BOOKS - TRUEMAN'S BIOLOGY (ENGLISH)

NEET - 2013 (GENETICS)

Mcqs

1. If both parents are carriers for thalassemia, which is an autosomal recessive disorder,

what are the chances pregnancy resulting in an affected child?

A. 0.25

B. 1

C. no chance

D. 0.5

Answer: 1

Watch Video Solution

2. Which Mendelian idea is depicted by a cross in which the F_1 generation resembles both the parents

A. Inheritance of one gene

B. Co-dominance

C. Incomplete dominance

D. Law of dominance

Answer: 2

Watch Video Solution

3. The incorrect statement with regard to Haemophilia is

- A. It is a dominant disease
- B. A single protein involved in the clot-ting of blood is affected
- C. It is a sex-linked disease
- D. It is a recessive disease

Answer: 1

Watch Video Solution

4. The diagram shows an important concept in the genetic implicative of DNA. Fill in the blanks A to C.

A. A - transcription B - translation C -

Francis Crick

B. A - translation B - extension C - Rosalind

Franklin

C. A - transcription B - replication C - James

Watson

D. A - translation B - transcription C - Erevin

Chargaff

Answer: 1

Watch Video Solution

5. Which enzyme/s will be produced in a cell in which there is a nonsense mutation in the lac Y gene?

A. (a) Transacetylase

B. (b) Lactose permease and transacetylase

C. (c) β -galactosidase

D. (d) Lactose permease

Answer: 3

Watch Video Solution

6. Which of the following statements is not true of two genes that show 50% recombination frequency?

A. (a) The genes show independent assortment

B. (b) If the genes are present on the same chromosome, they undergo more than one crossovers in every meiosis

C. (c) The genes may be on different chromosomes

D. (d) The genes are tightly linked

Answer: 4
