

BIOLOGY

BOOKS - VGS BRILLIANT BIOLOGY (TELUGU ENGLISH)

REPRODUCTION

Textual Lesson Part

1. Do you think reproduction occurs only for continuation of life ?

Watch Video Solution

2. How does an organism grow ? How does repair of worn out parts take place ? Is there any form of reproduction involved in the process ?

Watch Video Solution

1. Why do fish and frog produce a huge number of eggs each year ?

[Watch Video Solution](#)

2. Give examples and explain what is meant by external fertilisation.

[Watch Video Solution](#)

3. Write differences between

Grafting -Layering

[Watch Video Solution](#)

4. Explain the process of fertilization in plants.

[Watch Video Solution](#)

5. Explain the process of fertilization in plants.

Watch Video Solution

6. Double fertilization is wonderful phenomenon in flowering plants.

Explain double fertilization in flowering plant with the help of a diagram.

Watch Video Solution

7. Name the mode of asexual reproduction in yeast.

Watch Video Solution

8. Plants propagate normally through seeds. What are other ways that plants propagate through ? Give examples.

Watch Video Solution

9. What are the advantages of sexual reproduction over asexual reproduction?

Watch Video Solution

10. How are sperms cells adapted for their function?

Watch Video Solution

11. The menstrual cycle prepares the uterus for a fertilised egg. How long is an average menstrual cycle from start to finish ?

Watch Video Solution

12. When the foetus is growing inside the uterus it needs nutrients. What provides these nutrients ?

Watch Video Solution

13. Which type of substances are absorbed by foetus from the mother ?

Watch Video Solution

14. What is the job of the amniotic sac ?

Watch Video Solution

15. What are the advantages of sexual reproduction ?

Watch Video Solution

16. How does reproduction help in providing stability to population of the of species ?

Watch Video Solution

17. List the main differences between mitosis and meiosis.

[Watch Video Solution](#)

18. What happens to the wall of the uterus during menstruation ?

[Watch Video Solution](#)

19. What changes occur in the wall of the uterus during menstruation ?

[Watch Video Solution](#)

Improve Your Learning Asking Questions And Making Hypothesis

1. 'All unicellular organisms undergo only mitotic cell division during favourable conditions' - Do you support this statement ? Why ?

[Watch Video Solution](#)

2. What would be the consequences if there is no meiosis in organisms that reproduce sexually?

Watch Video Solution

3. What happens if meiosis does not take place in reproductive cells?

Watch Video Solution

Improve Your Learning Experimentation And Field Investigation

1. Vicky's father wants to grow a single plant having two desirable characters colourful flowers and big fruits. What method will you suggest him and why?

Watch Video Solution

2. What procedure you will follow to observe stages of mitosis in onion root tip?

Watch Video Solution

3. Uproot an onion plant and take a thin section of its root tip. Stain it and observe under microscope. Draw as you see and identify the stages of the cell division.

Watch Video Solution

Improve Your Learning Information Skills And Projects

1. Visit a nearby village and collect information how farmers grow sugarcane, flowering plants like chrysanthemum, prime rose and vegetables like stem tubers, plump gourd (dondakaya) etc. Make a report and submit in class.

Watch Video Solution

 [Watch Video Solution](#)

Improve Your Learning Communication Through Drawing Model Making

1. Collect information from school library or using internet what vegetative methods are followed in your district as well as in your state to propagate various plants of economic importance.

 [Watch Video Solution](#)

2. Make a flow chart to show the cell cycle and explain cell division describing different stages of mitosis.

 [Watch Video Solution](#)

3. Draw neat labelled diagrams of male and female reproductive system of plant.

 [Watch Video Solution](#)

4. Observe the following part of a flowering plant. Prepare a note.

Watch Video Solution

5. Prepare a flow to explain the process of sexual reproduction in plants.

Watch Video Solution

 [Watch Video Solution](#)

6. Draw a neatly labelled diagram to explain plant fertilisation. Write a few points on pollen grain.

[Watch Video Solution](#)

Improve Your Learning Appreciation And Aesthetic Sense Values

1. How ill you appreciate cell division that help perpetuation of life?

[Watch Video Solution](#)

Improve Your Learning Application To Daily Life Concern To Biodiversity

1. What precautions will you take to away from various sexually transmitted discases?

[Watch Video Solution](#)

2. What precautions will you take to keep from diseases like AIDS and other sexually transmitted diseases?

Watch Video Solution

3. Conduct a seminar on child marriages and foeticide.

Watch Video Solution

Questions Given In The Lesson 1 Mark Questions

1. How do you think bacteria were dividing to form curd?

Watch Video Solution

2. How do you think this (parthenogenesis) happens?

[Watch Video Solution](#)

3. Would it involve two parents?

[Watch Video Solution](#)

4. Which type of fission would produce larger colonies in less period of time . Why?

[Watch Video Solution](#)

5. Which mode of asexual reproduction provides maximum scope of choice of desirable characters?

[Watch Video Solution](#)

6. What are the characters that would you like to select?

Watch Video Solution

7. What mode of propagation would help you to produce the plants with desirable characters?

Watch Video Solution

8. Do you find any similarities between rhizopus and fern spores and sporangia?

Watch Video Solution

9. Think why testis are located outside the abdominal cavity?

Watch Video Solution

10. What function do you think is served by petals and sepals?

[Watch Video Solution](#)

11. How many nuclei are present in the pollen grain?

[Watch Video Solution](#)

12. Which floral part may be seen in a fruit?

[Watch Video Solution](#)

13. How would it affect the progeny formed by sexual reoroduction ?

[Watch Video Solution](#)

Questions Given In The Lesson 2 Marks Questions

1. Is regeneration can also be known as a type of fragmentation? Do you agree ? Why or why not?

Watch Video Solution

2. In what way is the anomalous behaviour of water advantageous to aquatic animals ?

Watch Video Solution

3. Whether they reproduce by budding, fission or fragmentation ? Organisms formed are the exact copies of their parents. Is it true? Why?

Watch Video Solution

4. What about mushrooms, how do they grow? Discuss in your class.

Watch Video Solution

5. How does the male reproductive cells reach the female reproductive cells in flowers of such plants (pea plants)?

[Watch Video Solution](#)

6. How are cotyledons useful for the plant?

[Watch Video Solution](#)

7. What would happen if the gametes do not have half the chromosome number as the skin parent?

[Watch Video Solution](#)

8. Why did the government of india fix the marriage age of boys (21 years) and girls (18 years)?

[Watch Video Solution](#)

9. Do you feel that it is a social responsibilities to control birth after having one or two children?

[Watch Video Solution](#)

10. What do you understand by the 'Healthy Society' ?

[Watch Video Solution](#)

11. Will you encourage child marriage?

[Watch Video Solution](#)

Questions Given In The Lesson 4 Marks Questions

1. Draw the diagram of the flower that you collect and parts shown and write their functions.

Watch Video Solution

2. Social discrimination against AIDS patient is also a social evil . Can you support this Why?

Watch Video Solution

3. Why doctors are prohibited to do sex determination through ultrasound scanning for pregnant women ?

Watch Video Solution

Objective Assignment

1. The part of the female reproductive system that produces the eggs.....

- A. Ovary
- B. Epididymis
- C. Cervix
- D. Fallopian tube

Answer:

Watch Video Solution

2. The term that we use to describe a sperm cell fusing with an egg cell.....

- A. Fragmentation
- B. Fermentation
- C. Fertilisation
- D. Fusion

Answer:

Watch Video Solution

3. Which part of the male reproductive system produces (human) the sperm cell?

- A. Vas deference
- B. Epididymis
- C. Seminiferous tubules
- D. Scrotum

Answer:

Watch Video Solution

4. How does the sperm break through the egg cell membrane ? Choose the option you think is right.

- A. Tears a hole in the membrane
- B. Dissolves the membrane with chemicals
- C. Bites through the membrane with teeth
- D. Squeezes through gaps in the memberane

Answer:

Watch Video Solution

5. Why are egg cells large than sperm cells? Choose the option you think is right.

- A. Egg cells have more cells in them
- B. Have food store to help growth after fertilisation
- C. Have thicker cell membranes
- D. Have larger nuclei

Answer:

[Watch Video Solution](#)

6. Which of these things will affect the way a foetus grows? Choose the option you think is right.

A. Chemicals in cigarette smoke

B. Alcohol

C. Drugs

D. All of the above

Answer:

[Watch Video Solution](#)

7. Which of the following is the correct sequence of steps in the human life cycle? Choose the right option.

A. Babyhood, childhood, adolescence, adulthood

B. Childhood, babyhood, adulthood, adolescence

C. Adolescence, babyhood, adulthood, childhood

D. None of above

Answer:

Watch Video Solution

Creative Questions For New Model Paper 1 2 Mark Questions

1.

Name the asexual reproduction shown in the above figure.

Watch Video Solution

Watch Video Solution

2.

Name the asexual reproduction shown in the above picture.

Watch Video Solution

3.

Name the mode of reproduction shown in the above figure.

Watch Video Solution

4.

Though which process, the above shown seedless fruits formed?

Watch Video Solution

5.

Name the above method of reproduction.

Watch Video Solution

6.

Name the plant shown in the above figure which propagate through epiphyllous buds.

[Watch Video Solution](#)

7.

In which plant, you can see the above propagation?

[Watch Video Solution](#)

8. 

In which plant, you can observe the above propagation?

Watch Video Solution

9. 

Give one example for the above shown propagation .

Watch Video Solution

10. 

Name the above artificial vegetative propagation.

Watch Video Solution

11. 

Identify the above shown artificial vegetative propagation.

Watch Video Solution

12.

Can you identify the above shown artificial vegetative propagation?

Watch Video Solution

13. 

Can you identify the above fungus?

Watch Video Solution

14.

Name the labelled part 'x' in the above figure.

Watch Video Solution

15. 

Can you identify the structure shown in the above figure?

Watch Video Solution

16. 

To which system the above figure is associated with?

Watch Video Solution

17. 

Identify the labelled part 'x' in the above figure.

Watch Video Solution

18.

Name the above structure shown in the above figure

Name the above structure shown in the above figure.

[Watch Video Solution](#)

19.

Name the labelled part 'x' in the above figure.

[Watch Video Solution](#)

20. 

To which system the above system belongs to ?

Watch Video Solution

21. 

Name the labelled part 'x' in the above figure.

Watch Video Solution

22. 

Name the above structure shown.

Watch Video Solution

23. 

Identify 'x' in the above figure.

Watch Video Solution

24. 

Identify 'x' in the above figure.

Watch Video Solution

25. 

Name the labelled part 'x' in the above figure.

Watch Video Solution

26.

Name the labelled part 'x' in the above figure.

[Watch Video Solution](#)

27. 

Name the labelled 'x' in the above figure.

Watch Video Solution

28. 

Name the labelled part 'x' in the above figure.

Watch Video Solution

29.

Watch Video Solution

30. 

Name the labelled part 'x' in the above figure.

Watch Video Solution

31.

Name the above structure shown in the above figure

Name the above structure shown in the above figure.

[Watch Video Solution](#)

32. Identify the scientist with the help of the paragraph.

In the year 1879, he examined many kinds of animal and plant cells and identified mitotic cell division.

[Watch Video Solution](#)

33. Name the scientist with help of the following paragraph.

He hypothesised that in successive cell division the number of chromosomes always remain constant. He hypothesised meiosis.

[Watch Video Solution](#)

34. Complete the following blanks.

In skin cells(1) division takes place, whereas in reproductive cells(2) division takes place.

[Watch Video Solution](#)

35. Complete the blanks.

Union of one male nucleus with the egg cell, forms (1) and the second male nucleus with the fusion nucleus forms (2)

[Watch Video Solution](#)

36. Complete the blanks.

The sperms are produced by(1).

The tail of the sperm helps in(2).

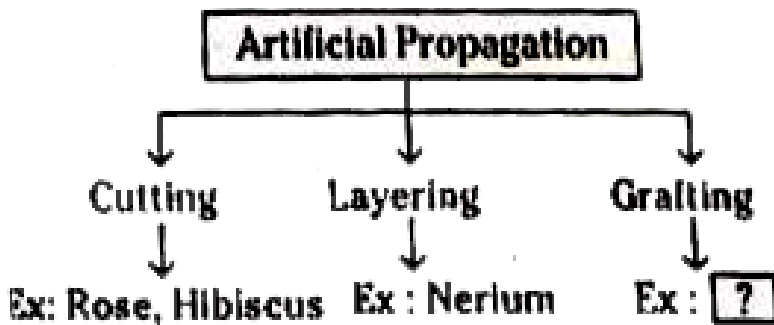

[Watch Video Solution](#)

37. Observe the flow chart and complete the blanks .

[Watch Video Solution](#)

38. Fill the missing options

[Watch Video Solution](#)

39. Fill the missing options

Watch Video Solution

41. Fill the missing options

 [Watch Video Solution](#)

42. Expand A.I.D.S.

 [Watch Video Solution](#)

43. Expand STD.

 [Watch Video Solution](#)

44. Expand H.I.V.

Watch Video Solution

45. Expand A.S.H.A.

Watch Video Solution

46. Expand A.R.T.

Watch Video Solution

47. Identify the mis-matched pair .

(1) Budding - Yeast

(2) Fission - Paramoecium

(3) Fragmentation - Bees

Watch Video Solution

48. Identify the mis-matched pairs.

(1) Stolon - Mango

(2) Bulb - Onion

(3) Root- Raddish

Watch Video Solution

49. Identify the mis- matched pair.

(1) Plumule - Stem

(2) Radicle -Flower

(3) Endosperm - Nutrition

Watch Video Solution

50. Identify the mismatched pair.

(1) Marriage age for men - 18

(2) Marriage age for women - 21

(3) AIDS- HIV

 [Watch Video Solution](#)

51. Fill the missing options

 [Watch Video Solution](#)

52. Fill the missing options

 [Watch Video Solution](#)

53. Observe the following placards. Suggest one occasion, to use them in your school.

 [View Text Solution](#)

54. Which of the following group does not constitute vegetative propagation methods?

A. fission,Budding,Fragmentation,Regeneration

B. Stolons, Suckers, Runners,Bulbs,Corns

Watch Video Solution

55. Which of the following group represent STDs ?

A. Typhoid, Dengue,T.B, Malaria

B. AIDS,Syphilis,Gonorrhoea

Watch Video Solution

56. Which of the following group represent the parts of female reproductive system?

A. Seminal vasicles, cowper gland , prostate gland

B. Fallopian tube, uterus, vagina, ovary, funnel

Watch Video Solution

57. I am a surgical birth control method in males. Who am I ?

Watch Video Solution

58. I can act as contraceptive and prevent sexual infection. Who am I ?

Watch Video Solution

59. I am a surgical birth control method in females. Who am I ?

Watch Video Solution

60. I am an artificial method of vegetative propagation, through which the desired characters can be obtained . Who am I ?

Watch Video Solution

61. I am one type of cell division . I can repair the wounds and help in the process of growth . Who am I ?

Watch Video Solution

62. Which of the following group represents male reproductive parts?

A. Anther, Pollen grain, Stamen

B. Ovary, Corolla, Stigma, Ovule, Ovary

Watch Video Solution

63. I Formed due to the fusion of second male gamete with fusion nucleus. I am in '3n' condition . Who am I ?

Watch Video Solution

64. I am a fungus. I reproduce asexually through by sporulation. I am also known as bread mould. Who am I ?

Watch Video Solution

65. Read the following lines, find the error and rewrite it.

Majority of flowering plants have an embryosac consisting of eight cells and nine nuclei.

Watch Video Solution

66. Read the following lines, find the error and rewrite it.

Pollen grain may have a pollen tube and one nucleus. It germinates only on the style.

Watch Video Solution

67. Read the lines, find the error and rewrite it.

One of the two sperms fuses with the egg to form a zygote. By the time the egg cell has been fertilized, the two polar nuclei form a single endosperm nucleus.

Watch Video Solution

68. Read the following lines, find the error and rewrite it.

Zygote is in ' $3n$ ' condition and endosperm nucleus is in ' $2n$ ' condition.

Watch Video Solution

69. I am a special tissue formed after double fertilization. I store food materials for the nourishment of the embryo. Who am I?

Watch Video Solution

70. We digest and absorb the endosperm and make the stored food for the growth of epicotyl and hypocotyl. Can you name us?

Watch Video Solution

71. Rhizopus: Sporangium, Aspergillus: ?

Watch Video Solution

72. Mango: Grafting: Nerium:?

Watch Video Solution

73. Bulb : Onion: Tuber:?

Watch Video Solution

74. Stolon: Jasmine, Corm:?

Watch Video Solution

75. Rhizome: Stem, Bryophyllum:?

Watch Video Solution

76. Planaria: Regeneration, Spirogyra: ?

Watch Video Solution

77. Amoeba: Binary fission, Yeast: ?

Watch Video Solution

78. Name the scientist with the help of the following paragraph.

He proposed the cell theory. He proposed that "Omnis cellula de cellula."

Watch Video Solution

79. Name the scientist with help of the paragraph.

He proposed that chromosomes carried a different set heritable elements.

Watch Video Solution

80. Expand D.N.A.

Watch Video Solution

81. Expand R.N.A.

[Watch Video Solution](#)

82. Name the scientist with the help of this paragraph.

In 1904, he proposed the scheme of mitotic division. It was considered as the milestone in the history of cell biology.

[Watch Video Solution](#)

83. Name the scientist, with the help of the following lines.

In 1953, they discovered the structure of DNA and they declared that it was double helix. They were honoured with the Nobel prize for their work.

[Watch Video Solution](#)

84. Identify the mis-matched pair.

(1) World AIDS Day - June, 5

(2) STD-Gonorrhoea

(3) ASHA- HIV patients

[Watch Video Solution](#)

85. Name the scientist with the help of the following lines.

In 1876, he showed that plants when isolated had the greatest tendency to self-fertilize while when surrounded by variety of the same flowers, they readily cross fertilize.

[Watch Video Solution](#)

86. I originate from the digestive canal of the embryo. I am a tube like structure I have very important blood vessels that connect the embryo with the placenta. Who am I?

[Watch Video Solution](#)

87. Identify the correct sequence.

(A) Prophase → Anaphase → Telophase → Metaphase

(B) Prophase → Metaphase → Anaphase → Telophase

(C) Metaphase → Telophase → Prophase → Anaphase

(D) Prophase → Anaphase → Metaphase → Telophase

[Watch Video Solution](#)

88. In the diagram, 'X' denotes.....

[Watch Video Solution](#)

List- A

List-B

- 89.
- | | |
|-------------------|--------------|
| 1. Fragmentation | —Fungi |
| 2. Budding | —Paramoecium |
| 3. Binary fission | —Flatworm |

Write the mis-matched pairs.

[Watch Video Solution](#)

90. Arrange the stages of cell cycle of mitosis in correct order:

S phase

1

→

G₂ phase

2

→ **M phase**

3

→

G₁ phase

4

Watch Video Solution

91. Arrange the sequence of steps of human life cycle.

1. Adolescence
2. Babyhood
3. Adulthood
4. Childhood

Watch Video Solution

92. This symbol denotes.....

Watch Video Solution

93. The student observes pollen grains under microscope.

It appears as below. 'X' indicates.....

Watch Video Solution

94. Write the stage of cell division .

Watch Video Solution

95. Name the structures found in a bean seed shown in the figure.

Watch Video Solution

96. The Pollen grain has 2 Nuclei. Whenever the pollen tube enters the Embryo soon after the tip of the pollen tube enters the embryo sac, the end of the tube ruptures and releases the two sperms into the embryo sac. One of the two sperms fuses with the egg to form 'X' and another sperm fuses with polar nuclei and form Y. What are X and Y in the above para?

Watch Video Solution

97. Name the part which is asked as a question mark ?

[Watch Video Solution](#)

98. Who stated that binary fission of cells was the means of reproduction of animals cells?

[Watch Video Solution](#)

99. Who hypothesised that individuals of the same species have the same number of chromosomes ?

[Watch Video Solution](#)

[Watch Video Solution](#)

100. Identify the mismatched pair.

- (a) Runner — Grass
- (b) Tuber — Potato
- (c) Bulb — Carrot

[Watch Video Solution](#)

101. Surgical method: Tubectomy : : Barrier method:.....?.....

[Watch Video Solution](#)

102. Which type of flower is this?

Watch Video Solution

103. This is an example for

- A. Bisexual flower
- B. unisexual flower
- C. sterile flower
- D. none of these

Answer:

View Text Solution

104. In this diagram, X represents

Watch Video Solution

105. In this diagram, X represents

Watch Video Solution

106. In this diagram, X denotes

Watch Video Solution

107. In this diagram, X represents

Watch Video Solution

108. In this diagram X represents

Watch Video Solution

109. In this diagram X denotes.....

Watch Video Solution

110. In the given diagram X represents

Watch Video Solution

111. Name the structure that denotes 'X' in the given diagram.

112. Fill the missing options

113. Identify the mismatched pair

- (1) Tuber - Potato
- (2) Corn - Colocasia
- (3) Bulb - Ginger

114. Can you identify this phase of mitosis?

Watch Video Solution

115. Arrange the flow chart in correct order.

Watch Video Solution

116. Complete this flow chart.

ATP, NADPH

Watch Video Solution

117. Complete this table.

Enzyme	Location of release
1) Pepsin	Stomach
2) Trypsin	?

Watch Video Solution

Creative Questions For New Model Paper Preparation Questions For The Examination Purpose

1. What is the mode of asexual reproduction do you find in paramoecium ?

[Watch Video Solution](#)

2. Name the mode of asexual reproduction in yeast.

[Watch Video Solution](#)

3. Where do you observe 'fragmentation' mode of asexual reproduction?

[Watch Video Solution](#)

4. In which process, the female gametes develop into zygote without fertilization ?

[Watch Video Solution](#)

5. Name the process of development of young ones from unfertilized ovum.

[Watch Video Solution](#)

6. What is the cause for formation of seedless fruits ?

[Watch Video Solution](#)

7. What kind of reproduction do you observe in bees, wasps and ants ?

[Watch Video Solution](#)

8. Where do you observe "regeneration" ?

[Watch Video Solution](#)

9. In which plant te vegetative propagation occurs through leaves ?

Watch Video Solution

10. Give an example for bulbs.

Watch Video Solution

11. Give an example for tubers.

Watch Video Solution

12. Give two example for stolon.

Watch Video Solution

13. Give one example for corm.

Watch Video Solution

14. Give one example for rhizome.

Watch Video Solution

15. Give examples for storage roots.

Watch Video Solution

16. Give example for cuttings.

Watch Video Solution

17. In which plant we can see 'layering' ?

[Watch Video Solution](#)

18. What is the best method to obtain desirable characters in a plants ?

[Watch Video Solution](#)

19. What are the traditional methods of artificial propagation ?

[Watch Video Solution](#)

20. Name the process in which thousands of plants can be grown in very short interval of time.

[Watch Video Solution](#)

21. Suggest the artificial method of propagation best for commercial propagation of plants.

[Watch Video Solution](#)

22. What is "bread mould" ?

[Watch Video Solution](#)

23. What is the process of reproduction in Rhizopus ?

[Watch Video Solution](#)

24. What is the reproductive structure of Rhizopus ?

[Watch Video Solution](#)

25. In which plant do you observe "sporophyll" ?

[Watch Video Solution](#)

26. On the lower side of the leaf of Fern, the cluster of dot like structures are seen. Can you name these structures ?

Watch Video Solution

27. Name the part that produces the sperm cells or male reproductive cells in the male reproductive system ?

Watch Video Solution

28. In plants, the fusion of male gamete with secondary nucleus results is ?

Watch Video Solution

29. Where can you observe double fertilization and triple fusion ?

Watch Video Solution

30. Name the body part which has divisionless cells.

Watch Video Solution

31. What are the hazardous substance that show effect on the growth of fetus ?

Watch Video Solution

32. What is the gestation period in human beings ?

Watch Video Solution

33. What are the functions of testes during puberty ?

Watch Video Solution

34. The teacher said that egg cells are larger than sperm cells. What is the reason for this ?

Watch Video Solution

35. Mother's uterus tissue and chorion tissue of the embryo together form a structure. What do you name it ?

Watch Video Solution

36. With what name do you call the embryo after the third month of pregnancy ?

Watch Video Solution

37. When do we celebrate 'World' s AIDS day' ?

Watch Video Solution

38. What are the most important floral organs required for sexual reproduction ?

Watch Video Solution

39. Where do you observe diploid condition in the embryo sac at the time of fertilization ?

Watch Video Solution

40. In which organisms do you observe external fertilization ?

Watch Video Solution

41. Name the STD which is used by bacteria.

Watch Video Solution

42. Name the method of contraception protects a person from acquiring a sexually transmitted disease.

Watch Video Solution

43. Name the surgical birth control method in males.

Watch Video Solution

44. Name the surgical birth control method in females.

Watch Video Solution

45. Name the part of the seed which grows and develops into root on germination.

Watch Video Solution

46. If a flower contains both stamen and carpel, then what do we call this flower?

Watch Video Solution

47. "Plants perfect self pollination, when they are isolated" - Who said these words?

Watch Video Solution

48. Who discovered mitosis?

Watch Video Solution

49. Name the phase of mitosis in which chromosomes split together to form chromatids.

Watch Video Solution

50. What are the programmes implimenting to control AIDS in our state ?

Watch Video Solution

51. Where do you observe epiphyllous buds?

Watch Video Solution

52. What is the first cells formed after the union of male gametes will egg ?

Watch Video Solution

53. Name the watery lymph like fluid that accumulates in the mammary glands during the last part of pregnancy.

Watch Video Solution

54. Male reproductive system secretes a fluid called semen . What is its use ?

Watch Video Solution

55. What type of cell division can we observe in reproductive cells?

Watch Video Solution

56. Name the period of cell cycle during which DNA is synthesized.

Watch Video Solution

57. What is Cytokinesis. ?

Watch Video Solution

58. What is Karyokinesis ?

Watch Video Solution

59. Give examples for sexually transmitted diseases (STDs).

Watch Video Solution

60. Where does fertilization takes place in females ?

Watch Video Solution

61. Who confirmed scheme of mitotic division in 1904 ?

Watch Video Solution

62. Give an example for intra uterine device.

[Watch Video Solution](#)

63. What is the statutory marriageable age for men and women in India ?

[Watch Video Solution](#)

64. Where is the egg apparatus is placed in the embryo sac ?

[Watch Video Solution](#)

65. What do anthers contain ?

[Watch Video Solution](#)

66. What are responsible- inheritance of characters ?

[Watch Video Solution](#)

67. Who discovered that chromosomes appear double in nature ?

Watch Video Solution

68. Who discovered the double helical structure of DNA ?

Watch Video Solution

69. Give an example for modified underground stem .

Watch Video Solution

70. How does colostrum helpful for the new born baby ?

Watch Video Solution

1. In what way does mitotic division help the living organism ?

Watch Video Solution

2. What questions you ask the doctor, who visited your school on world AIDS day ?

Watch Video Solution

3. What is colostrum ?

Watch Video Solution

4. Give any two suggestions to create awareness to stop female foeticide.

Watch Video Solution

5. Write two precautions you take , while observing Rhizopus in the laboratory.

Watch Video Solution

6. Name the types of asexual reproduction in the following organisms:

(a) Paramecium

(b) Yeast

Watch Video Solution

7. Apparao and Ramulamma are a newly married illiterate couple. They don't want children for few years. Suggest some birth control methods for them.

Watch Video Solution

8. During favourable conditions paramoecium reproduce by ?

[Watch Video Solution](#)

9. In which organisms fragmentation is a common mode of reproduction ?

[Watch Video Solution](#)

10. What is parthenogenesis ? Give example.

[Watch Video Solution](#)

11. What are the methods of artificial propagation ?

[Watch Video Solution](#)

12. Which method is used to obtain a plant with desirable characters ?

Watch Video Solution

13. What is tissue culture ?

Watch Video Solution

14. What is the name of common bread mould ?

Watch Video Solution

15. What is fertilisation ?

Watch Video Solution

16. Give examples and explain what is meant by external fertilisation.

[Watch Video Solution](#)

17. What is internal fertilisation ?

[Watch Video Solution](#)

18. What are the parts that present in male reproductive sysytem of man ?

[Watch Video Solution](#)

19. What are the accessory glands present in male reproductive system?

[Watch Video Solution](#)

20. What is ovulation ? How it occurs ?

[Watch Video Solution](#)

21. Which one of the following is not the function of placenta ? It

Watch Video Solution

22. When did the placenta is formed in the period of pregnancy ?

Watch Video Solution

23. What is umbilical cord?How does it form?

Watch Video Solution

24. What is foetus ?

Watch Video Solution

25. What is gestation period ?

Watch Video Solution

26. What are labour pains ?

Watch Video Solution

27. What is the need of sexual reproduction ?

Watch Video Solution

28. What are the different part of a flower ?

Watch Video Solution

29. What are unisexual flower ?

[Watch Video Solution](#)

30. What are the three parts of carpel ?

[Watch Video Solution](#)

31. What is self pollination ?

[Watch Video Solution](#)

32. What is cross pollination ?

[Watch Video Solution](#)

33. What is double fertilisation ?

[Watch Video Solution](#)

34. Who discovered mitosis ?

Watch Video Solution

35. What is the meaning of the phrase "Omnis cellula de cellula" ?

Watch Video Solution

36. What is interphase ?

Watch Video Solution

37. What is G_1 phase of the interphase?

Watch Video Solution

38. What is 'S' phase of the interphase ?

[Watch Video Solution](#)

39. What is G_2 phase of the interphase ?

[Watch Video Solution](#)

40. What are the different stages present in mitosis ?

[Watch Video Solution](#)

41. When does meiosis occur ?

[Watch Video Solution](#)

42. What is the virus that causes AIDS ?

[Watch Video Solution](#)

43. How does AIDS spread from one person to another ?

Watch Video Solution

44. What are the factors that contribute to the spread of HIV in the state?

Watch Video Solution

45. What is contraception ?

Watch Video Solution

46. What are the surgical methods to prevent fertilisation ?

Watch Video Solution

47. What is foeticide ?

Watch Video Solution

48. Who used cells fusion technique to understand the functional relationship between different phases of interphase ?

Watch Video Solution

49. What is the advantage of reproduction through spores in the case of rhizopus ?

Watch Video Solution

50. Which process taking place in the nucleus of a cell leads to variation in the offspring during reproduction ?

Watch Video Solution

51. Why it is said that sexual reproduction promotes diversity of characters in the offspring ?

Watch Video Solution

52. Name the causative organism of syphilis and gonorrhoea .

Watch Video Solution

53. Why are variation possible in progeny of sexually reproductive individuals ?

Watch Video Solution

54. The simple animals such as planarism can be cut number of pieces and each piece grows into a complex organism. What is this process

known as ?

Watch Video Solution

55. A student kept leaves of Bryophyllum in the soil. After few days new plants were grown from them. Why ?

Watch Video Solution

56. Name the three plants which are now grown using plant tissue culture method.

Watch Video Solution

57. What does the mother's blood take away from the baby and into the placenta ?

Watch Video Solution

58. What happens if the fallopian tubes are partially blocked and the ovulated eggs are prevented from reaching the uterus ?

Watch Video Solution

59. What will happen if there is no mitosis at all in living organisms ?

Watch Video Solution

60. How will you stain a microscopic slide showing mitosis in onion roots ?

Watch Video Solution

61. What happens if the fallopian tubes are partially blocked and the ovulated eggs are prevented from reaching the uterus ?

Watch Video Solution

62. What will happen if there is no mitosis at all in living organisms ?

[Watch Video Solution](#)

63. Identify the given picture. What is the message given by it?

[Watch Video Solution](#)

64. How will you stain a microscopic slide showing mitosis in onion roots ?

Watch Video Solution

Creative Questions For New Model Paper 2 Mark Questions

1. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(ii) In which cells, Meiosis takes place ?

Watch Video Solution

2. In Meiosis, the chromosome number in the daughter cells is reduced to half that of their parent cells. Guess, what would happen, if the reduction of chromosome number is not done.

Watch Video Solution

[Watch Video Solution](#)

3. What are the questions you asked the doctor who visited your school to know "the ways of transmission of HIV" ?

[Watch Video Solution](#)

4. Identify the flower parts a,b,c,d and write their main function.

[Watch Video Solution](#)

5. Draw a labelled diagram of sperm.

[Watch Video Solution](#)

6. How we will get the desired useful triats with the help of two selected triats by using grafting method ?

[Watch Video Solution](#)

7. Draw the labelled diagram of Embryo-sac.

Watch Video Solution

8. What questions do you ask a doctor to know about different birth control methods ?

Watch Video Solution

9.

గ్రూపు సంఖ్య	మూలక కుటుంబం పేరు	మూలకాలు		వేలన్సీస్థాయి విన్యాసం	వేలన్సీ విలక్షాణము	సంయోజకత వేలన్సీ

[Watch Video Solution](#)

11. Write the process involved in seedless fruit development with two suitable examples .

[Watch Video Solution](#)

12. What precautions will you take to keep away from diseases like AIDS and othersexually transmitted diseases ?

Watch Video Solution

13. Observe the diagram and answer the following questions.

(I) Name male and female reproductive parts of the above figure.

Watch Video Solution

14. Observe the diagram and answer the following questions.

(II)Write the names of (1) and (2) in the diagram.

View Text Solution

15. Write slogans on 'child marriages - a social evil' .

Watch Video Solution

16. Write 5 slogans on the prevention of HIV/ AIDS .

Watch Video Solution

17. What is the prevent scenario of HIV infection in Andhra Pradesh and Telangana ?

What are the causes for HIV infection ?

Watch Video Solution

18. Why do more complex orgaisms not give rise to new individual through regeneration ?

Watch Video Solution

19. What are the advantages of vegetative propagation ?

[Watch Video Solution](#)

20. How will an organism be benefited if it reproduces through spores ?

[Watch Video Solution](#)

21. Write the information you got from your teacher about role of different parts in development of embryo.

Chorion,placenta,amnion,alantois are the embryonic membranes.Write their functions in a tabular form.

[Watch Video Solution](#)

22. What causes joining up of stock and scion grafting technique of vegetative propagation in plants ?

Watch Video Solution

23. How does binary fission differ from multiple fission ?

Watch Video Solution

24. Why the DNA is copying an essential part of the process of reproduction ?

Watch Video Solution

25. Differentiate between asexual reproduction and sexual reproduction .

Watch Video Solution

26. Differentiate between unisexual and bisexual flower. Give two examples of each .

Watch Video Solution

27. How is the process of pollination different from fertilisation?

Watch Video Solution

28. If a woman is using a copper-T, will it help in protecting her from Sexually transmitted diseases?

Watch Video Solution

29. Arjun Tendulkar injured his knees while fielding at ground. The injury was healed after some days . Arjun was eager to know the process behind it . Describe the process involved in wound healing.

Watch Video Solution

Watch Video Solution

30. Write some slogans against female foeticide.

Watch Video Solution

31. What is fission ? Give examples.

Watch Video Solution

32. Write a short notes on fragmentation.

Watch Video Solution

33. What is parthenogenesis ? Give example.

Watch Video Solution

34. Write short note on artificial propagation method cutting.

Watch Video Solution

35. Write about layering. Give example.

Watch Video Solution

36. What are the advantages of grafting?

Watch Video Solution

37. How is tissue culture more beneficial than other traditional methods for artificial propagation of plants ?

Watch Video Solution

38. What is tissue culture ?

Watch Video Solution

39. How does the Rhizopus propagate ?

Watch Video Solution

40. Write a short note on spore formation.

Watch Video Solution

41. How spores are produced in sporangia of fungi ?

Watch Video Solution

42. Write a short note on ovulation.

[Watch Video Solution](#)

43. What is ovulation ? How it occurs ?

[Watch Video Solution](#)

44. What is colostrum ? What is its importance ?

[Watch Video Solution](#)

45. Ramu said that it is very essential to create more awareness in Andhra Pradesh and Telangana on the risk of HIV infection and AIDS . Do you believe support him ? If so, How can you support his statement ?

[Watch Video Solution](#)

46. What happens in a flowering plant if single fertilization only takes place ?

[Watch Video Solution](#)

Creative Questions For New Model Paper 4 Mark Questions

1. Observe the given diagram and answer the following questions .

What are the four main parts of a flower ?

[Watch Video Solution](#)

2. Observe the given diagram and answer the following questions .

(ii) Which parts of the flower produce gametes ?

[Watch Video Solution](#)

3. Observe the given diagram and answer the following questions .

(iii) Which parts of the flower help in pollination ?

Watch Video Solution

4. Observe the given diagram and answer the following questions .

(iv) Which part protect the flower during its bud stage ?

[Watch Video Solution](#)

5. Observe the given diagram and answer the following questions .

(v) Which part of the flower will turn into a fruit in the future ?

[Watch Video Solution](#)

6. Describe the life cycle of a flowering plant with a help of labelled diagrams.

[Watch Video Solution](#)

7. Draw the life history of flowering plant in the form of block diagram.

[Watch Video Solution](#)

8. Analyze the following information and answer the following questions .

(i) What do you call the give reproduction methods ?

[View Text Solution](#)

9. What is the major difference between sexual reproduction and vegetative reproduction in plants ?

Watch Video Solution

10. Potato plants do not produce seeds. How can you propagation this plant ?

Watch Video Solution

11. What are the advantages of propagating plants with the above methods ?

Watch Video Solution

12. Explain the formation of fruits and seeds in plants.

Watch Video Solution

13. What are the methods of artificial propagation ?

Watch Video Solution

14. Observe the following figures and find the stages of cell division and explain.

View Text Solution

15. Mention the stages of mitosis with the help of diagrams . Explain the changes that takes place in Prophase.

Watch Video Solution

16. Organisms reproduce asexually in many ways. Some of the organisms are given below. Fill the below table based on the collected information about the organism and mode of asexual reproduction in it .

(a) Onion (b) Spirogyra (c) Strawberry (d) Ginger (e) Honey-bee (f) Paramoecium (g) Planaria (h) Yeast

View Text Solution

17. Draw a near labelled diagram of L.S. of flower .

Watch Video Solution

18. What are the sexual parts in the flower ?

Watch Video Solution

19. What procedure do you follow to understand the effect of plant growth hormones (in agar medium) in the terminal portion of the tip of stem (coleoptile) ?

Watch Video Solution

20. What are the materials required to prepare and test the hydrogen gas in the lab by using acid and metal ? Where do you observe the evolved hydrogen gas ?

Watch Video Solution

21. The role of double fertilization in angiosperms is to produce

Watch Video Solution

22. Observe the diagram and answer the following .

(1) which part produce the female gametes

Watch Video Solution

23. Observe the diagram and answer the following .

(2) where does the fertilization takes place in female

Watch Video Solution

24. Observe the diagram and answer the following .

(3) Where does the embryo develops until is the ready to born ?

Watch Video Solution

25. Observe the diagram and answer the following .

(4) in some case doctors' cut and tie the cut ends of the follopians tubes.

What is the name of surgery ?

Watch Video Solution

26. Read the following table and answer the following questions.

Sl. No.	Structure	Location
1.	Tricuspid valve	Right auriculo-ventricular aperture
2.	Guard cells	Epidermis of leaves
3.	Glomerulus	Nephron
4.	Alveoli	Lungs
5.	Acrosome	Above the head of a sperm.

(i) Name the structure concerned to the heart.

Watch Video Solution

27. Read the following table and answer the following questions.

Sl. No. No.	Structure	Location
1.	Tricuspid valve	Right auriculo-ventricular aperture
2.	Guard cells	Epidermis of leaves
3.	Glomerulus	Nephron
4.	Alveoli	Lungs
5.	Acrosome	Above the head of a sperm.

(ii) What is the function of acrosome.

[Watch Video Solution](#)

28. Read the following table and answer the following questions.

Sl. No. No.	Structure	Location
1.	Tricuspid valve	Right auriculo-ventricular aperture
2.	Guard cells	Epidermis of leaves
3.	Glomerulus	Nephron
4.	Alveoli	Lungs
5.	Acrosome	Above the head of a sperm.

(iii) Name the structures which are helpful for gaseous exchange.

[View Text Solution](#)

29. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(i) What does ' n ' and ' $2n$ ' indicate ?

Watch Video Solution

30. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(ii) In which cells, Meiosis takes place ?

Watch Video Solution

31. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(iii) What happens, if chromosomal number is not reduced in meiosis ?

[Watch Video Solution](#)

32. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(iv) Which type of cell division occurs in the skin cells?

[Watch Video Solution](#)

33. Describe different artificial vegetative methods to produce large scale production plants.

[Watch Video Solution](#)

34. Draw a labelled diagram of female reproductive system.

[Watch Video Solution](#)

35. Draw a labelled diagram of female reproductive system.

Watch Video Solution

36. Among the following organisms can we see asexual reproduction .

Write about the method of asexual reproduction in any of the two organisms.

(a) Paramecium (b) Yeast (c) Spirogyra (d) Amoeba (e) Planaria

Watch Video Solution

37. See the adjacent picture. Which type of pollination will occur in this?

Why do you think so?

Watch Video Solution

38. Write slogans on 'child marriages - a social evil' .

Watch Video Solution

39. Describe the structure of male reproductive system in human beings.

Watch Video Solution

40. Describe the structure of male reproductive system in human beings.

Watch Video Solution

41. Describe briefly about the female reproductive system in human beings.

Watch Video Solution

42. Describe the structure of flower with a neatly labelled diagram.

Watch Video Solution

43. Why meiosis is called reduction division?

Watch Video Solution

44. What is contraception ?

Watch Video Solution

45. Describe the developmental stages of human embryo after fertilization with the help of neatly labelled diagrams.

Watch Video Solution

46. What is the significance of meiosis?

Watch Video Solution

47. Illustrate the process of regeneration in planaria with the help of suitable diagram.

Watch Video Solution

48. What are the consequences if meiosis not happen in the body cells of the organism. ?

Watch Video Solution

49. Ravi's father wants to cultivate potato in his field . He wants to clarify some doubts with the agriculturals officer. Prepare a list of doubts in form of questions for him .

Watch Video Solution

50. What procedure do you adopt to see pollen grain with tube ?

[Watch Video Solution](#)

51. Observe the following mitotic cell division diagram and answer the questions given below.

(i) How much time required for G_1 phase ?

[View Text Solution](#)

52. Observe the following mitotic cell division diagram and answer the questions given below.

(ii) What is 'S' phase ?

[View Text Solution](#)

53. Observe the following mitotic cell division diagram and answer the questions given below.

(iii) What is G_2 phase ? What change occur during this phase ?

[View Text Solution](#)

54. Observe the following mitotic cell division diagram and answer the questions given below.

(iv) What is 'M' phase ? How much time it required ?

[View Text Solution](#)

55. Observe the following mitotic cell division diagram and answer the questions given below.

(v) How much time required to complete mitotic cell cycles ?

[View Text Solution](#)

56. Draw a labelled diagram of male reproductive system.

Watch Video Solution

57. Draw the life history of flowering plant in the form of block diagram.

Watch Video Solution

58. Label the parts for given diagram and write functions of labelled parts 1,2,6 and 7.

Watch Video Solution

59. A person injured, after several days his wound completely healed. What type of process took place at the injured part ? Represent these

stages with diagram.

Watch Video Solution

60. Write two activities which you are performing to save the electricity.

Watch Video Solution

61. Describe what life skills one should develop in Adolescent stage.

Watch Video Solution

62. Government made an act on determining sex through ultrasound scanning and telling it as crime . What do you do to tell this others ?

Watch Video Solution

63. Write briefly about natural vegetative propagation.

[Watch Video Solution](#)

64. All sexually transmitted diseases are completely curable.

[Watch Video Solution](#)

65. Write a short note on Grafting.

[Watch Video Solution](#)

Exercise

1. Do you think reproduction occurs only for continuation of life ?

[Watch Video Solution](#)

2. How does an organism grow ? How does repair of worn out parts take place ? Is there any form of reproduction involved in the process ?

Watch Video Solution

3. How does an organism grow ? How does repair of worn out parts take place ? Is there any form of reproduction involved in the process ?

Watch Video Solution

4. Why do fish and frog produce a huge number of eggs each year ?

Watch Video Solution

5. Give examples and explain what is meant by external fertilisation.

Watch Video Solution

6. Write differences between

Grafting -Layering

Watch Video Solution

7. Write differences between

Stamen -Carpel

Watch Video Solution

8. Explain the process of fertilization in plants.

Watch Video Solution

9. Double fertilization is wonderful phenomenon in flowering plants.

Explain double fertilization in flowering plant with the help of a diagram.

Watch Video Solution

10. An example of asexual reproduction in plants is

[Watch Video Solution](#)

11. What are the advantages of propagating plants with the above methods ?

[Watch Video Solution](#)

12. What are the advantages of sexual reproduction over asexual reproduction?

[Watch Video Solution](#)

13. How are sperms cells adapted for their function?

[Watch Video Solution](#)

14. The menstrual cycle prepares the uterus for a fertilised egg. How long is an average menstrual cycle from start to finish ?

Watch Video Solution

15. When the foetus is growing inside the uterus it needs nutrients. What provides these nutrients ?

Watch Video Solution

16. Which type of substances are absorbed by foetus from the mother ?

Watch Video Solution

17. What is the job of the amniotic sac ?

Watch Video Solution

18. What are the advantages of sexual reproduction ?

Watch Video Solution

19. How does reproduction help in providing stability to populations of species?

Watch Video Solution

20. List the main differences between mitosis and meiosis.

Watch Video Solution

21. What happens to the wall of the uterus during menstruation ?

Watch Video Solution

22. 'All unicellular organisms undergo only mitotic cell division during favourable conditions' - Do you support this statement ? Why ?

[Watch Video Solution](#)

23. What would be the consequences if there is no meiosis in organisms that reproduce sexually?

[Watch Video Solution](#)

24. What happens if meiosis does not take place in reproductive cells?

[Watch Video Solution](#)

25. Vicky's father wants to grow a single plant having two desirable characters colourful flowers and big fruits. What method will you suggest him and why?

Watch Video Solution

26. What procedure you will follow to observe stages of mitosis in onion root tip?

Watch Video Solution

27. Uproot an onion plant and take a thin section of its root tip. Stain it and observe under microscope. Draw as you see and identify the stages of the cell division.

Watch Video Solution

28. Collect information from school library or using internet what vegetative methods are followed in your district as well as in your state to propagate various plants of economic importance.

Watch Video Solution

29. Make a flow chart to show the cell cycle and explain cell division describing different stages of mitosis.

Watch Video Solution

30. Draw neat labelled diagrams of male and female reproductive system of plant.

Watch Video Solution

31. Observe the following part of a flowering plant. Prepare a note.

[Watch Video Solution](#)

32. Prepare a flow to explain the process of sexual reproduction in plants.

[Watch Video Solution](#)

33. Draw a neatly labelled diagram to explain plant fertilisation. Write a few points on pollen grain.

Watch Video Solution

34. How ill you appreciate cell division that help perpetuation of life?

Watch Video Solution

35. What precautions will you take to away from various sexually transmitted discases?

Watch Video Solution

36. Conduct a seminar on child marriages and foeticide.

Watch Video Solution

37. The part of the female reproductive system that produces the eggs.....

- A. Ovary
- B. Epididymis
- C. Cervix
- D. Fallopian tube

Answer:

Watch Video Solution

38. The term that we use to describe a sperm cell fusing with an egg cell.....

- A. Fragmentation
- B. Fermentation
- C. Fertilisation

D. Fusion

Answer:

Watch Video Solution

39. Which part of the male reproductive system produces (human) the sperm cell?

A. Vasdeference

B. Epididymis

C. Seminiferous tubules

D. Scrotum

Answer:

Watch Video Solution

40. How does the sperm break through the egg cell membrane ? Choose the option you think is right.

- A. Tears a hole in the membrane
- B. Dissolves the membrane with chemicals
- C. Bites through the membrane with teeth
- D. Squeezes through gaps in the membrane

Answer:

Watch Video Solution

41. Why are egg cells larger than sperm cells? Choose the option you think is right.

- A. Egg cells have more cells in them
- B. Have food store to help growth after fertilisation
- C. Have thicker cell membranes

D. Have larger nuclei

Answer:

Watch Video Solution

42. Which of these things will affect the way a foetus grows? Choose the option you think is right.

A. Chemicals in cigarette smoke

B. Alcohol

C. Drugs

D. All of the above

Answer:

Watch Video Solution

43. Which of the following is the correct sequence of steps in the human life cycle? Choose the right option.

- A. Babyhood, childhood, adolescence, adulthood
- B. Childhood, babyhood, adulthood, adolescence
- C. Adolescence, babyhood, adulthood, childhood
- D. None of these

Answer:

Watch Video Solution

44. How do you think bacteria were dividing to form curd?

Watch Video Solution

45. Which type of fission would produce larger colonies in less period of time . Why?

[Watch Video Solution](#)

46. What mode of propagation would help you to produce the plants with desirable characters?

[Watch Video Solution](#)

47. Do you find any similarities between rhizopus and fern spores and sporangia?

[Watch Video Solution](#)

48. Think why testis are located outside the abdominal cavity?

[Watch Video Solution](#)

49. What function do you think is served by petals and sepals?

[Watch Video Solution](#)

50. How many nuclei are present in the pollen grain?

[Watch Video Solution](#)

51. Which floral part may be seen in a fruit?

[Watch Video Solution](#)

52. How would it affect the progeny formed by sexual reoroduction ?

[Watch Video Solution](#)

53. What is the virus that causes AIDS ?

[Watch Video Solution](#)

54. Is regeneration can also be known as a type of fragmentation? Do you agree ? Why or why not?

Watch Video Solution

55. Whether they reproduce by budding, fission or fragmentation ? Organisms formed are the exact copies of their parents. Is it true? Why?

Watch Video Solution

56. What about mushrooms, how do they grow? Discuss in your class.

Watch Video Solution

57. How does the male reproductive cells reach the female reproductive cells in flowers of such plants (pea plants)?

Watch Video Solution

58. What would happen if the gametes do not have half the chromosome number as the skin parent?

Watch Video Solution

59. Why did the government of india fix the marriage age of boys (21 years) and girls (18 years)?

Watch Video Solution

60. Do you feel that it is a social responsibilities to control birth after having one or two children?

Watch Video Solution

61. What do you understand by the 'Healthy Society' ?

Watch Video Solution

[Watch Video Solution](#)

62. Will you encourage child marriage?

[Watch Video Solution](#)

63. Why doctors are prohibited to do sex determination through ultrasound scanning for pregnant women ?

[Watch Video Solution](#)

64. Label parts of flower given in figure.

Watch Video Solution

65. Draw the diagram of the flower that you collect and parts shown and write their functions.

[Watch Video Solution](#)

66. observe the following figures and write their functions.

[Watch Video Solution](#)

67. List the main differences between mitosis and meiosis.

[Watch Video Solution](#)

68. Social discrimination against AIDS patient is also a social evil . Can you support this Why?

Watch Video Solution

69. How are cotyledons useful for the plant?

Watch Video Solution

70. In what way does mitotic division help the living organism ?

Watch Video Solution

71. Give any two suggestions to create awareness to stop female foeticide.

Watch Video Solution

72. Write two precautions you take , while observing Rhizopus in the laboratory.

Watch Video Solution

73. Mention two materials you have used to observe Rhizopus on bread mould.

Watch Video Solution

74. Identify the flower parts a,b,c,d and write their main function.

Watch Video Solution

75. Draw a labelled diagram of sperm.

Watch Video Solution

76. How we will get the desired useful triats with the help of two selected triats by using grafting method ?

Watch Video Solution

77. Write the process involved in seedless fruit development with two suitable examples .

Watch Video Solution

78. What precautions will you take to keep away from diseases like AIDS and othersexually transmitted diseases ?

Watch Video Solution

79. When does Parthenogenesis occur ? Write names of two animals in which parthenogenesis takes place.

Watch Video Solution

[Watch Video Solution](#)

80. Draw the figure of metaphase in mitosis, and write about it.

[Watch Video Solution](#)

81. Prepare 4 questions on meiosis, to conduct a Quiz programme.

[Watch Video Solution](#)

82. Describe the life cycle of a flowering plant with a help of labelled diagrams.

[Watch Video Solution](#)

83. What is foetus ?

[Watch Video Solution](#)

84. What are the methods of artificial propagation ?

Watch Video Solution

85. Mention the stages of mitosis with the help of diagrams . Explain the changes that takes place in Prophase.

Watch Video Solution

86. The role of double fertilization in angiosperms is to produce

Watch Video Solution

87. What is the name of common bread mould ?

Watch Video Solution

88. Describe different artificial vegetative methods to produce large scale production plants.

Watch Video Solution

89. What are the different part of a flower ?

Watch Video Solution

90. During favourable conditions paramoecium reproduce by ?

Watch Video Solution

91. In which organisms fragmentation is a common mode of reproduction ?

Watch Video Solution

92. What is parthenogenesis ? Give example.

Watch Video Solution

93. What are the methods of artificial propagation ?

Watch Video Solution

94. Which method is used to obtain a plant with desirable characters ?

Watch Video Solution

95. What is tissue culture ?

Watch Video Solution

96. What is the name of common bread mould ?

Watch Video Solution

97. What is fertilisation ?

Watch Video Solution

98. Give examples and explain what is meant by external fertilisation.

Watch Video Solution

99. What is internal fertilisation ?

Watch Video Solution

100. What are the parts that present in male reproductive sysytem of man ?

Watch Video Solution

101. What are the accessory glands present in male reproductive system?

Watch Video Solution

102.

What is ovulation?

Watch Video Solution

103. Which of the following hormones is not secreted by human placenta?

[Watch Video Solution](#)

104. The part of decidua where placenta is formed is called

[Watch Video Solution](#)

105. What is the membrane that forms umbilical cord ?

[Watch Video Solution](#)

106. What is foetus ?

[Watch Video Solution](#)

107. What is gestation period ?

[Watch Video Solution](#)

108. What is the gestation period in human beings ?

Watch Video Solution

109. What are labour pains ?

Watch Video Solution

110. What is the need of sexual reproduction ?

Watch Video Solution

111. What are the different part of a flower ?

Watch Video Solution

112. What are unisexual flower ?

[Watch Video Solution](#)

113. What are the three parts of carpel ?

[Watch Video Solution](#)

114. What is self pollination ?

[Watch Video Solution](#)

115. What is cross pollination ?

[Watch Video Solution](#)

116. What is double fertilisation ?

[Watch Video Solution](#)

117. Who discovered mitosis ?

Watch Video Solution

118. What is the meaning of the phrase "Omnis cellula de cellula" ?

Watch Video Solution

119. Which of the following organisms is not an example of eukaryotic cells?

Watch Video Solution

120. What is interphase ?

Watch Video Solution

121. What is G_1 phase of the interphase?

Watch Video Solution

122. What is 'S' phase of the interphase ?

Watch Video Solution

123. What is G_2 phase of the interphase ?

Watch Video Solution

124. What are the different stages present in mitosis ?

Watch Video Solution

125. When does meiosis occur ?

[Watch Video Solution](#)

126. What is the virus that causes AIDS ?

[Watch Video Solution](#)

127. How does AIDS spread from one person to another ?

[Watch Video Solution](#)

128. What are the factors that contribute to the spread of HIV in the state?

[Watch Video Solution](#)

129. What is contraception ?

[Watch Video Solution](#)

130. What are the surgical methods to prevent fertilisation ?

Watch Video Solution

131. Why did the government of india fix the marriage age of boys (21 years) and girls (18 years)?

Watch Video Solution

132. What is foeticide ?

Watch Video Solution

133. Who used cells fusion technique to understand the functional relationship between different phases of interphase ?

Watch Video Solution

134. Give examples for sexually transmitted diseases (STDs).

Watch Video Solution

135. What is the advantage of reproduction through spores in the case of rhizopus ?

Watch Video Solution

136. Which process taking place in the nucleus of a cell leads to variation in the offspring during reproduction ?

Watch Video Solution

137. Why it is said that sexual reproduction promotes diversity of characters in the offspring ?

Watch Video Solution

[Watch Video Solution](#)

138. Name the causative organism of syphilis and gonorrhoea .

[Watch Video Solution](#)

139. Why are variation possible in progeny of sexually reproductive individuals ?

[Watch Video Solution](#)

140. The simple animals such as planarism can be cut number of pieces and each piece grows into a complex organism. What is this process known as ?

[Watch Video Solution](#)

141. A student kept leaves of Bryophyllum in the soil. After few days new plants were grown from them. Why ?

Watch Video Solution

142. Name the three plants which are now grown using plant tissue culture method.

Watch Video Solution

143. What does the mother's blood take away from the baby and into the placenta ?

Watch Video Solution

144. Write slogans on 'child marriages - a social evil' .

Watch Video Solution

145. Write 5 slogans on the prevention of HIV/ AIDS .

Watch Video Solution

146. Write briefly about natural vegetative propagation.

Watch Video Solution

147. What is the prevent scenario of HIV infection in Andhra Pradesh and Telangana ?

What are the causes for HIV infection ?

Watch Video Solution

148. What is the prevent scenario of HIV infection in Andhra Pradesh and Telangana ?

What are the causes for HIV infection ?

[Watch Video Solution](#)

149. From the sexually transmitted diseases mentioned below. Identify the one which does not specifically affect the sex organs.

[Watch Video Solution](#)

150. Why do more complex organisms not give rise to new individual through regeneration ?

[Watch Video Solution](#)

151. What are the advantages of vegetative propagation ?

[Watch Video Solution](#)

152. How will an organism be benefited if it reproduces through spores ?

Watch Video Solution

153. Placenta is very important during pregnancy. What is the role of it in embryo development ?

Watch Video Solution

154. What causes joining up of stock and scion grafting technique of vegetative propagation in plants ?

Watch Video Solution

155. How does binary fission differ from multiple fission?

Watch Video Solution

156. Why is DNA copying an essential part of the process of reproduction?

Watch Video Solution

157. Differentiate between asexual reproduction and sexual reproduction .

Watch Video Solution

158. Differentiate between unisexual and bisexual flower. Give two examples of each .

Watch Video Solution

159. How is the process of pollination different from fertilisation?

Watch Video Solution

160. If a woman is using a copper-T, will it help in protecting her from Sexually transmitted diseases?

Watch Video Solution

161. Arjun Tendulkar injured his knees while fielding at ground. The injury was healed after some days. Arjun was eager to know the process behind it. Describe the process involved in wound healing.

Watch Video Solution

162. Why is vegetative propagation practised for growing some types of plants?

Watch Video Solution

163. Vegetative propagation is preferred by

[Watch Video Solution](#)

164. According to Weismann's prediction, every organism undergoes two kinds of cell divisions. In mitosis, there is no change in chromosomal number ($2n$) and in Meiosis, chromosomal number is reduced to half (n).

(iii) What happens, if chromosomal number is not reduced in meiosis?

[Watch Video Solution](#)

165. In Meiosis, the chromosome number in the daughter cells are reduced to half that of their parent cells. Guess, what would happen, if the reduction of chromosome number is not done.

[Watch Video Solution](#)

166. What are the questions you asked the doctor who visited your school to know "the ways of transmission of HIV"?

[Watch Video Solution](#)

167. Among the following organisms can we see asexual reproduction .

Write about the method of asexual reproduction in any of the two organisms.

(a) Paramecium (b) Yeast (c) Spirogyra (d) Amoeba (e) Planaria

Watch Video Solution

168. See the adjacent picture. Which type of pollination will occur in this?

Why do you think so?

[Watch Video Solution](#)

169. Describe different artificial vegetative methods to produce large scale production plants.

[Watch Video Solution](#)

170. Differentiate between asexual reproduction and sexual reproduction

.

Watch Video Solution

171. 

Identify the above shown artificial vegetative propagation.

Watch Video Solution

172. Describe the types of vegetative propagation.

Watch Video Solution

173. The shared terminal duct of the urinary system and the male reproductive system in human beings is

[Watch Video Solution](#)

174. Describe the structure of male reproductive system in human beings.

[Watch Video Solution](#)

175. Which of the following is not a part of the female reproductive system in human beings?

[Watch Video Solution](#)

176. Draw the neat labelled diagram showing the birth of a child before delivery.

[Watch Video Solution](#)

177. Describe the structure of flower with a neatly labelled diagram.

[Watch Video Solution](#)

178. Why meiosis is called reduction division?

[Watch Video Solution](#)

179. What is contraception ?

[Watch Video Solution](#)

180. Describe the developmental stages of human embryo after fertilization with the help of neatly labelled diagrams.

[Watch Video Solution](#)

181. How does cell division help in the formation of unicellular and highly evolved multicellular organisms like human being?

[Watch Video Solution](#)

182. Illustrate the process of regeneration in planaria with the help of suitable diagram.

[Watch Video Solution](#)

183. What are the consequences if meiosis not happen in the body cells of the organism. ?

[Watch Video Solution](#)

184. What happens in flowering plant if single fertilization only takes place ?

[Watch Video Solution](#)

185. What happens if the fallopian tubes are partially blocked and the ovulated eggs are prevented from reaching the uterus ?

Watch Video Solution

186. What will happen if there is no mitosis at all in living organisms ?

Watch Video Solution

187. Ravi's father wants to cultivate potato in his field . He wants to clarify some doubts with the agriculturals officer. Prepare a list of doubts in form of questions for him .

Watch Video Solution

188. What procedure do you adopt to see pollen grain with tube ?

Watch Video Solution

189. Sameer wants to observe Rhizopus under microscope. For this i) What are preparatory activities he has to do? ii) What procedure does he follow? And iii) What precautions should he take?

Watch Video Solution

190. How will you stain a microscopic slide showing mitosis in onion roots ?

Watch Video Solution

191. Draw the life history of flowering plant in the form of block diagram.

Watch Video Solution

192. Label the parts for given diagram and write functions of labelled parts 1,2,6 and 7.

Watch Video Solution

193. Draw a labelled diagram of female reproductive system.

Watch Video Solution

194. Arjun Tendulkar injured his knees while fielding at ground. The injury was healed after some days . Arjun was eager to know the process behind it . Describe the process involved in wound healing.

Watch Video Solution

195. Identify the given picture. What is the message given by it?

Watch Video Solution

196. What programmes you would like to conduct to explain the relationship between cleanliness and health?

Watch Video Solution

197. Describe what life skills one should develop in Adolescent stage.

Watch Video Solution

198. Write some slogans against female foeticide.

Watch Video Solution

199. Identify the correct sequence.

(A) Prophase → Anaphase → Telophase → Metaphase

(B) Prophase → Metaphase → Anaphase → Telophase

(C) Metaphase → Telophase → Prophase → Anaphase

(D) Prophase → Anaphase → Metaphase → Telophase

A. Prophase → *AnaphaserarrTelophaserarr`* Metaphase

B. Prophase → Metaphase → Anaphase → Telophase

C. Metaphase → Telophase → Prophase → Anaphase

D. Prophase → Anaphase → Metaphase → Telophase

Answer:

[Watch Video Solution](#)

200. Name the part that produces the sperm cells or male reproductive cells in the male reproductive system ?

- A. Seminal duct
- B. Prostate gland
- C. Testes
- D. Seminal vesicle

Answer:

[Watch Video Solution](#)

201. In plants, the fusion of male gamete with secondary nucleus results is ?

- A. Embryo-sac

B. Endosperm

C. Cotyledons

D. Spores

Answer:

Watch Video Solution

202. Name the body part which has divisionless cells.

A. Brain

B. Lungs

C. Kidney

D. Stomach

Answer:

Watch Video Solution

203. What are the functions of testes during puberty ?

A. (i)And (iii)

B. (ii)and(iv)

C. (iii)and(iv)

D. (i)and(ii)

Answer:

Watch Video Solution

204. Among the following organisms can we see asexual reproduction .

Write about the method of asexual reproduction in any of the two organisms.

(a) Paramecium (b) Yeast (c) Spirogyra (d) Amoeba (e) Planaria

A. Hibiscus

B. Tridax

C. Marigold

D. Fern

Answer:

Watch Video Solution

205. Name the structures found in a bean seed shown in the figure.

A. Cotyledon and radicle.

B. Plumule and cotyledon.

C. Cotyledon and endosperm

D. Plummle and radicle

Answer:

Watch Video Solution

206. Write the stage of cell division .

A. Prophase.

B. Metaphase

C. Anaphase

D. Telophase

Answer:

Watch Video Solution

207. Given below is a schematic break-up of the phases/stages of cell cycle. Which one of the following is the correct indication of the

stage/phase in the cell cycle?

A. $2 \rightarrow 1 \rightarrow 4 \rightarrow 3$

B. $4 \rightarrow 1 \rightarrow 2 \rightarrow 3$

C. $4 \rightarrow 2 \rightarrow 3 \rightarrow 1$

D. $1 \rightarrow 3 \rightarrow 4 \rightarrow 2$

Answer:

Watch Video Solution

208. The type of vegetative propagation seen in Chrysanthemum is _____

A. Layering

B. Cutting

C. Stolon

D. Corms

Answer:

Watch Video Solution

209. Protists which are diploid reproduce sexually by the process of

A. Nutrition

B. Reproduction

C. Excretion

D. Circulation

Answer:

Watch Video Solution

210. A few statements with regard to sexual reproduction are given below

- (i) Sexual reproduction does not always require two individuals
- (ii) Sexual reproduction generally involves gametic fusion
- (iii) Meiosis never occurs during sexual reproduction
- (iv) External fertilisation is a rule during sexual reproduction

Choose the correct statements from the options below

A. Single organism

B. Only mitotic cell division

C. Formation of gametes

D. Production of identical offspring resembling parent

Answer:

Watch Video Solution

211. In stem cuttings, a slanting cut is made in the stem

- A. Below the node
- B. Above the node
- C. On the node
- D. Across the node

Answer:

Watch Video Solution

212. Among the following organisms can we see asexual reproduction .
Write about the method of asexual reproduction in any of the two organisms.

(a) Paramecium (b) Yeast (c) Spirogyra (d) Amoeba (e) Planaria

- A. Recombination of genetic material
- B. Production of new characters in the offspring
- C. Production of identical offspring
- D. Occurrence of reduction division before gamete formation

Answer:

Watch Video Solution

213. What are the most important floral organs required for sexual reproduction ?

- A. Calyx, Corolla

- B. Corolla and Androecium
- C. Gynoecium and Thalamus
- D. Gynoecium and Androecium

Answer:

Watch Video Solution

214. Where do you observe diploid condition in the embryo sac at the time of fertilization ?

- A. Egg
- B. Synergids
- C. Secondary nucleus
- D. Antipodals

Answer:

Watch Video Solution

215. Find out the correct sentence a) Endosperm is formed from the fusion of male nucleus with secondary nucleus b) Endosperm converts into a seed

A. Egg

B. Secondary nucleus

C. Zygote

D. Synergids

Answer:

Watch Video Solution

216. External fertilisation occurs in which of the following pairs of animals ?

A. Frog, rat

B. Crow, fish

C. Snake, fish

D. Frog, fish

Answer:

Watch Video Solution

217. Male reproductive system consist of

A. Umbilical cord

B. Testis

C. Fallopian tube

D. Placenta

Answer:

Watch Video Solution

218. Seminiferous tubules occur in

- A. Urethra
- B. Fallopian tubes
- C. Vasefferentia
- D. Testis

Answer:

Watch Video Solution

219. The vas deferens receives duct from the seminal vesicle and opens into urethra as

- A. Epididymis
- B. Vas deferens
- C. Vasefferentia
- D. Urethra

Answer:

Watch Video Solution

220. ovary → → Ovum → Ovulation → Fallopian tube → Uterus. What will be in the box?

- A. Epididymis
- B. Vas deferens
- C. Fallopian tube (or) oviduct
- D. Uterus

Answer:

Watch Video Solution

221. Number of ova released at a time in female human being is

A. 4

B. 3

C. 2

D. 1

Answer:

Watch Video Solution

222. Foetus is connected to the wall of uterus of the mother by

A. Placenta

B. Umbilical cord

C. Fallopian tube

D. Epididymis

Answer:

Watch Video Solution

223. Whether they reproduce by budding, fission or fragmentation ?

Organisms formed are the exact copies of their parents. Is it true? Why?

A. Paramoecium

B. Euglena

C. Yeast

D. Amoeba

Answer:

Watch Video Solution

224. Why is reproduction essential for organisms?

A. It keeps the individual alive

B. Fulfil the energy requirement

C. Maintain growth

D. Continue the species forever

Answer:

Watch Video Solution

225. Bakane disease is caused by

A. Herpes

B. Aids

C. Mumps

D. Gonorrhoea

Answer:

Watch Video Solution

226. Name the method of contraception protects a person from acquiring a sexually transmitted disease.

- A. Spermicides
- B. Vasectomy
- C. Tubectomy
- D. Condom

Answer:

Watch Video Solution

227. I am a surgical birth control method in males. Who am I ?

- A. Copper T
- B. Oral pills
- C. Vasectomy
- D. Tubectomy

Answer:

Watch Video Solution

228. Name the part of the seed which grows and develops into root on germination.

A. episcotyl

B. Hypocotyl

C. Radicle

D. Plumule

Answer:

Watch Video Solution

229. In which organisms fragmentation is a common mode of reproduction ?

A. Algae

B. Fungi

C. Algae, Fungi

D. None

Answer:

Watch Video Solution

230. The process by which unfertilized egg develops into an individual is known as

A. Regeneration

B. Parthenogenesis

C. Fragmentation

D. Budding

Answer:

[Watch Video Solution](#)

231. Natural parthenogenesis occurs in:

- A. Bees
- B. Ants
- C. Wasps
- D. All

Answer:

[Watch Video Solution](#)

232. Why do more complex organisms not give rise to new individual through regeneration ?

- A. Budding
- B. Regeneration

C. Parthenogenesis

D. Fission

Answer:

Watch Video Solution

233. Small plants grow at the edge of leaves of

A. Bryophyllum

B. Dahila

C. Allium cepa

D. Vallisneria

Answer:

Watch Video Solution

234. What mode of propagation would help you to produce the plants with desirable characters?

- A. Cutting
- B. Layering
- C. Grafting
- D. Budding

Answer:

Watch Video Solution

235. Spore producing plants are

- A. Fungi, Bacteria
- B. Ferns, Mosses
- C. Fungi, Bacteria, Ferns and Mosses
- D. None

Answer:

Watch Video Solution

236. Consider the following sentences a- Production of sperms start from the age 13 in males. B - Production of ova starts at the same age in females.

A. 13 or 14 years

B. 14 or 15 years

C. 15 or 16 years

D. 12 or 13 years

Answer:

Watch Video Solution

237. What is umbilical cord?How does it form?

- A. Chorion
- B. Allantois
- C. Amnion
- D. All

Answer:

Watch Video Solution

238. What is the gestation period in human beings ?

- A. 280 days
- B. 330 days
- C. 300 days
- D. 260 days

Answer:

Watch Video Solution

239. The tree that grows in Himalayan mountain is

- A. Sal
- B. Cactus
- C. Orchid
- D. Potato

Answer:

Watch Video Solution

240. If a flower contains both stamen and carpel, then what do we call this flower?

- A. Bisexual
- B. Unisexual
- C. Hermaphrodite

D. Multi sexual

Answer:

Watch Video Solution

241. "Plants perfect self plination, when they are isolated ' - Who said these words ?

A. Darwin

B. Lamarck

C. Mendel

D. Walther Flemming

Answer:

Watch Video Solution

242. Seed formation without fertilisation in flowering plants involves the process of

- A. Fruit
- B. Seed
- C. Bud
- D. All

Answer:

Watch Video Solution

243. Who discovered mitosis ?

- A. Walther Flemming
- B. Theodar Boveri
- C. Augustus weisemann
- D. Charles Darwin

Answer:

Watch Video Solution

244. What is interphase ?

- A. The time of active division
- B. It is the period when the genetic material makes its copy
- C. It is divided into four phase
- D. All

Answer:

Watch Video Solution

245. Name the phase of mitosis in which chromosomes split together to form chomatids.

A. Prophase

B. Metaphase

C. Anaphase

D. Telophase

Answer:

Watch Video Solution

246. Name the part which is asked as a question mark ?

A. Granular cell

B. Polar cell

C. Egg cell

D. Hard cell

Answer:

Watch Video Solution

247. What are the programmes implimenting to control AIDS in our state ?

A. ASHA

B. Red ribbon express

C. Both A and B

D. ART Centres

Answer:

Watch Video Solution

248. What are the advantages of sexual reproduction ?

- A. Mutations
- B. Genetic Recombination
- C. Cell division in developing embryos
- D. Union of gametes

Answer:

Watch Video Solution

249. Production or fusion of gametes does not takes place in this kind of reproduction.

- A. Asexual
- B. Sexual
- C. Conjugation

D. None of the above

Answer:

Watch Video Solution

250. In asexual reproduction of the following group, a large number of spores are formed in special structures.

A. Fungi

B. Fern

C. Mosses

D. All the above

Answer:

Watch Video Solution

251. Where do you observe epiphyllous buds?

- A. Potato
- B. Chrysanthemum
- C. Bryophyllum
- D. Sugarcane

Answer:

Watch Video Solution

252. What are the advantages of grafting?

- A. New tissue between the grafts
- B. New tissue in stock part
- C. New tissue in scion part
- D. Secondary tissue in stock part

Answer:

Watch Video Solution

253. Chromosomal number becomes half in certain types of cells in cell division. This type of cell division takes place in

- A. Testis only
- B. Ovaries only
- C. Both Testis an ovaries
- D. All the body cells

Answer:

Watch Video Solution

254. In humans at the end of the first meiotic division, the male germ cells differentiate into the

- A. Germ cells
- B. Somatic cells
- C. Zygote
- D. All the above

Answer:

Watch Video Solution

255. What is the first cells formed after the union of male gametes will egg ?

- A. Zygospor
- B. Zygote
- C. Zoospore
- D. Blastula

Answer:

[Watch Video Solution](#)

256. Foetus is connected to the wall of uterus of the mother by

- A. Umbilical cord
- B. Amnion
- C. Placenta
- D. Chorion

Answer:

[Watch Video Solution](#)

257. With what name do you call the embryo after the third month of pregnancy ?

- A. Second month of pregnancy
- B. Fourth month of pregnancy

C. First month of pregnancy

D. Third month of pregnancy

Answer:

Watch Video Solution

258. The process of release of ovum from a mature follicle is called

A. Fallopian tube

B. Seminiferous tubules

C. Graffian follicles

D. Corpus Luteum

Answer:

Watch Video Solution

259. The following accessory glands of male reproductive system removal leads to generally sterility in males

- A. One prostate gland, One Cowper gland
- B. One prostate gland, Two Cowper glands
- C. Two prostate glands, One Cowper glands
- D. Two prostate glands, Two Cowper glands

Answer:

Watch Video Solution

260. Curdling of milk indicates the increase in number of

- A. Bacteria
- B. Virus
- C. Fungus
- D. All the above

Answer:

Watch Video Solution

261. Which method is used to obtain a plant with desirable characters ?

- A. Layering
- B. Grafting.
- C. Cutting
- D. Suckers

Answer:

Watch Video Solution

262. Write the observation you made by examining the fern leaf. Are they resembled spores of rhizopus?

- A. Sporangium
- B. Sporangiphore
- C. Sporophyll
- D. Sorus

Answer:

Watch Video Solution

263. Male reproductive system secretes a fluid called semen . What is its use ?

- A. Provide nutrients to sperms to keep alive
- B. Providing a medium for the movement of sperms
- C. Secreting testosterone
- D. A and B only

Answer:

[Watch Video Solution](#)

264. Ovulation is induced by a hormone called _____

- A. Release of ovum from graffian follicles
- B. Release of ovum from fallopian tube
- C. Release of ovum from uterus
- D. Release of ovum from carpus leteum

Answer:

[Watch Video Solution](#)

265. The placenta is formed by

- A. 6 weeks of pregnancy
- B. 8 weeks of pregnancy
- C. 12 weeks of pregnancy

D. 16 week of pregnancy

Answer:

Watch Video Solution

266. Name the watery lymph like fluid that accumulates in the mammary glands during the last part of pregnancy.

- A. Amniotic fluid
- B. Colostrum
- C. Allantoic fluid
- D. None of the above

Answer:

Watch Video Solution

267. Describe the post-fertilisation changes in a flower.

A. Zygote

B. Ovule

C. Endosperm

D. Nucleus

Answer:

Watch Video Solution

268. Chromosome number in sex cells become half due to the division called

A. Meiosis

B. Mitosis

C. Amitosis

D. Cleavage

Answer:

Watch Video Solution

269. Name the scientist with help of the paragraph.

He proposed that chromosomes carried a different set heritable elements.

A. Walther Flemming

B. Wilhelm Roux

C. Robert Remak

D. Virchow

Answer:

Watch Video Solution

270. Name the period of cell cycle during which DNA is synthesized.

A. G_2 phase

B. M phase

C. S phase

D. G_1 phase

Answer:

Watch Video Solution

271. What is Cytokinesis. ?

A. Divison of cytoplasm

B. Division of nucleus

C. Division of protoplasm

D. Division of cell

Answer:

Watch Video Solution

272. Expand NADPH.

- A. Acquired Immuno Disease Syndrome
- B. Acquired Immuno Deficiency Syndrome
- C. Advanced Immuno deficiency syndrome
- D. Acquired Intense Disease Syndrome

Answer:

Watch Video Solution

273. In synthetic stage of cell division cycle which substance is synthesized more?

- A. RNA
- B. RNA and proteins
- C. DNA

D. Glucose

Answer:

Watch Video Solution

274. Which of the following is not a sexually transmitted disease?

A. Gonorrhoea

B. Syphilis

C. AIDS

D. All the above

Answer:

Watch Video Solution

275. Lactobacillus mediated conversion of milk to curd results because of

A. Lactobacillus

B. Salmonella

C. Azotobactor

D. Nitrosomonas

Answer:

Watch Video Solution

276. Amoeba and Yeast reproduce asexually by fission and budding respectively, because they are

A. Fission

B. Fragmentation

C. Budding

D. Conjugation

Answer:

[Watch Video Solution](#)

277. In which one pair both the plants can be vegetatively propagated by leaf pieces?

- A. Stolons
- B. Bulbs
- C. Corns, tuber
- D. All the above

Answer:

[Watch Video Solution](#)

278. Carrot propagate vegetatively through

- A. Root
- B. Stem

C. Leaf

D. Bud

Answer:

Watch Video Solution

279. Potatoes are vegetatively propagated from

A. Sucker

B. Stolons

C. Tuber

D. Bulb

Answer:

Watch Video Solution

280. Name the part that produces the sperm cells or male reproductive cells in the male reproductive system ?

- A. Testis
- B. Ovary
- C. Ureter
- D. Graffian follicles

Answer:

Watch Video Solution

281. In male cockroaches sperms are stored in which part of reproductive system?

- A. Vasefferentia
- B. Epididymis
- C. Vas deferens

D. Cowper gland

Answer:

Watch Video Solution

282. Male reproductive system consist of

A. Progesteron

B. Estrogen

C. Testosterone

D. Cortisol

Answer:

Watch Video Solution

283. In the human female, fertilization of the ovum takes place in

- A. Uterus
- B. Vagina
- C. Cervix
- D. Fallopian tube

Answer:

Watch Video Solution

284. Identify the reproductive parts of Flower.

- A. Calyx, corolla
- B. Stamens, carpels
- C. Calyx, stamens,
- D. Carpels, Corolla

Answer:

Watch Video Solution

285. Who confirmed scheme of mitotic division in 1904 ?

- A. Theodor Boveri
- B. Augustus Weismann
- C. Walther Flemming
- D. Wilhelm Roux

Answer:

Watch Video Solution

286. Give an example for intra uterine device.

- A. Copper-T
- B. Condom
- C. Vasectomy

D. Pill

Answer:

Watch Video Solution

287. Tubectomy is a method of sterilization in which

- A. Males only
- B. Females only
- C. Both males and females
- D. Only pregnant females

Answer:

Watch Video Solution

288. Which contraception method is related to males?

- A. Oral pills
- B. Tubectomy
- C. Vasectomy
- D. None of the above

Answer:

Watch Video Solution

289. Which of the following is not a virus caused STD

- A. AIDS
- B. Gonorrhoea
- C. Genital herpes
- D. Hepatitis B

Answer:

Watch Video Solution

290. Breast feeding is the best feeding because it

- A. Enhances immunity
- B. Protects against allergies
- C. Reduces chances of immediate pregnancy
- D. All the above

Answer:

Watch Video Solution

291. Which animal is having less number of Chromosomes?

- A. Onion
- B. Monkey
- C. Ascaris

D. Rat

Answer:

Watch Video Solution

292. What is the statutory marriageable age for men and women in India ?

A. 16 years

B. 18 years

C. 21 years

D. 25 years

Answer:

Watch Video Solution

293. What is the statutory marriageable age for men and women in India ?

- A. 18 years
- B. 22 years
- C. 25 years
- D. 21 years

Answer:

Watch Video Solution

294. All organisms begin their life from a single cell called

- A. Male gamete
- B. Female gamete
- C. Zygote
- D. Microspore

Answer:

Watch Video Solution

295. Product of sexual reproduction generally generates

- A. Androecium and gynoecium
- B. Inflorescence and flower
- C. Calyx and corolla
- D. Seeds and fruits

Answer:

Watch Video Solution

296. The number of free nuclear mitotic divisions that occur in a single functional megaspore to form 8-nucleated' embryo sac is

A. 4

B. 3

C. 3

D. 7

Answer:

Watch Video Solution

297. Egg apparatus in the embryosac of angiosperms is

A. Chalaza

B. Funicle

C. Micropyle

D. Integument

Answer:

Watch Video Solution

298. The anther contains

- A. Sepals
- B. Petals
- C. Pollengrains
- D. Carpels

Answer:

Watch Video Solution

299. What is the correct sequential order of events in human reproduction?

- A. Fertilisation, pollination, embryo, seed
- B. Pollination, fertilisation, embryo, seed
- C. Pollination, embryo, fertilisation, seed

D. Embryo, seed, pollination, fertilisation

Answer:

Watch Video Solution

300. I carry the characters from parents and grand parents to the off springs. Who am I?

- A. Cytoplasm
- B. Ribosome
- C. Golgi bodies
- D. Genes

Answer:

Watch Video Solution

301. The diagrams below represent various processes associated with reproduction. Asexual reproduction by budding is represented by

(1)

(3)

(2)

(4)

- A. Yeast only
- B. Hydra only
- C. Both Yeast and Hydra
- D. Paramoecium

Answer:

Watch Video Solution

302. Binary fission is found in

- A. Bacteria, Hydra
- B. Bacteria, Paramoecium
- C. Euglena, Paramoecium
- D. Euglena, Hydra

Answer:

Watch Video Solution

303. During parthenogenesis as the egg develops without meiosis

- A. Male gametes develops into zygote without fertilization
- B. Female gametes develops into zygote without fertilization,
- C. Both male and female ,gametes develops into zygote without fertilization

D. Male gametes develops directly into organism

Answer:

Watch Video Solution

304. External fertilization of frog occurs in

A. Fishes

B. Amphibians

C. Both Fishes and Amphibians

D. Reptiles

Answer:

Watch Video Solution

305. Spermiation is the process of the release of sperms from

- A. Seminal duct, epididymis, urethra
- B. Urethra, epididymis, seminal duct
- C. Epididymis, urethra, seminal duct
- D. Epididymis, Seminal duct, urethra

Answer:

Watch Video Solution

306. Which extraembryonic membrane in humans prevents desiccation of the embryo inside the uterus ?

- A. Placenta
- B. Amniotic fluid
- C. Umbilical cord
- D. Chorion

Answer:

[Watch Video Solution](#)

307. After fertilization implantation of zygote takes place in the uterine walls of females after

- A. Some months
- B. Three weeks
- C. Month
- D. Probably 7 days

Answer:

[Watch Video Solution](#)

308. What are the three parts of carpel ?

- A. Androecium
- B. Gynoecium

C. Calyx

D. Corolla

Answer:

Watch Video Solution

309. Observe the diagram and answer the following.

If only stamens are present in flower what does it indicate.

- A. Unisexual
- B. Bisexual
- C. Asexual
- D. None of the above

Answer:

Watch Video Solution

310. Read the following lines, find the error and rewrite it.

Pollen grain may have a pollen tube and one nucleus. It germinates only on the style.

- A. Dry soil
- B. Wet soil
- C. Damp places

D. Stigma

Answer:

Watch Video Solution

311. Who stated that binary fission of cells was the means of reproduction of animals cells?

A. Virchow

B. Robert Remak

C. Walther Flemming

D. Wilhelm Roux

Answer:

Watch Video Solution

312. Who discovered that chromosomes appear double in nature ?

- A. Virchow
- B. Robert Remak
- C. Walther Flemming
- D. Wilhelm Roux

Answer:

Watch Video Solution

313. Who hypothesised that individuals of the same species have the same number of chromosomes ?

- A. Augustus Weisemann,
- B. Theodor Boveri
- C. Wilhelm Roux
- D. Robert Remak

Answer:

[Watch Video Solution](#)

314. Double helical model of DNA was proposed by

- A. James Watson
- B. Francis Crick
- C. Gregor Mendal, Morgan
- D. Watson and Crick

Answer:

[Watch Video Solution](#)

315. In a cell cycle G_1 phase is marked by the

- A. Period between the completion of mitosis and the beginning of DNA replication.
- B. Period of DNA synthesis leading to duplication of chromosomes
- C. The end of DNA replication and the beginning of mitosis
- D. The mitotic cell division phase

Answer:

Watch Video Solution

316. In S-Phase of the cell cycle

- A. Period between the completion of mitosis and the beginning of DNA replication.
- B. Period of DNA synthesis leading to duplication of chromosomes
- C. The end of DNA replication and the beginning of mitosis
- D. The mitotic cell division phase

Answer:

Watch Video Solution

317. Name the stage of cell cycle at which one of the following events occur:

- (i) Chromosomes are moved to spindle equator
- (ii) Centromere splits and chromatids separate
- (iii) Pairing between homologous chromosomes takes place
- (iv) Crossing over between homologous chromosomes takes place

A. Prophase

B. Metaphase

C. Anaphase

D. Telophase

Answer:

Watch Video Solution

318. Distinguish anaphase of mitosis from anaphase I of meiosis.

- A. Nuclear membranes breaks down
- B. Centromeres split, separating chromatids
- C. Chromatids pulled towards poles
- D. Nucleus divides into two

Answer:

Watch Video Solution

319. Cell membrane or cell wall laid down across spindle equator in

- A. Prophase
- B. Metaphase
- C. Telophase
- D. Anaphase

Answer:

Watch Video Solution

320. Paramoecium prefers sexual reproduction during

- A. Favourable conditions
- B. Unfavourable conditions
- C. Normal conditions
- D. Sterile conditions

Answer:

Watch Video Solution

321. The collective name for sepals is ____

- A. Corolla

B. Calyx

C. Androecium

D. Gynoecium

Answer:

Watch Video Solution

322. The group of petals is called

A. Corolla

B. Calyx

C. Androecium

D. Gynoecium

Answer:

Watch Video Solution

323. Which hormone is responsible for the set in of secondary sexual characters in males ?

- A. Breast
- B. Ovary
- C. Thyroid
- D. Gonads

Answer:

Watch Video Solution

324. In stem cuttings, a slanting cut is made in the stem

- A. Grafting
- B. Budding
- C. Vegetative propagation
- D. Parthenogenesis

Answer:

Watch Video Solution

325. Arrange the stages of cell cycle of mitosis in correct order:

S phase

1

→

G₂ phase

2

→ **M phase**

3

→

G₁ phase

4

A. 4,1,2,3

B. 2,3,4,1

C. 4,2,3,1

D. 1,3,4,2

Answer:

Watch Video Solution

326. How many eggs are released by a human ovary in a month? How many eggs do you think would have been released if the mother gave birth to identical twins? Would your answer change if the twins born were fraternal?

- A. Testes
- B. Ovary
- C. Uterus
- D. Fallopian tube

Answer:

Watch Video Solution

327. The organism which can grow from a separate piece of parent organisms and also reproduce sexually.

- A. Flat worms

- B. Moulds
- C. Spirogyra
- D. All the above

Answer:

Watch Video Solution

328. Mention the modes of reproduction in Algae and Fungi.

- A. Fission
- B. Budding
- C. Fragmentation
- D. Conjugation

Answer:

Watch Video Solution

329. Give an example for modified underground stem .

- A. Potato
- B. Sweet potato
- C. Carrot
- D. Turnip

Answer:

Watch Video Solution

330. At 14 th or 15th week of pregnancy the location of foetus and placenta is determined by

- A. Ovum
- B. Embryo
- C. Foetus
- D. Baby

Answer:

Watch Video Solution

331. How can you say that placenta supplies nutrition to embryo?

- A. Placenta
- B. Umbilical cord
- C. Fallopian tube
- D. Amnion

Answer:

Watch Video Solution

332. 'Colostrum' refers to

- A. It develops growth of the child

- B. It develops the Immune system of the child
- C. It develops protein in the child
- D. All the above

Answer:

Watch Video Solution

333. What is the need of sexual reproduction ?

- A. Combination of characters of both parents
- B. Develop characters
- C. To adapt better to the surroundings
- D. All the above

Answer:

Watch Video Solution

334. Name the surgical birth control method in males.

- A. Tubectomy
- B. Vasectomy
- C. Copper-T
- D. Loop

Answer:

Watch Video Solution

335. The female hormone inhibin is secreted by

- A. Oestrogen
- B. Progesteron
- C. Testosterone
- D. Cortisol

Answer:

Watch Video Solution

336. The leaf which produces spores is called

- A. Sporangium
- B. Sporangiphore
- C. Sporophyll
- D. Sorus

Answer:

Watch Video Solution

337. The basic forms of asexual reproduction are fission, budding, gemmulation and fragmentation. Binary fission is common among

- A. Amoeba
- B. Paramoecium
- C. Fungi
- D. Yeast

Answer:

Watch Video Solution

338. Mature Graafian follicle is generally present in the ovary of a healthy human female around

- A. Ovum
- B. Sperm
- C. Embryo
- D. None of the above

Answer:

[Watch Video Solution](#)

339. What are the changes that occur in uterus while embryo is developing?

- A. Uterus enlarges
- B. Inner wall thick, soft
- C. Blood supply is increased
- D. All the above

Answer:

[Watch Video Solution](#)

340. I originate from the digestive canal of the embryo. I am a tube like structure I have very important blood vessels that connect the embryo with the placenta. Who am I?

A. Chorion

B. Amnion

C. Allantois

D. Follicle

Answer:

Watch Video Solution

341. Pregnancy lasts, on an average of

A. 8 months

B. 9 months

C. 10 months

D. 11 months

Answer:

Watch Video Solution

342. The outermost whorl of a flower is

- A. Calyx
- B. Corolla
- C. Androecium
- D. Gynoecium

Answer:

Watch Video Solution

343. Monoecious inflorescence with unisexual flowers is

- A. Bottle gourd
- B. Papaya
- C. Datura

D. A and B

Answer:

Watch Video Solution

344. The number of cells in embryo sac 1) 7 cells 7 nuclei ii) 7 cells, 8 nuclei

A. 7

B. 9

C. 8

D. 6

Answer:

Watch Video Solution

345. What are the methods of artificial propagation ?

A. Sericulture

B. Apiculture

C. Tissue culture

D. Agriculture

Answer:

Watch Video Solution

346. Surgical method: Tubectomy : : Barrier method:.....?.....

A. Oral pills

B. Spermicides

C. Vasectomy

D. Condom

Answer:

Watch Video Solution

347. Which of the following group does not constitute vegetative propagation methods?

A. fission,Budding,Fragmentation,Regeneration

B. Stolons, Suckers, Runners,Bulbs,Corns

A. Hydrilla

B. Chrysanthemum

C. Potato

D. Bryophyllum

Answer:

Watch Video Solution
