## BOOKS - CBSE MODEL PAPER

### SAMPLE PAPER 2022 TERM II

#### Section A Reading

1. Read the passage given below. Technology is making advancements at a rapid rate but at the cost of a valued tradition-the crafts

industry. The traditional crafts industry is losing a lot of its trained and skilled craftsmen. With that, the art of embellishing brass and copper utensils with fine engravings is also

5 disappearing. The government has identified around 35 crafts as languishing craft.

The speciality of handcrafted items is its design, an association with long traditions belonging to a specific region. The word 'handcrafted' does not imply the involvement of dexterous human fingers or an agile mind with a

10 moving spirit anymore. Lessening drudgery, increasing production and promoting efficiency have taken precedence. The labour-saving devices are taking the place of handcrafted tools and this has jeopardized the skills of these artisans.

Mechanisation has made its way into everything - cutting, polishing,

15 edging, designing etc. Ideally, the use of machinery should be negligible and the handicrafts should be made purely by hand with a distinguishable artistic appeal. However, with the exception of small-scale industries,

the export units are mostly operated by machines. The heavily computerised designs contribute to a faster production at lower costs.

20 Although mechanization of crafts poses a challenge to safeguarding traditional crafts, the artisans are lured with incentives in order to impart handicrafts training. Some makers do see machines as a time-saving blessing since they are now able to accomplish difficult and demanding tasks with relative ease. These machines might give a better finesse to

25 these products but they don't stand out as

handcrafted. Quantity has overtaken quality in this industry.

A need to highlight the importance of the handmade aspect is required by both the government and private sectors, in order to amplify awareness and also support the culture of making handicrafts. A few artisans are still

30 trying their best to rejuvenate and revive their culture and heritage but it's an uphill task competing with the machine-made goods.

A multitude of artisans have changed their professions and are encouraging their

progeny to follow suit. There are others who have stayed their ground but are clearly inclined towards buying machines.

35 Nearly two decades ago, there were around 65 lakh artisans in the country. Three years ago, when the government started the process of granting a unique number to the artisans based on the Aadhaar card, 25 lakhs were identified. Loss of traditional crafts is clearly a worrying issue, but it stands to reason that forcing any artisan to follow old ways when concerns of livelihood overrule other considerations, is unfair.

Based on your understanding of the passage, answer the questions from the given below.

What does the writer mean by calling handicrafts a 'valued tradition' ?

clearly a worrying issue, but it stands to reason that forcing any artisan to follow old ways when concerns of livelihood overrule other considerations, is unfair.

Based on your understanding of the passage, answer the questions from the given below.

How does the writer justify an artist's act of abandoning her/his traditional craft for a more lucrative option?

**Watch Video Solution**

7. Read the following excerpt from a case study titled Impacts of Festivities on Ecology.

Festivals are synonymous with celebration, ceremony and joy. However, festivals bring to fore the flip side of celebrations – pollution – air, water, soil and noise. This led to the need of assessing the awareness level among people about ecological pollution during festivals. So, a study was conducted by scholars of an

5 esteemed university in India. This study was titled Awareness Towards Impact of Festivals

on Ecology.

There were two main objectives of the study.

The first one was to assess the awareness level among people about ecological protection during festivities. Exploring solutions to bring awareness about celebrating festivals without harming ecology was the second objective.

The method used to collect data was a simple questionnaire containing 6 questions, shared with 50 respondents across four selected districts of a state in the southern region of India.

The research began by understanding the

socio-economic conditions of the respondents before sharing the questionnaire. Once the responses were 15 received, the data collected was tabulated (Table 1), for analysis.

Table-1: Awareness level among respondents

QUESTIONS	YES %	NO %	CAN'T SAY%
1. Do you feel that bursting crackers is a must during festivities?	46	54	0
2. Do you think most people abuse environmental resources during celebration of festivals?	72	28	0
3. Do you think that celebrations & festivities result in uniting people?	64	32	4
4. Do you enjoy bursting crackers for amusement?	68	32	0

5. Do you feel pressured to burst crackers during festivals as an expectation of your social status?	82	12	6
6. Are you aware of waste segregation & disposal guidelines for better ecology?	56	40	4

The study recommended the imposition of

strict rules and regulations as opposed to a total ban on all festive activities which have a drastic impact on our environment. The researchers believed that such measures would help in harnessing some ill-effects that add to the growing pollution and suggested 20 further studies be taken up across the country to assess awareness about ecological degradation.

The observations made in the study pointed to the environmental groups and eco-clubs fighting a losing battle due to city traffic issues, disposal of plastics, garbage dumping

and all sorts of ecological degradation. The researchers

25 stressed that the need of the hour is increasing awareness among people to reduce ecological pollution which can be facilitated by celebrating all festivals in an eco-friendly manner.

On the basis of your understanding of the passage, answer the questions from the given below.

Why do the researchers call pollution the 'flip side' of festivals?

8. Read the following excerpt from a case study titled Impacts of Festivities on Ecology.

**9.** Pranjol and Rajvir discuss their next vacation destination. They shortlist Coorg and Goa. Rajvir is keen on Coorg and tries to convince Pranjol. Develop a conversation between the two, based on your understanding of Glimpses of India.

You may begin like this:

Rajvir: Hey Pranjol! I think we should be visiting Coorg. It is a beautiful place with coffee plantations. I can smell the aroma already!

Pranjol: I gave you the opportunity to explore a tea plantation last year, in Assam, I want to...
