CONSTRUCTION

Exericise 11 1

1. In each of the following give the justification of the construction also :

Draw a line segment of length 8.6cm and

divide it in the ratio $5:8$ Measure the two parts.

Watch Video Solution

2. Construct a triangle of sides 4cm, 5cm and 6cm and then a triangle similar to it whose sides are $\frac{2}{3}$ of the corresponding sides of it.

Watch Video Solution

3. In each of the following give the justification of the construction also :

Construct a triangle with sides 5cm, 6cm and 7cm and then another triangle whose sides are $\frac{7}{5}$ of the corresponding sides of the first triangle.

Watch Video Solution

4. Construct an isosceles triangle whose base 8cm and altitude 4cm and then another

triangle whose sides are $1\frac{1}{2}$ times the corresponding side of the isosceles triangle.

Watch Video Solution

5. Draw a triangle ABC with sides $BC = 6cm, AB = 5cm$ and $\angle ABC = 60^\circ$. Then connstruct a triangle whose sides are $\frac{3}{4}$ of the corresponding sides of the triangle ABC.

Watch Video Solution

6. Draw a triangle ABC with side BC=7cm, $\angle B = 45^\circ, \angle A = 105^\circ$. Then construct a triangle whose side are $\frac{4}{3}$ times the corresponding sides of ΔABC.

Watch Video Solution

7. Draw a right triangle in which the sides (other than hypotenuse) are of lengths 4cm and 3cm. Then construct another triangle

whose sides the $\frac{5}{3}$ times the corresponding sides of the given angle.

Watch Video Solution

Exercise 11 2

1. Draw a circle of radius 6cm. From a point 10 cm away from its centre, construct the pair of tangents to the circle and measure their lengths.

Watch Video Solution

2. Construct a tangent to a circle of radius 4cm from a point on the concentric circle of radius 6cm and measure its length. Also verify the measurement by actual calculation.

Watch Video Solution

3. Draw a circle of radius 3cm. Take two point P and Q on one of its extended diameter each at distance of 7cm from its centre. Draw tangents to the circle from these two points P and Q

Watch Video Solution

4. Draw a pair of tangents to a circle of radius 5cm which are inclined to each other at an angle of 60°

Watch Video Solution

5. Draw a line segment AB of length 8cm. Taking A as centre, draw a circle of radius 4cm and taking B as centre, draw another circle of

radius 3cm. Construct tangents to each circle from the centre of the other circle.

Watch Video Solution

6. Draw a circle of radius 3 cm. Take a point outside the circle. Construct the pair of tangents from this point to the circle.

Watch Video Solution
