Govt Solved Paper 2020 (2)

Exercise

1. Which one of the following statements is not true ?

- A. Sporopollenin is contributed by both pollen cytoplasm and tapetum
- B. It helps the pollen to withstand against strong acid
- C. Sporopollenin derived from phycobilins
- D. It helps pollen during long period preservation in fossil deposits

Answer:

Watch Video Solution

2. If you do dihybrid in *Prism sativum* on the traits of pod shape and plant height. Will you get 9:3:3:1 ratio in F₂?

A. Yes, because they are independently assorting genes

B. No, they are linked genes

C. Yes, because they are situated on different chromosomes

D. No, we cannot do experiments on these two traits

Answer:

Watch Video Solution

3. Bt brinjal is produced by using A and is having resistance againsts B?

A. A-E.coli B-Virus

B. A-Virus B-Bacteria

C. A-Agrobacterium B-Bacillus

D. A-Agrobacterium B-Lepidopteron

Answer:

Watch Video Solution

4. Which one of the following statements is true regarding IPR?

A. The discoverer has the full rights on his/her property

B. IPR-includes only the process of the product not trade secrets

C. IPR is not protected by laws framed by
the country

D. The discoverer can use his discovery for
this own company but cannot sell it to
others

Answer:

Watch Video Solution

5. Which one of the following is a biopesticide?

A. Azolla

B. Rhizobium

C. Beauveria

D. Hevea

Answer:

Watch Video Solution

6. Which one of the following is an incorrect pair?

A. Turmeric-Erode

B. Cardamom-Queen of species

C. Rubber-Kerala

D. Banana-National fruit of India

Answer:

Watch Video Solution

7. Which one of the following is highly effective against jaundice?

A. Milavembu

B. Opium poppy

C. Marijuana

D. Phyllanthus

Answer:

Watch Video Solution

8. Molecular farming plants are different from natural medicinal plants. How?

Watch Video Solution

9. Draw the diagram showing altitudinal zonation of vegetation.

Watch Video Solution

10. Write the steps involved in the mechanism of decomposition.

Watch Video Solution

11. Differentiate Rhizobium from Azolla as bio-fertilizers.

Watch Video Solution

12. Define germplasm collection.

Watch Video Solution

13. Write the uses of coffee.

Watch Video Solution

14. Differentiate heterostyly from herkogamy.

Watch Video Solution

15. Explain the role of genes in the formation of purple colour in the flowers of *Pisum sativum*.

[Watch Video Solution](#)

16. If the upstream process is not done for a fermentation process (bioreactor), what would happen to the product?

[Watch Video Solution](#)

17. List out the ethical issues of genomic research.

[Watch Video Solution](#)

18. If crow is absent in an ecosystem, What would happen?

Watch Video Solution

19. A reproduction without the involvement of male and female gametes is called apomixis. Give an outline of this method.

Watch Video Solution

20. Explain how translocation chromosomal aberration is different from crossing over?

Watch Video Solution

21. Topography influences the climate of an area-Discuss.

Watch Video Solution

22. Clouds, dusts and humid nights are warmer than clear dust free dry nights.

Discuss the global warming.

Watch Video Solution

23. Plasmogamy means?

A. Mononucleated parent divides into two

Mononucleated individuals

B. Multinucleated parent divides into two

Mononucleated individuals

C. Multinucleated parent divides into many

Mononucleated individuals

D. Multinucleated parent divides into many

Mononucleated daughter individuals

Answer:

Watch Video Solution

24. Before coming out of nucleus , in RNA is added (A) as capping (B) as tailing

A. A-ATP, B-ADP

B. A-Methyl guanine triphosphate,
B-/adenylate residue

C. A-diadenylate guanosine diphosphate, B-
guanosine residue

D. A-ethyl methane triphosphate, B-methyl
guanosine residue

Answer:

Watch Video Solution

25. Among the non-infections disease, which is the major cause for death?

A. Heart attack

B. Stroke

C. Arthritis

D. Cancer

Answer:

Watch Video Solution

26. Which of the following is not true regarding antibiotics?

A. Penicillin is a fungicide antibiotics

B. Tetracycline is a broad spectrum antibiotics

C. Streptomycin is broad spectrum antibiotics

D. Chlorotetracycline is obtained from *Streptomyces aureofacines*

Answer:

Watch Video Solution

27. Which technique can be used to amplify the smallest DNA?

- A. PCR technique
- B. NMR technique
- C. Tissue cloning technique
- D. Plasmaphoresis technique

Answer:

28. Find out the wrong pair.

A. Indian desert-Gujarat

B. Trans Himalayan-Lahal spiti

C. Western ghats-Andrapradesh

D. North-East India-Indo-Malayan bio-
geographical region

Answer:

29. Assertion (A) : Forest act as oxygen sinks and heart of the planet

Reason (R): Forest animals consume lot of oxygen for their respiration .

A. (A) is wrong, (R) is correct

B. (A) is correct, (R) is wrong

C. (A) and (R) is correct

D. (A) and (R) is wrong

Answer:

Watch Video Solution

30. Zygote is not formed during the conjugation of Paramecia, but we call it as sexual reproduction why?

Watch Video Solution

31. Differentiate ZIFT from GIFT

Watch Video Solution

32. What is chemical evolution?

Watch Video Solution

33. What is the use of methanobacterium?

Watch Video Solution

34. Extinction of a keystone species led to loss of biodiversity. Justify.

Watch Video Solution

35. Meiosis cell division does not take place during the gametes formation of drone bee.

Give reason.

Watch Video Solution

36. What is meant by ribozyme?

Watch Video Solution

37. What is the evolutionary significance of Archaeopteryx?

Watch Video Solution

38. Briefly explain the different measures to reduce noise pollution.

Watch Video Solution

39. A diabetic patient wants to have a single time treatment and permanent cure for diabetes. It is possible? If so explain.

Watch Video Solution

40. Explain the role of hormones in the maintenance of human male fertility.

Watch Video Solution

41. DNA is the genetic material, but it evolved from RNA. Justify.

Watch Video Solution

42. Suggest methods of maintenance of personal and public hygiene.

Watch Video Solution

43. Analyse the interactions of two species population.

Watch Video Solution
