## BIOLOGY

## NTA MOCK TESTS ENGLISH

## NTA NEET SET 109

## Biology

1. Identify the correct value.
A. RBC count $=5.5$ million $/ \mathrm{mm}^{3}$ of blood
B. Hb count $=12-16 \mathrm{gm} / 100 \mathrm{ml}$ of blood
C. Platelet cound $=1.5$ to $3.5 \mathrm{lac} / 100 \mathrm{ml}$ of
blood
D. Neutrophils $=60-65 \%$ of total WBC.

## Answer: C

D Watch Video Solution
2. Blood cholesterol reducing agent is:
A. Statins
B. lipase
C. protease
D. zymase

## Answer: A

## - Watch Video Solution

## 3. The vectorless gene transfer includes

A. Microinjection
B. electroporation

## C. biolistics

D. all of these

## Answer: D

## D Watch Video Solution

4. Statement A: Atherosclerosis is a type of

Coronary Artery Diseases( CAD ).

Statement B: Monocytes are the least abundant granulocytes,
A. Only statement A is corrent
B. only statement $B$ is correct
C. Both statements A and B are correct
D. Both statements $A$ and $B$ are incorrect

## Answer: A

D Watch Video Solution
5. Identify in order the plants showing alternate, opposite and whorled phyllotaxy .
A. Alstonia, Calotropis and China rose
B. China rose, Alstonia and Claotropis
C. Calotropis China rose and Alstonia
D. China rose, Calotropis and Alstonia

## Answer: D

## - Watch Video Solution

6. What is the correct location of the human kidneys?
A. Between last lumbar and second sacral
B. Between third thoracic and last lumbar
C. Between last thoracic and third sacral
D. Between last thoracic and third lumbar

## Answer: D

## D Watch Video Solution

7. Read the following statements -

A - Speciation in microbes may occur within a
few days.
B. Anteater and numbat show convergent evolution.
C. Branching descent is the concept of Darwin.

How many statements are incorrect?
A. None
B. One
C. Two
D. All

Answer: A
8. Which of the following statement is correct regarding biodiversity ?
A. Medicinal plant Rauwolfia vomitoria
growing in the Himalayan range show
diversity in the synthesis of chemical
colchicine in higher concentration and
potential.
B. Eastern Ghat have greater species
diversity of amphibians than Western
ghat.
C. At the ecosystem level, India , has
greater ecosystem diversity than
a Scandivavian country like Norway.
D. Biodiversity is the term popularised by
the sociobiologist David

Tilman.

## Answer: C

9. Which of the following genes were introduced in cotton to protect it from cotton bollworms?
A. cry I Ac
B. cry II Ab
C. both (a) and (b)
D. cry I Ab

## Answer: C

10. Matthias Schleiden examined a sizable amount of plants and revealed the presence of
A. a - cell which forms tissue
B. a nucleus inside the cell
C. a centromere in the chromosome
D. all of these

Answer: A

D Watch Video Solution
11. "The Evil Quartet" is sobriquet used to describe
A. four major causes of biodiversity losses
B. four major causes of forest loss
C. four major causes of air pollution
D.four major causes of population
explosion

Answer: A

D Watch Video Solution
12. Select the correct statement-
A. Miller experiment is related to organic evolution.
B. Placental mammals in Australia are result of adaptive radiation.
C. Mutations are directional.
D. Vertebrate hearts represent Analogous
organs.
13. In alimentary cannal , pyloric sphincter prevents the entry of food from -
A. oesophagus to stomach
B. stomach to intestine
C. ileum to colon
D. bile duct to the intestine

Answer: B
14. The plasma membrane was discovered by whom and in which year?
A. M. Schleiden , 1839
B. T. Swhwann , 1839
C. Robert Hook, 1838
D. Robert brown, 1839

Answer: B
15. The RNAi process, found only in in eukaryotes, is initiate by
A. ds RNA fragments
B. da DNA fragments
C. ss DNA fragments
D. ss RNA fragments

Answer: A

## 16. Match the column I (Ecologist with column

## II (Concept) and choose

## the correct option.

A. $a-1, b-2, c-3, d-4$
B. $a-2, b-1, c-4, d-3$
C. $a-1, b-2, c-4, d-3$

$$
\text { D. } a-3, b-2, c-1, d-4
$$

## Answer: D

## D Watch Video Solution

17. What are the modes of exchange of gases
( $\mathrm{O}_{2}$ and $\mathrm{CO}_{2}$ ) at the level of alveoli and tissue respectively?
A. Active transport, active transpot

B. Diffusion, diffusion

## C. Diffusion, active transport

D. Active transport, diffusion

Answer: B

## D Watch Video Solution

18. Mature male gametophyte of Angiosperm shows :
A. 7 celled, 8 nucleate condition
B. 8 celled, 7 nucleate condition

## C. 3 celled condition

## D. 6 celled condition

## Answer: C

## D Watch Video Solution

19. Which of the following statement is
incorrect?
A. isolated metabolic reactions in vitro are not living things but surely living
reactions
B. All organisms from the prokaryotes to
the most complex eukaryotes have self-
consciousness.
C. The sum total of all the chemical
reactions curing in our body is
metabolism.
D. Metabolic reactions can be
demonstrated outside the body in
cell-free system

Answer: B

## - Watch Video Solution

20. The process of mineralisation by micro organisms helps in the release of
A. Organic nutrient from the humans
B. Inorganic nutrients from detritus and
formation of humas

# C. Both organic and inorganic nutrients 

from detritus

## D. Inorganic nutrients from humus

## Answer: D

## D Watch Video Solution

21. Identify the incorrect statement
A. External nostrils leads to nasal chamber.
B. Inner pleural membrane is in contact with thoracic lining.
C. Rights from the lateral boundary of
thoracic chamber.
D. Exchange of gases in alveoli occurs by
simple diffusion

Answer: B

- Watch Video Solution

22. The first cellular forms of life appeared on earth about
A. 2000 mya
B. 500 mya
C. 4500 mya
D. 3000 mya

Answer: A
( Watch Video Solution
23. Which of the following statement is not true?
A. Food chains are generally short with a
few trophic levels as only $10 \%$ of the
energy is transferred to higher trophic
level from lower one.
B. The pyramid of biomass in the sea is
generally inverted as the biomass of fish
for exceeds that phytoplankton.

# C. Pyramid of energy is mostly upright but 

 sometimes it may be invertedD. Pyramid of numbers and biomass may be either upright or inverted

## Answer: C

## D Watch Video Solution

24. Exine of pollen contains large amount of:
A. Lecithin

# B. Sporopollenin 

C. Lignin
D. Suberin

Answer: B

- Watch Video Solution

25. Causative agents of sleeping sickness and malaria are included respectively in which classes of protozoa?
A. Flagellated and amoeboid protozoa
B. Ciliated protozoa and sporozoa
C. Flagellated protozoa and sporozoa
D. Amoeboid and cillated protozoa

## Answer: C

D Watch Video Solution
26. Identify the correct set of a genus of animals that represent eutherians-
A. Eryx, Balenoptera, Pan
B. Cavia, Felis, Pteropus
C. Macropus, Desmodus, Leo
D. Rhea, Elephas, Delphinus

## Answer: B

D Watch Video Solution
27. which of the following is not the function of tapetum?
A. Secretion of enzyme and hormone
B. Formation of ubisch's body
C. Release of pollen
D. Secretion of pollen kit substance.

## Answer: C

D Watch Video Solution
28. The complex tissues are made up of
A. same type of cell

## B. more than one type of cell

## C. cell haivng different structure

D. None of these

Answer: B

D Watch Video Solution
29. Among the following statements, incorrect statement is
A. The oceanic reservoir regulate the amount of carbon dioxide in the atmosphere
B. It is estimated that $4 \times 10^{10} \mathrm{~kg}$ of
carbon is fixed in the biosphere through
photosynthesis annually
C. Of the total quantity of global carbon,
$71 \%$ carbon is found dissolved in ocean
D. Carbon constitutes $49 \%$ of the dry
weight of organism and is next to the

## water

## Answer: B

## D Watch Video Solution

30. Some bacteria oxidize various inorganic substances such as nitrates, nitrites , and ammonia and use the released energy for their ATP production? These bacteria are called
A. archaebacteria

## B. photosynthetic autotrophs

## C. chemosythetic autotrophs

D. heterotrophs

## Answer: C

D Watch Video Solution
31. The cells in the embryo sac located at the micropylar end are :
A. Synergids only
B. Antipodals
C. Egg apparatus
D. Funicle

## Answer: C

D Watch Video Solution
32. ............ concluded that the presence of cell
wall is a unique character of plant cells .
A. M. Schleiden

## B. T. Swhwann

## C. A. V. Leeuwenhoek

D. Robert Hook

## Answer: B

## D Watch Video Solution

33. The typical body plan of a chordate is given
in the following diagram. Given labellings $A$
and B, respectively, are :

A. Nerve cord and notochord
B. Nerve cord and myotomes
C. Notochord and vertebral column
D. Notochord and nerve cord

Answer: A
34. Agaricus, alternaria and Aspergillus are genera of fungi which are included in three different classes. The respective order of these classes will be:
A. Phycomycetes, Ascomycetes and

Basidiomycetes
B. Basidiomycetes, Deuteromycetes and

Ascomycetes

# C. Ascomycetes, Basidiomycetes and 

Deuteromycetes
D. Basidiomycetes, Phycomcyetes and

Ascomycetes.

## Answer: B

## D Watch Video Solution

35. Choose the correct option with respect to
the genetic makeup of the $A B O$ blood grouping system in humans.
A. 4 Alleles, 4 phenotype and 6 genotype
B. 3 Alleles, 6 phenotype and 4 genotypes
C. 4 Alleles, 6 phenotype and 4 genotypes
D. 3 Alleles, 4 phenotypes and 6 genotypes

## Answer: D

## D Watch Video Solution

36. The endosperm is completely consumed by
the developing embryo in the seeds of :
A. Maize and rice
B. Rice and castor
C. Castor and maize
D. Pea and beans

## Answer: D

## D Watch Video Solution

37. Multiple choice questions (MCQs)
choose the correct option

Given below are four methods (A-D) and their
modes of action (a-d) in achieving contraception. Select their correct matching
from the four options that follow

Method<br>A. The pill<br>B. Condom<br>C. Vasectomy<br>D. Copper-T<br>Mode of Action<br>I Prevents sperm reaching cervix<br>II Prevents<br>implantation<br>III Prevents<br>ovulation<br>IV Semen contains no sperms

A. A - (iii) , B-(iv), C-(i), D - (ii)
B. A - (ii), B - (iii) , C - (i), D - (iv)
C. A - (iv), B-(i), C - (ii), D - (iii)
D. A-(iii), B-(i), C-(iv) , D-(ii)

## Answer: D

## D Watch Video Solution

38. Find out the correctly matched option of the causative agent and their disease.
A. Prion-Bovine

Spongiform

Encephalopathy

B. Virus - Citrus Canker disease

C. Viroids - Cr- Jacob disease in human

D. Bacteria- small pox

## Answer: A

## D Watch Video Solution

39. Select the incorrect statement from the following.
A. Other than sexual intercourse, STDs can be transmitted through infected medical
devices, blood transfusion or from
mother to foetus
B. Infected females may often be
asymptomatic and hence, may remain
undetected for long
C. Failure of timely detection and
treatment may lead to ectopic
pregnancies, pelvic inflammatory
diseases and infertility
D. Except HIV, all STIs are completely
curable with proper treatment

## Answer: D

## D Watch Video Solution

40. In Drosophila melanogaster, what percentage of recombination is shown between the genes white and yellow, and what percentage of linkage is shown between the genes white and miniature wing, respectively?
A. $98.7 \%$ and $62.8 \%$
B. 1.3 \% and 37.2\%
C. 1.3 \% and 62.8\%
D. $98.7 \%$ and $37.2 \%$

## Answer: C

## D Watch Video Solution

41. Choose the incorrectly matched plant with its vegetative propagule.
A. Eichhornia - offsets
B. Agave - bulbil
C. Kalanchoe - suckers
D. Banana - rhizomes

## Answer: C

D Watch Video Solution
42. The following three kinds of leaves were exposed to light:
I. Variegated leaf
II. Green leaves partially covered with black paper
III. Green leaf

## Presence of starch was seen in

A. Only in the green leaves
B. Both green and variegated leaves
C. All the leaves in which green parts
exposed to light
D. Only variegated leaf

## Watch Video Solution

43. Clot buster is obtained from a genetically modified bacterium belonging to the genus
A. Saccharomyces
B. Monascus
C. Trichoderma
D. Streptococcus

Answer: D

- Watch Video Solution

44. Which of the following statements is incorrect regarding sex determination in animals?
A. Grasshoppers, male = autosomes +XO ,
female - autosomes +XX
B. Drosophila, males $=$ autosomes $+X Y$,
female = autosomes $+X X$
C. Birds, females = autosomes + ZW, males
= autosomes + ZZ

## D. Insects (XO type), all sperms = one set of

 autosomes $+X$
## Answer: D

## D Watch Video Solution

45. Which of the following statements is not true for class phaeophyceae?
A. Vegetative reproduction takes place by
fragmentation
B. The protoplast contains, in addition to plastids, a centrally located vacuole and nucleus.
C. Sexual reproduction may be isogamous, anisogamous or oogamous.

D. Asexual reproductive by uniflagellate

zoospores

## Answer: D

## D Watch Video Solution

46. In the process of transformation, divalent ions are used to make the host component. The function of such ions is to
A. increase the efficiency of DNA entering
the bacterium
B. make the DNA hydrophobic so that it enters the bacterium
C. force the DNA inside the bacterium by
applying heat

# D. break the DNA into smaller fragments 

## for better uptake into the bacterium

## Answer: A

## - Watch Video Solution

47. Which of the following shows point matution?
A. Alteration in DNA sequence
B. Deletion of segment of DNA
C. Change in a single base pair of DNA
D. Gain of a segment of DNA

## Answer: C

## - Watch Video Solution

48. Select the incorrect statement from the following.
A. Bird flu, which is normally seen as a
domenticated fowls, is a viral disease.
B. Outcrossing is the practice of animal mating within the same breed, with no common ancestors on either side of their pedigree up to 4-6 generations.
C. Rohu and common carp are some common freshwater fishes used
for consumption.
D. Pusa komal is a crop variety of chilli
which is resistant to bacterial blight.

## Answer: D

## D Watch Video Solution

49. Read the following statements and choose the correct option
I. Failure of segregation of chromatids during cell division results in aneuploidy
(II) Chromosomal disorders are mainly determined buy alteration or mutation in a single gene
(III) Thalassemia and cystic fibrosis are

Mendelian disorders
(IV) Sickle cell anemia is an X - linked trait Itbvrgt (V) Haemophilia is an autosome linked recessive disease
A. A and C are correct
B. C and D are correct
C. B and D are correct
D. A, C and D are correct

Answer: A
50. In Engelmann's experiment, bacteria were used to
A. split light into its spectral components.
B. detect the sites of $O_{2}$ evolution.
C. absorb the spectra of chlorophyll is a
and b using Cladophora.
D. detect the sites of $\mathrm{CO}_{2}$ evolution and
monitor the algal photosynthesis.
51. Most herbaceous plants have only about ___-_ of its weight as dry matter.
A. 10-15\%
B. 90-92\%
C. $30-40 \%$
D. 1-5\%

Answer: A
52. Among the following groups of plants, the correct set of archegoniate plants is:

A. Bryophyta,

pteridophyta,

Gymnosperms,angiosperms
B. Algae, bryophyte, pteridophyte
C. Bryophyta,peridophyte, angiosperm
D. Bryophyta, pteridophyta, gymnosperm

## - Watch Video Solution

53. "A disease which shows its transmission
from unaffected carrier female to some of the male progeny". Find the nature of the trait.
A. Autosomal dominate
B. Autosomal recessive
C. Sex-linked dominant
D. Sex-linked recessive

## - Watch Video Solution

54. Read the given statement about the human reproductive system.
(A) The uterus is an inverted pear-shaped organ.
(B) Each testis possesses 150 testicular tubules.
(C) Mammary tubules open into the mammary ducts.

How many of the given statements are incorrect?
A. None
B. One
C. Two
D. Three

Answer: B

## - Watch Video Solution

55. Select the correct statement about the

RNAi method.
A. RNAi strategy was taken up to prevent
the infestation of nematodes in the roots maize plants.
B. This method involves the use of a
complementary dsRNA molecule that
binds to ans prevents translation of the mRNA
C. Only RNA genomes of viruses can be
used as a source for the complementary

RNA
D. Mobile genetic elelments called transposons can replicate only through
a DNA intermediate

## Answer: B

## D Watch Video Solution

56. Resource partitioning is a mechanism which has been used to promote co-existence among closely related species rether than exclusion. In MacArthur's studies, e showed
that species of warblers living on the same tree avoided competition due to
A. behavourial difference in forgaing patterns.
B. Timing differences in their feeding patterns.
C. Both behavourial and timing differences
in foraging and feeding patterns, respectively.

# D. Certain differences in behaviour which 

 had nothing to do with foraging for feeding
## Answer: A

## D Watch Video Solution

57. The index to the plant species found in a particular area is provide in:
A. Flora

## B. Monographs

## C. Manuals

## D. Catalogue

## Answer: A

## D Watch Video Solution

## 58. Match the columns:

|  | Column - A | Column - B |
| :--- | :--- | :--- |
| A. | Hypothyroidism | 1. | Sleep awake cycle | B. | Vasopressin |
| :--- | :--- |
| 2. | Source pituitary gland |
| D. | MSH |

A. A-3, B-4 ,C-1, D-2
B. $A-3, B-4, C-2, D-1$
C. A-4, B-3 ,C-1, D-2
D. $\mathrm{A}-4, \mathrm{~B}-3, \mathrm{C}-2, \mathrm{D}-1$

## Answer: C

## - Watch Video Solution

59. In a eukaryotic cell during transcription enzymes RNA polymerase I, II and III are used respectively for the formation of:
A. m- RNA , t-RNA and 5S r-RNA
B. t-RNA, 28S r-RNA and m-RNA
C. 5.8S r-RNA, hn- RHA and and t- RNA
D. 18Sr- RNA , t-RNA and m- RNA

## Answer: C

## - Watch Video Solution

60. Which of the following is not related to follicular phase of the menstrual cycle?
A. Development of Graafian follicle
B. Regeneration of lost endometerium
C. Release of estrogen hormone
D. Endometrium becomes secretory

## Answer: D

D Watch Video Solution
61. Insulin acts upon:
A. Hepatocytes but no effect on adipocytes

# B. Adipocytes but no effect on hepatocytes 

C. Hepatocytes and adipocytes both
D. Neither hepatocytes nor on adipocytes

## Answer: C

## D Watch Video Solution

62. Read the following statements and choose
the incorrect statement.
A. Mango tree do not and cannot grow in tropical countries like Canada and

Germany.
B. Snow leopards are not found in Kerala
forests
C. Tuna fish are rarely caught beyond tropical latitudes in the ocean.
D. Both (B) and (C ) are correct

## Answer: A

63. All of the following hormones are released
from GIT except:
A. Gastrin
B. CCK
C. Erythropoetin
D. Secretin

Answer: C
64. In cellular respiration, from 180 g of glucose which of the following is formed ?
A. $264 g \mathrm{CO}_{2}+190 g \mathrm{H}_{2} \mathrm{O}+686 \mathrm{Kcal}$
B. $264 g \mathrm{CO}_{2}+108 g \mathrm{H}_{2} \mathrm{O}+686 \mathrm{Kcal}$
C. $390 g \mathrm{CO}_{2}+108 g \mathrm{H}_{2} \mathrm{O}+391 \mathrm{Kcal}$
D. $390 g \mathrm{CO}_{2}+264 g \mathrm{H}_{2} \mathrm{O}+391 \mathrm{Kcal}$

## Answer: B

## - Watch Video Solution

65. Corpora quadrigemina is found in
A. Ventral , Forebrain
B. Ventral, Midbrain
C. Dorsal, Forebrain
D. Dorsal, Midbrain

Answer: D

D Watch Video Solution
66. How many nucleosomes are present in DNA of a human cell?

A. $6.6 \times 10^{9}$<br>B. $3.3 \times 10^{9}$<br>C. $6.6 \times 10^{7}$<br>D. $3.3 \times 10^{7}$

Answer: D

D Watch Video Solution
67. In which animal, nerve cell is present but brain is absent?
A. Sponge
B. Earthworm
C. Cockroach
D. Hydra

Answer: D

- Watch Video Solution

68. Suppose the gene of interest is inserted as

Pstl site in pBR322, the resulting plasmid will confer resistance to :
A. Ampicillin
B. Penicillin
C. Ampicillin and tetracycline
D. Tetracycline

Answer: D

D Watch Video Solution
69. Select incorrect pairing:
A. Apocarpous - carpels free - lotus, rose
B. Syncarpous - carpels fused - mustard, tomato
C. Axile Placentation - lemon, tomato
D. Formation of false septum - mustard,

Dianthus

## Answer: D

70. In Arcata marshes, cleaning of wastewater involves:
A. Utilization of microorganism only for pollution control
B. Filteration chlorination like chemical
process
C. Removal of dissolved heavy metals
through biological process

# D. Only conventional method sewage 

 treatment
## Answer: C

## - Watch Video Solution

71. Macronutrients are present in plant tissue in an amount :
A. gt $10 \mathrm{~mol} / \mathrm{kg}$ of dry matter
B. gt $10 \mathrm{mmol} / \mathrm{kg}$ of dry matter

## C. It $10 \mathrm{nmol} / \mathrm{kg}$ of dry matter

## D. It $10 \mathrm{mmol} / \mathrm{kg}$ of dry matter

## Answer: B

## D Watch Video Solution

72. Many diseases can be diagnosed by observing the symptoms in the patient. Which group of symptoms are indicative of pneumonia?
A. Infection in nasal cavity, headache, pain in stomach
B. Infection in alveoli, chills , fever and
cough
C. Sore throat, nasal discharge and
constipation

D. Intestinal infection, persistent fever.

## Answer: B

## 73. Match the following and mark the correct

## option.

|  | Column I | Column II |  |
| :--- | :--- | :--- | :--- |
| (A) | Fast muscle fibres | (i) | Myoglobin |
| (B) | Slow muscle fibres | (ii) | Lactic acid |
| (C) | Actin filament | (iii) | Contractile unit |
| (D) | Sarcomere | (iv) | l-band |

A. A - i, B-ii, C-iv, D-iii
B. A - ii, B-i, C - iii, D - iv
C. A-ii, B-i, C-iv, D-iii
D. $A-i i i, B-i i, C-i v, D-i$

## Answer: C

# 74. Ti plasmid is being used as cloning vectors 

 for:A. Animals
B. Plants
C. Bacteria
D. Both (A) and (B)

Answer: B
75. Read the following statements carefully and find the incorrect statements:
A. More than 1 percent impurities make domestic sewage unfit for human use.
B. Less BOD causes mortality of fish and other aquatic creatures.
C. Presence of large amounts of nutrients in
water also causes excessive growth of planktonic algae, called an algal bloom.
D. Algai bloom causes deterioration of the
water quality an decreases fish mortality.
E. Some bloom-forming algae are extremely toxic to human beings and animals.
F. Eichhornia crassipies is the world's most problematic aquatic weed.
A. A, C , E and F
B. C, E and F
C. A, B and D
D. All are correct

Answer: C
76. Which is the longest phase of cell cycle
A. Interphase
B. Mitotic phase
C. Meiotic phase
D. Both (B) and (C )

Answer: A
( Watch Video Solution
77. Which of the following parts are used for the development of fruit in mango and coconut?
A. Polycarpellary superior ovaries and is one seeded
B. Polycarpellary superior ovaries and are many seeded
C. Monocarpellary superior ovaries and are one seeded

# D. Monocarpellary inferior ovaries and are 

 many seeded
## Answer: C

## D Watch Video Solution

78. Which part of the skull is connected with the vertabral column?
A. Temporal bone
B. Occipital condyles

## C. Parietal bone

D. Mandible

## Answer: B

## - Watch Video Solution

79. Read the statements ( $\mathrm{A}-\mathrm{E}$ ) and answer the question following them.

A - Rheumatoid arthritis is an auto-immune disease.

B - During allergy, IgA type antibodies
increases in plasma.

C- Injection given to patients of snakebite, possess antibiotics.

D- Humoral immunity is because of B-cells.

E- Interferons are an example of a cytokine barrier.

Identify the number of true statements?
A. One
B. Two
C. Three
D. Four

## Answer: D

## - Watch Video Solution

80. In flowering plants, the substance that
would need to be transported are :
A. Water and mineral nutrients
B. Organic nutrients
C. Plant growth regulators
D. All of these

## Answer: D

## D Watch Video Solution

81. Select the incorrect statement.
A. In each segment, the exoskeleton has
hardended plates called sclerites,
sternites dorsally and tergites ventrally
B. The entire body is covered by a hard
chitinous exoskeleton (brown in colour).
C. Head is triangular in shape and lies
anteriorly at right angles to the longitudinal body axis.
D. A pair of thread - like antennae arise
from membranous sockets lying in front of eyes.

Answer: A

D Watch Video Solution
82. In which of the following option members of the same family are present?
A. Gram, Indigofera, petunia, colchicine
B. Soyabean, mulathi, ashwagandha and Asparagus
C. Tomato, chilli, belladonna and tobacco
D. Gloriosa , Aloe, Sesbania and Trifolium

Answer: C
83. In prophase I, the stage that closely resembles prometaphase of mitosis is :
A. Diplotene
B. Chaismata
C. Leptotene
D. Diakinesis

Answer: D

D Watch Video Solution
84. Apical dominance can be overcome by application of :
A. GA
B. Cytokinin
C. Ethylene
D. Auxin

Answer: B
( Watch Video Solution

## 85. Identifiy the given plants:

Plant A

A. | Plant A | Plant B |
| :--- | :--- |
| Erythroxylum coca Datura |  |

B. | Plant A | Plant B |
| :--- | :--- |
| Cannabis sativa | Datura |

C. | Plant A Plant B |
| :--- |

D. | Plant A | Plant B |
| :--- | :--- |
| Datura | Cannabis sativa |

Answer: C
86. The mucosal lining of which organ differs
from others in concerned with the number of
layers of the cell (simple/startifide):
A. Stomach
B. Small intestine
C. PCT
D. Oesophagus
87. who's the correct 1 word environmental heterophyllous development in plants.

A. Cotton

B. Larkspur
C. Coriander
D. Buttercup

Answer: D

## 88. Find the correct option :

|  | Column: A | Column: B |
| :---: | :---: | :---: |
| (A) | Parenchyma | 1 Living tissue that provides . mechanical support |
| (B) | Collenchyma | 2.Food storage |
| C) | Sclerenchyma | 3 <br> Dead tissue that provides mechanical support |

A. $(A)-1,(B)-2,(C)-3$
B. $(A)-2,(B)-1,(C)-3$
