BOOKS - SWAN PUBLICATION

AREAS OF PARALLELOGRAMS AND TRIANGLES

Exercise 9 1

1. Which of the following figures lie on the same base and between the same parallels.

In such a case, write the common base and the two parallels.

Watch Video Solution

1. In Fig ., ABCD is parallelogram ,
 $AE \perp DC$ and $CF \perp AD$. If $AB = 16$ cm , $AE = 8$ cm and $CF = 10$ cm , find AD .

[Watch Video Solution](#)

2. If E , F G and H are respectively the mid -
points of the sides of a parallelogram ABCD ,

show that $\text{ar}(\text{EFGH}) = \frac{1}{2} \text{ar}(\text{ABCD})$.

[Watch Video Solution](#)

3. P and Q are any two points lying on the sides DC and AD respectively of a parallelogram ABCD. Show that $\text{ar}(\text{APB}) = \text{ar}(\text{BQC})$.

[Watch Video Solution](#)

4. In Fig ., P is a point in the interior of a parallelogram ABCD . Show that

$$ar(APB) + ar(PCD) = \frac{1}{2}ar(ABCD)$$

Watch Video Solution

5. In Fig ., P is a point in the interior of a parallelogram ABCD . Show that

$$ar(APD) + ar(PBC) = ar(APB) + ar(PCD)$$

Watch Video Solution

6. In Fig ., PQRS and ABRS are parallelograms and X is any point on side BR .Show that $ar(PQES) = ar(ABRS)$

[Watch Video Solution](#)

7. In Fig ., PQRS and ABRS are parallelograms and X is any point on side BR .Show that

$$ar(AXS) = \frac{1}{2} ar(PQRS)$$

Watch Video Solution

8. A farmer was having a field in the form of a parallelogram PQRS. She took any point A on RS and joined it to points P and Q. In how many parts the field is divided? What are the shapes

of these parts ? The farmer wants to sow wheat and pulses in equal portions of the field separately. How should she do it ?

[Watch Video Solution](#)

Exercise 9 3

1. In Fig ., E is any point on median AD of a $\triangle ABC$. Show that ar (ABE) = ar (ACE) .

Watch Video Solution

2. E is any point on median AD of a $\triangle ABC$.

Show that $\text{ar}(\text{ABE}) = \text{ar}(\text{ACE})$.

Watch Video Solution

3. Show that the diagonals of a parallelogram divide it into four triangles of equal area.

[Watch Video Solution](#)

4. In Fig ., ABC and ABD are two triangles on the same base AB . If line -segment CD is

bisected by AB at O , show that $\text{ar}(\triangle ABC) = \text{ar}(\triangle ABD)$.

[Watch Video Solution](#)

5. D, E and F are respectively the mid-points of the sides BC, CA and AB of a $\triangle ABC$. Show that:- BDEF is a parallelogram.

[Watch Video Solution](#)

6. D, E and F are respectively the mid-points of the sides BC, CA and AB of a $\triangle ABC$. Show that:- BDEF is a parallelogram.

[Watch Video Solution](#)

7. D, E and F are respectively the mid-points of the sides BC, CA and AB of a $\triangle ABC$. Show that:- BDEF is a parallelogram.

[Watch Video Solution](#)

8. In Fig ., diagonals AC and BD of quadrilateral ABCD intrsect at O such that $OB = OD$. If $AB = CD$, then show that :

$$\text{ar}(\text{DOC}) = \text{ar}(\text{AOB})$$

[▶ Watch Video Solution](#)

9. In Fig ., diagonals AC and BD of quadrilateral ABCD intersect at O such that $OB = OD$. If $AB = CD$, then show that :

$$\text{ar}(\text{DCB}) = \text{ar}(\text{ACB})$$

 [Watch Video Solution](#)

10. In Fig ., diagonals AC and BD of quadrilateral ABCD intersect at O such that $OB = OD$. If $AB = CD$, then show that :

$DA \parallel CB$ or $ABCD$ is a parallelogram .

Watch Video Solution

11. D and E are points on sides AB and AC respectively of $\triangle ABC$ such that $\text{ar}(\triangle DBC) = \text{ar}(\triangle EBC)$. Prove that $DE \parallel BC$.

Watch Video Solution

12. XY is a line parallel to side BC of triangle ABC. If $BE \parallel AC$ and $CF \parallel AB$ meet XY at E and F respectively, show that $\text{ar}(\triangle ABE) = \text{ar}(\triangle ACF)$.

Watch Video Solution

13. The side AB of a parallelogram ABCD is produced to any point P. A line through A and parallel to CP meets CB produced at Q and then parallelogram PBQR is completed. Show that $\text{ar}(\text{ABCD}) = \text{ar}(\text{PBQR})$. [Hint : Join AC and

PQ. Now compare ar (ACQ) and ar (APQ).]

Watch Video Solution

14. In the figure. ABCD in a trapezium in which $AB \parallel DC$. Prove that

$$ar(\triangle AOD) = ar(\triangle BOC)$$

Watch Video Solution

15. In Fig ., ABCDE is a pentagon . A line through B parallel to AC meets DC produced at F . Show that

ar (ACB)=ar (ACF)

Watch Video Solution

16. In Fig ., ABCDE is a pentagon . A line through B parallel to AC meets DC produced at F . Show that

$$\text{ar}(AEDF) = \text{ar} (ABCDE)$$

[Watch Video Solution](#)

17. Find the area of a square plot of side 8m.

Watch Video Solution

18. ABCD is a trapezium with $AB \parallel DC$. A line parallel to AC intersects AB at X and BC at Y. Prove that $\text{ar}(\text{ADX}) = \text{ar}(\text{ACY})$. [Hint : Join CX.]

Watch Video Solution

19. In Fig ., $AP \parallel BQ \parallel CR$. Prove that

$$ar(\Delta PBR) = ar(\Delta AQC)$$

 [Watch Video Solution](#)

20. Diagonals AC and BD of a quadrilateral ABCD intersect at O in such a way that ar

$\text{ar}(\triangle AOD) = \text{ar}(\triangle BOC)$. Prove that ABCD is a trapezium.

Watch Video Solution

21.

ABCD and EFGH are two trapeziums.

Use: $\text{ar}(\triangle AOD) = \text{ar}(\triangle BOC)$

$\text{ar}(\triangle DRC) =$

$\text{ar}(\triangle DPC)$ and $\text{ar}(\triangle BDP) = \text{ar}(\triangle ARC)$. Show that

both the quadrilaterals $ABCD$ and $DCPR$ are trapeziums.

[Watch Video Solution](#)

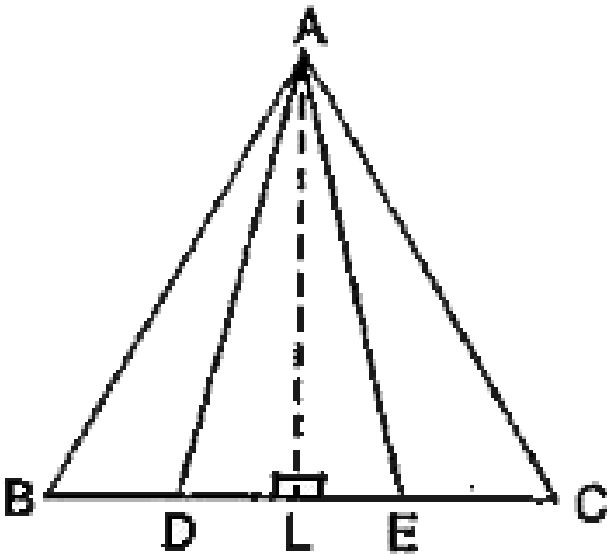

Exercise 9 4

1. Parallelogram $ABCD$ and rectangle $ABEF$ are on the same base AB and have equal areas. Show that the perimeter of the parallelogram is greater than that of the rectangle.

[Watch Video Solution](#)

2. In Fig ., D and E are two points on BC such that $BD = DE = EC$. Show that $\text{ar} (ABD) = \text{ar} (ADE) = \text{ar} (AEC)$.

Can you now answer the question that you have left in the introduction of this chapter ,

whether the field of Budhia has been actually divided into three parts of equal area ?

Watch Video Solution

3.

ABCD,

DCFE and ABFE are parallelograms. Show that

$$\text{ar}(ADE) = \text{ar}(BCF)$$

www.vedantu.com

 [Watch Video Solution](#)

4. ABCD is a parallelogram and BC is produced to a point Q such that $AD = CQ$. If AQ intersect DC at P, show that: $\text{ar}(BPC) = \text{ar}(DPQ)$

[Watch Video Solution](#)

5.

ABC and BDE are two equilateral triangles such that D is the mid-point of BC . If AE intersects BC at F , show that :

$$\text{ar}(BDE) = \frac{1}{4} \text{ar}(ABC)$$

6.

ABC and BDE are two equilateral triangles such that D is the mid-point of BC. If AE intersects

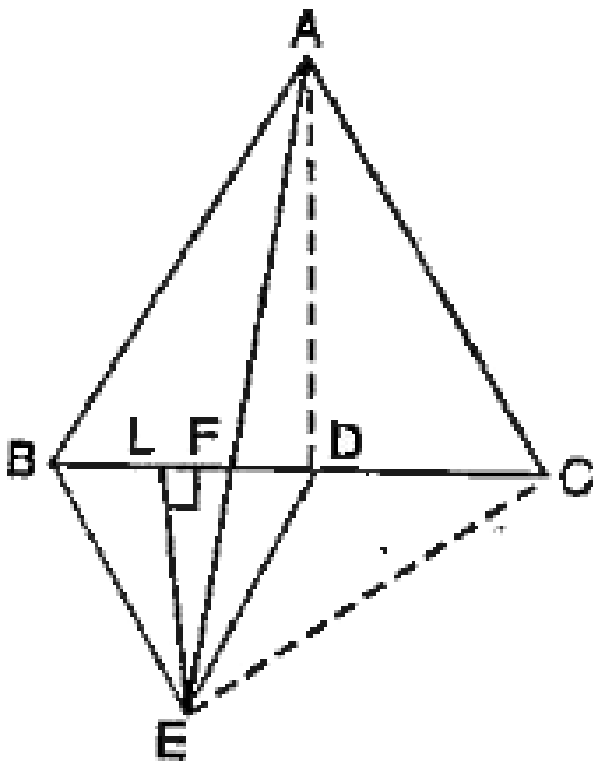

BC at F, show that :

$$\text{ar}(\text{BDE}) = \frac{1}{2} \text{ar}(\text{BAE})$$

[Watch Video Solution](#)

7. In Fig ., ABC and BDE are two equilateral triangles such that D is the mid -point of BC .If AE intersects BC at F , show that

$$ar(ABC) = 2ar(BEC)$$

Watch Video Solution

8.

ABC and BDE are two equilateral triangles such that D is the mid-point of BC. If AE intersects BC at F, show that :

$$\text{ar}(BFE) = \text{ar}(AFD)$$

9.

ABC and BDE are two equilateral triangles such that D is the mid-point of BC. If AE intersects

BC at F, show that :

$$\text{ar}(\text{BFE}) = 2\text{ar}(\text{FED})$$

Watch Video Solution

10.

ABC and BDE are two equilateral triangles such that D is the mid-point of BC. If AE intersects BC at F, show that :

$$\text{ar}(\text{FED}) = \frac{1}{8} \text{ar}(\text{AFC})$$

[Watch Video Solution](#)

11. Diagonals AC and BD of quadrilateral ABCD intersect each other at P. Show that $\text{ar}(APB) \times \text{ar}(CPD) = \text{ar}(APD) \times \text{ar}(BPC)$

.

[Watch Video Solution](#)

12. P and Q are respectively the midpoints of sides AB and BC of a triangle ABC and R is the mid-point of AP, show $\text{ar}(\text{PRQ}) = \frac{1}{2} \text{ar}(\text{ABC})$.

[Watch Video Solution](#)

13. P and Q are respectively the midpoints of sides AB and BC of a triangle ABC and R is the mid-point of AP, show $\text{ar}(\text{PRQ}) = \frac{1}{2} \text{ar}(\text{ABC})$.

[Watch Video Solution](#)

14. P and Q are respectively the midpoints of sides AB and BC of a triangle ABC and R is the mid-point of AP, show $\text{ar}(\text{PBQ}) = \text{ar}(\text{ARC})$.

[Watch Video Solution](#)

15. In Fig., ABC is a right triangle right angled at A. BCED, ACFG and ABMN are squares on the sides BC, CA and AB respectively. Line segment $AX \perp DE$ meets BC at Y. Show that

$$\triangle MBC \cong \triangle ABD$$

Watch Video Solution

16. In Fig ., ABC is a right triangle right angled at A . $BCED$, $ACFG$ and $ABMN$ are squares on the sides BC , CA and AB respectively .Line segment $AX \perp DE$ meets BC at Y . Show that

$$\triangle MBC \cong \triangle ABD$$

Watch Video Solution

17. In Fig ., ABC is a right triangle right angled at A . $BCED$, $ACFG$ and $ABMN$ are squares on the sides BC , CA and AB respectively .Line segment $AX \perp DE$ meets BC at Y . Show that

$$\triangle MBC \cong \triangle ABD$$

Watch Video Solution

18. In Fig ., ABC is a right triangle right angled at A . $BCED$, $ACFG$ and $ABMN$ are squares on the sides BC , CA and AB respectively .Line segment $AX \perp DE$ meets BC at Y . Show that

$$\triangle MBC \cong \triangle ABD$$

Watch Video Solution

19.

ABC is a
right triangle right angled at A . $BCED$, $ACFG$
and $ABMN$ are squares on the sides BC , CA and
 AB respectively. Line segment $AX \perp DE$ meets

BC at Y. Show that:

$$\text{ar}(\text{CYXE}) = 2\text{ar}(\text{FCB})$$

Watch Video Solution

20.

ABC is a

right triangle right angled at A. BCED, ACFG and ABMN are squares on the sides BC, CA and AB respectively. Line segment $AX \perp DE$ meets BC at Y. Show that:

$$\text{ar}(CYXE) = \text{ar}(ACFG)$$

Watch Video Solution

21.

ABC is a right triangle right angled at A . $BCED$, $ACFG$ and $ABMN$ are squares on the sides BC , CA and AB respectively. Line segment $AX \perp DE$ meets

BC at Y. Show that:

$$\text{ar}(\text{BCED}) = \text{ar}(\text{ABMN}) + \text{ar}(\text{ACFG})$$

[Watch Video Solution](#)

Objective Type Questions

1. State whether the following statements are true (T) or false (F) :

If A and B are two congruent figures then their areas will be equal .

[Watch Video Solution](#)

2. Two figures are said to be on the same base and between the same parallels , if they have a common base (side) and the vertices opposite to the common base of each figure lie on a line parallel to the base .

[Watch Video Solution](#)

3. Parallelogram on equal bases and between the same parallels are equal in area.

[Watch Video Solution](#)

4. If a triangle and a parallelogram are on the same base and between the same parallels then the area of the triangle is equal to half the area of the parallelogram .

[Watch Video Solution](#)

5. Two triangles on the same base and between the same parallel lines have unequal areas .

[Watch Video Solution](#)

6. The median of a triangle divides it into two

[Watch Video Solution](#)

7. In the given figure ABCD is a parallelogram and BD is its diagonal ,then ar

$$(\Delta ABD) \neq ar(\Delta CDB)$$

 [View Text Solution](#)

8. A diagonal of parallelogram divides it into four triangles of equal area.

 [Watch Video Solution](#)

9. The medians of a triangle ABC intersect each other at G then

$$ar(\triangle AGB) = \frac{1}{3}ar(\triangle ABC)$$

Watch Video Solution

10. The perimeter of a trapezium is equal to the product of its height and the sum of the parallel sides .

[Watch Video Solution](#)

11. Fill in the Blanks :

Area of || gm = Base \times

[Watch Video Solution](#)

12. Area of triangle = $\frac{1}{2} \times \dots \times$

Altitude.

Watch Video Solution

13. Area of rhombus = $\frac{1}{2} \times \dots$

Watch Video Solution

14. Area of trapezium

= $\frac{1}{2} \times \text{Height} \times (\dots)$

[Watch Video Solution](#)

15. Area of a \parallel gm whose base is 4 cm and the height is 5 cm will be =

[Watch Video Solution](#)

16. What will be the height of a triangle whose base is 4 cm and area is 20cm^2 .

[Watch Video Solution](#)

17. ABC is a triangle in which $AB=AC=10\text{cm}$ and $\angle A = 90^\circ$.What will be the area of $\triangle ABC$?

[Watch Video Solution](#)

18. PQRS is a rhombus .If $PQ= 3\text{cm}$, what will be the perimeter of rhombus ?

[Watch Video Solution](#)

19. What will be the height of a || gm whose area is 20cm^2 and the base is 10 cm .

Watch Video Solution

20. If the diagonals of a rhombus are 6 cm and 8 cm then what will be its area ?

Watch Video Solution
