PROBABILITY

Solved Examples

1. A coin is tossed 500 times. We obtain a head 260 times. On tossing the coin at random, find the probability of getting (i) a head, (ii) a tail

[Watch Video Solution](#)

2. A die is rolled 50 times and the number 6 is obtained 8 times. Now, if the die is rolled at random, find the probability of getting the number 6.

[Watch Video Solution](#)

3. here are 10 cards in a bag bearing numbers from 1 to 10. A card is drawn from the bag 60

times. Each time, the number obtained is noted and the card drawn is replaced. It was found that the card bearing number 7 was drawn 4 times. Now, if a card is drawn at random, find the probability of getting the card bearing number 7.

Watch Video Solution

4. A die is rolled 100 times and the outcomes are noted and tabulated as shown :

Outcome	1	2	3	4	5	6
Frequency	9	15	19	21	24	12

When a die is rolled at random, find the probability of getting the number:

(i) 2, (ii) 4, (iii) 6

[Watch Video Solution](#)

5. In a school, 300 students were surveyed. The survey showed that 186 students liked watching cricket match while the rest disliked it. Out of these students, if one student is chosen at random, what is the probability that the chosen student :

(i) likes watching cricket match?

(ii) dislikes watching cricket match?

[Watch Video Solution](#)

Exercise 25

1. When a coin was tossed 200 times, we obtained Head : 118 times and Tail: 82 times.

When the coin is tossed at random, what is the probability of getting

(i) ahead?

(ii) a tail?

[Watch Video Solution](#)

2. A die is rolled 150 times and the outcomes are noted which are tabulated as shown below

:

Outcome	1	2	3	4	5	6
Frequency	29	17	24	19	33	28

When a die is rolled at random, find the probability of getting a :

(i) 1, (ii) 4, (iii) 5

3. Five cards numbered to 5 are placed in a bag. A card is drawn from the bag 30 times. Each time, the number on the drawn card is noted and the card drawn is replaced. The outcomes are tabulated as shown below :

Outcome	1	2	3	4	5
Frequency	4	10	7	5	4

If a card is now drawn at random, find the probability that the card drawn bears the number:

(i) 2, (ii) 3, (iii) 5

A. (i) $\frac{2}{3}$, (ii) $\frac{7}{30}$, (iii) $\frac{2}{15}$

B. (i) $\frac{1}{3}$, (ii) $\frac{7}{20}$, (iii) $\frac{2}{15}$

C. (i) $\frac{1}{3}$, (ii) $\frac{9}{30}$, (iii) $\frac{2}{15}$

D. (i) $\frac{1}{3}$, (ii) $\frac{7}{30}$, (iii) $\frac{2}{15}$

Answer: D

Watch Video Solution

4. Two coins are tossed simultaneously 100 times. We obtained : Two Heads : 23 times, One Head: 56 times, Zero Head : 21 times.

When two coins are tossed at random, what is the probability of getting:

(i) Two Heads?

(ii) One Head?

(iii) Zero Head?

[Watch Video Solution](#)

5. In a survey of 200 employees of a company, it was found that 89 liked the lunch packs provided by the Company while the rest did not. Out of these employees, if one employee

is chosen at random, what is the probability that the chosen employee:

(i) likes the lunch pack? (ii) dislikes the lunch pack?

[Watch Video Solution](#)

Example

1. A bag contains 3 Maths books, 5 English books, and 4 Science books. One book is taken out from the bag. Find the probability that the

book drawn is a

Maths book

[Watch Video Solution](#)

2. A bag contains 3 Maths books. 5 English books, and 4 Science books. One book is taken out from the bag. Find the probability that the book drawn is a English book.

[Watch Video Solution](#)

3. A bag contains 3 Maths books, 5 English books, and 4 Science books. One book is taken out from the bag. Find the probability that the book drawn is a Science book.

[Watch Video Solution](#)

4. A bag has 7 white, 12 green and 9 blue marbles. One marble is drawn at random. Find the probability that the marble drawn from the bag is not white.

[Watch Video Solution](#)

5. A box has three pairs of socks. One pair is white and the other two are of blue colour. One white sock is taken out. Later another sock is drawn from the bag without looking at the colour. What is the probability that it will be blue in colour?

[Watch Video Solution](#)

6. A card is drawn from a pack of 52. List the outcomes of the following events:

Getting a king.

[Watch Video Solution](#)

7. A card is drawn from a pack of 52. List the outcomes of the following events:

Getting a red ace.

[Watch Video Solution](#)

Exercise 19 1

1. Describe the following events as 'certain', 'impossible' 'likely' or 'unlikely'.

This year January will have 32 days.

[Watch Video Solution](#)

2. Describe the following events as 'certain', 'impossible' 'likely' or 'unlikely'.

Today I will reach school on time.

[Watch Video Solution](#)

3. Describe the following events as 'certain', 'impossible' 'likely' or 'unlikely'.

When I toss a coin. I will get either a head or a tail.

[Watch Video Solution](#)

4. Describe the following events as 'certain', 'impossible' 'likely' or 'unlikely'.

You are in grade 7 and you will have 'Surprise Test' in 4 subjects today.

Watch Video Solution

5. List the outcomes when:

a coin is tossed.

Watch Video Solution

6. List the outcomes when:

a die is rolled.

[Watch Video Solution](#)

7. A dice is rolled. List the outcomes of the event A if:

A is the event that a number less than or equal to 3 appears.

[Watch Video Solution](#)

8. A dice is rolled. List the outcomes of the event A if:

A is the event that a number greater than or equal to 5 appears.

[Watch Video Solution](#)

9. A die is rolled. List the outcomes of the event A if:

A is the event that a number not more than 4 appears.

[Watch Video Solution](#)

10. A die is rolled. List the outcomes of the event A if:

A is the event that a number not less than 3 appears.

Watch Video Solution

11. A die is rolled. Find the probability of getting:

a 6.

Watch Video Solution

12. A die is rolled. Find the probability of getting:

a multiple of 3.

Watch Video Solution

13. A die is rolled. Find the probability of getting:

a multiple of 4.

Watch Video Solution

14. A dice is rolled. Find the probability of getting:

a number which is not a prime number.

Watch Video Solution

15. A die is rolled. Find the probability of getting:

a composite number.

Watch Video Solution

16. A die is rolled. Find the probability that:
a number less than 4 shows.

Watch Video Solution

17. A die is rolled. Find the probability that:
a number more than 4 shows.

Watch Video Solution

18. A die is rolled. Find the probability that:
a number greater than or equal to 2 shows.

Watch Video Solution

19. A die is rolled. Find the probability that:
a number less than equal to 2 shows.

Watch Video Solution

20. A die is rolled. Find the probability that:
a number divisible by 2 shows.

Watch Video Solution

21. A card is drawn from a pack of 52. Find the probability that:
it is a card of heart.

Watch Video Solution

22. A card is drawn from a pack of 52. Find the probability that:

it is a face card (jack, queen, and king).

Watch Video Solution

23. A card is drawn from a pack of 52. Find the probability that:

it is not a face card.

Watch Video Solution

24. A card is drawn from a pack of 52. Find the probability that:

it is a 10 and red in colour.

Watch Video Solution

25. A card is drawn from a pack of 52. Find the probability that:

it is an 8 and black in colour.

Watch Video Solution

26. A bag contains 5 red and 8 green marbles. One marble is drawn from the bag at random. Find the probability that the marble drawn is red.

Watch Video Solution

27. A bag has 10 green, 5 white, and 4 green balls. One ball is drawn at random. What is the probability that it is white?

Watch Video Solution

28. Your team along with other two teams are participating in a debate competition. The team that will go first is to be decided by a drawn of lots. What is the probability that your team will go first?

Watch Video Solution

29. A box has 50 identical cards numbered 1 to 50. One card is drawn at random. What is probability that the card drawn has a number which is a multiple of 3?

[Watch Video Solution](#)

30. A box has five pairs of socks. Two pairs are white and the other three are black. One black sock is taken out. Later , another sock is drawn from the bag. What is the probability that it will be a black sock?

[Watch Video Solution](#)

31. A letter is picked at random from the English alphabet. Find the probability that is a vowel.

Watch Video Solution

32. A letter is picked at random from the letters of the word UNCOPYRIGHTABLE. Find the probability that it is a vowel.

Watch Video Solution

33. A bag has 6 green, 5 red, 7 blue and 3 pink pencils. One pencil is drawn at random. Find the probability that the pencil is neither green nor pink.

Watch Video Solution

34. A group of students are asked which game they play. The findings are as follows : 8 play cricket, 9 play football, 7 play table tennis, and 5 play tennis. One student is selected at

random. What is the probability that the student plays either table tennis or tennis?

[Watch Video Solution](#)

Revision Exercise

1. Use one of the following to describe each one of the statements: Certain, very likely, likely, very unlikely, impossible

It will snow tomorrow in Delhi.

[Watch Video Solution](#)

2. Use one of the following to describe each one of the statements: Certain, very likely, likely, very unlikely, impossible

The sun will rise tomorrow.

[Watch Video Solution](#)

3. Use one of the following to describe each one of the statements: Certain, very likely, likely, very unlikely, impossible

A die is rolled and a 5 shows.

[Watch Video Solution](#)

4. Use one of the following to describe each one of the statements: Certain, very likely, likely, very unlikely, impossible

Your car will have a flat tyre today.

[Watch Video Solution](#)

5. Use one of the following to describe each one of the statements: Certain, very likely,

likely, very unlikely, impossible

A worksheet of 10 question. A given to you from the worksheet is an easy question.

Watch Video Solution

6. A die is rolled. List the outcomes of the event A if:

A is the event that a prime number appears.

Watch Video Solution

7. A die is rolled. List the outcomes of the event A if:

A is the event that a composite number appears.

[Watch Video Solution](#)

8. A die is rolled. List the outcomes of the event A if:

A is the event that a multiple of 2 appears.

[Watch Video Solution](#)

9. A die is rolled. List the outcomes of the event A if:

A is the event that a number not less than 4 appears.

Watch Video Solution

10. A die is rolled. Find the probability of getting:

a number greater than 5.

Watch Video Solution

11. A die is rolled. Find the probability of getting:

a multiple of 5.

Watch Video Solution

12. A die is rolled. Find the probability of getting:

a non - prime number.

Watch Video Solution

13. An unbiased die is rolled. Find the probability of getting:
an even number.

Watch Video Solution

14. A card is drawn from a pack of cards. Find the probability that:
It is a 10 of hearts.

Watch Video Solution

15. A card is drawn from a pack of cards. Find the probability that:

It is a 6 of spades.

Watch Video Solution

16. A card is drawn from a pack of cards. Find the probability that:

it is red in colour.

Watch Video Solution

17. A card is drawn from a pack of cards. Find the probability that:
it is black in colour,

Watch Video Solution

18. A card is drawn from a pack of cards. Find the probability that:
it is a card of spades.

Watch Video Solution

19. A card is drawn from a pack of cards. Find the probability that:
it is a king.

Watch Video Solution

20. A box has 15 slips with numbers from 1 to 15 written on them, one slip with one number. One slip is drawn from the box at random. Find the probability that the slip drawn has a multiple of 5.

Watch Video Solution

21. A bag has 5 chocolate candies and 7 vanilla candies. One candy is drawn out at random. Find the probability that the candy drawn is vanilla.

Watch Video Solution

22. A pencil box has 5 fountain pens. 3 blue pencils. And 7 red pencils. One item is taken out of the box at random. Find the probability

that the item is a:

fountain pen

[Watch Video Solution](#)

23. A pencil box has 5 fountain pens. 3 blue pencils. And 7 red pencils. One item is taken out of the box at random. Find the probability that the item is a:

red pencil

[Watch Video Solution](#)

24. A pencil box has 5 fountain pens. 3 blue pencils. And 7 red pencils. One item is taken out of the box at random. Find the probability that the item is a:

pencil

Watch Video Solution

25. A class has 20 girls and 16 boys. One student is selected at random. Find the probability that the student is a girl.

Watch Video Solution

26. A six - faced die has 3 faces red, 2 blue 1 white. The die is rolled. Find the probability that the face that shows is:

red

Watch Video Solution

27. A six - faced die has 3 faces red, 2 blue 1 white. The die is rolled. Find the probability

that the face that shows is:

blue

[Watch Video Solution](#)

28. A six - faced die has 3 faces red, 2 blue 1 white. The die is rolled. Find the probability that the face that shows is:

while

[Watch Video Solution](#)

29. The letters of the word "CHANCES" are placed in a box and one letter is taken out. What is the probability of the following being the one taken out:

Vowel

Watch Video Solution

30. The letters of the work "CHANCES" are placed in a box and one letter is taken out. What is the probability of the following being

the one taken out?

Consonants

[Watch Video Solution](#)

Challenges

1. A card is drawn from a well shuffled pack of playing cards. What is the probability that it is either a spade or an ace or both?

[Watch Video Solution](#)

2. A bag has 6 yellow, 9 red, and 12 blue marbles. A marble is drawn at random. Find the probability that it is either red or blue.

[Watch Video Solution](#)

Unit Practice Paper Vi Fill In The Blanks

1. The median of 3,5,9,11,13,15 is _____

[Watch Video Solution](#)

2. The arithmetic mean of first 10 natural numbers is _____

Watch Video Solution

3. The mode of the data (1,2,1,5,6,7,8,1) is _____

Watch Video Solution

4. The range of data (2,3,5,6,8,11,13) is _____

Watch Video Solution

5. The arithmetic mean of $3a$, $3b$, $3c$ is _____

Watch Video Solution

Unit Practice Paper Vi

1. Following are the number of members in 20 families of the smallest size?

6,8,3,2,5,7,8,6,5,5,7,7,8,6,6,7,7,6,5

What is the smallest family size? How many families are of the smallest size?

[Watch Video Solution](#)

2. Following are the number of members in 20 families of the smallest size?

6,8,6,3,2,5,7,8,6,5,5,7,7,8,6,6,7,7,6,5

Find the average family size.

[Watch Video Solution](#)

3. Following are the number of members in 20 families of the smallest size?

6,8,3,2,5,7,8,6,5,5,7,7,8,6,6,2,7,6,5,3

What is the mode of the data given?

[Watch Video Solution](#)

4. A die is thrown 12 times and the source are recorded in the following table.

Throw	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th	11th	12th
Scores	2	3	2	3	1	6	5	4	2	3	1	2

Find the range, mean and mode of the given scores.

[Watch Video Solution](#)

5. Read the bar graph and answer the following questions.

What information is given by the bar graph?

Watch Video Solution

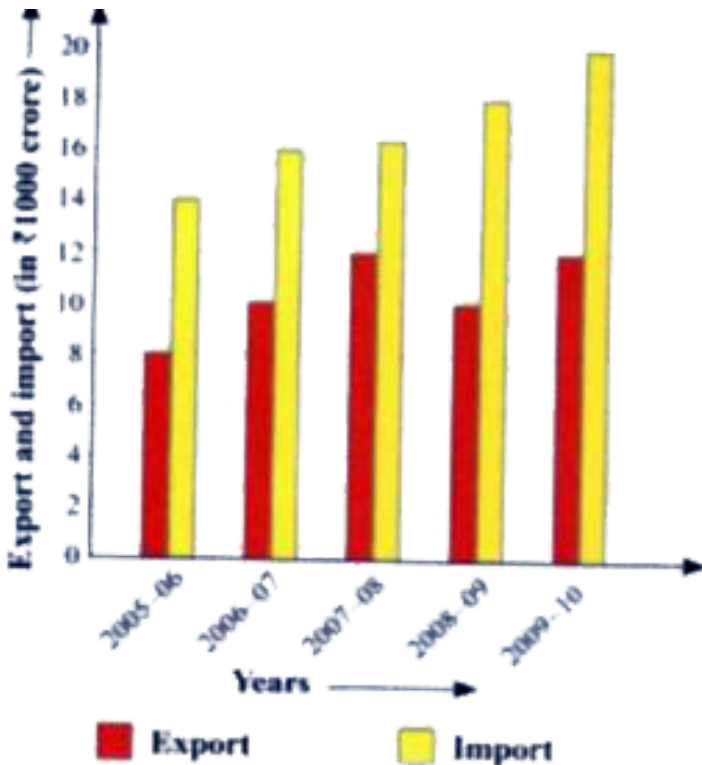

6. Read the bar graph and answer the following questions.

In which year the difference of the values of export and import is maximum?

7. Read the bar graph and answer the following questions.

in which year the value of the export is greater than that of the import?

[Watch Video Solution](#)

8. A jar contains 3 blue, 2 black, 6 red, and 8 white balls, If a ball is drawn at random from the jar, find the probability that the ball drawn is:

blue

[Watch Video Solution](#)

9. A jar contains 3 blue, 2 black, 6 red, and 8 white balls, If a ball is drawn at random from the jar, find the probability that the ball drawn is:

not red

Watch Video Solution

10. A jar contains 3 blue, 2 black, 6 red, and 8 white balls, If a ball is drawn at random from the jar, find the probability that the ball drawn

is:

white

[Watch Video Solution](#)

11. A jar contains 3 blue, 2 black, 6 red, and 8 white balls, If a ball is drawn at random from the jar, find the probability that the ball drawn is:

not black

[Watch Video Solution](#)

12. Classify the following outcomes as likely, unlikely, possible impossible, even change, or certain.

The number on the top face of an ordinary die when rolled will be less than 7.

Watch Video Solution

13. Classify the following outcome as likely, unlikely, possible ,impossible or certain.

A dog will have kittens.

Watch Video Solution

14. Classify the following outcomes as likely, unlikely, possible impossible, even change, or certain.

Monday will be the day after Tuesday next month.

Watch Video Solution

15. Classify the following outcomes as likely, unlikely, possible impossible or certain.

Your friend will call you tonight.

Watch Video Solution

16. Classify the following outcomes as likely, unlikely, possible impossible, even change, or certain.

There will be floods in Delhi tomorrow.

Watch Video Solution

17. A card is drawn from a pack of 52 cards.

What is probability that is a black king?

Watch Video Solution

18. Nitin has three 50-rupee notes, and sis 500-rupee notes in his pocket. If one note is taken out randomly. Then what is the probability that is a

50-rupee note?

Watch Video Solution

19. Nitin has three 50-rupee notes and six 500-rupee notes in his pocket. If one note is taken out randomly. Then what is the probability that is a 500-rupee note?

Watch Video Solution

20. Nitin has three 50-rupee notes, and six 500-rupee notes in his pocket. If one note is taken out randomly. Then what is the

probability that is a

100 - rupee note?

[Watch Video Solution](#)

21. A die is rolled. What is the probability of getting a multiple of 2?

[Watch Video Solution](#)

22. A bag has 10 green 5 white, and 4 red balls.

One ball is drawn at random. What is the

probability that it is white?

[Watch Video Solution](#)

Try This

1. Next February will have 30 days.

[Watch Video Solution](#)

2. You fall off your bike on the way home from school.

[Watch Video Solution](#)

3. You complete all your Maths homework correctly.

[Watch Video Solution](#)

4. Your parents decide to double your pocket money next week.

[Watch Video Solution](#)

5. All the tyres of the school bus will get flat tomorrow.

[Watch Video Solution](#)

6. The school bus will be on time tomorrow.

[Watch Video Solution](#)

7. State whether statement is certain or uncertain :Today is Sunday and tomorrow will

be Monday.

Watch Video Solution

8. A card is drawn from a pack of 52 cards. Find the probability of getting a card of spades

Watch Video Solution

9. Sandy can spend the evening either reading a book or visiting her friend Seema or Esha.

Find the probability that Sandy reads a boo in the evening.

[Watch Video Solution](#)

10. Sandy can spend the evening either reading a book or visiting her friend Seema or Esha. Find the probability that Sandy visits Esha in the evening.

[Watch Video Solution](#)

11. Sandy can spend the evening either reading a book or visiting her friend Seema or Esha. Find the probability that Sandy visits a friend in the evening.

Watch Video Solution

12. A die is rolled. Find the probability that a prime number shows.

Watch Video Solution

13. A die is rolled. Find the probability that a number not less than 5 shows.

Watch Video Solution

14. A die is rolled. Find the probability that a number greater than or equal to 3 shows.

Watch Video Solution
