TRIGONOMETRY

Worked Examples

1. Prove that $\sin^4 \theta - \cos^4 \theta = \sin^2 \theta - \cos^2 \theta$.

View Text Solution

2. Show that $\sqrt{\frac{1 - \sin \theta}{1 + \sin \theta}} = \sec \theta - \tan \theta$

View Text Solution

3. Prove that $\frac{\cot A + \tan B}{\cot B + \tan A} = \cot A \tan B$

View Text Solution

4. Prove the following:

$$\frac{\tan A + \sec A - 1}{\tan A - \sec A + 1} = \frac{1 + \sin A}{\cos A} = \frac{\cos A}{1 - \sin A}$$
