## BOOKS - NCERT EXEMPLAR

### FRICTION

#### Multiple Choice Questions

1. Whenever the surfaces in contact tend to move or move with respect to each other, the force of friction comes into play

- A. only if the objects are solid.
- B. only if one of the two objects is liquid.
- C. only if one of the two objects is gaseous.
- D. irrespective of whether the objects are solid, liquid or gaseous.

**Answer: D**

2. To sharpen the blade of a knife by rubbing it against a surface, which of the following will be most suitable?

A. stone

B. wooden block

C. plastic block

D. glass block

**Answer: A**

**Watch Video Solution**

3. A toy car released with the same initial speed will travel farthest on

- A. muddy surface
- B. cemented surface
- C. polished marble surface
- D. brick surface

**Answer: C**

**Watch Video Solution**

4. If we apply oil on door hinges, the friction will

A. increase

B. disappear altogether

C. decrease

D. will remain unchanged

**Answer: C**

**Watch Video Solution**

5. Which of the following statements is incorrect?

A. Friction acts on a writing.

B. Friction acts on a boat moving on water.

C. Friction acts on a bicycle moving on a smooth road.

D. Friction does not act on a ball moving through air.

**Answer: D**

6. A boy rolls a rubber ball on a wooden surface. The ball travels a short distance before coming to rest. To make the same ball travel longer distance before coming to rest, he may

- A. spread a carpet on the wooden surface.
- B. cover the ball with a piece of cloth.
- C. sprinkle talcum powder on the wooden surface.

D. sprinkle sand on the wooden surface.

**Answer: C**

**Watch Video Solution**

7. In a large commercial complex there are four ways to reach the main road. One of the path has loose soil, the second is laid with polished marble, the third is laid with bricks and the fourth has gravel surface. It is raining heavily

and Paheli wishes to reach the main road. The path on which she is least likely to slip is

- A. loose soil.
- B. bricks
- C. polished marble
- D. gravel

**Answer: D**

**Watch Video Solution**

1. Will force of friction come into play when a rain drop rolls down a glass window pane?

**Watch Video Solution**

2. Two boys are riding their bicycles on the same concrete road. One has new tyres on his bicycle while the other has tyres that are old and used. Which of them is more likely to skid while moving through a patch of the road which has lubricating oil spilled over it?

4. The handle of a cricket bat or a badminton racquet is usually rough. Explain the reason.

**Watch Video Solution**

5. Explain why the surface of mortar and pestle (silbatta) used for grinding is etched again after prolonged use?

**Watch Video Solution**

6. A marble is allowed to roll down an inclined plane from a fixed height. At the foot of the inclined plane, it moves on a horizontal surface (a) covered with silk cloth (b) covered

with a layer of sand and (c) covered with a glass sheet. On which surface will the marble move the shortest distance. Give reason for your answer.

- A. covered with silk cloth
- B. covered with a layer of sand
- C. covered with a glass sheet
- D. none of these

**Answer: B**

**Watch Video Solution**

7. A father and son pushed their car to bring it to the side of road as it had stalled in the middle of the road. They experienced that although they had to push with all their might initially to move the car, the push required to keep the car rolling was smaller, once the car started rolling. Explain.
