

# PHYSICS

## BOOKS - PSEB

### FORCE AND PRESSURE

#### Exercise

1. Give two examples each of situations in which you push or pull to change the state of motion of objects.

[Watch Video Solution](#)

2. Give two examples of situations in which applied force causes a change in the shape of an object.

[Watch Video Solution](#)

3. Fill in the blanks in the following statements  
:- To draw water from a well we have to .....at  
the rope.

[Watch Video Solution](#)

4. Fill in the blanks in the following statements

:- A charged body .....an uncharged body towards it.

[Watch Video Solution](#)

5. Fill in the blanks in the following statements

:- To move a loaded trolley we have to ..... it.

[Watch Video Solution](#)

6. Fill in the blanks in the following statements

:- The north pole of a magnet .....the north pole of another magnet.

[Watch Video Solution](#)

7. An archer stretches her bow while taking aim at the target. She then releases the arrow, which begins to move towards the target .Based on this informaion, fill up the gaps in

the following statements using the following terms. Muscular, contact, non -contact, gravity, friction, shape, attraction The force applied by the archer to stretch the bow is a example of ..... force.

[Watch Video Solution](#)

8. An archer stretches her bow while taking aim at the target. She then releases the arrow, which begins to move towards the target .Based on this informaion, fill up the gaps in

the following statements using the following terms. Muscular, contact, non -contact, gravity, friction, shape, attraction The force applied by the archer to stretch the bow is a example of ..... force.

**Watch Video Solution**

9. An archer stretches her bow while taking aim at the target. She then releases the arrow, which begins to move towards the target .Based on this informaion, fill up the gaps in

the following statements using the following terms. Muscular, contact, non -contact, gravity, friction, shape, attraction The type of force responsible for a change in the state of motion of the arrow is an example of a..... force .

[Watch Video Solution](#)

**10.** An archer stretches her bow while taking aim at the target. She then releases the arrow, which begins to move towards the target

.Based on this informaion, fill up the gaps in the following statements using the following terms. Muscular,contact,non -contact,gravity, friction,shape, attraction While the arrow moves towards its target, the forces acting on it are due to..... of air.

**Watch Video Solution**

**11.** In the following situations identify the agent exerting the force and the object on which it acts.State the effect of the force in

each case.

Squeezing a piece of lemon between the fingers to extract its juice.

Taking out paste from a toothpaste tube.

A load suspended from a spring while its other end is on a hook fixed to a wall.

An athlete making a high jump to clear the bar at a certain height.

**Watch Video Solution**

**12.** A blacksmith hammers a hot piece of iron while making a tool. How does the force due to hammering affect the piece of iron ?

**Watch Video Solution**

**13.** An inflated balloon was pressed against a wall after it has been rubbed with a piece of synthetic cloth. It was found that the balloon sticks to the wall. What force might be

responsible for the attraction between the balloon and the wall ?

[Watch Video Solution](#)

**14.** Name the forces acting on a plastic bucket containing water held above ground level in your hand. Discuss why the forces acting on the bucket do not bring a change in its state of motion.

[Watch Video Solution](#)

**15.** A rocket has been fired upwards to launch a satellite in its orbit . Name the two forces acting on the rocket immediately after leaving the launching pad.

**Watch Video Solution**

**16.** When we press the bulb of a dropper with its nozzle kept in water , air in the dropper seems to escape in the form of bubbles. Once we release the pressure on the bulb , water gets filled in the dropper.The rise of water in

the dropper is due to pressure of water  
gravity of the earth (c) shape of rubber bulb  
atmospheric pressure.

A. pressure of water

B. gravity of the earth

C. shape of rubber bulb

D. atmospheric pressure.

**Answer:**

**Watch Video Solution**
