

MATHS

Geometrical Concepts Related To Regular Solids

Example

1. Let me try and find a solid which has only one surface.

[Watch Video Solution](#)

2. Let me write the name of such a solid which has one curved surface and two plane surfaces.

[Watch Video Solution](#)

3. Let me draw such a solid which has one curved and one plane surface.

[Watch Video Solution](#)

4. With 6 plane surfaces let me make a solid figure and write my observations for the solid made.

[Watch Video Solution](#)

5. Chose the right option - Which of these is of cylindrical shape -

A. (i) Eraser,

B. (ii) Duster,

C. (iii) Milk powder can,

D. (iv) Ball.

Answer:

Watch Video Solution

6. Chose the right option - A solid having one surface -

A. (i) Dice,

B. (ii) Pencil,

C. (iii) Exercise Book,

D. (iv) Ball.

Answer:

Watch Video Solution
