

MATHS

BOOKS - MODERN PUBLICATION

CIRCLES

Example

1. The radius of a circle is 13 cm and the length of one of its chord is 10 cm. Find the distance of the chord from the centre.

[Watch Video Solution](#)

2. Find the length of a chord which is at a distance of 24 cm from the centre of a circle whose diameter is 50 cm.

[Watch Video Solution](#)

3. Two circles of radii 5 cm and 3 cm intersect at two points and the distance between their

centres is 4 cm. Find the length of the common chord.

[Watch Video Solution](#)

4. In the figure

OD is

perpendicular to the chord AB of a circle

whose centre is O. If BC is a diameter, show that $CA = 2OD$

[Watch Video Solution](#)

5. Two concentric circles have a common centre O. A line 'l' intersects these circles at A, B, C and D. Prove that $AB = CD$.

[Watch Video Solution](#)

6. Two circles with centres O and O' intersect at P . Through P , a line l parallel to OO' , meeting circles at C and D , is drawn. Prove that $CD = 2OO'$

[Watch Video Solution](#)

7. Two chords PQ and RS of a circle are parallel to each other and AB is the perpendicular bisector of PQ . Without using any construction, prove that AB bisects RS .

[Watch Video Solution](#)

8. Prove that the right-bisector of a chord of a circle bisects the corresponding minor arc of the circle.

[Watch Video Solution](#)

9. If a diameter of a circle bisects each of the chords of the circle, prove that the chords are parallel.

[Watch Video Solution](#)

10. If two intersecting chords of a circle make equal angles with the diameter passing through their point of intersection, prove that the chords are equal.

Fig. 10.24

[Watch Video Solution](#)

11. AB and CD are two chords of a circle such that $AB = 6$ cm, $CD = 12$ cm and AB is parallel to CD. The distance between AB and CD is 3 cm. Find the radius of the circle.

[Watch Video Solution](#)

12. Prove that the line of centres of two intersecting circles subtends equal angles at the two points of intersection.

Watch Video Solution

13. In the given figure

O is the

centre of a circle and PO bisects $\angle APD$. Prove

that $AB = CD$

Watch Video Solution

14. L and M are mid-points of two equal chords AB and CD of a circle with centre O Prove that

$$\angle OLM = \angle OML$$

Watch Video Solution

15. L and M are mid-points of two equal chords AB and CD of a circle with centre O Prove that

$$\angle ALM = \angle CML$$

Watch Video Solution

16. Two equal chords AB and CD of a circle with centre O, intersect each other at E. Prove that $AD = CB$

Watch Video Solution

17. Equal chords AB and CD of a circle with centre O, cut at right angles at E. If L and M are the mid-points of AB and CD respectively, prove that OLEM is a square.

Watch Video Solution

18. If two chords of a circle bisect one another they must be diameters.

Watch Video Solution

19. OA and OB are respectively perpendicular to chords CD and EF of a circle whose centre is

O. If $OA = OB$, prove that $CE \cong DF$

Watch Video Solution

20. If O is the centre of a circle, find the value of x in each of the following figures

(i)

(ii)

Watch Video Solution

21. O is the centre of the circle and the measure of arc AOC is 120° . Find

$\angle ADC$ and $\angle ABC$

[Watch Video Solution](#)

22. O is the centre of the circle. The angle subtended by the ar BCD at the centre is 150° .

BC is produced to E. Find $\angle BAD$ and $\angle BCD$

 [Watch Video Solution](#)

23. AB is a diameter of the circle $C(AO,R)$ and the radius OD is perpendicular to AB. If C is any point on the arc DB, find

$\angle BAD$ and $\angle ACD$

Watch Video Solution

24. O is the centre of the circle. Prove that

$$\angle x + \angle y = \angle z$$

[Watch Video Solution](#)

25. $AB = CD$. Prove that $BE =$ and $AE = Ce$, where E is the point of intersection AD and BC .

As $\triangle AEB$ and $\triangle CED$

[▶ Watch Video Solution](#)

26. ABC and ADC are two right triangles with common hypotenuse AC. Prove that $\angle CAD = \angle CBD$.

Watch Video Solution

27. If O is the circumcentre of a $\triangle ABC$, $OD \perp BC$, prove that $\angle BOD = \angle A$

Watch Video Solution

28. Prove that the angle in a segment smaller than a semi-circle is greater than a right angle.

[Watch Video Solution](#)

29. AB is a diameter of a circle having centre O and a circle is described having AO as diameter. A chord AD of the bigger circle intersects the smaller circle at C . Prove that BD

$$= 2OC.$$

Watch Video Solution

30. Prove that the circle drawn on any one of the equal sides of an isosceles triangle as

diameter bisects the base.

Watch Video Solution

31. In the figure

AB and

CD are two chords of a circle, intersecting each other at P such that $AP = CP$ show that $AB = CD$.

Watch Video Solution

32. Prove that in a right angled triangle the mid-point of the hypotenuse is equidistant from its vertices.

Watch Video Solution

33. Two circles intersect at A and and AC,AD are respectively the diameter of the circle .

Prove that the points C, B and D are collinear.

Watch Video Solution

34. ABCD is a cyclic quadrilateral in which AC and BD are its diagonals. If

$\angle DBC = 70^\circ$ and $\angle BAC = 30^\circ$ find

$\angle BCD$

Watch Video Solution

35. ABCD is a cyclic quadrilateral O is the centre of the circle. If $\angle BOD = 160^\circ$, find $\angle BPD$

Watch Video Solution

36. O is the centre of the circle. If $\angle AOC = 140^\circ$. Find $\angle ABC$

Watch Video Solution

37. If O is the centre of the circle, $\angle AOC = 110^\circ$ and side AB is produced to D , find $\angle CBD$

Watch Video Solution

38. C and D are the points on the semi-circle described on BA as diameter. Given $\angle BAD = 70^\circ$ and $\angle DBC = 30^\circ$. Find $\angle ABD$ and $\angle BDC$

ICE ARTS :

Watch Video Solution

39. A,B,C and D,E,f are two of collinear points.

Prove that $AD \parallel CF$

[Watch Video Solution](#)

40. ABC is an isosceles triangle in which $AB = AC$. If D and E are the mid-points of AB and AC respectively, prove that B,C,D and E are concyclic.

[Watch Video Solution](#)

41. AOB is a diameter of the circle with centre O. Find the numerical value of $\angle ACD + \angle DEB$

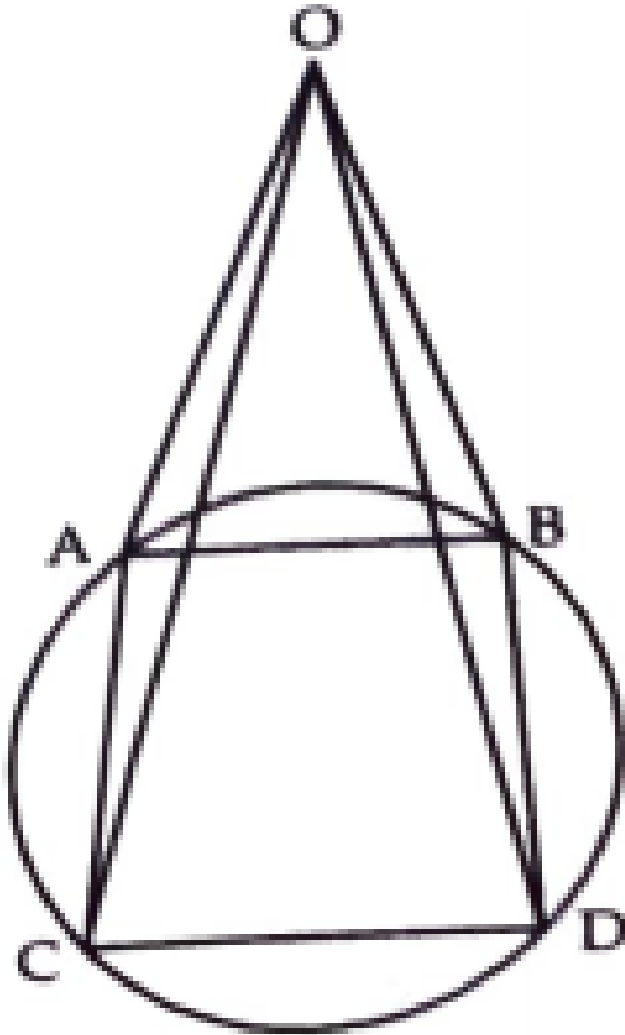

Watch Video Solution

42. ABCD is a cyclic quadrilateral. A circle passing through A and B meets AD and BC in E and F respectively. Prove that $EF \parallel DC$

Watch Video Solution

43. AB and CD are two parallel chords of a circle and lines CA and DB intersect each other at O. Show that $OA = OB$.

Watch Video Solution

44. POQ is a diameter and $PQRS$ is a cyclic quadrilateral. If $\angle PSR = 150^\circ$, find $\angle RPQ$

Watch Video Solution

45. O is the centre of the circle and arc ABC subtends an angle of 130° at the centre. If AB is extended to P, find $\angle PBC$

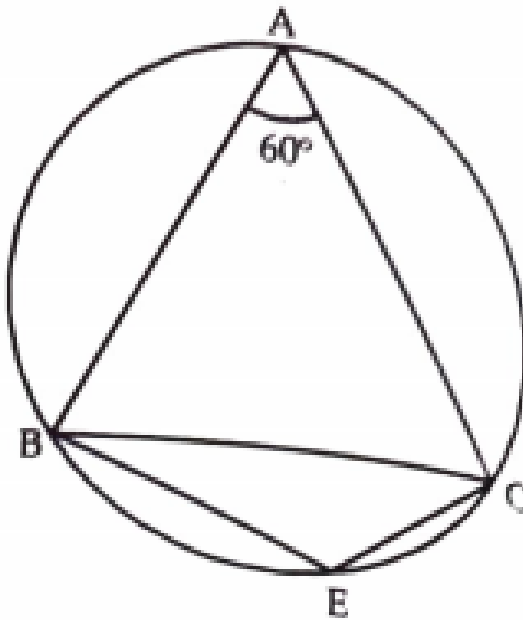

[Watch Video Solution](#)

46. $BD = DC$ and $\angle CBD = 30^\circ$, find $m\angle BAC$

Watch Video Solution

47. $\triangle ABC$ is an equilateral triangle $\angle BEC$

Watch Video Solution

48. Sides AD and AB of cyclic quadrilateral ABCD are produced to E and F respectively. If $\angle CBF = 130^\circ$ and $\angle CDE = x^\circ$, find the value of x.

Watch Video Solution

49. AB and CD are diameters of a circle with centre O. If $\angle OBD = 50^\circ$, find $\angle AOC$

Watch Video Solution

50. O is the centre of the circle. If $\angle AOC = 140^\circ$. Find $\angle ABC$

[Watch Video Solution](#)

51. O is the centre of a circle. If $\angle AOD = 140^\circ$ and $\angle CAB = 50^\circ$, calculate the $\angle EBD$

[Watch Video Solution](#)

52. Prove that the circle drawn with any side of a rhombus as diameter, passes through the point of intersection of its diagonals.

[Watch Video Solution](#)

53. Chords AB and Cd of a circle are produced to meet at E . Prove that $\triangle EDB$ and $\triangle EAC$ are similar.

[Watch Video Solution](#)

54. Prove that the centre of the circle circumscribing the cyclic rectangle ABCD is the point of intersection of its diagonals.

Watch Video Solution

55. Prove that the circle drawn with any side of a rhombus as diameter, passes through the point of intersection of its diagonals.

Watch Video Solution

56. ABCD is a cyclic quadrilateral in which BA and CD when produced meet in E and $EA = Ed$.

Prove that $AD \parallel BC$

[Watch Video Solution](#)

57. ABCD is a cyclic quadrilateral in which BA and CD when produced meet in E and $EA = Ed$.

Prove that $EB = EC$

[Watch Video Solution](#)

58. P and Q are centres of two circles, intersecting at B and C, and ACD is a straight line.

$\angle APB = 150^\circ$

If

$\angle APB = 150^\circ$ and $\angle BQD = x^\circ$, find the value of x .

Watch Video Solution

59. Prove that any four vertices of a regular pentagon are concyclic.

Watch Video Solution

60. If two equal chords of a circle intersect within the circle, prove that the segments of one chord are equal to corresponding segments of the other chord.

Watch Video Solution

61. If two equal chords of a circle intersect within the circle, prove that the line joining the point of intersection to the centre makes equal angles with the chord.

[Watch Video Solution](#)

62. The bisector of $\angle B$ of an isosceles triangle $\triangle ABC$ with $AB = AC$ meets the circumcircle of $\triangle ABC$ at P as shown in the figure. If AP and BC produced meet at Q , prove that $CQ =$

CA.

Watch Video Solution

63. ABC is a triangle in which $\angle BA_c = 30^\circ$.

Prove that BC is the radius of the circumcircle

of $\triangle ABC$, whose centre O.

[Watch Video Solution](#)

64. Three STD booths situated at P, Q and R is the figure are operated by handicapped persons. These three booths are equidistant from each other

Find

$\angle QPR$

Watch Video Solution

65. Recall that two circles are congruent if they have the same radii. Prove that equal chords of congruent circles subtend equal angles at their centres.

[Watch Video Solution](#)

66. Prove that if chords of congruent circles subtend equal angles at their centres, then the chords are equal.

[Watch Video Solution](#)

67. Draw different pairs of circles. How many points does each pair have in common ? What is the maximum number of common points ?

[Watch Video Solution](#)

68. Suppose you are given a circle. Give a construction to find its centre.

[Watch Video Solution](#)

69. If two circles intersect at two points, prove that their centres lie on the perpendicular bisector of the common chord.

[Watch Video Solution](#)

70. Two circles of radii 5 cm and 3 cm intersect at two points and the distance between their centres is 4 cm. Find the length of the common chord.

Watch Video Solution

71. If two equal chords of a circle intersect within the circle, prove that the segments of one chord are equal to corresponding segments of the other chord.

[Watch Video Solution](#)

72. If two equal chords of a circle intersect within the circle, prove that the line joining the point of intersection to the centre makes equal angles with the chord.

[Watch Video Solution](#)

73. If a line intersects two concentric circles (circles with the same centre) with centre O at

A, B, C and D, prove that $AB = CD$

[Watch Video Solution](#)

74. A circular park of radius 20 m is situated in a colony. Three boys Ankur, Syed and David are sitting at equal distance on its boundary each having a toy telephone in his hands to talk

each other. Find the length of the string of each phone.

[Watch Video Solution](#)

75. A, B and C are three points on a circle with centre O such that $\angle BOC = 30^\circ$, $\angle AOB = 60^\circ$. If D is a point on the circle other than the arc ABC, find

$\angle ADC$

Watch Video Solution

76. A chord of a circle is equal to the radius of the circle. Find the angle subtended by the chord on a point on the minor arc and also at a point on the major arc.

[Watch Video Solution](#)

77. In the given figure, $\angle PQR = 100^\circ$, where P, Q and R are points on a circle with centre O. Find $\angle OPR$.

[Watch Video Solution](#)

78. In Fig. 10.38, $\angle ABC = 69^\circ$, $\angle ACB = 31^\circ$, find $\angle BDC$.

Fig. 10.38

Watch Video Solution

79. ABCD is a cyclic quadrilateral whose diagonals intersect at a point E.

$\angle DBC = 70^\circ$, $\angle BAC$ is 30° , find $\angle BCD$.

Further, if $AB = BC$, find $\angle ECD$.

[Watch Video Solution](#)

80. If diagonals of a cyclic quadrilateral are diameters of the circle through the vertices of the quadrilateral, prove that it is a rectangle.

[Watch Video Solution](#)

81. If the non-parallel sides of a trapezium are equal, prove that it is cyclic.

Watch Video Solution

82. If circles are drawn taking two sides of a triangle as diameters, prove that the point of intersection of these circles lie on the third side.

Watch Video Solution

83. ABC and ADC are two right triangles with common hypotenuse AC. Prove that $\angle CAD = \angle CBD$.

Watch Video Solution

84. Prove that a cyclic parallelogram is a rectangle.

Watch Video Solution

85. Prove that the line of centres of two intersecting circles subtends equal angles at the two points of intersection.

Watch Video Solution

86. Two chords AB and CD of lengths 5 cm and 11 cm respectively of a circle are parallel to each other and are on opposite sides of its centre. If the distance between AB and CD is 6 cm, find the radius of the circle.

[Watch Video Solution](#)

87. The lengths of two parallel chords of a circle are 6 cm and 8 cm. If the smaller chord is at a distance of 4 cm from the centre, what is the distance of the other chord from the centre ?

[Watch Video Solution](#)

88. Let vertex of an angle ABC be located outside a circle and let the sides of the angle

intersect chords AD and CE with the circle.
Prove that $\angle ABC$ is equal to half the difference of the angles subtended by the chords AC and DE at the centre.

[Watch Video Solution](#)

89. Prove that the circle drawn with any side of a rhombus as diameter, passes through the point of intersection of its diagonals.

[Watch Video Solution](#)

90. ABCD is a parallelogram. The circle through A, B and C intersect CD (produced if necessary) at E. Prove that $AE = AD$.

Watch Video Solution

91. AC and BD are chords of a circle which bisect each other. Prove that (i) AC and BD are diameters, (ii) ABCD is a rectangle.

Watch Video Solution

92. AC and BD are chords of a circle which bisect each other. Prove that (i) AC and BD are diameters, (ii) ABCD is a rectangle.

[Watch Video Solution](#)

93. Bisectors of angles A, B and C of a triangle ABC intersect its circumcircle at D, E and F respectively. Prove that angles of the triangle are $90^\circ - \frac{A}{2}$, $90^\circ - \frac{B}{2}$ and $90^\circ - \frac{C}{2}$ respectively.

[Watch Video Solution](#)

94. Two congruent circles intersect each other at points A and B. Through A any line segment PAQ is drawn so that P, Q lie on the two circles. Prove that $BP = BQ$.

Watch Video Solution

95. In any triangle ABC, if the angle bisector of $\angle A$ and perpendicular bisector of BC

intersect, prove that they intersect on the circumcircle of the triangle ABC.

[Watch Video Solution](#)

96. (True/ False) Two chords AB and CD of a circle are each at distances 4 cm from the centre. Then $AB = CD$.

[Watch Video Solution](#)

97. Two chords AB and AC of a circle with centre O are on the opposite sides of OA . Then

$$\angle OAB = \angle OAC$$

Watch Video Solution

98. (True/ False) Two congruent circles with centres O and O' intersect at two points A and B . Then $\angle AOB = \angle AO'B$.

Watch Video Solution

99. Through three collinear points a circle can be drawn.

Watch Video Solution

100. (True/ False) A circle of radius 3 cm can be drawn through two points A, B such that $AB = 6$ cm.

Watch Video Solution

101. (True/ False) If AOB is a diameter of a circle and C is a point on the circle, then $AC^2 + BC^2 = AB^2$.

[Watch Video Solution](#)

102. (True/ False) ABCD is a cyclic quadrilateral such that $\angle A = 90^\circ$, $\angle B = 70^\circ$, $\angle C = 95^\circ$ and $\angle D = 105^\circ$.

[Watch Video Solution](#)

103. (True/ False) If A, B, C, D are four points such that $\angle BAC = 30^\circ$ and $\angle BDC = 60^\circ$, then D is the centre of the circle through A, B and C.

Watch Video Solution

104. (True/ False) If A, B, C and D are four points such that $\angle BAC = 45^\circ$ and $\angle BDC = 45^\circ$, then A, B, C, D are concyclic.

Watch Video Solution

105. (True/ False) In Fig.

If AOB , is a diameter and $\angle ADC = 120^\circ$, then $\angle CAB = 30^\circ$.

[Watch Video Solution](#)

106. If arcs AXB and CYD of a circle are congruent, find the ratio of AB and CD .

Watch Video Solution

107. If the perpendicular bisector of a chord AB of a circle $PXAQBY$ intersects the circle at P and Q , prove that $\text{arc } PXA \cong \text{arc } PYB$.

Watch Video Solution

108. Two triangles ABC and PQR are such that the perpendiculars from A to QR , B to RP and C to PQ are concurrent. Show that the perpendicular from P to BC , Q to CA and R to AB are also concurrent.

Watch Video Solution

109. If two equal chords intersect each other, then the bisector of the angle between them pass through the centre.

[Watch Video Solution](#)

110. If a diameter of a circle bisects each of the chords of the circle, prove that the chords are parallel.

[Watch Video Solution](#)

111. ABCD is such a quadrilateral A is the centre of the circle passing through B,C and D. Prove that : $\angle CBD + \angle CDB = \frac{1}{2} \angle BAD$

[Watch Video Solution](#)

112. O is the circumcentre of the triangle ABC and D is the mid-point of the base BC. Prove that $\angle BOD = \angle A$

[Watch Video Solution](#)

113. On a common hypotenuse AB, two right triangles ACB and ADB are situated on opposite $\angle BAC = \angle BDC$

[Watch Video Solution](#)

114. Two chords AB and AC of a circle subtend angles equal to 90° and 150° , respectively at the centre. Find $\angle BAC$, if AB and AC lie on the opposite sides of the centre.

Watch Video Solution

115. If D , E and F are three points on the sides BC , CA and AB , respectively, of a triangle ABC such that the lines AD , BE and CF are

concurrent, then show that

$$\frac{BD}{CD} \cdot \frac{CE}{AE} \cdot \frac{AF}{BF} = 1$$

[Watch Video Solution](#)

116. If a pair of opposite sides of a cyclic quadrilateral are equal, prove that its diagonals are also equal.

[Watch Video Solution](#)

117. If O is the circumcentre of a $\triangle ABC$, $OD \perp BC$, prove that $\angle BOD = \angle A$

[Watch Video Solution](#)

118. A chord of a circle is equal to the radius. Find the angle subtended by this chord at a point in major segment.

[Watch Video Solution](#)

119. ABCD is a cyclic quadrilateral such that AB is a diameter of the circle circumscribing it and $\angle ADC = 140^\circ$, then $\angle BAC$ is equal to

[Watch Video Solution](#)

120. Two circles with centres O and O' intersect at P. Through P, a line 'l' parallel to a OO', meeting circles at C and D, is drawn. Prove that $CD = 2OO'$

[Watch Video Solution](#)

121. AOB is a diameter of the circle with centre O . Find the numerical value of $\angle ACD + \angle BED$

[Watch Video Solution](#)

122. If two equal chords of a circle intersect within the circle, prove that the segments of one chord are equal to corresponding segments of the other chord.

[Watch Video Solution](#)

123. If the non-parallel sides of a trapezium are equal, prove that it is cyclic.

Watch Video Solution

124. If P,Q and R are the mid-point of the side BC,CA and AB of a triangle and AD is the perpendicular from A and BC, prove that P,Q and D are concyclic.

Watch Video Solution

125. ABCD is a parallelogram. The circle through A,B is so drawn that it intersects AD at P and CB at Q. Prove that P,Q,C and D are concyclic.

[Watch Video Solution](#)

126. The angle bisector of any angle of a triangle and perpendicular bisector of the opposite side if intersect, they will intersect on the circumcircle of the triangle.

[Watch Video Solution](#)

127. If the chords AB and CD of a circle $AYDZBWCX$ intersect at right angle prove that $\text{arc } CXA + \text{arc } DZB = \text{arc } AYD + \text{arc } BWC = \text{Semicircle}$.

[Watch Video Solution](#)

128. If ABC is an equilateral triangle inscribed in a circle and P be any point on the minor arc

BC which does not coincide with B or C, prove that PA is angle bisector of $\angle BPC$.

[Watch Video Solution](#)

129. If bisectors of opposite angles of a cyclic quadrilateral ABCD intersect the circle, circumscribing it at the points P and Q, prove that PQ is a diameter of the circle.

[Watch Video Solution](#)

130. A circle has radius $\sqrt{2}cm$. It is divided into two segments by a chord of length 2 cm. prove that angle subtended by chord at a point in major segment is 45°

Watch Video Solution

131. Two equal chords AB and CD of a circle when produced intersect at a point P. Prove that $PB = PD$.

Watch Video Solution

132. AB and AC are two chords of a circle of radius r such that $AB = 2AC$. If p and q are the distances of AB and AC from the centre, prove that $4q^2 = p^2 + 3r^2$

[Watch Video Solution](#)

Exercise

1. The radius of a circle is 8 cm and the length of its chords is 12 cm. Find the distance of the

from the centre.

[Watch Video Solution](#)

2. Find the length of a chord which is at a distance of 24 cm from the centre of a circle whose diameter is 50 cm.

[Watch Video Solution](#)

3. A chord of length 16 cm is drawn in a circle of radius 10 cm. Find the distance of the chord

from the of the circle.

[Watch Video Solution](#)

4. Find the length of a chord which is at a distance of 24 cm from the centre of a circle whose diameter is 50 cm.

[Watch Video Solution](#)

5. PQ and RS are two parallel chords of a circle whose centre is O and radius is 10 cm. If PQ =

16 cm and $RS = 12$ cm, find the distance between PQ and RS , if they lie on the same side of the centre O .

[Watch Video Solution](#)

6. PQ and RS are two parallel chords of a circle whose centre is O and radius is 10 cm. If $PQ = 16$ cm and $RS = 12$ cm, find the distance between PQ and RS , if they lie on the opposite side of the centre O .

[Watch Video Solution](#)

7. AB and CD are two chords of a circle such that $AB = 6$ cm, $CD = 12$ cm and AB is parallel to CD. The distance between AB and CD is 3 cm. Find the radius of the circle.

[Watch Video Solution](#)

8. Two parallel chords of lengths 30 cm and 16 cm are drawn on the opposite sides of the centre of a circle of radius 17 cm. find the distance between the chords.

[Watch Video Solution](#)

9. In an equilateral triangle, prove that centroid and circumcentre coincide.

[Watch Video Solution](#)

10. Two chords PQ and RS of a circle are parallel to each other and AB is the perpendicular bisector of PQ . Without using any construction, prove that AB bisects RS .

Watch Video Solution

11. In fig., two circles with centres O , O' touch externally at a point A . A line through A is drawn to intersect these circles in B and C . Prove that the tangents at B and C are parallel.

Watch Video Solution

12. Prove that the right-bisector of a chord of a circle bisects the corresponding minor arc of the circle.

Watch Video Solution

13. Two chords AB and AC of a circle are equal. Prove that the centre of the circle lies on the angle bisector of $\angle BAC$.

Watch Video Solution

14. Two equal chords AB and CD of a circle $C(O,r)$ when produced meet at a point E . Prove that:

$$BE = DE$$

[Watch Video Solution](#)

15. Two equal chords AB and CD of a circle $C(O,r)$ when produced meet at a point E . Prove that:

$$AE = CE$$

[Watch Video Solution](#)

16. If a diameter of a circle bisects each of the chords of the circle, prove that the chords are parallel.

Watch Video Solution

17. Prove that the perpendicular at the point of contact to the tangent to a circle passes through the centre.

Watch Video Solution

18. Diameter is the largest chord of the circle.

(True/False)

Watch Video Solution

19. PQ and RQ are chords of a circle equidistant from the centre. Prove that the diameter passing through Q bisects $\angle PQR$

Watch Video Solution

20. In given Fig.

, $AD = AE$ and D and E are points on BC , such that $BD = EC$. Prove that $AB = AC$.

Watch Video Solution

21. Prove that of all chords of a circle through a given point within it, the least is one. Which is bisected at that point.

Watch Video Solution

22. Bisector AD of $\angle BAC$ of $\triangle ABC$ passes through the centre O of the circumcircle of $\triangle ABC$ as shown in the figure Prove that $AB = AC$

Watch Video Solution

23. If two equal chords of a circle intersect within the circle, prove that the segments of one chord are equal to corresponding segments of the other chord.

[Watch Video Solution](#)

24. If two equal chords of a circle intersect within the circle, prove that the line joining the point of intersection to the centre makes equal angles with the chord.

[Watch Video Solution](#)

25. If O is the centre of the circle, find the value of x in each of the following

Watch Video Solution

26. O is the centre of the circle and $\angle AOB = 70^\circ$. Calculate the values of $\angle OCA$

Watch Video Solution

27. O is the centre of the circle and $\angle AOB = 70^\circ$. Calculate the values of $\angle OAC$

Watch Video Solution

28. O is the centre of the circle. If $\angle ABD = 35^\circ$ and $\angle BAC = 70^\circ$. Find

$\angle ACB$

Watch Video Solution

29.

$\angle ABD = 54^\circ$ and $\angle BCD = 43^\circ$, calculate the $\angle ACD$

Watch Video Solution

30.

$\angle ABD = 54^\circ$ and $\angle BCD = 43^\circ$, calculate the $\angle BAD$

Watch Video Solution

31.

$\angle ABD = 54^\circ$ and $\angle BCD = 43^\circ$, calculate the $\angle BDA$

Watch Video Solution

32. DE is a chord parallel to diameter AC of the circle with centre O. If $\angle CBD = 60^\circ$, calculate the $\angle CDE$

Watch Video Solution

33. C is a point on the minor arc of the circle, with centre O. If $\angle ACB = x^\circ$ and express y in terms of x. Calculate x, if $ACBO$ is a parallelogram.

[Watch Video Solution](#)

34. If O is the circumcentre of a $\triangle ABC$, $OD \perp BC$, prove that $\angle BOD = \angle A$

[Watch Video Solution](#)

35. Two diameters of a circle intersect each other at right angles. Prove that the quadrilateral formed by joining their end points is a square.

Watch Video Solution

36. AB is a diameter of the circle $C(O, R)$ and the radius OD is perpendicular to AB . If C is any point on the arc DB , find

$\angle BAD$ and $\angle ACD$

Watch Video Solution

37. Prove that the circle drawn on any one of the equal sides of an isosceles triangle as diameter bisects the third side of the triangle.

Watch Video Solution

38. AC is the diameter of a circle with centre O and chord $BD \perp AC$, intersecting each other at E . Find the values p, q, r in terms of x .

[Watch Video Solution](#)

39. Fill in the Blanks:

The centre of a circle lies in _____ of the circle.

(exterior/interior)

[Watch Video Solution](#)

40. A point, whose distance from the centre of a circle is greater than its radius lies in Of the circle.

[Watch Video Solution](#)

41. The longest chord of a circle is a of the circle.

[Watch Video Solution](#)

42. An arc is a When its ends are the ends of a diameter.

Watch Video Solution

43. Segment of a circle is the region between an arc and of the circle.

Watch Video Solution

44. Fill in the Blanks:

A circle divides the plane, on which it lies, in _____ parts.

Watch Video Solution

45. (True/ False) Line segment joining the centre to any point on the circle is a radius of the circle.

Watch Video Solution

46. (True/ False) A circle has only finite number of equal chords.

Watch Video Solution

47. (True/ False) If a circle is divided into three equal arcs each is a major arc.

Watch Video Solution

48. (True/ False) A chord, which is twice as long as its radius is a diameter of the circle.

Watch Video Solution

49. (True/ False) Sector is the region between the chord and its corresponding arc.

Watch Video Solution

50. (True/ False) A circle is a plane figure.

[Watch Video Solution](#)

51. Name the region between a chord and either of the arcs.

[Watch Video Solution](#)

52. If diagonals of a cyclic quadrilateral are diameters of the circle through the vertices of the quadrilateral, prove that it is a rectangle.

[Watch Video Solution](#)

53. Given three non-collinear points. How many circles can be drawn through these three points?

Watch Video Solution

54. In a triangle with one angle $\frac{2\pi}{3}$, the lengths of the sides form an A.P. If the length of the greatest side is 7 cm, the radius of the circumcircle of the triangle is

Watch Video Solution

55. In a circle $C(O,r)$, AOB and COD are two diameters perpendicular to each other. Find length of chord AC .

[Watch Video Solution](#)

56. Two congruent circles with centres C and O' intersect at A and B . If $\angle AO'B = 50^\circ$, then find $\angle ACB$

[Watch Video Solution](#)

57. True/False:

The degree measure of a semi-circle is 180°

Watch Video Solution

58. (True/ False) A circle has only finite number of equal chords.

Watch Video Solution

59. True/False:

The perimeter of circle is called its circumference .

Watch Video Solution

60. True/False:

A circle divides the plane into three parts.

Watch Video Solution

61. True/False:

Let O be the centre of a circle with radius r .

Then a point P such that $OP < r$ is called an interior point of the circle.

[Watch Video Solution](#)

62. True/False:

An equilateral triangle ABC is inscribed in a circle with centre O . The measure of $\angle BOC$ is 60°

[Watch Video Solution](#)

63. The perpendicular from the centre of a circle to a chord bisects the chord.

[Watch Video Solution](#)

64. In a circle $C(O,r)$, AOB and COD are two diameters perpendicular to each other. Find length of chord AC .

[Watch Video Solution](#)

65. True/False:

The degree measure of a semi-circle is 180°

Watch Video Solution

66. Two circles of radii 5 cm and 3 cm intersect at two points and the distance between their centres is 4 cm. Find the length of the common chord.

Watch Video Solution

67. Fill in the Blanks:

Angles in the same segment of a circle are

Watch Video Solution

68. Fill in the Blanks:

Equal arcs of a circle subtend_____ angles at the centre.

Watch Video Solution

69. Fill in the Blanks:

Angles subtended by an arc at the centre of a circle is _____ the angle subtended by the same arc at any other point on the remaining part of the circle.

Watch Video Solution

70. Fill in the Blanks:

Equal chords of a circle (or congruent circles) are _____ from the centre.

Watch Video Solution

71. Fill in the Blanks:

The line drawn through the centre of a circle to _____ a chord is perpendicular to the chord.

Watch Video Solution

72. Fill in the Blanks:

Chords _____ from the centre of a circle are equal in length.

Watch Video Solution

73. Fill in the Blanks:

The perpendicular from the centre of a circle to a chord _____ the chord.

Watch Video Solution

74. Fill in the Blanks:

The sum of either pair of opposite angles of a _____ quadrilateral is 180°

Watch Video Solution

75. The longest chord of a circle is a of the circle.

[Watch Video Solution](#)

76. An arc is a When its ends are the ends of a diameter.

[Watch Video Solution](#)

77. A chord is at a distance of 8 cm from the centre of a circle of radius 17 cm. The length of the chord is

A. 25 cm

B. 30 cm

C. 12.5 cm

D. 9 cm

Answer:

Watch Video Solution

78. An equilateral triangle of side 9 cm.

A. 3 cm

B. $3\sqrt{3}cm$

C. $3\sqrt{2}cm$

D. 6 cm

Answer:

Watch Video Solution

79. Is every diameter of a circle also a chord?

A. 17 cm

B. 15 cm

C. 4 cm

D. 8 cm

Answer:

Watch Video Solution

80. If $OA = 5 \text{ cm}$, $AB = 8 \text{ cm}$ and OD is perpendicular to AB , then OD is equal to

A. 2 cm

B. 3 cm

C. 4 cm

D. 5 cm

Answer:

Watch Video Solution

81. (True/ False) If AOB is a diameter of a circle and C is a point on the circle, then $AC^2 + BC^2 = AB^2$.

A. 30°

B. 60°

C. 90°

D. 45°

Answer:

Watch Video Solution

82. ABCd is a cyclic quadrilateral such that AB is a diameter of the circle circumscribing it and $\angle ADC = 140^\circ$, then $\angle BAC$ is equal to

A. 80°

B. 50°

C. 40°

D. 30°

Answer:

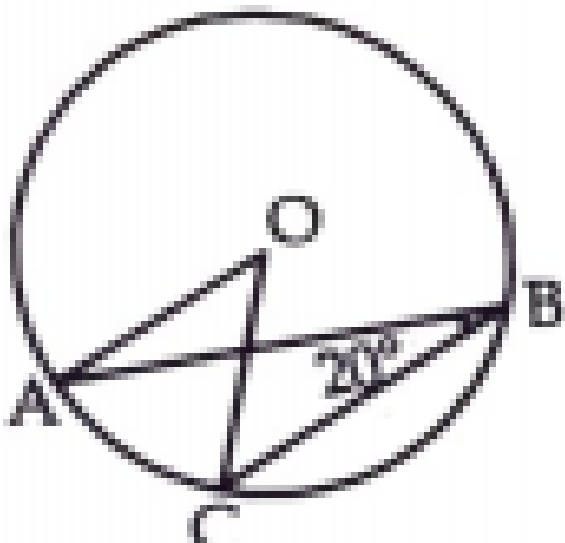

Watch Video Solution

83. Prove that the circle drawn with any side of a rhombus as diameter, passes through the point of intersection of its diagonals.

Watch Video Solution

84. If $\angle ABC = 20^\circ$ find $\angle AOC$

Watch Video Solution

85. $\angle DAB = 60^\circ$, $\angle ABD = 50^\circ$ find $\angle ACB$

(i)

(ii)

 [Watch Video Solution](#)

86. If arc AXB and CYD of a circle are congruent, find the ratio of AB and CD

 [Watch Video Solution](#)

87. Two triangles ABC and PQR are such that the perpendiculars from A to QR , B to RP and C to PQ are concurrent. Show that the perpendicular from P to BC , Q to CA and R to AB are also concurrent.

[Watch Video Solution](#)

88. If a diameter of a circle bisects each of the chords of the circle, prove that the chords are parallel.

[Watch Video Solution](#)

89. The whole angle at the centre of a circle is :

[Watch Video Solution](#)

90. In a triangle ABC , D is the mid point of the side AC and $BD = \frac{1}{2}AC$. Show that $\angle ABC$ is a right angle.

[Watch Video Solution](#)

91. On a common hypotenuse AB , two right triangles ACB and ADB are situated on opposite sides of AB such that $\angle BAC = \angle BDC$

Watch Video Solution

92. If the non-parallel sides of a trapezium are equal, prove that it is cyclic.

Watch Video Solution

93. In fig, two chords AB and CD intersect each other at the point P. Prove that:

(i) $\triangle APC \sim \triangle DPB$

(ii) $AP \cdot PB = CP \cdot DP$

[Watch Video Solution](#)

94. Draw a circle of radius 5 cm and divide it into 6 equal sectors .

[Watch Video Solution](#)
