## NCERT - NCERT Biology(Telugu)

**NOT FOR DRINKING - NOT FOR  
BREATHING**

**Medicine Oriented Material**

1. A new vehicles in operation for more than one year should undergo emission tests for

every

A. for every 2 months

B. for every 3 months

C. for every 5 months

D. for every 6 months

**Answer:**

**Watch Video Solution**

2. The maximum percentage of causes for air pollution is only because of

- A. human activities
- B. storms and volcanoes
- C. industrial effluents
- D. vehicular traffic

**Answer:**

**Watch Video Solution**

3. Excessive use of fertilizers often leads to the accumulation of nitrates in water. When this water is utilized by animals, these nitrates,

A. silt

B. death of hydrophytes

C. growth of fishes

D. eutrophication

**Answer:**

**Watch Video Solution**

4. Main air pollutant is

A.  $CO_2$

B. CO

C.  $N_2$

D. Sulphur

**Answer:**

**Watch Video Solution**

5. Carries of fluorosis

A.  $CO_2$

B. chlorine

C. nitrogen

D. water

**Answer:**

**Watch Video Solution**

**6. (A):** Photo chemical smog is Oxidising in nature

(R): Photo chemical smog is formed due to the combustion of coal and petroleum products

A. air

B. soil

C. noise

D. water

**Answer:**

**Watch Video Solution**

7. The excreta and other garbage should be treated for

A. biogas

B. manures

C. as both well

D. none of them

**Answer:**

**Watch Video Solution**

8. River Musi situated in

A. Vijayawada

B. Hyderabad

C. Warangal

D. Rajamundry

**Answer:**

**Watch Video Solution**

9. pH of a water sample is tested with

A. litmus paper

B. carbon paper

C. white paper

D. calorimeter

**Answer:**

**Watch Video Solution**

**10. When water temperature is increased**

A. the amount of dissolved oxygen

increases

B. the amount of dissolved oxygen

decreases

C. the amount of  $CO_2$  increases

D. nothing will happen

**Answer:**

**Watch Video Solution**
