**1.** The method of directly injecting a sperm into an ovum is assisted by reproductive technology called

A. GIFT B. ZIFT C. ICSI D. ET **Answer: Watch Video Solution** 

**2.** Surgical removal of testes of male to control the human population is :

### Watch Video Solution

**3.** Choose the correct answer from the choices given under each bit. /Give the answer is one word only.

Fertilization of ovum can be prevented by:

- A. Tubal ligation
- B. Vasectomy
- C. Use of IUD
- D. All of the above

### **Answer:**

# **Watch Video Solution**

- 4. Select sexually transmitted disease?
  - A. Syphilis
  - B. Dengue
  - C. Malaria
  - D. Filaria

**5.** In IVF technique, fusion of ovum and sperm occurs in :

A. Uterus

B. Fallopian tube

C. Culture medium

D. Vagina

# Watch Video Solution

**6.** The technique, involving transfer of ovum of a donor female in to the fallopian tube of recipient female is called:

A. ZIFT

B. IUT

C. GIFT

D. IVF-ET

7. Amniocentosis is process to:

A. Determine any disease in the brain

B. Know about disease of heart

C. Determine karyotype and any hereditary

disease in embryo.

D. All of these

**Answer:** 

8. Contraceptive pills help in birth control by:

A. Killing the sperms

B. Forming barrier between sperm and ovum

C. By preventing ovulation

D. Killing the ovum

### **Answer:**

**9.** Tubectomy, a method of population control, is performed on :

A. Both males and females

B. Males only

C. Females only

D. Only pergnant females

### **Answer:**

<b>10.</b> Which one is the method of birth control	ntrol?
---	--------

A. HTF

B. GIFT

C. IUDs

D. IVF-ET

### **Answer:**

**11.** When natality is balanced by mortality.

There will be:

- A. Decrease in population growth
- B. Zero population growth
- C. Increase in population growth
- D. Over population.

### **Answer:**

- 12. What is function of copper -T?
  - A. Stops cleavae
  - B. Stops fertilization
  - C. Checks mutation
  - D. Stops gastrulation

### **Answer:**

13.	Oral	contraceptive	are	prescribed	in
fem	nales to	check :			

- A. Ovulation
- B. Fertilization
- C. Implantation
- D. Entry of sperms into vagina.

### **Answer:**

**14.** Which of the following is a technique of direct introduction of gametes into the oviduct?

A. MTS

B. ET

C. IVF

D. POST

### **Answer:**

**15.** Which of the following is a mechanical barrier used birth control ?

- A. Loop
- B. Copper-T
- C. Diaphragm
- D. Dalconshield

### **Answer:**

16.	Test	tube	baby	means	and	baby	is	born
wh	en :							

A. It is developed in a test tube

B. It develops from a non-fertilized egg

C. The ovum is fertilized exrternally and thereafter implanted in uterus.

D.

### **Answer:**

17. The sexually transmitted disease that can affect both male and female genitals and may damage the eyes of babies born of infected mother is:

A. AIDS

B. Syphilis

C. Gonorrhoea

D. Hepatitis

**18.** The test tube baby programme employs which one of the following techniques ?

A. Intra-cytoplasmic semen injection (ICSI)

B. Intra-uterine insemination

C. Gamete intra-fallopian tube transfer (GIFT)

(011-1)

D. Zygote intra-fallopian transfer (ZIFT)

19. Oral contraceptive pills are composed of:

A. Estrogen and progesterone

B. Estrogen and testosterone

C. Progesterone and testosterone

D. Estrogen and G.H.

**Answer:** 

**20.** Which of the following birth control measures can be considered as the safest ?

- A. Rhythm method
- B. Use of physical barriers
- C. Termination of unwanted pregnancy
- D. Sterilization techniques.

### **Answer:**

**21.** If the vasa efferentia in the human reproductive system get blocked, the gametes will not be transported from:

- A. Testes of epididymis
- B. Epididymis to vas deferens
- C. Ovary to uterus
- D. Vagina to uterus

### **Answer:**

# **22.** MTP is considered safe to how many weeks of pregnancy?

- A. Eight weeks
- B. Twelve weeks
- C. Eighteen weeks
- D. Six weeks

### **Answer:**

23. Saheli is :
A. an oral contraceptive of females
B. an oral contraceptive of males
C.
D. a diaphragm
Answer: A
Watch Video Solution

24. Female condoms are called:

- A. Nirodh

- D. None of these

### **Answer:**

**Watch Video Solution** 

**25.** Assisted reproductive technologies (ART)

A. Include social awareness programme to educate people about reproductive health.

B. Include research centre for birth control.

C. Include a number of special techniques which assist infertile couples to have

D. Both a and b

children

# **Answer:**

# 26. In chorionic villi sampling (CVS)

- A. Amniotic fluid is withdrawn
- B. A small amount of foetal tissues is withdrawn
- C. Villi sample is withdrawn
- D. Mother's serum is withdraw

### **Answer:**

**27.** Greatest biological problems faced by human beings in :

- A. Population explosion
- B. Depletion of ozone layer
- C. Depletion of natural resource
- D. air pollution

### **Answer:**

- A. Lag
- **B. Stationary**
- C. Expoential
- D. Random

### **Answer:**

# 29. World Population day is

- A. 5th June
- B. 11th July
- C. 4th October
- D. 21st March

### **Answer:**

**30.** Intensely lactating mothers do not generally conceive due to the

- A. Suppression of gonadotrophin
- B. Hyper-secretion of gonadotrophin
- C. Suppression of gametic transport
- D. Suppression of fertilization

### **Answer:**

**31.** Intrauterine Devices (IUDs) are not made up of

A. Plastic

B. metal

C. rubber

D. plastic and metal

### **Answer:**

**32.** Which is not a constituent of chemical method?

- A. Lactic acid
- B. Boric acid
- C. Maleic acid
- D. Citric acid

### **Answer:**

**33.** The correct surgical procedure as contraceptive method is :

- A. Ovariectomy
- B. Hysteroctomy
- C. Castration
- D. Vasectomy

### **Answer:**

**34.** Emergency contraceptives are effective if used within

- A. 72 hours of ovulation
- B. 72 hours of coitus
- C. 72 hours of menstruation
- D. 72 hours of implantation

### **Answer:**

35. Which is a fertility	treatment for men?
--------------------------	--------------------

- A. In-vitro fertilization
- B. Erectyle dysfunction
- C. Assisted hatching
- D. Intra-uterine insemination

### **Answer:**

**36.** In which type of pill, both oestrogen and progestin are present in nearly the same amount?

- A. Multiphasic combined
- B. Monophasic combined
- C. Mini
- D. Antiprogression

### **Answer:**

## 37. Which is not a method of tubectomy?

- A. Conventional laparotomy
- B. Milaparatomy
- C. Implants
- D. Conventional trans abdominal surgery

#### **Answer:**

# 38. Creams, jelly foam and tablets contain:

- A. Ovicidal chemical
- B. Spermidal chemical
- C. Larvicidal chemical
- D. Herbicidal chemical

#### **Answer:**

39.	Mini	pills	contains	only	
-----	------	-------	----------	------	--

- A. Progestogen
- B. Estrogen
- C. Both (a) & (b)
- D. Relaxin

## **Answer:**
