

BIOLOGY

BOOKS - JMD BIOLOGY (PUNJABI ENGLISH)

Reproduction health

1. ovulation takes place on the day of menstrual cycle.

A. 7th

B. 10th

 $\mathsf{C.}\,14th$

D. 17th

Answer: C

2. geometric representation of age structure is

a characteristics of

A. landscape

- B. ecosystem
- C. population
- D. biotic community

Answer: C

3. in the human female, menstruation can be

deferred by the administration of:

A. FSH only

B. LH only

C. combination of FSH and LH

D. combination of estrogen and

progesterone

Answer: D

Watch Video Solution

4. biotic potential of human female is

A. 471

 $B.\,481$

C. 491

D.461

Answer: B

View Text Solution

5. Lippes loop is

A. inert IUI

B. inert IUD

C. Active IUI

D. Active IUD

Answer: B

Watch Video Solution

6. the population of an insect species shows and explosive increase in number during rainy season followed by its disappearance at the end of the season. what does the show? A. a population of its predators increases

enormously.

- B. S-shaped or sigmoid growth of this insect.
- C. the food plants mature and die at the

end of the rainy season.

D. its population growth curve is of J-type

Answer: D

7. given below are four methods (a-d) and their modes of action (i-iv) in achieving contraception. select their correct matching from the four options that follow Method(a. the pill, b. condom, c.Vasectomy, d.Copper-T), Mode of Action(i. prevents sperms reaching cervix, ii. prevents implantation, iii. prevents ovulation, iv.Semen contains no sperm)

A. a-iii, b-iv, c-i, d-ii

B. a-ii, b-iii, c-i, d-iv

C. a-iii, b-i, c-iv, d-ii

D. a-iv, b-i, c-ii, d-iii

Answer: C

8. consider the statements given below regarding contraception answer as directed thereafter.

(a) medical termination of pregnancy (MTP) during first trimester is generally save, (b) generally chances of conception are Nil until mother breast-feeds the infant up to 2 years. (c) intrauterine devices like copper-T are effective contraceptives. (d) Contraceptive pills may be taken up to 1 week after coitus to prevent conception.

which two of the above statements are correct?

A. (a),(c)

B. (a),(b)

C. (b),(c)

D. (c),(d)

Answer: A

Watch Video Solution

9. July 11th is observed as

A. no Tobacco day

B. World health day

C. World population day

D. World environment day

10. the permissible use of the amniocentesis technique is for:

A. artificial insemination

B. transfer of embryo into the uterus of a

surrogate mother

C. detecting any genetic abnormality.

D. detecting sex of the unborn foetus.

Answer: A

Watch Video Solution

11. Cu ions released from copper-releasing Intra Uterine Devices(IUDs)

A. increase phagocytosis of sperm

B. suppress sperms motility

C. prevent ovulation

D. make uterus unsuitable for implantation

Answer: B

Watch Video Solution

12. in vitro fertilization is a technique that involves transfer of which one of the following into the fallopian tube?

A. either zygote or early embryo upto 8 - cell stage

B. embroil of 32 cell stage

C. Zygote only

D. embryo only, upto 8 cell stage.

Answer: C

Watch Video Solution

13. LNG-20 is

A. IUI

B. IUT

C. IUD

D. IFT

Answer: C

Watch Video Solution

14. Progestin- estradiol combined contraceptive pills inhibit ovulation by:

A. negative feedback on the release of

estrogen, from ovary required for

follicular development in follicular

phase.

B. preventing the uterine physiological and

morphological changes required for

implantation.

C. inhibiting the secretion of FSH and LH

that are necessary for ovulation.

D. both (A) and (C)

Answer: D

15. the technique called Gamete Intra Fallopian Transfer (GIFT) is is recommended for those females

A. who cannot produce an ovum

B. who cannot retain the foetus inside

uterus

C. whose cervical canal keys to narrow to

allow passage for the sperms.

environment for fertilization

Answer: A

16. medical termination of pregnancy (MTP) is

considered safe upto how many weeks of pregnancy?

A. Eighteen weeks

B. Six weeks

C. Eight weeks

D. Twelve weeks

Answer: D

Watch Video Solution

17. which one of the following is the most widely accepted method of contraception in India, as at present?

A. diaphragms

B. IUDs

C. cervical caps

D. tubectomy

Answer: B

Watch Video Solution

18. in assisted reproductive technology, after invitro fertilization which is transplanted in fallopian tube

A. Embryo upto 8 blastomeres, if zygote is

not transplanted.

B. only zygote is transplanted

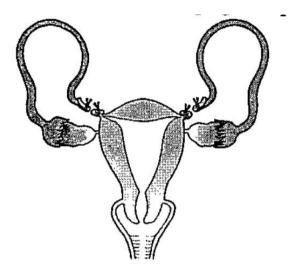

C. blastula is transplanted

D. Morula in 8-24 celled stage is

transplanted

Answer: A

19. what does the following figure depict?

- A. Uterine cancer
- B. tubectomy
- C. ovarian cancer
- D. Vasectomy

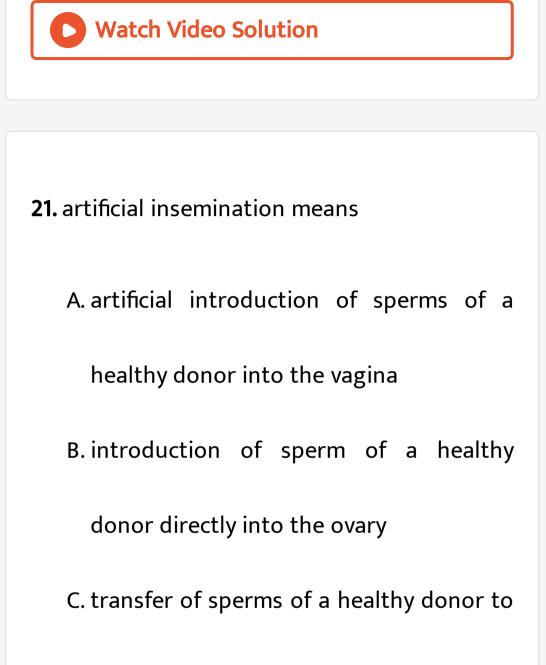

20. test tube baby programme employs

- A. intracytoplasmic sperm injection
- B. zygote intrafallopian transfer
- C. intrauterine insemination
- D. gamete intrafallopian transfer

Answer: C

a test tube containing ovary

D. transfer of arms of husband to a test

tube containing ova.

Answer: D

22. which of the following cannot be detected

in the developing foetus by amniocentesis?

A. down syndrome

B. jaundice

C. Klinefelter syndrome

D. sex of the foetus

Answer: B

23. one of the legal method of birth control is

A. by having coitus at the time of day break

B. by a premature ejaculation during coitus

C. abortion by taking an appropriate

medicine

D. by abstaining from coitus from day 10 to

17 of menstrual cycle

Answer: D

Watch Video Solution

24. choose the correctly matched pair from the

following

A. Gonorrhoea, hepatitis B - sexually

transmitted disease.

B. AIDS, gonorrhea - viral infection

C. Diphtheria, ringworm - fungal infection

D. diphtheria, tuberculosis- protozoan

infection.

Answer: A

25. Assisted productive technology IVF involves transfer of

- A. zygote into uterus
- B. embryo with 16 blastomeres into the

fallopian tube

C. ovum into the fallopian tube

D. zygote into the fallopian tube

Answer: D

the optimal capacity of the organism to

produce offsprings is called

Watch Video Solution

27. fill in the blanks

..... is the upper limit up to which

environment can sustain population.

instrument used for tubal ligation is

Watch Video Solution

29. fill in the blanks

rapid increase in human population is called

.....

instrument used for tubal ligation is

31. By aminocentesis the foetal sex

determination test is banned in our country. Is

it necessary ? Comment.

carrying capacity of the Earth for human

population is

33. fill in the blanks

presently human population needs years

to double.

34. What are the main reasons for population

explosion ?

35. Explain :

Surgical methods of birth control

36. true or false

congenital chromosomal and metabolic defects in the foetus can be determined by amniocentesis.

Watch Video Solution

37. true or false

the excess of birth covid deaths in a year per

1000 individuals is called growth rate.

first test tube baby was born to Mrs. Louise Joy

Brown of England.

39. true or false

the best way to decrease population of a

country is to kill people on a large scale.

complete count of individual in an area is

called population.

41. true or false

main cause of disease are genetic disorder,

infections and life style.

hepatitis-B genital herpes and HIV are STDs,

only HIV is incurable.

Watch Video Solution

43. true or false

test tube baby technique involves artificial

insemination.

in India, medical termination of pregnancy (i.e.

abortion) was legalised in 1999.

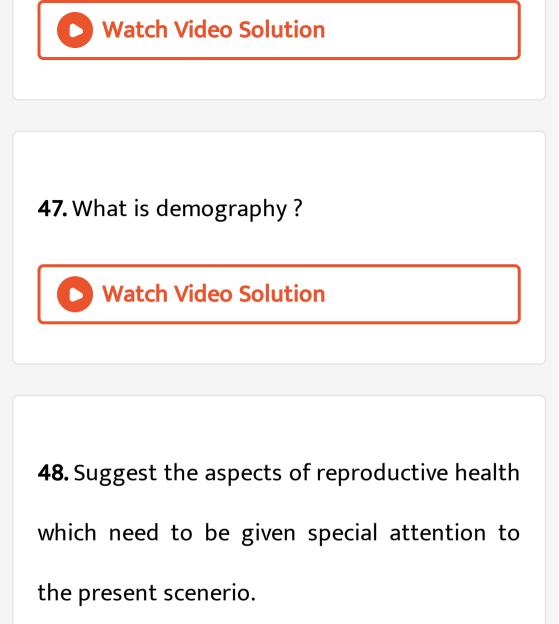

Watch Video Solution

45. true or false

abortions could happen spontaneously too.

Watch Video Solution

46. What is surrogate mother ?

49. Is sex education necessary in schools?Why?

Watch Video Solution

50. What are measures one has to take to

prevent from contacting STDs?

51. Expand the term GIFT.

52. Differentiate natality rate and mortality

rate.

53. Briefly give an account of various

intrauterine contraceptive measures.

54. Name some ARTs which have decreased the

number of cases of of infertile couples.

55. By aminocentesis the foetal sex

determination test is banned in our country. Is

it necessary ? Comment.

56. Expand MTP. Which time period of pregnancy is considered safe to perform MTP? What is its importance?

57. Identify the figure-1 and figure- 2.

(1)

(2)

58. Mention the role of figure-1 and figure-2.

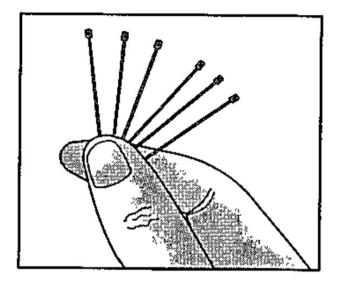

(2)

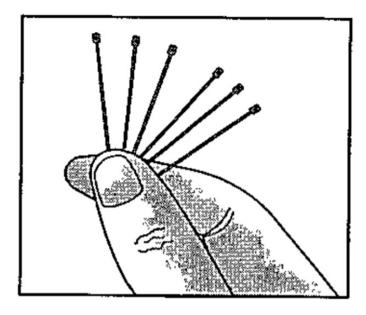

59. What does the above figure depict?

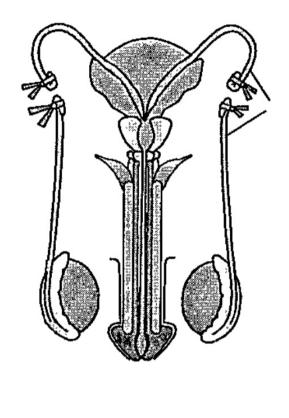

60. How long it remains effective for contraception?

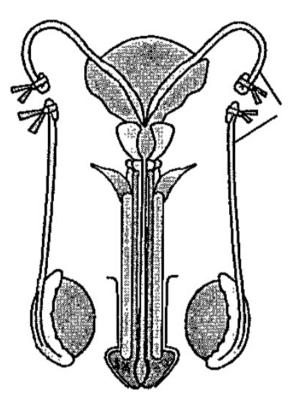

61. What does the above figure depict?

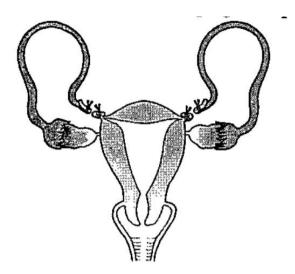

62. Which structure is removed in this

technique?

63. what does the following figure depict?

64. Which structure is removed in this figure?
