b) Black buck

(c) Bhojpatra

(d) both (a) and (b)

A. Prosopis cineraria

B. Black buck

C. Bhojpatra

D. both (a) and (b)

**Answer: D**

**Watch Video Solution**

**88.** Select the incorrectly matched pair.

A. a) Tannis-Narrow utilitarian.

B. b) Endemism - Species confined to a particular region and not found anywhere else

C. c) Lungs of the planet - Amazon rainforest

D. d) Rajasthan - Sacred groves that are last refuges for a large number of rare and threatened plants

**Answer: D**

**Watch Video Solution**

**89.** The one-horned rhinoceros is specific to which of the following sanctuaries ?

A. 1) Bharatpur

B. 2) Vedanthgol

C. 3) Kaziranga

D. 4) Corbett Park

**Answer: C**

**Watch Video Solution**

**90.** Which of the following is not an example of in situ conservation ?

A. a) Biosphere reserves

B. b) National parks

C. c) Wildlife sanctuaries

D. d) Zoological parks

**Answer: D**

**Watch Video Solution**

**91.** One of the ex situ conservation methods for endangered species is

(a) Wildlife sanctuaries

(b) Biosphere reserves

(c) Cryopreservation

(d) National parks.

A. wildlife sanctuaries

B. biosphere reserves

C. cryopreservation

D. national parks.

**Answer: C**

**Watch Video Solution**

**92.** Cryopreservation is the reservation of germplasm at very low temperature of around

(a)  $-121^{\circ}\text{C}$

(b)  $-196^{\circ}\text{C}$

(c)  $0^{\circ}\text{C}$

(d)  $-101^{\circ}\text{C}$

A.  $-121^{\circ}\text{C}$

B.  $-196^{\circ}\text{C}$

C.  $0^{\circ}\text{C}$

D.  $-101^{\circ}\text{C}$

**Answer: B**

**Watch Video Solution**

**93.** Select the option correctly identifies I, II, III and IV.

- A. I- Biosphere reserves, II-National parks , wildlife sanctuaries, III - Sacred groves, IV - Gene banks, cryopreservation
- B. I- Sacred plants, home gardens, II - National parks, wildlife sanctuaries, III - Arboreta, IV - Gene banks, cryopreservation
- C. I - Biosphere reserves, II - Gene banks, cryopreservation, III - Sacred plants, home gardens, IV- National parks, wildlife sanctuaries
- D. I-Biosphere reserves, II - Arboreta, III -Gene banks, cryopreservation, IV - National parks, wildlife sanctuaries

**Answer: A**

**View Text Solution**

**94.** What is common to the seed banks, orchards, tissue culture and cryopreservation ?

- (a) All are in situ conservation methods.
- (b) All are ex situ conservation methods.
- (c) All require ultramodern equipment and very large space
- (d) All are methods conservation of extinct organisms.

A. All are in situ conservation methods.

B. All are ex situ conservation methods.

C. All require ultramodern equipment and very large space

D. All are methods conservation of extinct organisms.

**Answer: B**

**Hots**

**1. Where would the greatest number of endemic species occur and why ?**

(a) Small volcanic archipelagos, such as the Galapagos Islands, because the abundance of unoccupied habitats favours the adaptive divergence of colonists from nearby mainland populations.

(b) Large oceanic island, such as Australia, because the inhabitants have been isolated from mainland populations for a very long time.

(c) On rugged landscapes, such as Patagonia, because of the high levels of natural disturbance by glaciers and earthquakes.

(d) Temperate woodlands, such as those in southern England, because of the high levels of disturbance by human activity and the history of artificial selection.

A. Small volcanic archipelagos, such as the Galapagos Islands, because the abundance of unoccupied habitats favours the adaptive divergence of colonists from nearby mainland populations.

B. Large oceanic island, such as Australia, because the inhabitants have been isolated from mainland populations for a very long time.

C. On rugged landscapes, such as Patagonia, because of the high levels of natural disturbance by glaciers and earthquakes.

D. Temperate woodlands, such as those in southern England, because of the high levels of disturbance by human activity and the history of artificial selection.

**Answer: B**

**Watch Video Solution**

2. In the tropical rainforest, the majority of trees have showy animal-pollinated flowers. In temperate forests the majority of trees are wind pollinated. Which factors best explain these contrasting patterns ?

(i) Wind is rare in tropical forests.

(ii) Because of high species diversity in the tropics, individuals of trees species are often widely separated making wind an inefficient means of pollen dispersal.

(iii) More opportunities for coevolved mutualisms exist in tropical forests because of the high diversity of animal species.

(iv) Trees in tropical forests are mostly evergreen and year-round leaf canopies impede pollen dispersal by wind.

(v) Flowering in tropical forests occurs over a short period of time when wind is absent.

(a) (i) , (ii) and (v)

(b) (i),(iii) and (v)

(c) (ii), (iii) and (iv)

(d) (ii) and (iv)

A. (i) , (ii) and (v)

B. (i),(iii) and (v)

C. (ii), (iii) and (iv)

D. (ii) and (iv)

**Answer: C**

### Ncert Exemplar Problems

**1. Which of the following countries has the highest biodiversity?**

(a) Brazil

(b) South Africa

(c) Russia

(d) India

A. Brazil

B. South Africa

C. Russia

D. India

**Answer: A**

**Watch Video Solution**

**2. Which of the following is not a cause for loss of biodiversity ?**

- (a) Destruction of habitat
- (b) Invasion of alien species
- (c) Keeping animals in zoological parks
- (d) Over-exploitation of natural resources

A. Destruction of habitat

B. Invasion bu alien species

C. Keeping by alien species

D. Over-exploitation of natural resources

**Answer: C**

**Watch Video Solution**

3. Which of the following is not an invasive alien species in the Indian context?

- (a) Lantana
- (b) Cynodon
- (c) Parthenium
- (d) Eichhornia

A. Lantana

B. Cynodon

C. Parthenium

D. Eichhornia

**Answer: B**

4. Where among the following will you find pitcher plant?

- (a) Rainforest of North-East India
- (b) Sunderbans
- (c) Thar Desert
- (d) Western Ghats

A. Rainforest of North-East India

B. Sunderbans

C. Thar Desert

D. Western Ghats

**Answer: A**

**Watch Video Solution**

5. Which of the following is not a features of biodiversity hotspots?

- (a) Large number of species
- (b) Abundance of endemic species

(c) Mostly located in the polar regions

(d) Mostly located in the tropics

A. Large number of species

B. Abundance of endemic species

C. Mostly located in the polar regions

D. Mostly located in the tropics

**Answer: C**

**Watch Video Solution**

**6. Match the animals given in column A with their location in column B.**

Column A

Column B

(i) Dodo

A. Africa

(ii) Quagga

B. Russia

(iii) Thylacine

C. Mauritius

(iv) Stellar's sea cow

D. Australia

Choose the correct match from the following.

(a) i-A, ii-C, iii-B, iv-D

(b) i-D, ii-C, iii-A, iv-B

(c) i-C, ii-A, iii-B, iv-D

(d) i-C, ii-A, iii-D, iv-B

A. i-A, ii-C, iii-B, iv-D

B. i-D, ii-C, iii-A, iv-B

C. i-C, ii-A, iii-B, iv-D

D. i-C, ii-A, iii-D, iv-B

**Answer: D**

**9.** Amongst the animal groups given below, which one has the highest percentage of endangered species?

(a) Insects

(b) Mammals

(c) Amphibians

(d) Reptiles

A. Insects

B. Mammals

C. Amphibians

D. Reptiles

**Answer: C**

**Watch Video Solution**

**10. Which one of the following is an endangered plant species of India?**

- (a) *Rauwolfia serpentina*
- (b) *Santalum album* (Sandalwood)
- (c) *Cycas beddonei*
- (d) All of the above

A. *Rauwolfia serpentina*

B. *Santalum album* (Sandalwood)

C. *Cycas beddonei*

D. All of the above

**Answer: D**

**Watch Video Solution**

11. What is common to Lantana, Eichhornia and Africa catfish?

- (a) All are endangered species of India.
- (b) All are keystone species.
- (c) All are mammals found in India.
- (d) All are species are neither threatened nor indigenous species of India.

A. All are endangered species of India.

B. All are keystone species.

C. All are mammals found in India.

D. All are species are neither threatened nor indigenous species of India.

**Answer: D**

**Watch Video Solution**

12. The extinction of passenger pigeon was due to

- A. a) increased number of predatory birds
- B. b) over exploitation by humans
- C. c) non-availability of the food
- D. d) bird flu virus infection.

**Answer: B**

**Watch Video Solution**

**13. Which of the following statements is correct?**

- A. a) Parthenium is an endemic species of our country.
- B. b) African catfish is not a threat to indigenous catfishes
- C. c) Steller's sea cow is an extinct animal.
- D. d) Lantana is popularly known as carrot grass.

**Answer: C**

**Watch Video Solution**

14. Among the ecosystem mentioned below, where can one find maximum biodiversity?

- A. a) Mangroves
- B. b) Desert
- C. c) Coral reefs
- D. d) Alpine meadows

**Answer: C**

**Watch Video Solution**

15. Which of the following forests is known as the 'lungs of the planet earth'?

- A. a) Taiga forest
- B. b) Tundra forest

C. c) Amazon rainforest

D. d) Rainforest of North east India

**Answer: C**

**Watch Video Solution**

**16.** The active chemical drug reserpine is obtained from

A. a) Datura

B. b) Rauwolfia

C. c) Altropa

D. d) Papaver

**Answer: B**

**Watch Video Solution**

17. Which of the following group exhibit more species diversity

- A. a) Gymnosperms
- B. b) Algae
- C. c) Bryophytes
- D. d) Fungi

**Answer: D**

**Watch Video Solution**

18. Which of the below mentioned regions exhibit less seasonal variations

?

- A. a) Tropics
- B. b) Temperates
- C. c) Alpines
- D. d) Both (a) and (b)

**Answer: A**

**Watch Video Solution**

**19.** The historic convention on Biological Diversity held in Rio de Janeiro in 1992 is known as

- A. a) CITES Convention
- B. b) The Earth Summit
- C. c) C-16 Summit
- D. d) MAB Programme.

**Answer: B**

**Watch Video Solution**

**20.** What is common to the techniques (i) in vitro fertilisation, (ii) Cryopreservation and (iii) tissue culture?

- A. a) All are in situ conservation methods.
- B. b) All are ex situ conservation methods.
- C. c) All require ultra modern equipment and large space.
- D. d) All are methods of conservation of extinct organisms.

**Answer: B**

**Watch Video Solution**

### Assertion Reason

**1. Assertion :** Genetic variation shown by the plant *Rauwolfia vomitoria* growing in different Himalayan ranges is very important economically.

**Reason :** The amount and variety of alkaloids presents in this plant, change both between the *Rauwolfia* species and between the different strains of *R. vomitoria*.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.
- B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. c) If assertion is true but reason is false.
- D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**2. Assertion :** The specific diversity present in a given community or habitat is referred to as alpha diversity.

**Reason :** Alpha diversity is usually expressed by species richness and species evenness in that community or habitat.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.

B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**3. Assertion :** Tropical regions have got a long evolutionary time for species diversification as compared to temperate regions.

**Reason :** Temperate regions have undergone frequent glaciations in the past whereas tropical regions have remained relatively undisturbed for millions of years.

A. a) If both assertion and reason are true and reason is the correct explanation of assertion.

B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**4. Assertion :** If the species-area relationship are analysed among very large areas like the entire continents, the value of  $Z$ , i.e., slope of line in the range of 0.1 to 0.2.

**Reason :** The value of  $Z$ , i.e., slope of line of species area relationship lies in the range of 0.6 to 1.2 when analysis is done among small areas.

A. a) If both assertion and reason are true and reason is the correct explanation of assertion.

B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: D**

**Watch Video Solution**

**5. Assertion :**Species with low genetic variability are generally at greater risk of extinction than the species with more genetic variability.

**Reason:** Species with low genetic variability are more vulnerable to disease, predators or other environmental challenges.

A. a) If both assertion and reason are true and reason is the correct explanation of assertion.

B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**6. Assertion :** Threatened species are those living species which have been greatly reduced in their number and are liable to become extinct if the causative factors continue.

**Reason :** IUCN is an international organisation which maintains the IUCN red list of threatened species, to assess the conservation status of different species.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

- A. If both assertion and reason are true and reason is the correct explanation of assertion.
- B. If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. If assertion is true but reason is false.
- D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

7. Assertion : Critically endangered category includes the species which have sufficient population at present but is undergoing depletion due to some factors.

Reason : Vulnerable category includes the species which are facing very high risk of extinction in the wild and can become extinct any moment.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: D**

**Watch Video Solution**

**8. Assertion :** Over-exploitation of a species reduces the size of its population eventually leading to its extinction.

Reason : Steller's sea cow is a large, herbivorous, terrestrial mammal which is on the verge of extinction due to over exploitation.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**9. Assertion :** The Nile perch introduced into lake Victoria in east Africa led to the extinction of an ecologically unique assemblage of more than 200 species of cichlid fish in the lake.

**Reason :** When alien species are introduced deliberately for economic or other uses, they often become invasive and cause extinction of indigenous species.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**10.** Assertion : Broadly utilitarian arguments say that we should conserve biodiversity because biodiversity plays a major role in many ecosystem services that nature provides.

Reason : Exploitation of molecular, genetic and species level diversity to obtain the products of economic importance is included under broadly utilitarian category.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

- A. If both assertion and reason are true and reason is the correct explanation of assertion.
- B. If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. If assertion is true but reason is false.
- D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**11. Assertion :** Biodiversity hotspots are the regions which possess high levels of species richness, high degree of endemism and no loss habitats.

**Reason :** Total number of biodiversity hotspots in the world is 32 with two of these hotspots found in India.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct

explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: D**

**Watch Video Solution**

**12. Assertion :** Jim Corbett National Park is the first National Park of India and is famous for tigers.

**Reason :** Through the main focus is protection of wildlife, the reserve

management has also encouraged ecotourism in this national park.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

**13. Assertion :** In a wildlife sanctuary, collection of timber, harvesting of minor forest products and private ownership rights are allowed.

**Reason :** A sanctuary is a protected area meant for the conservation of both flora and fauna where cultivation of land is permitted.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**14. Assertion :** One of the most important traditional uses of sacred groves was that they acted as a repository for various ayurvedic medicines.

**Reason :** In modern times , sacred groves have become biodiversity rich areas, as they provide refuge to various plant and animal species of conservation significance.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

**15. Assertion :** Offsite collections can be used to restock depleted populations, reintroduce species in the wild and restore degraded habitats.

**Reason :** In situ conservation refers to the conservation of endangered species in their natural habitats.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

## Biodiversity Conservation

1. The term biodiversity is popularised by-

(a) Odum

(b) Paul Ehrlich

(c) Edward Wilson

(d) Tilman

A. Odum

B. Paul Ehrlich

C. Edward Wilson

D. Tilman

**Answer: C**

**Watch Video Solution**

2. Genetic variations affect the production of the drug reserpine in the medicinal plant *Rauwolfia vomitoria* growing in different Himalayan ranges. What kind of diversity does it indicate ?

(a) Species diversity

(b) Genetic diversity

(c) Ecological diversity

(d) None of these

A. Species diversity

B. Genetic diversity

C. Ecological diversity

D. None of these

**Answer: B**

**Watch Video Solution**

**3.** In India, we find mangoes with different flavours, colours, fibre content , sugar content and even shelf-life. The large variation is on account of

(a) Species diversity

(b) Induced mutations

(c) Genetic diversity

(d) Hybridisation

- A. species diversity
- B. induced mutations
- C. genetic diversity
- D. hybridisation

**Answer: C**

**Watch Video Solution**

**4.** Study the given populations and choose the correct answer in relation to species diversity.

Population	Species	Group	Individuals
Population A	I	Mammals	3
	II	Birds	2
	III	Amphibians	2
Population B	I	Mammals	2
	II	Mammals	2
	III	Amphibians	1
Population C	I	Mammals	3
	II	Mammals	2
	III	Mammals	1

- A. Maximum diversity Population B Minimum diversity Population C
- B. Maximum diversity Population A Minimum diversity Population C
- C. Maximum diversity Population A Minimum diversity Population B
- D. Maximum diversity Population B Minimum diversity Population A

**Answer: B**

**View Text Solution**

5. Western ghats have a greater number of amphibian species than the Eastern ghats. What kind of diversity does it represent ?

- (a) Species diversity
- (b) Genetic diversity
- (c) Ecological diversity
- (d) None of these

A. Species diversity

B. Genetic diversity

C. Ecological diversity

D. None of these

**Answer: A**

**Watch Video Solution**

6. India has a greater ecosystem diversity than a Scandinavian country like Norway. What kind of diversity does it represent?

- A. Species diversity
- B. Ecological diversity
- C. genetic diversity
- D. None of these

**Answer: B**

**Watch Video Solution**

7. The diversity of organisms sharing the same habitat or community is termed as

- (a) alpha diversity
- (b) beta diversity
- (c) gamma diversity
- (d) delta diversity

- A. alpha diversity
- B. beta diversity

C. gamma diversity

D. delta diversity

**Answer: A**

**Watch Video Solution**

8. Identify different types of diversity by 1,2 and 3 in the given figure.

A.      1                                  2                                  3  
Alpha diversity    Beta diversity    Gamma diversity

**Answer: A**

**Watch Video Solution**

**10.** A more conservative and scientifically sound estimate about the total number of species present on earth, was made by

- (a) Robert May
- (b) Paul Ehrlich
- (c) David Tilman
- (d) Both A and B

A. Robert May

B. Paul Ehrlich

C. David Tilman

D. Both A and B

**Answer: A**

**Watch Video Solution**

11. What is the total number of species present on earth as estimated by

Robert May ?

(a) 3 million

(b) 5 million

(c) 7 million

(d) 9 million

A. 3 million

B. 5 million

C. 7 million

D. 9 million

**Answer: C**

**Watch Video Solution**

12. Which of the following statements regarding the estimates of number of species found on earth is not correct ?

- (a) Total number of species present on earth are considered to be about 7 million as estimated by Robert May.
- (b) Plants constitute more than 70% of all the species recorded, whereas animals constitute less than 22% of the total number of species.
- (c) Insects constitute more than 70% of all the animal species.
- (d) None of these

A. Total number of species present on earth are considered to be about 7 million as estimated by Robert May.

B. Plants constitute more than 70 % of all the species recorded, whereas animals constitute less than 22 % of the total number of species.

C. Insects constitute more than 70 % of all the animal species.

D. None of these

**Answer: B**

13. Which of the following are the phylum which is the largest (A) and second largest group (B)?

- A. A=Insects, B=Molluscs
- B. A = Molluscs, B = Insects
- C. A = Insects, B = Annelids
- D. A = Molluscs, B = Annelids

**Answer: A**

[Watch Video Solution](#)

14. The given pie diagram represents the proportionate number of species of major taxa of vertebrates. Identify the group A and B.

A. A = Reptiles, B = Birds

B. A - Fish, B-Birds

C. A-Birds, B - Fish

D. A-Birds, B-Reptiles

**Answer: B**

**View Text Solution**

**15.**

A. A - Bryophytes, B - Gymnosperms

B. A - Fungi, B - Gymnosperms

C. A - Fungi, B - Angiosperms

D. A - Algae, B - Angiosperms

**Answer: C**

**View Text Solution**

16. India constitutes\_\_\_\_\_percent of the world's land area and contributes\_\_\_\_\_percent of the global species diversity.

(a) 1.0, 5.5

(b) 5.5, 1.0

(c) 8.1, 2.4

(d) 2.4, 8.1

A. 1.0, 5.5

B. 5.5, 1.0

C. 8.1, 2.4

D. 2.4, 8.1`

**Answer: D**

**Watch Video Solution**

17. India is one of the 17 megadiversity countries of the world and is being divided into \_\_\_\_\_biogeographical regions.

- (a) 8
- (b) 10
- (c) 16
- (d) 18

- A. 8
- B. 10
- C. 16
- D. 18

**Answer: B**

**Watch Video Solution**

18. Which of the following groups does not include the countries which contribute to 12 megadiversity centres of the world?

(i) Mexico, Columbia, Brazil

(ii) Peru, Ecuador, Venezuela

(iii) Madegascar, Indonesia, Malaysia

(iv) China, Germany, Japan

(v) China, India, Australia

(a) (ii)

(b) (v)

(c) (iii)

(d) (iv)

A. (ii)

B. (v)

C. (iii)

D. (iv)

**Answer: D**

**Watch Video Solution**

**19.** Read the given statement and select the correct option.

Statement 1: Indian elephants (*Elephas maximus*) are confined to terai and the foothills.

Statement 2: Elephants are herbivores and require succulent grass and plenty of water.

- (a) Both statement 1 and 2 are correct
- (b) Statement 1 is correct but statement 2 is incorrect
- (c) Statement 1 is incorrect but statement 2 is correct.
- (d) Both statement 1 and 2 are incorrect.

- A. Both statement 1 and 2 are correct
- B. Statement 1 is correct but statement 2 is incorrect
- C. Statement 1 is incorrect but statement 2 is correct.
- D. Both statement 1 and 2 are incorrect.

**Answer: A**

**Watch Video Solution**

20. According to May's global estimates how many species of plants and animals, respectively, are yet to be discovered and described from India ?

- (a) 50,000 and 90, 000
- (b) 3,00,000 and 90,000
- (c) 3,00,000 and 1,00,000
- (d) 1,00,000 and 3,00,000

A. 50,000 and 90, 000

B. 3,00,000 and 90,000

C. 3,00,000 and 1,00,000

D. 1,00,000 and 3,00,000

**Answer: D**

**Watch Video Solution**

21. Species diversity\_\_\_\_\_as one moves from high to low altitudes.

- (a) increase

(b) decreases

(c) first increases then decreases

(d) first decreases then increases

A. increase

B. decreases

C. first increases then decreases

D. first decreases then increases

**Answer: A**

**Watch Video Solution**

**22.** Species diversity\_\_\_\_\_as we move away from the \_\_\_\_\_towards\_\_\_\_\_.

(a) decreases, equator, poles

(b) increases, equator, poles

(c) decreases, poles, equator

(d) none of these

A. decreases, equator, poles

B. increases, equator, poles

C. decreases, poles, equator

D. none of these

**Answer: A**

**Watch Video Solution**

**23.** Tropics ( $23.5^{\circ} N$  to  $23.5^{\circ} S$ ) have\_\_\_\_\_species as compared to temperature or polar regions.

(a) less

(b) equal

(c) more

(d) none of these

A. less

B. equal

C. more

D. none of these

**Answer: C**

**Watch Video Solution**

**24.** Which of the following is a reason for the greater biological diversity of tropical regions ?

(a) Tropical latitudes have remained almost undisturbed for millions of years.

(b) Tropical environments are less seasonal, relatively more constant and predictable.

(c) More solar energy is available in the tropics, resulting in high productivity.

(d) All of these

A. Tropical latitudes have remained almost undisturbed for millions of years.

- B. Tropical environments are less seasonal, relatively more constant and predictable.
- C. More solar energy is available in the tropics, resulting in high productivity.
- D. All of these

**Answer: D**

**Watch Video Solution**

**25.** Which option correctly describes the equation for curves A and B, in the given graph of species - area relationship ?

- A.  $S = CA^z$        $\log S = \log C + Z \log A$
- B.  $\log S = \log C + Z \log A$        $S = CA^z$
- C.  $\log C = \log S + Z \log A$        $S = CA^z$
- D.  $S = CA^z$        $\log C = \log S + Z \log A$

**Answer: A**

**Watch Video Solution**

**26.** On a logarithmic scale, the species area relationship is a straight line described by the equation  $\log S = \log C + Z \log A$ .

What does S, C, Z and A represent in the given equation? Select the correct answer from the codes given below.

Species richness = 1

Slope of the line = 2

Y-intercept = 3

Area = 4

a) 1 2 3 4

C S Z A

b) 1 2 3 4

S Z C A

c) 1 2 3 4

Z S C A

d) 1 2 3 4

A C S Z

A. a)    1    2    3    4  
          C    S    Z    A

B. b)    1    2    3    4  
          S    Z    C    A

C. c)    1    2    3    4  
          Z    S    C    A

D. d)    1    2    3    4  
          A    C    S    Z

**Answer: B**

27. Fill in the blanks with the most appropriate option.

The value of  $z$  lies in the range of \_\_\_\_\_ regardless of the taxonomic group or the region.

- (a) 0.1 to 0.2
- (b) 0.3 to 0.8
- (c) 0.1 to 1.0
- (d) 0.6 to 1.8

A. 0.1 to 0.2

B. 0.3 to 0.8

C. 0.1 to 1.0

D. 0.6 to 1.8

**Answer: A**

[Watch Video Solution](#)

**28.** For frugivorous birds and mammals in the tropical forests of different continents the slope is found to be

- (a) 0.6
- (b) 1.3
- (c) 1.15
- (d) 1.7

A. 0.6

B. 1.3

C. 1.15

D. 1.7

**Answer: C**

**Watch Video Solution**

**29.** Who confirmed communities with more species tend to be more stable than those with less species ?

(a) Alexander von Humboldt

(b) David Tilman

(c) Paul Ehrlich

(d) Edward Wilson

A. Alexander von Humboldt

B. David Tilman

C. Paul Ehrlich

D. Edward Wilson

**Answer: B**

**Watch Video Solution**

**30.** Character of a stable community is that it

(a) should not show too much variations in year-to-year productivity

(b) must be resistant to occasional natural or man-made disturbances

(c) should be resistant to invasions by alien species

(d) all of these

- A. should not show too much variations in year-to-year productivity
- B. must be resistant to occasional natural or man-made disturbances
- C. should be resistant to invasions by alien species
- D. all of these

**Answer: D**

**Watch Video Solution**

**31. Keystone species deserve protection because these**

- (a) are capable of surviving in harsh environmental conditions
- (b) indicate presence of certain minerals in the soil
- (c) have become rare due to overexploitation
- (d) play an important role in supporting other species

- A. are capable of surviving in harsh environmental conditions
- B. indicate presence of certain minerals in the soil
- C. have become rare due to overexploitation

D. play an important role in supporting other species.

**Answer: D**

**Watch Video Solution**

**32.** Match column I with column II and select the correct option from the given codes.

Column I

A) Rivet Popper hypothesis

B) Long-term ecosystem experiments using outdoor plots

C) Species-area relationships

Column II

(i) Paul Elmer

(ii) David S.

(iii) Alexander

(a) A-(iii), B-(i), C-(ii)

(b) A-(i), (ii), C-(iii)

(c) A-(i), B-(iii), C-(ii)

(d) A-(ii), B-(iii), C-(i)

A. A-(iii), B-(i), C-(ii)

B. A-(i), (ii), C-(iii)

C. A-(i), B-(iii), C-(ii)

D. A-(ii), B-(iii), C-(i)

**Answer: B**

**Watch Video Solution**

**33.** Rivert popper hypothesis was given by

- (a) Paul Ehrlich
- (b) Alexander von Humboldt
- (c) David Tilman
- (d) Robert May

A. Paul Ehrlich

B. Alexander von Humboldt

C. David Tilman

D. Robert May.

**34.** Organisation responsible for maintaining Red Data Book is

- (a) IUCN
- (b) WWF
- (c) CITES
- (d) IBWL

A. IUCN

B. WWF

C. CITES

D. IBWL

**Answer: A**

**Watch Video Solution**

**35.** Red Data Book deals with

A. organisms on the verge of extinction

B. endemic plants

C. organisms showing photoperiodism

D. organisms that are extinct

**Answer: A**

**View Text Solution**

**36.** How many species are documented to be extinct in last 500 years by IUCN Red List, 2004?

A. 2000

B. 87

C. 567

D. 784

**Answer: D**

**37.** According to IUCN, some of the extinctions include

(i) Dodo

(ii) Indian gazelle

(iii) Thylacine

(iv) Steller's sea cow

(a) (i), (ii), (iii) and (iv)

(b) (ii) and (iv)

(c) (i),(iii) and (iv)

(d) (iii) and (iv)

A. (i), (ii), (iii) and (iv)

B. (ii) and (iv)

C. (i),(iii) and (iv)

D. (iii) and (iv)

**Answer: C**

[Watch Video Solution](#)

**38.** Bali, Javan Caspian are

- (a) species of tiger
- (b) species of Cheetah
- (c) subspecies of cheetah
- (d) subspecies of tiger

A. species of tiger

B. species of Cheetah

C. subspecies of cheetah

D. subspecies of tiger

**Answer: D**

[Watch Video Solution](#)

**39.** Select the correct term for the following definitions (i,ii,iii,iv).

(i) The taxon is liable to become extinct if not allowed to realise its full biotic potential by providing protection from exotic species/human exploitation/habitat deterioration/depletion of food.

(ii) The taxon has been completely eliminated or died out from earth. e.g Dodo

(iii) The taxon is facing a high risk of extinction in the wild in the near future due to decrease in its habitat, excessive predation or poaching.

(iv) They are species with naturally small populations, either localised or thinly scattered, which are always at risk from pests/pathogens/predators/exotic species.

- |       |            |         |            |            |
|-------|------------|---------|------------|------------|
| A. a) | (i)        | (ii)    | (iii)      | (iv)       |
|       | Threatened | Extinct | Endangered | Rare       |

|       | Threatened | Extinct | Rare       | Endangered |

**Answer: A**

[Watch Video Solution](#)

**40.** Antelope cervicapra (blackbuck) is

- (a) of least concern
- (b) Endangered
- (c) Critically endangered
- (d) Extinct in the wild.

A. of least concern

B. endangered

C. critical endangered

D. extinct in the wild.

**Answer: A**

[Watch Video Solution](#)

**41.** A critically endangered animal is

- (a) Passenger pigeon
- (b) Dodo
- (c) Great Indian bustard
- (d) Zebu

A. passenger pigeon

B. dodo

C. great Indian bustard

D. zebu

**Answer: C**

**Watch Video Solution**

**42.** Match column I with column II and select the correct option from the given codes.

Column I		Column II	
<i>A</i>	Beta diversity	( <i>i</i> )	Tropical areas
<i>B</i>	Rich biodiversity	( <i>ii</i> )	Dodo
<i>C</i>	Gamma diversity	( <i>iii</i> )	Between community diversity
<i>D</i>	Extinct species	( <i>iv</i> )	Great Indian bustard
<i>E</i>	Critically endangered species	( <i>v</i> )	Diversity of whole geographical r

A. 1) A-(iv), B-(i), C-(iii), D-(ii), E-(iv)

B. 2) A-(iii), B-(i), C-(v), D-(ii), E-(iv)

C. 3) A-(iii), B-(i), C-(v), D-(iv), E-(ii)

D. 4) A-(v), B-(i), C-(iii), D-(iv), E-(ii)

**Answer: B**

**Watch Video Solution**

**43.** The impact of loss of biodiversity includes

(a) decline in plant production

(b) lowered resistance to environmental perturbations

(c) increased variability in ecosystem processes like plant productivity,

water use, pest and disease cycles

(d) all of these

A. decline in plant production

B. lowered resistance to environmental perturbations

C. increased variability in ecosystem processes like plant productivity,  
water use, pest and disease cycles

D. all of these

**Answer: D**

**Watch Video Solution**

**44.** Which of the following statements describe natural extinction ?

(i) Extinctions abetted by human activities

(ii) Slow replacement of existing species

(iii) Also known as background extinction

(iv) A small population is most likely to be extinct

(a) (i) and (ii)

(b) (i), (ii) and (iii)

(c) (ii), (iii) and (iv)

(d) (i), (ii), (iii) and (iv)

A. (i) and (ii)

B. (i), (ii) and (iii)

C. (ii), (iii) and (iv)

D. (i), (ii), (iii) and (iv)

**Answer: C**

**Watch Video Solution**

**45.** The term "the evil quartet" is related with four major causes of

(a) Forest loss

(b) Population explosion

(c) Air pollution

(d) Biodiversity losses

- A. forest loss
- B. population explosion
- C. air pollution
- D. biodiversity losses

**Answer: D**

**Watch Video Solution**

**46.** Read the given statement and select the correct option.

Statement 1: Tropical rainforests are disappearing fastly from developing countries such as India.

Statement 2 : No value is attached to these forests because these are poor in biodiversity.

- (a) Both statement 1 and 2 are correct
- (b) Statement 1 is correct but statement 2 is incorrect
- (c) Statement 1 is incorrect but statement 2 is correct
- (d) Both statement 1 and 2 are incorrect.

- A. Both statement 1 and 2 are correct
- B. Statement 1 is correct but statement 2 is incorrect
- C. Statement 1 is incorrect but statement 2 is correct.
- D. Both statement 1 and 2 are incorrect.

**Answer: B**

**Watch Video Solution**

**47.** Dodo, passenger pigeon and Steller's sea cow became extinct in the last 500 years due to

- (a) Habitat destruction
- (b) Over-exploitation
- (c) Bird-flu virus infection
- (d) Pollution

A. habitat destruction

B. over-exploitation

C. bird-flu virus infection

D. pollution

**Answer: B**

**Watch Video Solution**

**48.** An exotic species that is introduced to a new area, spreads rapidly and eliminates native species is called

(a) Immigrant species

(b) Invasive species

(c) Destructive species

(d) None of these

A. immigrant species

B. invasive species

C. destructive species

D. none of these

**Answer: B**

**Watch Video Solution**

**49.** Which of the following fish led to the extinction of an ecologically unique assemblage of more than 200 species of cichlid fish in the lake Victoria of E.Africa ?

- (a) Catla catla
- (b) Dog fish
- (c) Nile perch
- (d) African catfish

A. Catla catla

B. Dog fish

C. Nile perch

D. African catfish

**Answer: C**

Watch Video Solution

**50.** Introduction of Nile Perch in lake Victoria of South Africa resulted in

- (a) Excessive growth of water weeds
- (b) Eliminations of water weeds
- (c) Elimination of many species of cichild fish
- (d) Excessive growth of cichild fish.

A. excessive growth of water weeds

B. eliminations of water weeds

C. elimination of many species of cichild fish

D. excessive growth of cichild fish.

**Answer: C**

Watch Video Solution

51. The exotic species, which when introduced in India became notorious weed, is

- (a) *Lantana camara*
- (b) *Eichhornia crassipes*
- (c) *Parthenium hysterophorus*
- (d) all of these

A. *Lantana camara*

B. *Eichhornia crassipes*

C. *Parthenium hysterophorus*

D. all of these

**Answer: D**

**Watch Video Solution**

52. Which one of the following fish is being illegally introduced for aquaculture purposes and is posing a threat to the indigenous catfishes

of Indian rivers?

- (a) *Clarias gariepinus*
- (b) Nile perch
- (c) climbing perch
- (d) *Protopterus*

A. *Clarias gariepinus*

B. Nile perch

C. climbing perch

D. *Protopterus*

**Answer: A**

**Watch Video Solution**

**53.** Introduction of alien species into new area poses a threat to extinction of indigenous species due to

- (a) their high nutrient requirement
- (b) their symbiotic relationship

(c) absence of their natural predators

(d) more intraspecific competition.

A. their high nutrient requirement

B. their symbiotic relationship

C. absence of their natural predators

D. more intraspecific competition.

**Answer: C**

**Watch Video Solution**

**54.** There are four major causes of accelerated rates of species extinction, which are collectively called as 'the evil quartet'. Which one of the following is not included in 'the evil quartet' ?

(a) Over exploitation

(b) Pollution

(c) Co-extinctions

(d) Alien species invasions

- A. Over exploitation
- B. Pollution
- C. Co-extinctions
- D. Alien species invasions

**Answer: B**

**Watch Video Solution**

**55. Biodiversity loss occurs due to**

- (i) habitat loss and fragmentation
  - (ii) co-extinction
  - (iii) over-exploitation
  - (iv) alien species invasion.
- (a) (i) and (ii)
  - (b) (i), (ii) and (iii)
  - (c) (ii), (iii) and (iv)
  - (d) (i), (ii), (iii) and (iv)

A. (i) and (ii)

B. (i), (ii) and (iii)

C. (ii), (iii) and (iv)

D. (i), (ii), (iii) and (iv)

**Answer: D**

**Watch Video Solution**

**56.** When a species becomes extinct, the plant and animal species associated with it in an obligatory way also become extinct. This phenomenon is referred to as

(a) fragmentation

(b) alien species invasion

(c) over-exploitation

(d) co-extinction

A. fragmentation

B. alien species invasion

C. over-exploitation

D. co-extinction

**Answer: D**

**Watch Video Solution**

**57.** The reason behind conserving biodiversity have been grouped into which of the following categories ?

(a) Narrowly utilitarian

(b) Broadly utilitarian

(c) Ethical

(d) All of these

A. Narrowly utilitarian

B. Broadly utilitarian

C. Ethical

D. All of these

**Answer: D**

**Watch Video Solution**

**58.** Match column I with column II and select the correct option from the given codes.

Column I

Lungs of the planet    (*i*)

Reserpine                (*ii*)

Anti-cancer drug       (*iii*)

Exotic species          (*iv*)

Column II

Lantana camara

Amazon rainforests

Yew tree

Rauwolfia

(a) A-(ii), B-(iv), C-(iii), D-(i)

(b) A-(ii), B-(iii), C-(iv), D-(i)

(c) A-(iv), B-(iii), C-(i), D-(ii)

(d) A-(ii), B-(iv), C-(i), D-(iii)

A. A-(ii), B-(iv), C-(iii), D-(i)

B. A-(ii), B-(iii), C-(iv), D-(i)

C. A-(iv), B-(iii), C-(i), D-(ii)

D. A-(ii), B-(iv), C-(i), D-(iii)

**Answer: A**

**Watch Video Solution**

**59.** More than 25 % of drugs are derived from plants. What kind of benefit does this describe?

- (a) Ethical value
- (b) Aesthetic value
- (c) Direct economic value
- (d) Indirect economic value

A. Ethical value

B. Aesthetic value

C. Direct economic value

D. Indirect economic value

**Answer: C**

[Watch Video Solution](#)

60. \_\_\_\_\_ is the exploration of molecular, genetic and species-level diversity for gaining the products of economic importance.

- (a) Exploitation
- (b) Bioprospecting
- (c) Co-extinction
- (d) Patenting

A. Exploitation

B. Bioprospecting

C. Co-extinction

D. Patenting

**Answer: B**

[Watch Video Solution](#)

61. Amazon rainforests are considered as 'lungs of the planet' as they contribute\_\_\_\_\_of the total oxygen in the earth's atmosphere.

(a) 10 %

(b) 15 %

(c) 20 %

(d) 30 %

A. 10 %

B. 15 %

C. 20 %

D. 30 %

**Answer: C**

**Watch Video Solution**

62. The narrowly utilitarian arguments for biodiversity conservation include which of the following from the given list?

- (i) Industrial products like dyes, lubricants
- (ii) Ecosystem services like photosynthesis
- (iii) Pollinators layer of bees, birds and bats
- (iv) Firewood, fibre and construction material
- (v) The aesthetic pleasure of walking through thick woods
- (vi) Products of medicinal importance
- (vii) Watching spring flowers in full bloom

(a) (i), (ii), (v) and (vii)

(b) (ii), (iii), (v) and (vii)

(c) (i), (iv) and (vi)

(d) (ii), (v), (vi) and (vii)

A. (i), (ii), (v) and (vii)

B. (ii), (iii), (v) and (vii)

C. (i), (iv) and (vi)

D. (ii), (v), (vi) and (vii)

**Answer: C**

**Watch Video Solution**

**63.** Broadly utilitarian' argument for the conservation of biodiversity does not include

- (a) bioprospecting
- (b) pollination
- (c) asethetic value
- (d) climatic regulation.

A. bioprospecting

B. pollination

C. asethetic value

D. climatic regulation.

**Answer: A**

**Watch Video Solution**

**64.** Waking up to a bulbul's song in the morning is related to

- (a) narrowly utilitarian
- (b) Broadly utilitarian
- (c) Ethical
- (d) both (b) and (c)

A. narrow utilitarian

B. Broadly utilitarian

C. ethical

D. both (b) and (c )

**Answer: B**

**Watch Video Solution**

**65.** Read the given statements and select the correct option regarding this.

(i) Ecosystem services provided by nature to human beings such as

oxygen for respiration, aesthetic value, etc.

(ii) Direct economic benefits derived from nature by human beings such as food, medicine, etc.

(iii) Every species has an intrinsic value, even if it is not of any economic use to us.

With respect to above give codes (i), (ii) and (iii) choose the correct option.

- |       |                               |                              |                  |
|-------|-------------------------------|------------------------------|------------------|
| A. a) | Narrowly utilitarian<br>(iii) | Broadly utilitarian<br>(ii)  | Ethical<br>(i)   |
| B. b) | Narrowly utilitarian<br>(ii)  | Broadly utilitarian<br>(i)   | Ethical<br>(iii) |
| C. c) | Narrowly utilitarian<br>(i)   | Broadly utilitarian<br>(ii)  | Ethical<br>(iii) |
| D. d) | Narrowly utilitarian<br>(ii)  | Broadly utilitarian<br>(iii) | Ethical<br>(i)   |

**Answer: B**

**Watch Video Solution**

**66.** Which of the following statements regarding the ethical argument for conserving biodiversity is incorrect?

- (a) We owe to millions of plant, animal and microbes species with whom we share this planet
- (b) Every species has an intrinsic value only when it is of an economic value to us.
- (c) It is our moral duty to care for the well-being of all species i.e., our biological legacy.
- (d) All of these

A. We owe to millions of plant, animal and microbe species with whom we share this planet

B. Every species has an intrinsic value only when it is of an economic value to us.

C. It is our moral duty to care for the well-being of all species i.e., our biological legacy.

D. All of these

**Answer: B**

**Watch Video Solution**

**67.** Ex situ conservation is used for the conservation of

- (a) all plants
- (b) all animals
- (c) threatened animals and plants
- (d) both (a) and (b)

A. all plants

B. all animals

C. threatened animals and plants

D. both (a) and (b)

**Answer: C**

**Watch Video Solution**

**68.** Conservation in the natural habitat is

- (a) In situ

(b) Ex situ

(c) Zoo

(d) Botanical garden.

A. in situ

B. ex situ

C. zoo

D. botanical garden.

**Answer: A**

**Watch Video Solution**

**69.** Presently, total number of biodiversity hotspots in the world is

(a) 25

(b) 34

(c) 37

(d) 40

A. 25

B. 34

C. 37

D. 40

**Answer: B**

**Watch Video Solution**

**70.** Which one of the these is not included in the biodiversity hotspots of India ?

(a) Western Ghats

(b) Himalayas

(c) Indo-Burma

(d) North Indian Plains

A. Western Ghats

B. Himalayas

C. Indo-Burma

D. North Indian Plains

**Answer: D**

**Watch Video Solution**

**71.** Ecological hotspots present in India are

(a) one

(b) two

(c) three

(d) five

A. one

B. two

C. three

D. five

**Answer: C**

[Watch Video Solution](#)

72. Which pair of geographical area shows maximum biodiversity in our country?

- (a) Sunderbans and Rann of Kutch
- (b) Eastern Ghats and Western Ghats
- (c) Eastern Himalayas and Western Ghats
- (d) Kerala and Punjab

- A. Sunderbans and Rann of Kutch
- B. Eastern Ghats and Western Ghats
- C. Eastern Himalayas and Western Ghats
- D. Kerala and Punjab

**Answer: C**

[Watch Video Solution](#)

**73.** Which of the following statements regarding biodiversity hotspots are incorrect?

(i) High endemism

(ii) High level of species richness

(iii) Total number is 34 in the world

(iv) Five of these occur in India

(v) High alien species invasion

(vi) Cover less than 2 % of the earth's land area, but if properly conserved, they can reduce extinctions by about 30 %

(a) (i) and (ii)

(b) (iv) and (v)

(c) iv), (v) and (vi)

(d) (iii), (iv), (v) and (vi)

A. (i) and (ii)

B. (iv) and (v)

C. (iv), (v) and (vi)

D. (iii), (iv), (v) and (vi)

**Answer: B**

**Watch Video Solution**

**74.** In a national park, protection is provided to

- (a) flora and fauna
- (b) entire ecosystem
- (c) fauna only
- (d) flora only

A. flora and fauna

B. entire ecosystem

C. fauna only

D. flora only

**Answer: B**

**Watch Video Solution**

75. Refer to the given figure representing different zones of a biosphere reserve.

Choose the correct answer as per the statements given below

- (i) Limited human activity is allowed such as for research and education.
- (ii) An active co-operation occurs between reserve management and local people for activities like cropping, settlements, etc.
- (iii) No human activity is allowed.

- A. 

(i)	(ii)	(ii)
A	B	C
- B. 

(i)	(ii)	(ii)
B	C	A
- C. 

(i)	(ii)	(ii)
C	A	B
- D. 

(i)	(ii)	(ii)
C	B	A

**Answer: B**

**View Text Solution**

**76.** Which of the given statements is true ?

- (a) National parks are meant for the protection of fauna only.
- (b) Wildlife sanctuaries are meant for the protection of both flora and fauna.
- (c) Activities like collection of forest products, harvesting of timber, private ownership of land, etc. are allowed in national parks.
- (d) None of these

A. National parks are meant for the protection of fauna only.

B. Wildlife sanctuaries are meant for the protection of both flora and fauna.

C. Activities like collection of forest products, harvesting of timber, private ownership of land, etc. are allowed in national parks.

D. None of these

**Answer: D**

**Watch Video Solution**

77. Biosphere reserves differ from national parks and wildlife sanctuaries because in the former

- (a) human beings are not allowed to enter
- (b) people are integral part of the system
- (c) plants are paid greater attention than the animals
- (d) living organisms are brought from all over the world and preserved for posterity.

A. human beings are not allowed to enter

B. people are integral part of the system

C. plants are paid greater attention than the animals

D. living organisms are brought from all over the world and preserved for posterity.

**Answer: B**

**Watch Video Solution**

78. India has \_\_\_\_\_ biosphere reserves, \_\_\_\_\_ national parks and \_\_\_\_\_ wildlife sanctuaries till 2018.

- (a) 20,90,500
- (b) 14,85, 348
- (c) 18, 103, 544
- (d) 11, 91, 500

A. 20,90,500

B. 14,85, 348

C. 18, 103, 544

D. 11, 91, 500

**Answer: C**

**80.** \_\_\_\_\_ National Park was the first national park of India.

(a) Jim Corbett

(b) Nanda Devi

(c) Kaziranga

(d) Jaldapara

A. Jim Corbett

B. Nanda Devi

C. Kaziranga

D. Jaldapara

**Answer: A**

**Watch Video Solution**

**81.** First biosphere reserve was established in 1986 at

(a) Nilgiri

(b) Nanda Devi

(c) Rann of Kutch

(d) Sunderbans

- A. Nilgiri
- B. Nanda Devi
- C. Rann of Kutch
- D. Sunderbans

**Answer: A**

**Watch Video Solution**

**82.** Nanda Devi biosphere reserve is found in

- (a) Uttaranchal
- (b) Assam
- (c) Himachal Pardesh
- (d) Andhra Pradesh

- A. Uttaranchal
- B. Assam
- C. Himachal Pardesh

**Answer: A**

**Watch Video Solution**

**83.** MAB Programme means

- (a) Man and biosphere programme
- (b) Man and biodiversity conservation programme
- (c) Manually aided biosphere conservation programme
- (d) None of these

A. Man and biosphere programme

B. Man and biodiversity conservation programme

C. Manually aided biosphere conservation programme

D. None of these

**Answer: A**

**Watch Video Solution**

**84.** India relishes a history of religious and culture traditions which emphasised the protection of nature. In many cultures, tracts of forest were set aside, all the trees and wildlife within were venerated and given total protection. Such areas are referred to as

- (a) hotspots
- (b) ethical groves
- (c) sacred groves
- (d) protected areas

A. hotspots

B. ethical groves

C. sacred groves

D. protected areas

**Answer: C**

**Watch Video Solution**

**85.** Select the correct option regarding sacred forests or groves.

- (a) These are forest patches which are held in high esteem by tribal communities.
- (b) Rare endemic species can be found flourishing in these areas.
- (c) These are found in several parts of India.
- (d) All of these

A. These are forest patches which are held in high esteem by tribal communities.

B. Rare endemic species can be found flourishing in these areas.

C. These are found in several parts of India.

D. All of these

**Answer: D**

**Watch Video Solution**

86. Sacred groves are found in Khasi and Jaintia hills of i, Aravalli hills of ii, Western Ghat regions of iii.

- A. a) (i) (ii) (iii)  
Meghalaya Rajasthan Karnataka and Maharashtra
- B. b) (i) (ii) (iii)  
Meghalaya and Maharashtra Rajasthan Madhya Pradesh
- C. c) (i) (ii) (iii)  
Madhya Pradesh and Maharashtra Rajasthan Meghalaya
- D. d) (i) (ii) (iii)  
Rajasthan Meghalaya Karnataka and Maharashtra

**Answer: A**

**Watch Video Solution**

87. Which of these organisms are protected by people of 'Bishnoi' community of Rajasthan?

- (a) Prosopis cineraria
- (b) Black buck

(c) Bhojpatra

(d) both (a) and (b)

A. Prosopis cineraria

B. Black buck

C. Bhojpatra

D. both (a) and (b)

**Answer: D**

**Watch Video Solution**

**88.** Select the incorrectly matched pair.

A. a) Tannis-Narrow utilitarian.

B. b) Endemism - Species confined to a particular region and not found anywhere else

C. c) Lungs of the planet - Amazon rainforest

D. d) Rajasthan - Sacred groves that are last refuges for a large number of rare and threatened plants

**Answer: D**

**Watch Video Solution**

**89.** The one-horned rhinoceros is specific to which of the following sanctuaries ?

A. 1) Bharatpur

B. 2) Vedanthgol

C. 3) Kaziranga

D. 4) Corbett Park

**Answer: C**

**Watch Video Solution**

**90.** Which of the following is not an example of in situ conservation ?

A. a) Biosphere reserves

B. b) National parks

C. c) Wildlife sanctuaries

D. d) Zoological parks

**Answer: D**

**Watch Video Solution**

**91.** One of the ex situ conservation methods for endangered species is

(a) Wildlife sanctuaries

(b) Biosphere reserves

(c) Cryopreservation

(d) National parks.

A. wildlife sanctuaries

B. biosphere reserves

C. cryopreservation

D. national parks.

**Answer: C**

**Watch Video Solution**

**92.** Cryopreservation is the reservation of germplasm at very low temperature of around

(a)  $-121^{\circ}\text{C}$

(b)  $-196^{\circ}\text{C}$

(c)  $0^{\circ}\text{C}$

(d)  $-101^{\circ}\text{C}$

A.  $-121^{\circ}\text{C}$

B.  $-196^{\circ}\text{C}$

C.  $0^{\circ}\text{C}$

D.  $-101^{\circ}\text{C}$

**Answer: B**

**Watch Video Solution**

**93.** Select the option correctly identifies I, II, III and IV.

- A. I- Biosphere reserves, II-National parks , wildlife sanctuaries, III - Sacred groves, IV - Gene banks, cryopreservation
- B. I- Sacred plants, home gardens, II - National parks, wildlife sanctuaries, III - Arboreta, IV - Gene banks, cryopreservation
- C. I - Biosphere reserves, II - Gene banks, cryopreservation, III - Sacred plants, home gardens, IV- National parks, wildlife sanctuaries
- D. I-Biosphere reserves, II - Arboreta, III -Gene banks, cryopreservation, IV - National parks, wildlife sanctuaries

**Answer: A**

**View Text Solution**

**94.** What is common to the seed banks, orchards, tissue culture and cryopreservation ?

- (a) All are in situ conservation methods.
- (b) All are ex situ conservation methods.
- (c) All require ultramodern equipment and very large space
- (d) All are methods conservation of extinct organisms.

A. All are in situ conservation methods.

B. All are ex situ conservation methods.

C. All require ultramodern equipment and very large space

D. All are methods conservation of extinct organisms.

**Answer: B**

**Watch Video Solution**

**95.** First 'Earth Summit' for Convention on Biological Diversity' (CBD) was held at

- (a) Johanneberg (2002), South Africa
- (b) Rio de Janeiro (1992), Brazil
- (c) Dehradun (1992), India
- (d) New York (2000), U.S.A.

A. Johanneberg (2002), South Africa

B. Rio de Janeiro (1992), Brazil

C. Dehradun (1992), India

D. New York (2000), U.S.A.

**Answer: B**

**Watch Video Solution**

**96.** Which of the following is not an objective of Convention of Biodiversity?

- (a) Conservation of biodiversity
- (b) Sustainable use of biodiversity
- (c) Fair and equitable sharing of benefits arising out of genetic resources
- (d) Selective hunting of dangerous and threatening species

A. Conservation of biodiversity

B. Sustainable use of biodiversity

C. Fair and equitable sharing of benefits arising out of genetic resources

D. Selective hunting of dangerous and threatening species

**Answer: D**

**Watch Video Solution**

**97.** World Summit on Sustainable Development, 2002 was held in

- (a) Rio de Janeiro, Brazil
- (b) Johannesburg, South Africa
- (c) Dehradun, India
- (d) New York, U.S.A.

A. Rio de Janeiro, Brazil

B. Johannesburg, South Africa

C. Dehradun, India

D. New York, U.S.A.

**Answer: B**

**Watch Video Solution**

**98.** Biodiversity Act of India was passed by the Parliament in the year

- (a) 1992
- (b) 1996

(c) 2000

(d) 2002

A. 1992

B. 1996

C. 2000

D. 2002

**Answer: D**

**Watch Video Solution**

**99.** Select the incorrectly matched pair.

(a) UNESCO = United nations Educational Scientific and cultural Organisation

(b) CITES = Convention in International Trade in Elite Species

(c) IUCN = International Union of Conservation for Nature and Natural Resources

(d) WWF =World Wild Fund for Nature

A. UNESCO = United nations Educational Scientific and cultural Organisation

B. CITES = Convention in International Trade in Elite Species

C. IUCN = International Union of Conservation for Nature and Natural Resources

D. WWF =World Wide Fund for Nature

**Answer: B**

**Watch Video Solution**

**100.** Symbol of WWF is

- (a) tiger
- (b) Rhododendron
- (c) white bear
- (d) giant panda

A. tiger

B. Rhododendron

C. white bear

D. giant panda

**Answer: D**

**Watch Video Solution**

**101.** Where would the greatest number of endemic species occur and why ?

(a) Small volcanic archipelagos, such as the Galapagos Islands, because the abundance of unoccupied habitats favours the adaptive divergence of colonists from nearby mainland populations.

(b) Large oceanic island, such as Australia, because the inhabitants have been isolated from mainland populations for a very long time.

(c) On rugged landscapes, such as Patagonia, because of the high levels of natural disturbance by glaciers and earthquakes.

(d) Temperate woodlands, such as those in southern England, because of

the high levels of disturbance by human activity and the history of artificial selection.

- A. Small volcanic archipelagos, such as the Galapagos Islands, because the abundance of unoccupied habitats favours the adaptive divergence of colonists from nearby mainland populations.
- B. Large oceanic island, such as Australia, because the inhabitants have been isolated from mainland populations for a very long time.
- C. On rugged landscapes, such as Patagonia, because of the high levels of natural disturbance by glaciers and earthquakes.
- D. Temperate woodlands, such as those in southern England, because of the high levels of disturbance by human activity and the history of artificial selection.

**Answer: B**

**Watch Video Solution**

**102.** In the tropical rainforest, the majority of trees have showy animal-pollinated flowers. In temperate forests the majority of trees are wind-pollinated. Which factors best explain these contrasting patterns ?

(i) Wind is rare in tropical forests.

(ii) Because of high species diversity in the tropics, individuals of trees species are often widely separated making wind an inefficient means of pollen dispersal.

(iii) More opportunities for coevolved mutualisms exist in tropical forests because of the high diversity of animal species.

(iv) Trees in tropical forests are mostly evergreen and year-round leaf canopies impede pollen dispersal by wind.

(v) Flowering in tropical forests occurs over a short period of time when wind is absent.

(a) (i) , (ii) and (v)

(b) (i),(iii) and (v)

(c) (ii), (iii) and (iv)

(d) (ii) and (iv)

A. (i) , (ii) and (v)

B. (i),(iii) and (v)

C. (ii), (iii) and (iv)

D. (ii) and (iv)

**Answer: C**

**Watch Video Solution**

**103.** Which of the following statements is incorrect regarding biodiversity?

(a) Biodiversity deals with biological and geographical units such as genes, chromosomes, species, families and biogeographic regions.

(b) Biodiversity is an addition sum of genetic, taxonomic and ecosystem diversity.

(c) It is a measure of the amount of resources shared by the human population.

(d) None of these

- A. Biodiversity deals with biological and geographical units such as genes, chromosomes, species, families and biogeographic regions.
- B. Biodiversity is an addition sum of genetic, taxonomic and ecosystem diversity.
- C. It is a measure of the amount of resources shared by the human population.
- D. None of these

**Answer: C**

**Watch Video Solution**

**104.** Some animals are shown below. Identify the national park concerned chiefly with their preservation and select the correct option.

(1)

(2)

(3)

(4)

A. Velavadar National Park, Gujarat

B. Jim Corbett National Park, Uttarakhand

C. Gir Forest, Gujarat

D. Kaziranga National Park, Assam

A. A-(2), B-(3), C-(1), D-(4)

B. A-(4), B-(3), C-(1), D-(2)

C. A-(4), B-(2), C-(3), D-(1)

D. A-(3), B-(1), C-(2), D-(4)

**Answer: B**

**View Text Solution**

**105.** The given pie diagram represents the proportionate number of species of major taxa of plants. Select the incorrect statements regarding the achloro-

(i) A represents the achloro phyllous, heterotrophic, eucaryotic organisms with chitinous cell walls.

(ii) B represents the members of Kingdom Monera, e.g., bacteria and cyanobacteria.

(iii) B represents those seed plants in which seeds are enclosed inside fruits.

A and B represents gymnosperm and angiosperms respectively.

A. (i) and (iv)

B. (ii) and (iv)

C. (i) and (iii)

D. (ii), (iii) and (iv)

**Answer: B**

**View Text Solution**

**106.** Which of the following countries has the highest biodiversity?

(a) Brazil

(b) South Africa

(c) Russia

(d) India

A. Brazil

B. South Africa

C. Russia

D. India

**Answer: A**

[Watch Video Solution](#)

**107.** Which of the following is not a cause for loss of biodiversity ?

- (a) Destruction of habitat
- (b) Invasion of alien species
- (c) Keeping animals in zoological parks
- (d) Over-exploitation of natural resources

A. Destruction of habitat

B. Invasion bu alien species

C. Keeping by alien species

D. Over-exploitation of natural resources

**Answer: C**

[Watch Video Solution](#)

**108.** Which of the following is not an invasive alien species in the Indian context?

- (a) Lantana
- (b) Cynodon
- (c) Parthenium
- (d) Eichhornia

A. Lantana

B. Cynodon

C. Parthenium

D. Eichhornia

**Answer: B**

**Watch Video Solution**

**109.** Where among the following will you find pitcher plant?

- (a) Rainforest of North-East India

(b) Sunderbans

(c) Thar Desert

(d) Western Ghats

A. Rainforest of North-East India

B. Sunderbans

C. Thar Desert

D. Western Ghats

**Answer: A**

**Watch Video Solution**

**110.** Which of the following is not a features of biodiversity hotspots?

(a) Large number of species

(b) Abundance of endemic species

(c) Mostly located in the polar regions

(d) Mostly located in the tropics

- A. Large number of species
- B. Abundance of endemic species
- C. Mostly located in the polar regions
- D. Mostly located in the tropics

**Answer: C**

**Watch Video Solution**

**111.** Match the animals given in column A with their location in column B.

Column A

Column B

- |                        |              |
|------------------------|--------------|
| (i) Dodo               | A. Africa    |
| (ii) Quagga            | B. Russia    |
| (iii) Thylacine        | C. Mauritius |
| (iv) Stellar's sea cow | D. Australia |

Choose the correct match from the following.

- (a) i-A, ii-C, iii-B, iv-D
- (b) i-D, ii-C, iii-A, iv-B
- (c) i-C, ii-A, iii-B, iv-D
- (d) i-C, ii-A, iii-D, iv-B

A. i-A, ii-C, iii-B, iv-D

B. i-D, ii-C, iii-A, iv-B

C. i-C, ii-A, iii-B, iv-D

D. i-C, ii-A, iii-D, iv-B

**Answer: D**

**Watch Video Solution**

**112.** What is common to the following plants: *Nepenthes*, *Psilotum*, *Rauwolfia* and *Aconitum* ?

(a) All are ornamental plants.

(b) All are phylogenetic link species.

(c) All are prone to over exploitation.

(d) All are exclusively present in the Eastern Himalayas.

A. All are ornamental plants.

B. All are phylogenetic link species.

C. All are prone to over exploitation.

D. All are exclusively present in the Eastern Himalayas.

**Answer: C**

**Watch Video Solution**

**113.** The one-horned rhinoceros is specific to which of the following sanctuary ?

(a) Bihar Kanika

(b) Bandipur

(c) Kaziranga

(d) Corbett park

A. Bihar Kanika

B. Bandipur

C. Kaziranga

D. Corbett park

**Answer: C**

**Watch Video Solution**

**114.** Amongst the animal groups given below, which one has the highest percentage of endangered species?

- (a) Insects
- (b) Mammals
- (c) Amphibians
- (d) Reptiles

A. Insects

B. Mammals

C. Amphibians

D. Reptiles

**Answer: C**

**Watch Video Solution**

**115.** Which one of the following is an endangered plant species of India?

- (a) *Rauwolfia serpentina*
- (b) *Santalum album* (Sandalwood)
- (c) *Cycas beddomei*
- (d) All of the above

A. *Rauwolfia serpentina*

B. *Santalum album* (Sandalwood)

C. *Cycas beddomei*

D. All of the above

**Answer: D**

**Watch Video Solution**

**116.** What is common to *Lantana*, *Eichhornia* and Africa catfish?

- (a) All are endangered species of India.

- (b) All are keystone species.
- (c) All are mammals found in India.
- (d) All are species are neither threatened nor indigenous species of India.
- A. All are endangered species of India.
- B. All are keystone species.
- C. All are mammals found in India.
- D. All are species are neither threatened nor indigenous species of India.

**Answer: D**

**Watch Video Solution**

**117.** The extinction of passenger pigeon was due to

- A. a) increased number of predatory birds
- B. b) over exploitation by humans

C. c) non-availability of the food

D. d) bird flu virus infection.

**Answer: B**

**Watch Video Solution**

**118.** Which of the following statements is correct?

A. a) Parthenium is an endemic species of our country.

B. b) African catfish is not a threat to indigenous catfishes

C. c) Steller's sea cow is an extinct animal.

D. d) Lantana is popularly known as carrot grass.

**Answer: C**

**Watch Video Solution**

**119.** Among the ecosystem mentioned below, where can one find maximum biodiversity?

- A. a) Mangroves
- B. b) Desert
- C. c) Coral reefs
- D. d) Alpine meadows

**Answer: C**

**Watch Video Solution**

**120.** Which of the following forests is known as the 'lungs of the planet earth'?

- A. a) Taiga forest
- B. b) Tundra forest
- C. c) Amazon rainforest

D. d) Rainforest of North east India

**Answer: C**

**Watch Video Solution**

**124.** The historic convention on Biological Diversity held in Rio de Janeiro in 1992 is known as

- A. a) CITES Convention
- B. b) The Earth Summit
- C. c) C-16 Summit
- D. d) MAB Programme.

**Answer: B**

[Watch Video Solution](#)

**125.** What is common to the techniques (i) in vitro fertilisation, (ii) Cryopreservation and (iii) tissue culture?

- A. a) All are in situ conservation methods.

- B. b) All are ex situ conservation methods.
- C. c) All require ultra modern equipment and large space.
- D. d) All are methods of conservation of extinct organisms.

**Answer: B**

**Watch Video Solution**

**126. Assertion :** Genetic variation shown by the plant *Rauwolfia vomitoria* growing in different Himalayan ranges is very important economically.

**Reason :** The amount and variety of alkaloids presents in this plant, change both between the *Rauwolfia* species and between the different strains of *R. vomitoria*.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.
- B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**127.** Assertion : The specific diversity present in a given community or habitat is referred to as alpha diversity.

Reason : Alpha diversity is usually expressed by species richness and species evenness in that community or habitat.

A. a) If both assertion and reason are true and reason is the correct explanation of assertion.

B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.

C. c) If assertion is true but reason is false.

D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**128.** Assertion : Tropical regions have got a long evolutionary time for species diversification as compared to temperate regions.

Reason : Temperate regions have undergone frequent glaciations in the past whereas tropical regions have remained relatively undisturbed for millions of years.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.
- B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. c) If assertion is true but reason is false.
- D. d) If both assertion and reason are false.

**Answer: A**

[Watch Video Solution](#)

**129.** Assertion : If the species-area relationship are analysed among very large areas like the entire continents, the value of  $Z$ , i.e., slope of line in the range of 0.1 to 0.2.

Reason : The value of  $Z$ , i.e., slope of line of species area relationship lies in the range of 0.6 to 1.2 when analysis is done among small areas.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.
- B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. c) If assertion is true but reason is false.
- D. d) If both assertion and reason are false.

**Answer: D**

[Watch Video Solution](#)

**130. Assertion :**Species with low genetic variability are generally at greater risk of extinction than the species with more genetic variability.

**Reason:** Species with low genetic variability are more vulnerable to disease, predators or other environmental challenges.

- A. a) If both assertion and reason are true and reason is the correct explanation of assertion.
- B. b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. c) If assertion is true but reason is false.
- D. d) If both assertion and reason are false.

**Answer: A**

**Watch Video Solution**

**131. Assertion :** Threatened species are those living species which have been greatly reduced in their number and are liable to become extinct if the causative factors continue.

**Reason :** IUCN is an international organisation which maintains the IUCN red list of threatened species, to assess the conservation status of different species.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

**132.** Assertion : Critically endangered category includes the species which have sufficient population at present but is undergoing depletion due to some factors.

Reason : Vulnerable category includes the species which are facing very high risk of extinction in the wild and can become extinct any moment.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

- A. If both assertion and reason are true and reason is the correct explanation of assertion.
- B. If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. If assertion is true but reason is false.
- D. If both assertion and reason are false.

**Answer: D**

**Watch Video Solution**

**133.** Assertion : Over-exploitation of a species reduces the size of its population eventually leading to its extinction.

Reason : Steller's sea cow is a large, herbivorous, terrestrial mammal which is on the verge of extinction due to over exploitation.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct

explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**134.** Assertion : The Nile perch introduced into lake Victoria in east Africa led to the extinction of an ecologically unique assemblage of more than 200 species of cichlid fish in the lake.

Reason : When alien species are introduced deliberately for economic or other uses, they often become invasive and cause extinction of indigenous species.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: A**

Watch Video Solution

**135.** Assertion : Broadly utilitarian arguments say that we should conserve biodiversity because biodiversity plays a major role in many ecosystem services that nature provides.

Reason : Exploitation of molecular, genetic and species level diversity to obtain the products of economic importance is included under broadly utilitarian category.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**136.** Assertion : Biodiversity hotspots are the regions which possess high levels of species richness, high degree of endemism and no loss habitats.

Reason : Total number of biodiversity hotspots in the world is 32 with two of these hotspots found in India.

(a) If both assertion and reason are true and reason is the correct explanation of assertion.

(b) If both assertion and reason are true but reason is not the correct explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

- A. If both assertion and reason are true and reason is the correct explanation of assertion.
- B. If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. If assertion is true but reason is false.
- D. If both assertion and reason are false.

**Answer: D**

**Watch Video Solution**

**137.** Assertion : Jim Corbett National Park is the first National Park of India and is famous for tigers.

Reason : Through the main focus is protection of wildlife, the reserve management has also encouraged ecotourism in this national park.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct

explanation of assertion.

(c) If assertion is true but reason is false.

(d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

**138.** Assertion : In a wildlife sanctuary, collection of timber, harvesting of minor forest products and private ownership rights are allowed.

Reason : A sanctuary is a protected area meant for the conservation of

both flora and fauna where cultivation of land is permitted.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: C**

**Watch Video Solution**

**139. Assertion :** One of the most important traditional uses of sacred groves was that they acted as a repository for various ayurvedic medicines.

**Reason :** In modern times , sacred groves have become biodiversity rich areas, as they provide refuge to various plant and animal species of conservation significance.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

A. If both assertion and reason are true and reason is the correct explanation of assertion.

B. If both assertion and reason are true but reason is not the correct explanation of assertion.

C. If assertion is true but reason is false.

D. If both assertion and reason are false.

**Answer: B**

**Watch Video Solution**

**140.** Assertion : Offsite collections can be used to restock depleted populations, reintroduce species in the wild and restore degraded habitats.

Reason : In situ conservation refers to the conservation of endangered species in their natural habitats.

- (a) If both assertion and reason are true and reason is the correct explanation of assertion.
- (b) If both assertion and reason are true but reason is not the correct explanation of assertion.
- (c) If assertion is true but reason is false.
- (d) If both assertion and reason are false.

- A. If both assertion and reason are true and reason is the correct explanation of assertion.
- B. If both assertion and reason are true but reason is not the correct explanation of assertion.
- C. If assertion is true but reason is false.
- D. If both assertion and reason are false.

**Answer: B**
