- **1.** Which of the following cannot be considered as an advantage of amniocentesis?
  - A. Prenatal diagnostics
  - B. Detection of biochemical abnormalities
  - C. Detection of congenital defects
  - D. Determination of sex to abort female fetus

**Answer: D** 

2.	Population	growth	rate	depends	upon
----	------------	--------	------	---------	------

A. Birth rate

B. Death rate

C. Immigration

D. All of these

### **Answer: D**

**Watch Video Solution** 

**3.** Replacement level is the number of children a couple must produce to replace themselves so as to maintain population at zero growth lavel. The value of replacement level for developed countries is

A. 2.7

B. 2.1		
C. 1.9		
D. 1.2		
Answer: B		
Watch Video Solution		

- **4.** Which of the following defines the stage of demographic transition?
  - A. Birth rate is higher than death rate.
  - B. Death rate is higher than birth rate.
  - C. Birth rate and death rate are equal.
  - D. Both (1) and (2).

## **Answer: C**

5. The average number of children that would be borne by a female
during her lifetime is called
A. Natality
B. Birth rate
C. Population growth rate
D. Total fertility rate
Answer∙ D
Answer: D
Answer: D  Watch Video Solution

6. Which of the following can be included under natural methods of birth control?
Watch Video Solution  6. Which of the following can be included under natural methods of birth

C. Lactational amenorrhoea

#### **Answer: D**

**Watch Video Solution** 

**7.** Which of the following contraceptive devices also protect against sexually transmitted diseases ?

A. Fem shield

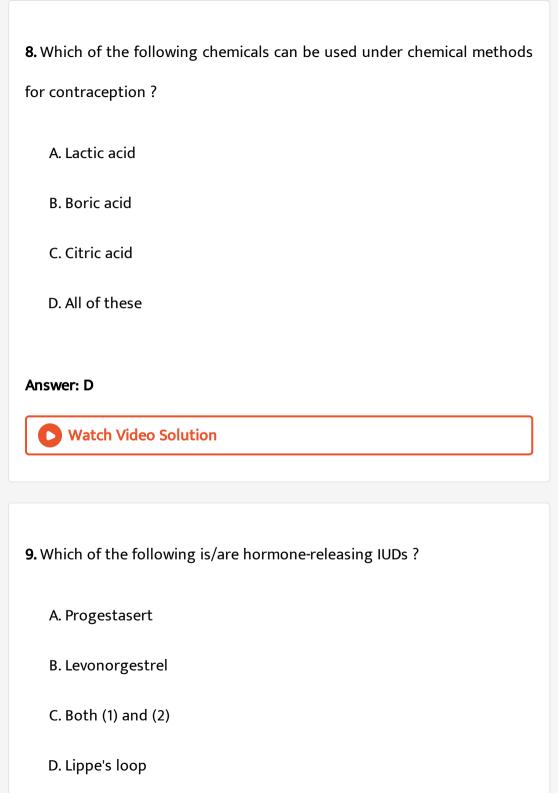

B. Sponge

C. IUDs

D. LNG-20

## **Answer: A**

## **Answer: C**

Watch Video Solution

10. Which of the following can be included under emergency contraception?

A. An antiprogesterone pill

B. Insertion of IUD within 72 h of unprotected sexual contact

C. Both (1) and (2)

D. Vasectomy

## **Answer: C**

Watch Video Solution

11. "Norplant" is the new form of birth control and it

A. Allows ovulation but does not allow fertilization B. Makes the cervical mucus thin making sperm entry into the uterus difficult C. Has progestin as the active ingredient D. Is effective for a maximum of 1 year Answer: C **Watch Video Solution** 12. Which of the following is not included under barrier methods of birth control? A. Vaginal pouch B. Diaphragm C. Cervical cap D. Implant

## Answer: D

**13.** Sexually transmitted diseases can get transmitted easily during the use of

- A. Diaphragm
- B. Cervical cap
- C. Birth control pills
- D. All of these

## Answer: D

Watch Video Solution

**14.** The diaphragm is rubber-dome-shaped structure that stops the sperms from entering into

A. Vestibule B. Vagina C. Cervix D. Both (1) and (2). **Answer: C Watch Video Solution** 15. Among the following methods, which one has the highest failure rate ? A. Diaphragm with spermicide B. Condom C. Intra-uterine device D. Rhythm method Answer: D

**16.** In case of a person suffering from syphilis, chancre formation occurs during

- A. Primary stage
- B. Secondary stage
- C. Tertiary stage
- D. Neurosyphilis stage

## **Answer: A**

**Watch Video Solution** 

**17.** The "symptomless" period or latent period in case of syphilis may last for

A. 1 - 5 weeks

B. 6 - 24 weeks
C. 4 - 12 weeks

D. 20 years

## Answer: D

- **18.** Which of the following STD and its causative agent is not correctly matched?
  - A. Gential warts : Haemophilus ducrei
  - B. Syphilis : Treponema pallidum
  - C. Genital herpes : Type II Herpes simplex virus (HSV-2)
  - D. Trichomoniasis: Trichomonas vaginalis

## Answer: A

19. India was amongst the first countries in the world to initiate action plans and programs at a national level to attain reproductive health.

These programs called "family planing" were initiated in \_\_\_\_\_ in India.

- A. 1951
- B. 1976
- C. 1901
- D. 1987

## **Answer: A**

**Watch Video Solution** 

**20.** All the following are use of amniocentesis, but one is a misuse. Which one is it ?

A. the centers for genetic consunseling offer amniocentesis on

request to women for chromosome analysis.

- B. This technique has been dveloped for detecting fetal abnormalities by analyzing chromosomal defects.
- C. It is used to study the metabolic defects of fetus, e.g., PKU (phenyl ketonuria).
- D. It is done to examine the sex of the fetus leading to increasing female feticides.

## **Answer: D**

**21.** Which of the following is world's first non-hormonal oral contraceptive pill for females, developed by scientists at Central Drug Research Institute (CDRI( in Lucknow, India ?

A. Mala-D

C. MORNING D. PoP Answer: A Watch Video Solution 22. Which of the following is hormone-releasing IUD? A. Cu-T **B. LNG-20** C. Multiload 375 D. Implant **Answer: B Watch Video Solution** 

B. Saheli

23. Contraceptive pills are very effective with lesser side-effects and are
well accepted by the females. They work by
A Johibiting availation
A. Inhibiting ovulation
B. Inhibitating implantation
C. Altering the quality of cervical mucus to prevent/retard the entry of
sperms
D. All of these
Answer: D
Watch Video Solution
<b>24.</b> Which of the following is a one-a-week pill with very few side-effects
and high contraceptive value ?
A. Mala-D

B. Saheli

C. Depo-Provera
D. Norplant
Answer: B
Watch Video Solution
<b>25.</b> A sterilization technique in female which blocks gamete transport and
thereby prevents conception is
A. Vasectomy
B. Copper-T
C. Condom
D. Tubectomy
Answer: D
Watch Video Solution

# **26.** Surrogate mother is

- A. Mother without lactation
- B. Future mother with embryo implanted from another
- C. Carrying several embryos
- D. Artificially inseminated female

#### **Answer: B**

- 27. The latest technique to produce a child is "GIFT". The full form is
  - A. Gametic internal fertilization and transfer
  - B. Gametic intra-fallopian transfer
  - C. Gametic inter-fallopian transfer
  - D. General internal fallopian transfer

#### **Answer: B**

**Watch Video Solution** 

## 28. Test-tube baby is the one

- A. Who is reared on artificial medium outside the womb
- B. In which hrowth of human baby takes place inside the fallopian tube instead of uterus
- C. In which the ova from wife/donor (female) and sperms from husband/donor (male) are induced to from zygote by IVF and then implanted in female
- D. In which baby is born after artificial insemination

## **Answer: C**

**29.** Which of the following is the most appropriate statement of infertility ?

A. Couple is unable to produce children in spite of unprotected sexual cohabitation.

B. Infertility is defined as the inability to produce a viable offspring and is always due to defects/abnormalities in the female partner.

 $\ensuremath{\mathsf{C}}.$  Infertility is due to immature sex organs.

D. Infertility cannot be helped by ART.

## Answer: A

**Watch Video Solution** 

**30.** Which of the following STDs cannot be treated with antibiotics ?

A. Gonorrhoea B. Syphilis

C. Chlamydia D. Genital herpes

A. (D) only B. (B) and (D) C. (C) and (D) D. (C) only Answer: A **Watch Video Solution** 31. At which stage of the ovarian cycle are mammalian eggs most likely to become fertilized? A. At the beginning of proliferative phase. B. Immediately after ovulation. C. During the middle of the secretory phase. D. During the menstrual phase. **Answer: B** 

- A. 11th July
- B. 21 st September
- C. 7th April
- D. 1st July

## Answer: A

## **33.** MTPs are considered relatively safe up to \_\_\_\_ of pregnancy.

- A. 12 weeks
- B. 20 weeks
- C. 25 weeks

D.	18	weeks
υ.	10	weeks

#### Answer: A

**Watch Video Solution** 

**34.** Most of the sexually transmitted diseases are completely curable if detected early and treated properly, except

- A. Hepatitis-B
- B. Genital herpes
- C. HIV infections
- D. All of these

## **Answer: D**

**35.** Which of the following causative agents of STDs can cross the placenta?

A. Hepatitis-B

B. HIV

C. Syphilis

D. All of these

## **Answer: D**

**36.** Which of the following methods of birth control can cause excessive mesntrual bleeding and pain ?

A. Condom

B. Cervical cap

C. Oral contraceptive

D. Intra-uterine device	
Answer: D	
Watch Video Solution	
37. Which one is safest method of birth control ?	
A. The rhythm method	
B. Sterilization techniques	
C. Use of physical barriers	
D. Termination of unwanted pregancy	
Answer: B

<b>38.</b> Purpose of tubectomy is to prevent	

A. Coitus B. Fertilization C. Egg formation D. Embryonic development **Answer: B Watch Video Solution** 39. Which of the following method of birth control is effective, easy to use, and less-expensive? A. IUD B. Condom C. Implant D. Diaphragm **Answer: B** 

- **40.** Which of the following are included in barrier method?
  - A. Condoms
  - B. Diaphragms
  - C. Cervical caps and vault
  - D. All of these

#### **Answer: D**

- 41. In oogenesis, haploid egg is fertilized by sperm at which stage?
  - A. Ovum
  - B. Oogonium
  - C. Primary oocyte

D. Secondary oocyte
Answer: D
Watch Video Solution
<b>42.</b> 1st polar body is formed at which stage of oogenesis?
A. 1 st meisosis
B. 2nd mitosis
C. 1 st mitosis
D. Differentiation
Answer: A
Watch Video Solution
<b>43.</b> Vitallogenesis occurs during the formation of

.

- A. Ootid in the fallopian tube
- B. Oogonial cell in the Graafian follicle
- C. Secondary oocyte in the fallopian tube
- D. Primary oocyte in the Graafian follicle

## **Answer: D**

**Watch Video Solution** 

- 44. Fetal ejection reflex in human females is induced by
  - A. Release of oxytocin from pituitary
  - B. Fully developed fetus and placenta
  - C. Differentiation of mammary glands
  - D. Pressure exerted by amniotic fluid

## Answer: B

**45.** Which of the following statement is correct?

A. Hormone releasing IUD make uterus unsuitable for implantation.

B. IUDs are ideal contraceptives for females who want to delay pregnancy.

C. IUD is the most widely accepted method of contraception in India.

D. All the above.

#### **Answer: D**

**Watch Video Solution** 

**46.** Which of the following can ve used as an emergency contraceptive to avoid possible pregnancy?

A. Progestogens

B. IUD, within 72 h

C. Diaphrams
D. (1) and (2)
Answer: D
Watch Video Solution
<b>47.</b> Which of the following statements is correct ?
A. MTP has a significant role in decreasing the population.
B. Government of India legalized MTP in 1977 with some strict
conditions.
C. MTP is relatively safe during the first trimester.
D. All the above.
Answer: D

48. Infertility cases due to the inability of male partner to inseminate the
female are corrected by
A. ZIFT
B. GIFT
C. Artificial insemination
D ICSI

## Answer: C

**49.** In vitro fertilization is a technique that involves transfer of which one of the following into the fallopian tube?

A. Either zygote or early embryi up to 8 cell stage

B. Embryo only, up to 8 cell stage

C. Embryo of 32 cell stage

D. Zygote only

#### **Answer: A**

**Watch Video Solution** 

**50.** Which of the following statement is not true with respect to tubectomy or tubal ligation ?

A. It is more difficult than vasectomy and is even more difficult to reverse.

- B. No ovulation occurs, hence, no ferilization is posible.
- C. It involves ligation of both fallopian tube.
- D. The fallure rate of this approach is almost zero percent.

## **Answer: B**

51. Which of the following hormone/s is/are maintained at high level during hormonal method of birth control? A. FSH B. LH C. Progestogens D. Both (1) and (2). Answer: C **Watch Video Solution** 52. Injectable form of hormone-based contraceptive is A. Norplant B. Depo-Provera C. Mala-D D. Saheli

## **Answer: B**

**Watch Video Solution** 

**53.** In the rhythm method of birth control, the couple refrains from intercourse

- A. One day before and after ovulation
- B. Two days before and after ovulation
- C. Three day before and after ovulation
- D. One week before and after ovulation

## Answer: C

**Watch Video Solution** 

54. Which of the following method is used during abortion?

A. Vacuum aspiration B. Infusion of a saline solution C. Scraping D. All of these **Answer: D** Watch Video Solution 55. The action of which of the following hormone is blocked during the use of RU 486 (mifepristone)? A. FSH B. LH C. Progesterone D. hCG Answer: C

**56.** Which of the following STD is not caused by a bacterium?

A. Chlamydia

B. Gonorrhea

C. Syphilis

D. Genital herpes

### **Answer: D**

**57.** Which of the following cannot be taken as the symptom of a female suffering from gonorrhea ?

A. Inflammation of urethra with painful urination

B. Discharge of pus from vagina

- C. Inflammation of uterine tubes D. Peritonitis or inflammation of the peritoneum Answer: A **Watch Video Solution** fever and aches in joints and muscles?
- 58. Which of the following stage of syphilis is characterized by skin rash,
  - A. Primary stage
  - B. Secondary stage
  - C. Tertiary stage
  - D. Neurosyphilis stage

### Answer: B

**59.** The use of which of the following contraceptive device has increased in recent years due to its additional benefit of protecting the user from contracting STDs and AIDS ?

- A. Coitus interruptus
- B. IUDs (intra-utrine-devices)
- C. Condoms
- D. Vasectomy

#### **Answer: C**

- **60.** Which of the following have been found to be very effective as emergency contraceptives as they can be used to avoid possible pregnancy due to rape if given within 72 h?
- A. Administration of progestogens
- B. Progestogen estrogen combination

C. IUDs		
D. Condoms		
A. (D) only		
B. (A) and (B)		
C. (A), (B) and (C)		
D. (A), (B), (C) and (D)		
Answer: C		
Watch Video Solution		
<b>61.</b> All the following statement about ZIFT are correct, but one is wrong.		
Which one is wrong ?		
A. It is zygote intra-fallopian transfer (ZIFT).		
B. Zygote is transferred into the fallopian tube after IVF.		

C. Early embryos up to 8 blastomers can also be transferred into the fallopian tubes.

D. Embryos with more than 8 blastomeres are also transferred into

### Answer: D

0	Watch	Video	Solution

the fallopian tubes.

**62.** If a person is suffering from severe male infertility, in which the ejaculate contains very few sperms (oligozoospermia) or even no live sperm (azoospermia), it can be overcome by \_\_\_\_\_. This should offer couples an alternative to using donor sperm.

A. GIFT

B. ZIFT

C. ICSI

D. IVF

# Answer: C

**63.** Which of the following sexually transmitted diseases is caused by a protozoan?

- A. Gonorrhoea
- B. Trichomoniasis
- C. Chlamydiasis
- D. Syphilis

### **Answer: B**

Watch Video Solution

**64.** Which of the following contraceptive is an injectable form of the

"birth control pill hormones" that prevent ovulation ?

A. Norplant B. Depo-Provera C. Saheli D. Mala-D **Answer: B Watch Video Solution** 65. Which of the following STDs is caused by the human papilloma virus (HPV) and is transmitted through intimate contact with infected person? A. Genital herpes B. Genital warts C. AIDS D. Chlamydia **Answer: B** 

## 66. Norplant is

- A. A kind of plant
- B. A fertilizer factory
- C. A contraceptive
- D. A power generation plant

### **Answer: C**

**67.** Which of the following is an important detection technique for syphilis?

- A. Gram staining of the discharge
- B. Nucleic acid hybridization, PCR

- C. Antibody detection, e.g., VDRL D. Microscopic examination of culture Answer: C **Watch Video Solution** 68. Which of the following virus has dsDNA as the genetic material and is transmitted mainly be sexual contact? A. Hepatitis-A B. Hepatitis-B
  - C. Hepatitis-C
  - D. All of theses

### **Answer: B**

**69.** Which of the following drug is progesterone antagonist and acts as an abortion drug?

A. Saheli

B. Mifepristone

C. Mala-N

D. Depo-Provera

### **Answer: B**

- **70.** An important function of progesterone is:
- 1. prepare uterus for pregnency
- 2. implantation of embryo
- 3. maintainance of pregneny
- 4. stimulate ADH
  - A. (A) and (B) are correct

B. (B) and (D) are correct C. (A) and (C) are correct. D. (A), (B) and (C) are correct. **Answer: D Watch Video Solution** 71. Which hormone level reaches its peak during the luteal phase of menstrual cycle? A. Estrogen B. Progesterone C. Luteininzing hormone D. Follicle stimulating hormone **Answer: B** 

72. The 32-cells stage of the human embryo is

A. Smaller than the fertilized egg

B. Of the same size as the fertilized egg

C. Two times the size of the fertilized egg

D. Four times the size of the fertilized egg

#### **Answer: B**

**Watch Video Solution** 

**73.** Which one of the following is the correct matching of the events occurring during menstrual cycle?

A. Menstruation: Breakdown of myometrium and ovum not fertilized

B. Ovulation: LH and FSH attain peak level and sharp fall in the

secretion of progesterone

C. Proliferative: Rapid regeneration of myometrium and maturation of
Graafian phase follicle

D. Corpus luteum: Development of secretory phase and increased secretion of progesterone

Answer: D

74. RCH stands for

A. Routine check-up of health

**Watch Video Solution** 

- B. Reproduction cum hygiene
- C. Reversible contraceptive hazards
- D. Reproduction and child healthcare

Answer: D

### 75. What is true about "Saheli"?

- (i) Developed at the CDRI, Lucknow
- (ii) Contains a steroidal preparation
- (iii) "Once-a-week" pill
- (iv) Many side effects
- (v) High contraceptive valve
- (vi) Very few side effects
- (vii) Low contraceptive value
  - A. (i), (ii), (iii), (v), (vi)
  - B. (i), (iii), (v), (vi)
  - C. (ii), (iii), (iv), (v)
  - D. (i), (iii), (iv), (v)

### Answer: B

### 76. Amniocentesis is

- A. Digestion of amino acid
- B. Conversion of glucose to amino acids
- C. Taking out of cells near the fetus
- D. Killing of child before birth

### **Answer: C**

**Watch Video Solution** 

112. Each couple should produce only two children which will help in

A. Checking pollution

C. Fertility of soil D. Improving food-web **Answer: B Watch Video Solution** 113. Amniocentesis has helped A. The childless couples B. In establishment of biological superiority of females C. In waste of money D. N/A **Answer: B Watch Video Solution** 

B. Stabilizing the ecosystem

**114.** The technique which makes use of amniotic fluid for the detection of prenatal disorder is called

- A. Laparoscopy
- B. Amniocentesis
- C. Endoscopy
- D. Ultrasound

# **Answer: B**

**Watch Video Solution** 

115. In vitro fertilization is a technique that involves the transfer of which one of the following into the fallopian tube ?

- A. Zygote only
- B. Embryo only, up to 8 cell stage
- C. Either zygote or early embryo up to 8 cell stage

D. Embryo of 32 cell stage

#### **Answer: C**

**Watch Video Solution** 

- 116. Cu ions released from copper-releasing intra uterine devices (IUDs)
  - A. Prevent ovulation
  - B. Make uterus unsuitable for implantation
  - C. Increase phagocytosis of sperms
  - D. Suppress sperm motility

# Answer: D

**117.** Which of the following cannot be considered as assisted reproductive technology

- A. In vitro fertilization (IVF)
- B. Medical termination of pregnancy (MTP)
- C. Gamete intra-fallopian transfer (GIFT)
- D. Intra-cytoplasmic sperm injection (ICSI)

#### **Answer: B**

**118.** Which of the following statements is correct with reference to a test tube baby?

A. Fertilization of egg is completed outside the body, the fertilized egg is then placed in the womb of the mother where gestation is completed.

- B. Fertilization of egg is complete in the female genital tract. It is then
  - taken out and grown in a large test tube.
- C. A prematurely born baby is reared in an incubator.
- D. Fertilization of egg and growth of embryo is completed in a large test tube.

### Answer: A

# 119. A test-tube baby means

- A. Fertilization and development both in uterus
- B. Fertilization in vitro and then transplantation in uterus
- C. A baby grown in test tube
- D. Fertilized and developed embryo in test tube

# Answer: B

**120.** What is the work of copper-T?

A. To inhibit ovulation

B. To inhibit fertilization

C. To inhibit implantation of blastocyst

D. To inhibit gametogenesis

# Answer: B

Watch Video Solution

**121.** What is the work of progesterone which is present in oral contraceptive pills ?

A. To inhibit ovulation

B. To check oogenesis

- C. To check entry into cervix and to make them inactive

  D. To check sexual behavior
- **Answer: A**

**122.** Which is showing accurate pairing?

- A. Syphilis Treponema pallidum
- B. AIDS Bacillus conjugalis
- C. Gonorrhoea Leishmania donovani
- D. Typhoid Mycobacterium leprae

Answer: A

123. Test tube baby means a baby born when

A. It is developed in a test tube

B. It is developed through tissue culture method

C. The ovum is fertilized externally and the egg is thereafter implanted

in the uterus

D. It develops from a non-fertilized egg

#### **Answer: C**

**Watch Video Solution** 

**124.** Consider the statements given below regarging contrception and answer as directed thereafter:

(1) Medical Termination of Pregnancy (MTP) during first trimester is

generally safe

(2) Generally chances of contraception are nil until mother breast-feeds

the infant upto two years

(4) Contraceptive pill may be taken upto one week after coitus to prevent conception

125. Given below are four methods (A-D) and their modes of action (i-iv) in

achieving contraception. Select their correct matching from the four

(3) Intrauterine devices like copper-T are effective contraceptives

A. (A), (C)

B. (A), (B)

- C. (B), (C)
- D. (C), (D)

# Answer: A

- options that follow Method Mode of Action
  - Oral pill (i) Prevents sperms reaching cervix Α.
- Condom В. (ii) Suppresses sperm motility
  - Prevents ovulation C. Vasectomy (iii) D. Copper T (iv)
    - Semen contain no sperms

A. 1-(c), 2-(d), 3-(a), 4-(b)

B. 1 - (b), 2 - (c), 3 - (a), 4 - (d)

C.1-(c), 2-(a), 3-(d), 4-(b)

D.1 - (d), 2 - (a), 3 - (b), 4 - (c)

# **Answer: C**

Watch Video Solution

A. Detecting any genetic abnormality

B. Detecting sex of the unborn fetus

C. Artificial insemination

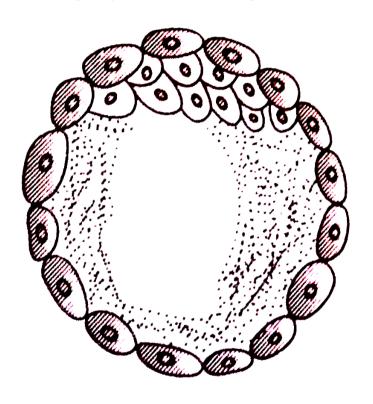

D. Transfer of embryo into the uterus of a surrogate mother

126. The permissible use of the technique aminocentesis is for

# Answer: A

**127.** Ifdentify the human developmental stage shown in the figure as well as the related right place of its occurrence in a normal pregnant woman. Select the right option for the two together.

Developmental stage Site of occurrence

Late morula Middle part of fallopian tube

Developmental stage Site of occurrence

Blastula End part of fallopian tube

Developmental stage Site of occurrence

Blastocyst Uterine wall

D. Developmental stage  $\,$  Site of occurrence  $\,$  8-celled morula  $\,$  Starting point of fallopian tube

**Answer: C** 

**Watch Video Solution** 

128. Artificial insemination means

A. articial introduction of sperms of a healthy donor into the vagina

B. introduction of sperms of a healthy donor directly into the ovary

C. Transfer of sperms of husband to a test tube containing ova.

D. Transfer of sperms of a healthy donor to a test tube containing ova

Answer: D

**129.** Which one of the following statements is correct regarding sexually transmitted infections (STIs) ?

A. A person may contact syphilis by sharing milk with one already suffering from the disease.

B. Haemophilia is one of the STDs.

 $\ensuremath{\mathsf{C}}.$  Genital herpes and sickle-cell anaemia are both STDs.

D. The chances of a 5-years boy contacting a STD are very little.

#### **Answer: D**

- **130.** Consider the following statements and select the option stating which ones are true (T) and which ones are false (F)
- (i) There are many side effects of tubectomy and vasectomy
- (ii) Purpose of tubectomy is to prevent egg formation
- (iii) Contraceptive oral pills help in birth control by preventing ovulation

(iv) Gential warts is a sexually transmitted disease caused by herpes virus

(v) In India, there is rapid decline in infant mortality rate adn MMR.

(iii) (iv) (v)(ii) FTFFB.  $\stackrel{(\mathrm{i})}{F}$   $\stackrel{(\mathrm{ii})}{F}$   $\stackrel{(\mathrm{iii})}{F}$   $\stackrel{(\mathrm{iv})}{F}$   $\stackrel{(\mathrm{v})}{T}$  $F \quad F \quad T \quad T$ (ii) (iii) (iv) (v) TT TT(ii) (iii) (iv) (v) FTFT

# **Answer: D**

**131.** Match Column-I with Column-II and select the correct option from the codes given below.

	Column-l		Column-II
(A)	Syphilis	(i)	Human papilloma virus
(B)	GIFT	(ii)	Haemophilus ducreyi
(C)	AIDS	(iii)	Treponema pallidum
(D)	Gentital warts	(iv)	HIV

- A. (iii) (ii) (iv) (i)
- B. (ii) (i) (iii) (iv)
- C. (iv) (ii) (i) (iii)
- D. (i) (iv) (iii) (ii)

#### Answer: A

**Watch Video Solution** 

# **132.** Which of the following statements is/are correct?

- A. Hepatitis B virus (HBV) can be transmitted through blood transfusion, sesual contact, tears, intravenous drug abuse, tatooing, ear and nose pierceing, sharing of razors, etc.
- B. Hepatitis B virus vaccine is the second generation vaccine produced from transgenic yeast by recombinant DNA technology.

C. Hepatitis B virus vaccine is the first commercially available human vaccine produced by genetic engineering.

D. All of these.

#### Answer: D

- 133. What is true for lactational amenorrhea?
- (i) It means absence of menstruction
- (ii) Ovulation does not occur during the lactational period
- (iii) Chances of contraception are almost nil upto six months following parturition
- (iv) Side effects are almost nil
- (v) Contraceptive efficiency reduces after the period of intense lactation
- (vi) It is natural method of contraception
- (vii) It increases phagocytosis of sperms
  - A. (ii), (iii), (iv), (v), (vi)

B. (i), (ii), (iii), (iv)

C. (ii), (iii), (iv), (v), (vii)

D. (i), (ii), (iii), (iv), (v), (vi)

#### Answer: D

136. Pick up the odd one in each series and select the correct option:

- (i) Diaphragms, Cervical caps, Vaultes, Tubectomy
- (ii) Lippes loop, LNG-20, laplants Multiload-375
- (iii) Gonorrhoes, Jaundice, Hepatitis-B, Syphilis

src="https://d10lpgp6xz60nq.cloudfront.net/physics images/CEN BIO P2 CO4

(iv) MTP, ZIFT, GIFT

width="80%"gt

(v) Saheli, Mala-D, Implants, Lactational amenorrhoea

**Watch Video Solution** 

137. Different types of assisted reproductive techniques are given below?

Select the correct type of fertilisation in the above techniques:

(a) ZIFT (b) IUT

(c) ICSI (d) GIFT

(e) Al

A. In vitro  $\rightarrow d, b, c$  In vivo  $\rightarrow$  a, e

B. In vitro  $\;
ightarrow \, a,\, b,\, c \;\;\;\;$  In vivo  $\;
ightarrow \;$  d, e

C. In vitro  $\;
ightarrow \, d, e \;\;\;$  In vivo  $\;
ightarrow \;$  d, b, c

D. In vitro  $\;
ightarrow \, a, \, c, \, e \;\;\;\;$  In vivo  $\;
ightarrow \;$  b, d

Answer: B

138. Consider the following statements and select the option stating which ones are true (T) and which ones are false (F)

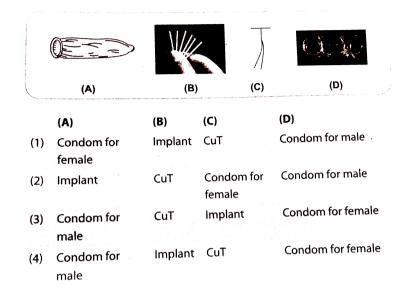

- (i) There are many side effects of tubectomy and vasectomy
- (ii) Purpose of tubectomy is to prevent egg formation
- (iii) Contraceptive oral pills help in birth control by preventing ovulation
- (iv) Gential warts is a sexually transmitted disease caused by herpes virus
- (v) In India, there is rapid decline in infant mortality rate adn MMR.

C. 
$$\frac{\mathrm{i}}{T}$$
  $\frac{\mathrm{ii}}{T}$   $\frac{\mathrm{iii}}{T}$   $\frac{\mathrm{iv}}{F}$   $\frac{\mathrm{v}}{F}$ 

Answer: D

**139.** Identify the figure of the contraceptive given below and select the correct option :

**140.** Match Column-I with Column-II and select the correct option from the codes given below.

Column-I

(A) Syphilis (i) Human papilloma virus
(B) GIFT (ii) Haemophilus ducreyi
(C) AIDS (iii) Treponema pallidum
(D) Gentital warts (iv) HIV

A. 
$$A-(i), B-(ii), (iv), (ix), C-(iii), (vi), D-(vii), (vii), E-(v)$$
B. 
$$A-(i), B-(ii), C-(iii), (vi), (ix), D-(vii), (viii), E-(v)$$
C. 
$$A-(i), B-(ii), (iv), (ix), C-(iii), (ix), D-(vii), (viii)E-(v)$$
D. 
$$A-(i), B-(iv), (ix), C-(ii), (iii), (vi), D-(vii), (viii), E-(v)$$
Answer: A

141. Select the correct option regarding contraceptive method:

	(i)	(ii)	(iii)	(iv)
(1)	Barrier	Coitus inter- rupts	Periodic abstinence	Lactational amenorrhoea
(2)	IUDs	Lactational amenorrhoea	Coitus inter- rupts	Periodic abstinence
(3)	Natural	Periodic abstinence	Coitus inter- rupts	Lactational amenorrhoea
(4)	Surgi- cal	Periodic abstinence	Coitus interrupts	Lactational amenorrhoea

**142.** Given below are four statement (a-d) regarding assisted reproductive technologies :

Select the option which include one only:

- (a) ZIFT The zygote or early correct one (only blastomere) transferred into the fallopian tube
- (b) ICSI A sperm is directly injected into the fallopian tube to form an embryo in the laboratory
- (c) IUI The semen collected either from the husband or healthy donor is artificially introduced either into the vargina or into the uterus

(d) GIFT - Transfer of zygote collected from a donor into the fallopian tube of another female who cannot produce one but can provide suitable environment for fertilisation and development.

A. Statement (b), (c) and (d)

B. Statement (a), (c)

C. Statement (c), (d)

D. Statement (a), (c) and (d)

#### **Answer: B**

143. Assertion: Population of India crossed 1 billion in May 2000.

Reason: It is the result of rapid decline in death rate, maternal mortality rate (MMR), and infant mortality rate (IMR) as well as an increase in the number of people in reproducible age.

A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).

B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).

C. If Assertion is true but Reason is false, then mark (3).

D. If both Assertion and Reason are false, then mark (4).

#### Answer: A

**Watch Video Solution** 

**144.** Assertion : Intra-uterine devices (IUDs) are very effective contraceptive method.

Reason: IUDs do not allow sperms to enter uterus.

A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).

B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).

C. If Assertion is true but Reason is false, then mark (3).

D. If both Assertion and Reason are false, then mark (4).

#### **Answer: C**

Watch Video Solution

**145.** Assertion: Surgical method blocks gamete transport and thereby prevents conception.

Reason: Surgical method used in males for this purpose is called vasectomy.

A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).

B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).

- C. If Assertion is true but Reason is false, then mark (3).
- D. If both Assertion and Reason are false, then mark (4).

#### **Answer: B**

Watch Video Solution

**146.** Assertion: Saheli - the new oral contraceptive for females - contains a non-steroidal preparation.

Reason: It is "once-a-week" pill with very few side-effects and high contraceptive value.

- A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).
- B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).
- C. If Assertion is true but Reason is false, then mark (3).
- D. If both Assertion and Reason are false, then mark (4).

# **Watch Video Solution**

**147.** Assertion: In test-tube baby program, ova from wife/donor (female) and sperms from husband/donor (male) are collected and are induced to form zygote under simulated conditions in laboratory.

Reason: Embryos with more than 8 blastomeres are then transferred to fallopian tube (ZIFT) to complete its further development.

- A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).
- B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).
- C. If Assertion is true but Reason is false, then mark (3).
- D. If both Assertion and Reason are false, then mark (4).

# Answer: C

**148.** Assertion : Surgical methods of contraception are practiced to space two successive conceptions.

Reason: During surgical methods, ovaries from females or testes from males are removed.

A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).

B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).

C. If Assertion is true but Reason is false, then mark (3).

D. If both Assertion and Reason are false, then mark (4).

# **Answer: D**

**149.** Assertion : Natural methods are based on menstrual cycle and the

life of sperms

Reason: Natural methods often fail to contracept.

A. If both Assertion and Reason are true but the reason is the correct explanation of the assertion, then mark (1).

B. If both Assertion and Reason are true but the reason is not the correct explanation of the assertion, then mark (2).

C. If Assertion is true but Reason is false, then mark (3).

D. If both Assertion and Reason are false, then mark (4).

# Answer: A
