

MATHS

BOOKS - RD SHARMA MATHS (ENGLISH)

PERMUTATIONS

Others

1. Find the number of ways in which 5 boys and 5 girl be seated in a row so that (i)No two girls may sit together (ii)All the girls sit together (iii)all the boys sit together. (iv)All the girls are never together.

[Watch Video Solution](#)

2. Five boys and five girls form a line with the boys and girls alternating.
Find the number of ways of making the line.

 [Watch Video Solution](#)

3. How many even numbers are there with three digits such that if 5 is one of the digits, then 7 is the next digit?

 [Watch Video Solution](#)

4. How many four digit numbers divisible by 4 can be made with the digits 1, 2, 3, 4, 5 if the repetition of digits is not allowed?

 [Watch Video Solution](#)

5. Find the number of arrangements of the letters of the BIRTH.

 [Watch Video Solution](#)

6. (i) How many different words can be formed with letters of the word 'SUNDAY' ? (ii) How many of the words begin with N? (iii) How many begin with N and end Y?

[Watch Video Solution](#)

7. Find the number of arrangements of the letters of the EXAM

[Watch Video Solution](#)

8. A tea party is arranged for 16 persons along two sides of a long table with 8 chairs on each side. Four persons wish to sit on one particular and two on the other side. In how many ways can they be seated?

[Watch Video Solution](#)

9. In how many ways can the letters of the word PERMUTATIONS be arranged if the (i) words start with P and end with S, (ii) vowels are all together, (iii) there are always 4 letters between P and S?

[Watch Video Solution](#)

10. In how many ways can a lawn tennis mixed double be made up from seven married couples if no husband and wife play in the same set?

[Watch Video Solution](#)

11. The number of different of different ways in which 8 persons can stand in a row so that between two particular persons A and B there are always two persons, is

[Watch Video Solution](#)

12. Prove that $33!$ is divisible by 2^{15} . what is the largest integer n such that $33!$ is divisible by 2^n .

 [Watch Video Solution](#)

13. Find the number of arrangements of the letters of the MISS.

 [Watch Video Solution](#)

14. Prove that $(n! + 1)$ is not divisible by any natural number between 2 and n

 [Watch Video Solution](#)

15. Prove that: $\frac{(2n)!}{n!} = \{1 \cdot 3 \cdot 5(2n - 1)\}2^n$.

 [Watch Video Solution](#)

16. If $\frac{n!}{2!(n-2)!}$ and $\frac{n!}{4!(n-4)!}$ are in the ratio 2:1, find the value of n .

 [Watch Video Solution](#)

17. Find n , if $(n+2)! = 2550 \times n!$

 [Watch Video Solution](#)

18. If $\frac{1}{9!} + \frac{1}{10!} = \frac{x}{11!}$, find x .

 [Watch Video Solution](#)

19. Prove that: $n(n-1)(n-2)\dots(n-r+1) = \frac{n!}{(n-r)!}$

 [Watch Video Solution](#)

20. If w_1 , w_2 , w_3 and w_4 are work done in isothermal, adiabatic, isobaric, and isochoric reversible expansion for an ideal gas, respectively, then

 [Watch Video Solution](#)

21. How many permutations of the letters of the word MADHUBANI do not begin with M but end with I ?

 [Watch Video Solution](#)

22. Find the probability that in a random arrangement of the letters of the word 'UNIVERSITY' the two I 's come together.

 [Watch Video Solution](#)

23. How many numbers can be formed with the digits 1, 2, 3, 4, 3, 2, 1 so that the odd digits always occupy the odd places?

 [Watch Video Solution](#)

[Watch Video Solution](#)

24. If the letters of the word 'MOTHER' are written in all possible orders and these words are written out as in a dictionary, find rank of the word 'MOTHER'.

[Watch Video Solution](#)

25. In how many ways can the letters of the word PERMUTATIONS be arranged if the (i) words start with P and end with S, (ii) vowels are all together, (iii) there are always 4 letters between P and S?

[Watch Video Solution](#)

26. In how many ways can the letters of the word PERMUTATIONS be arranged if the (i) words start with P and end with S, (ii) vowels are all together, (iii) there are always 4 letters between P and S?

[Watch Video Solution](#)

27. (i) How many different words can be formed with letters of the word 'SUNDAY' ? (ii) How many of the words begin with N? (iii) How many begin with N and end Y?

[Watch Video Solution](#)

28. How many words can be formed using the letter A thrice, the letter B twice and the letter C thrice?

[Watch Video Solution](#)

29. How many 5 letters words can be formed using the letters of the words '*INEFFECTIVE*'

[Watch Video Solution](#)

30. m men and n women are to be seated in a row so that no two women sit together. If $m > n$ then show that the number of ways in which they can be seated is $\frac{m!(m+1)!}{(m-n+1)!}$.

 [Watch Video Solution](#)

31. A gentleman wants to invite six friends. In how many ways can he send invitation cards to them, if he has three servants to carry the cards.

 [Watch Video Solution](#)

32. How many three-digit numbers more than 600 can be formed by using the digits 2, 3, 4, 6, 7.

 [Watch Video Solution](#)

33. How many numbers between 3000 and 4000 can be formed from the digits 3, 4, 5, 6, 7 and 8, no digit being repeated in any number?

 [Watch Video Solution](#)

34. How many numbers divisible by 5 and lying between 4000 and 5000 can be formed from the digits 4, 5, 6, 7 and 8.

 [Watch Video Solution](#)

35. A room has 6 doors. In how many ways can a man enter the room through one door and come out through a different door?

 [Watch Video Solution](#)

36. How many numbers between 4000 and 5000 can be formed from the digits 4, 5, 6, 7 and 8.

[Watch Video Solution](#)

37. There are 6 multiple choice questions in an examination. How many sequence of answers are possible, if the first three questions have 4 choices each and the next three have 5 each?

[Watch Video Solution](#)

38. How many numbers are there between 100 and 1000 in which all the digits are distinct?

[Watch Video Solution](#)

39. How many 3-digit numbers can be formed from the digits 1, 2, 3, 4 and 5 assuming that (i) repetition of the digits is allowed? (ii) repetition of the digits is not allowed?

[Watch Video Solution](#)

40. How many numbers greater than 1000, but not greater than 4000 can be formed with the digits 0, 1, 2, 3, 4 if: (i) repetition of digits is allowed? (ii) repetition of digits is not allowed?

 [Watch Video Solution](#)

41. How many different signals can be given using any number of flags from 5 flags of different colours?

 [Watch Video Solution](#)

42. In how many ways can the letters of the word 'PHONE' be arranged

 [Watch Video Solution](#)

43. Find the total number of ways in which six '+' and four '-' signs can be arranged in a line such that no two '-' signs occur together.

Watch Video Solution

44. In how many ways can the letters of the word 'PIZZA' be arranged

Watch Video Solution

45. If the letters of the word 'MOTHER' are written in all possible orders and these words are written out as in a dictionary, find rank of the word 'MOTHER'.

Watch Video Solution

46. The remainder when $1! + 2! + 3! + 4! + \dots + 1000!$ is divided by 10 is

 [Watch Video Solution](#)

47. A biologist studying the genetic code is interested to know the number of possible arrangements of 12 molecules in a chain. The chain contains 4 different molecules represented by the initials A (for Adenine), C (for Cytosine), G (for Guanine) and T (for Thymine) and 3 molecules of each kind. How many different such arrangements are possible?

 [Watch Video Solution](#)

48. If the letters of the word 'LATE' be permuted and the words so performed be arranged as in a dictionary, find rank of the word LATE.

 [Watch Video Solution](#)

49. If the letters of the word *MOTHER* are written in all possible orders and these words are written out as in a dictionary, find rank of the word *MOTHER*.

A. 307

B. 261

C. 308

D. 309

Answer: A

[Watch Video Solution](#)

50. If the letters of the word 'LATE' be permuted and the words so performed be arranged as in a dictionary, find rank of the word LATE.

[Watch Video Solution](#)

51. Five persons entered the lift cabin on the ground floor of an 8-floor house. Suppose each of them can leave the cabin independently at any floor beginning with the first. Find the total number of ways in which each of the five persons can leave the cabin (i) at any one of the 7 floors (ii) at different floors.

 [Watch Video Solution](#)

52. In how many ways first and second rank in mathematics, first and second rank in physics, first rank in chemistry, and first rank in English be given away to a class of 30 students.

 [Watch Video Solution](#)

53. How many numbers are there between 100 and 1000. Repetation is allowed.

 [Watch Video Solution](#)

54. For a set of five true/false questions, no student has written all correct answers, and no two students have given the same sequence of answers. What is the maximum number of students in the classes, for this to be possible?

 [Watch Video Solution](#)

55. How many numbers are there between 100 and 1000 which will be divisible by 10?

 [Watch Video Solution](#)

56. In how many ways can 3 prizes be distributed among 4 boys, when

- (i) no boy gets more than 1 prize,
- (ii) a boy may get any number of prizes,
- (iii) no boy gets all the prizes?

 [Watch Video Solution](#)

 [Watch Video Solution](#)

57. A telegraph has 5 arms and each arm is capable of 4 distinct positions, including the position of rest. What is the total number of signals that can be made?

 [Watch Video Solution](#)

58. There are four parcels and five post-offices. In how many different ways can the parcels be sent by registered post?

 [Watch Video Solution](#)

59. A mint prepares metallic calendars specifying months, dates and days in the form of monthly sheets (one plate for each month). How many types of February calendars should it prepare to serve for all the possibilities in the future year ?

 [Watch Video Solution](#)

60. A die is tossed once. Find the probability of getting an odd number.

[Watch Video Solution](#)

61. Find the total number of ways in which 20 balls can be put into 5 boxes so that first box contains just one ball.

[Watch Video Solution](#)

62. Find the number of 4 digit numbers that can be formed using the digits 1,2,3,4,5 if no digit is repeated. How many of these will be even?

[Watch Video Solution](#)

63. How many four digit natural numbers not exceeding the number 4321 can be formed using the digits 1,2,3,4, if repetition is allowed?

[Watch Video Solution](#)

64. How many different numbers of six digits each can be formed from the digits 4, 5, 6, 7, 8, 9 when repetition of digits is not allowed?

[Watch Video Solution](#)

65. Serial numbers for an item produced in a factory are to be made using two letters followed by four digits (0 to 9). If the letters are to be taken from twenty six letters of English alphabet without repetition and the digits are also not repeated in a serial number, how many serial numbers are possible?

[Watch Video Solution](#)

66. From among the 36 teachers in a college, one principal, one vice-principal and the teacher-incharge are to be appointed. In how many

ways can this be done?

[Watch Video Solution](#)

67. In how many ways can 6 persons stand in a queue?

[Watch Video Solution](#)

68. There are five books on Mathematics and 6 books on Physics in a book shop. In how many ways can a student buy : (i) a Mathematics book and a Physics book (ii) either a Mathematics book or a Physics book?

[Watch Video Solution](#)

69. Seven athletes are participating in a race. In how many ways can the first three prizes be won?

[Watch Video Solution](#)

70. If a group of n distinct objects, the number of arrangements of 4 object is 12 times the number of arrangements of 2 objects, then the number of objects is (a)10 (b) 8(c) 6(d) none of these

[Watch Video Solution](#)

71. If the letters of the word 'MOTHER' are written in all possible orders and these words are written out as in a dictionary, find rank of the word 'MOTHER'.

[Watch Video Solution](#)

72. In a room there are 12 bulbs of the same wattage, each having separate switch. The number of ways to light the room with different amounts of illumination is (a) $12^2 - 1$ (b) 2^{12} (c) $2^{12} - 1$ (d) none of these

[Watch Video Solution](#)

73. How many different signals can be given using any number of flags from 5 flags of different colours?

[Watch Video Solution](#)

74. It is required to seat 8 men and 4 women in a row so that the women occupy the even places. How many such arrangements are possible?

[Watch Video Solution](#)

75. If $P(n, 4) = 20 \times P(n, 2)$, find n .

[Watch Video Solution](#)

76. If $P(n, 4) = 18 \times P(n, 3)$, find n

 [Watch Video Solution](#)

77. If $P(n, 4) = 20 \times P(n, 2)$, then $f \in d$ the value of f

 [Watch Video Solution](#)

78. If $P(n, 4) = 20 \times P(n, 2)$, find n .

 [Watch Video Solution](#)

79. In how many ways can 6 persons stand in a queue?

 [Watch Video Solution](#)

80. Seven athletes are participating in a race. In how many ways can the first three prizes be won?

 [Watch Video Solution](#)

81. If ${}^{22}P_{r+1} : {}^{20}P_{r+2} = 11 : 52$, find r

 [Watch Video Solution](#)

82. If ${}^{2n+1}P_{(n-1)} : (2n-1)P_n = 3:5$, find n

 [Watch Video Solution](#)

83. Find the number of arrangements of the letters of the INDEPENDENCE. In how many of these arrangements, (i) do the words start with P (ii) do all the vowels always occur together (iii) do the vowels never occur together (iv) do the words begin with I and end in P?

 [Watch Video Solution](#)

84. In how many ways can the letters of the word PENCIL be arranged so that (i) N is always next to E ? (ii) N and E are always together?

 Watch Video Solution

85. How many 4-letter word, with or without meaning, can be formed out of the letters of the word, 'LOGARITHMS', if repetition of letters is not allowed?

 Watch Video Solution

86. If P_m stands for ${}^m P_m$, then prove that:
 $1 + 1 \cdot P_1 + 2 \cdot P_2 + 3 \cdot P_3 + \dots + n P_n = (n + 1)!$

 Watch Video Solution

87. In an examination hall there are four rows of chairs. Each row has 8 chairs one behind the other. There are two classes sitting for the examination with 16 students in each class. It is desired that in each row, all students belong to the same class and that no two adjacent rows are allotted to the same class. In how many ways can these 32 students be seated?

[Watch Video Solution](#)

88. The sum of all four-digit numbers that can be formed by using the digits 2, 4, 6, 8 (when repetition of digits is not allowed) is a. 133320 b. 5333280 c. 53328 d. none of these

[Watch Video Solution](#)

89. If $P(15, r - 1) : P(16, r - 2) = 3 : 4$, find r .

[Watch Video Solution](#)

90. If ${}^{n+5}P_{n+1} = \frac{11(n-1)}{2} {}^{n+3}P_n$, find n .

Watch Video Solution

91. How many words, with or without meaning, can be formed by using the letters of the word 'TRIANGLE'?

Watch Video Solution

92. If a denotes the number of permutations of $(x + 2)$ things taken all at a time, b the number of permutations of x things taken 11 at a time and c the number of permutations of $x - 11$ things taken all at a time such that $a = 182bc$, find the value of x .

Watch Video Solution

93. In how many ways can 9 examination papers arranged so the best and the worst papers are never together?

 [Watch Video Solution](#)

94. How many words can be formed with the letters of the words 'ORDINATE' so the vowels occupy odd places?

 [Watch Video Solution](#)

95. A code word is to consist of two distinct English alphabets followed by two distinct number from $1 \rightarrow 9$. for example, $CA23$ is a code word. How many such code words are there? How many of them end with an even integer?

 [Watch Video Solution](#)

96. In how many ways can 5 children be arranged in a row such that two of them, Ram and Shyam, are always together? Two of them, Ram and Shyam, are never together?

[Watch Video Solution](#)

97. How many words can be formed from the letters of the word, TRIANGLE? How many of these will begin with T and end with E ?

[Watch Video Solution](#)

98. (i) How many different words can be formed with letters of the word 'SUNDAY'? (ii) How many of the words begin with N? (iii) How many begin with N and end Y?

[Watch Video Solution](#)

99. In how many ways can 5 girls and 3 boys be seated in a row so that no two boys are together?

 [Watch Video Solution](#)

100. How many words can be formed with the letters of the words 'ORDINATE' so the vowels occupy odd places?

 [Watch Video Solution](#)

101. When a group photograph is taken, all the seven teachers should be in the first row and all the twenty students should be in the second row. If the two corners of the second row are reserved for the two tallest students, interchangeable only between them, and if the middle seat of the front row is reserved for the Principal, how many arrangements are possible?

 [Watch Video Solution](#)

102. In a class of 10 students there are 3 girls A, B, C. In how many different ways can they be arranged in a row such that no two of the girls are consecutive.

 [Watch Video Solution](#)

103. Compute: $\frac{20!}{18!}$

 [Watch Video Solution](#)

104. Compute: $\frac{10!}{6!10!}$

 [Watch Video Solution](#)

105. Convert the following products into factorial: 6.7.8.9.10

 [Watch Video Solution](#)

106. Convert the following products into factorial: $2 \cdot 4 \cdot 6 \cdot 8 \cdot 10$

 [Watch Video Solution](#)

107. Find the LCM of $4!$, $5!$ and $6!$

 [Watch Video Solution](#)

108. Compute: $\frac{30!}{28!}$

 [Watch Video Solution](#)

109. Compute: $\frac{11! - 10!}{9!}$

 [Watch Video Solution](#)

110. Prove that: $\frac{1}{9!} + \frac{1}{10!} + \frac{1}{11!} = \frac{122}{11!}$

Watch Video Solution

111. Find x in each of the following: $\frac{1}{4!} + \frac{1}{5!} = \frac{x}{6!}$

Watch Video Solution

112. Find x in each of the following: $\frac{x}{10!} = \frac{1}{8!} + \frac{1}{9!}$

Watch Video Solution

113. Find x in each of the following: $\frac{1}{6!} + \frac{1}{7!} = \frac{x}{8!}$

Watch Video Solution

114. Convert the following products into factorial: 5. 6. 7. 8. 9. 10

Watch Video Solution

115. Convert the following products into factorial: 3.6.9.12.15.18

Watch Video Solution

116. Convert the following products into factorial:

$$(n + 1)(n + 2)(n + 3)\dots\dots (2n)$$

Watch Video Solution

117. Convert the following products into factorial: 1. 3. 5. 7. 9(2n - 1)

Watch Video Solution

118. Which of the following are true: $(2 + 3) \neq 2! + 3!$

Watch Video Solution

119. Which of the following are true: $(2 \times 3)! = 2! \times 3!$

Watch Video Solution

120. Prove that: $n!(n + 2) = n! + (n + 1)!$

Watch Video Solution

121. if $(n + 2)! = 60[(n - 1)]!$, find n

Watch Video Solution

122. If $(n + 1)! = 90[(n - 1)!]$, find n

Watch Video Solution

123. If $(n + 3)! = 56[(n + 1)!]$ find n

 [Watch Video Solution](#)

124. Prove that $\frac{(2n + 1)!}{n!} = 2^n \{1. 3. 5.....(2n - 1)(2n + 1)\}$

 [Watch Video Solution](#)

125. There are 3 candidates for a classical, 5 for a Mathematical,, and 4 for a Natural science scholarship. In how many ways can these scholarships be awarded? In how many ways one of these scholarships be awarded?

 [Watch Video Solution](#)

126. The flag of a newly formed forum is in the form of three blocks, each to be coloured differently. If there are six different colours on the whole

to choose from how many such designs are possible.

[Watch Video Solution](#)

127. Find the number of 4 letter words, with or without meaning which can be formed out of the letters of the word ROSE, when the repetition of the letters is not allowed. The repetition of the letters is allowed.

[Watch Video Solution](#)

128. Given 4 flags of different colours, how many different signals can be generated, if a signal requires the use of 2 flags one below the other?

[Watch Video Solution](#)

129. Find the number of different signals that can be generated by arranging at least 2 flags in order (one below the other) on a vertical staff, if five different flags are available.

[Watch Video Solution](#)

130. How many words (with or without meaning) of three distinct letters of the English alphabets are there?

[Watch Video Solution](#)

131. Find the total number of ways of answering 5 objective type questions, each question having 4 choices.

[Watch Video Solution](#)

132. How many three digit numbers can be formed without using the digits 0,2,3,4,5 and 6?

[Watch Video Solution](#)

133. How many numbers are there between 100 and 1000 consists such that every digit is either 2 or 9?

 [Watch Video Solution](#)

134. How many numbers are there between 100 and 1000 such that 7 is the unit's place.

 [Watch Video Solution](#)

135. How any three digit odd numbers can be formed by using the digits 1,2,3,4,5,6 if; The repetition of digits is not allowed? The repetition of digits is allowed?

 [Watch Video Solution](#)

136. How many 3-digit even number can be formed form the digits 1,2,3,4,5,6 if the digits can be repeated?

 [Watch Video Solution](#)

137. How many numbers of 3 digits can be formed with the digits 1,2,3,4,5 when digits may be repeated?

 [Watch Video Solution](#)

138. Find the number of numbers of 5 digits than can be formed with the digits 0,1,2,3,4 if the digits can be repeated in the same number.

 [Watch Video Solution](#)

139. How many 4-digit numbers are there when a digit may be repeated an number of times?

[Watch Video Solution](#)

140. How many three letter words can be formed using a, b, c, d, e if Repetition is not allowed ii. repetition is allowed?

[Watch Video Solution](#)

141. In how many ways 5 rings of different types can be worn in 4 fingers?

[Watch Video Solution](#)

142. In how many ways can 5 letters be posted in 4 letter boxes?

[Watch Video Solution](#)

143. A mint prepares metallic calendars specifying months, dates and days in the form of monthly sheets (one plate for each month). How many types of February calendars should it prepare to serve for all the possibilities in the future years?

 [Watch Video Solution](#)

144. Find the total number of ways in which n distinct objects can be put into two different boxes.

 [Watch Video Solution](#)

145. Find the total number of ways in which n distinct objects can be put into two different boxes.

 [Watch Video Solution](#)

146. By using the digits 0,1,2,3,4 and 5 (repetitions not allowed) numbers are formed by using any number of digits. Find the total number of non-zero number that can be formed.

[Watch Video Solution](#)

147. In a class there are 27 boys and 14 girls. The teacher wants to select 1 boy and 1 girl to represent the class in a function. In how many ways can the teacher make this selection?

[Watch Video Solution](#)

148. A person wants to buy one fountain pen, one ball pen and one pencil from a stationery shop. If there are 10 fountain pen varieties, 12 ball pen varieties and 5 pencil varieties in how many ways can he select these articles?

[Watch Video Solution](#)

149. From Goa to Bombay there are two routes; air, and sea. From Bombay to Delhi there are three routes air, rail and road. From Goa to Delhi via Bombay, how many kinds of routes are there?

[Watch Video Solution](#)

150. A coin is tossed three times and outcomes are recorded. How many possible outcomes are there?

[Watch Video Solution](#)

151. In how many ways can an examinee answer a set of ten true/false type questions?

[Watch Video Solution](#)

152. A letter lock consists of three rings each marked with 10 different letters. In how many ways it is possible to make an unsuccessful attempt to open the lock?

[Watch Video Solution](#)

153. There are 6 multiple choice questions in an examination. How many sequences of answers are possible, if the first three questions have 4 choices each and the next three have 2 each?

[Watch Video Solution](#)

154. Given 7 flags of different colours, how many different signals can be generated if a signal requires the use of two flags, one below the other?

[Watch Video Solution](#)

155. A team consists of 6 boys and 4 girls and other has 5 boys and 3 girls. How many single matches can be arranged between the two teams when a boy plays against a boy and a girl plays against a girl?

[Watch Video Solution](#)

156. How many A.P.'s with 10 terms are there whose first term is in the set $\{1,2,3\}$ and whose common difference is in the set $\{1,2,3,4,5\}$?

[Watch Video Solution](#)

157. How many three digit numbers are there with no digit repeated?

[Watch Video Solution](#)

158. How many three -digit numbers are there?

[Watch Video Solution](#)

159. How many different five –digit number licence plates can be made if First digit cannot be zero and the repetition of digits is not allowed, The first digit cannot be zero, but the repetition of digits is allowed?

[Watch Video Solution](#)

160. How many four –digit numbers can be formed with the digits 3,5,7,8,9 which are greater than 7000, if repetition digits is not allowed?

[Watch Video Solution](#)

161. How many four digit numbers can be formed with the digits 3,5,7,8,9 which are greater than 8000, if repetition of digits is not allowed?

[Watch Video Solution](#)

162. How many 3 digit numbers are there, with distinct digits, with each digit odd?

 [Watch Video Solution](#)

163. How many different numbers of six digits can be formed from the digits 3,1,7,0,9,5 when repetition of digits is not allowed?

 [Watch Video Solution](#)

164. A number lock on a suitcase has three wheels each labelled with ten digits 0 to 9. If opening of the lock is a particular sequence of three digits with no repeats, how many such sequences will be possible? Also, find the number of unsuccessful attempts to open the lock.

 [Watch Video Solution](#)

165. How many numbers of six digits can be formed from the digits 0,1,3,5,7 and 9 when no digit is repeated? How many of them are divisible by 10?

[Watch Video Solution](#)

166. If three six faced die each marked with numbers 1 to 6 on six faces, are thrown find the total number of possible outcomes.

[Watch Video Solution](#)

167. A coin is tossed three times and the outcomes are recorded. How many possible outcomes are there? How many possible outcomes if the coin is tossed four times? Five times? n times?

[Watch Video Solution](#)

168. How many numbers of four digits can be formed with the digits 1,2,3,4,5 if the digits can be repeated in the same number?

 [Watch Video Solution](#)

169. How many three digits numbers can be formed by using the digits 0,1,3,5,7 while each digit may be repeated any number of times?

 [Watch Video Solution](#)

170. How many natural numbers less than 1000 can be formed from the digits 0,1,2,3,4,5 when a digit may be repeated any number of times?

 [Watch Video Solution](#)

171. How many five digit telephone numbers can be constructed using the digits 0 to 9. If each numbers starts with 67 and no digit a appears

more than once?

Watch Video Solution

172. Find the number of ways in which 8 distinct toys can be distributed among 5 children.

Watch Video Solution

173. Find the number of ways in which one can post 5 letters in 7 letter boxes.

Watch Video Solution

174. In how many ways can 5 different balls be distributed among three boxes?

Watch Video Solution

175. In how many ways can 7 letters be posted in 4 letter boxes?

 [Watch Video Solution](#)

176. In how many ways can 4 prizes be distributed among 5 students, when (1)No student gets more than one prize? (2)A student may get any number of prizes? (3)No student gets all the prizes?

 [Watch Video Solution](#)

177. There are 10 lamps in a hall. Each one of them can be switched on independently. Find the number of ways in which the hall can be illuminated.

 [Watch Video Solution](#)

178. Evaluate the following: 5P_3

Watch Video Solution

179. Evaluate the following: $P(15, 3)$

Watch Video Solution

180. Evaluate the following: $P(5, 5)$

Watch Video Solution

181. If $P(5, r) = 2 \cdot P(6, r - 1)$, find r .

Watch Video Solution

182. If $10P_r = 5040$, find the value of r .

Watch Video Solution

183. If $9P_5 + 5^9 P_4 = {}^{10}P_r$, find the value of r .

Watch Video Solution

184. Prove the following: $P(n, n) = 2P(n, n - 2)$

Watch Video Solution

185. Prove the following: $P(n, r) = P(n - 1, r) + rP(n - 1, r - 1)$

Watch Video Solution

186. Prove the following: $P(n, n) = P(n, n - 1)$

Watch Video Solution

187. Prove the following: $P(n, r) = nP(n - 1, r - 1)$

[Watch Video Solution](#)

188. In how many ways three different rings can be worn in four fingers with at most one in each finger?

[Watch Video Solution](#)

189. How many different signals can be made by 5 flags from 8 flags of different colours?

[Watch Video Solution](#)

190. Three men have 4 coats, 5 waist coats and 6 caps. In how many ways can they wear them?

[Watch Video Solution](#)

191. How many numbers lying between 100 and 1000 can be formed with the digits 1,2,3,4,5 if the repetition of digits is not allowed?

 [Watch Video Solution](#)

192. How many four digit numbers are there with distinct digits?

 [Watch Video Solution](#)

193. In how many ways 7 pictures can be hung from 5 picture nails on a wall?

 [Watch Video Solution](#)

194. The number of natural numbers smaller than 10^4 of which all digits are different, is

 [Watch Video Solution](#)

195. How many words, with or without meaning, can be formed using all the letters of the word EQUATION, using each letter exactly once?

 [Watch Video Solution](#)

196. Ten different letters of an alphabet are given. Words with five letters are formed from these given letters. Determine the number of words which have at least one letter repeated.

 [Watch Video Solution](#)

197. Evaluate each of the following: 8P_3

 [Watch Video Solution](#)

198. Evaluate each of the following: ${}^{10}P_4$

Watch Video Solution

199. Evaluate each of the following: $P(6, 4)$

Watch Video Solution

200. If $P(5, r) = P(6, r-1)$, find r .

Watch Video Solution

201. If ${}^5P(n, 4) = 6 {}^nP(n, 3)$ find n ?

Watch Video Solution

202. If ${}^nP_4 = 360$, find the value of n .

Watch Video Solution

203. If $P(9, r) = 3024$, find r .

Watch Video Solution

204. If $P(11, r) = P(12, r - 1)$ find n .

Watch Video Solution

205. If $P(n - 1, 3) : P(n, 4) = 1 : 9$ find n

Watch Video Solution

206. If ${}^{2n-1}P_n : {}^{2n+1}P_{n-1} = 22 : 7$, find n .

Watch Video Solution

207. If $P(n, 5) : P(n, 3) = 2 : 1$ find n

Watch Video Solution

208. Prove that:

$$P(1, 1) + 2 \cdot P(2, 2) + 3 \cdot P(3, 3) + \dots + n \cdot P(n, n) = P(n + 1, n + 1) - 1.$$

Watch Video Solution

209. In how many ways can five children stand in a queue?

Watch Video Solution

210. From among the 36 teachers in a school, one principal and one vice principal are to be appointed. In how many ways can this be done?

Watch Video Solution

211. Four letters E, K, S and V, one in each, were purchased from a plastic warehouse. How many ordered pairs of letters, to be used as initials, can be formed from them?

 [Watch Video Solution](#)

212. Four books, one each in Chemistry, Physics, Biology and Mathematics, are to be arranged in a shelf. In how many ways can this be done?

 [Watch Video Solution](#)

213. Find the number of different 4-letter words, with or without meaning, that can be formed from the letters of the word NUMBER.

 [Watch Video Solution](#)

214. How many 3 digit numbers are there, with distinct digits, with each digit odd?

 [Watch Video Solution](#)

215. How many words, with or without meaning, can be formed by using all the letters of the word DELHI using each letter exactly once?

 [Watch Video Solution](#)

216. There are two works each of 3 volumes and two works each of 2 volumes; In how many ways can the 10 books be placed on a shelf so that the volumes of the same work are not separated?

 [Watch Video Solution](#)

217. There are 6 items in column A and 6 items in column B. A student is asked to match each item in column A with an item in column B. How many possible, correct or incorrect, answer are there to this question?

 [Watch Video Solution](#)

218. How many three digit numbers are there, with no digit repeated.

 [Watch Video Solution](#)

219. How many 6-digit telephone numbers can be constructed with digits 0,1,2,3,4,5,6,7,8,9 if each number starts with 35 and no digit appears more than once?

 [Watch Video Solution](#)

220. In how many ways can 6 boys and 5 girls be arranged for a group photograph if the girls are to sit on chairs in a row and the boys are to stand in a row behind them?

Watch Video Solution

221. How many 3-digit even numbers can be made using the digits 1,2,3,4,5,6,7 if no digits is repeated?

Watch Video Solution

222. How many 3-digit numbers can be formed by using the digits 1 to 9 if no digit is repeated?

Watch Video Solution

223. Find the numbers of 4-digit numbers that can be formed using the digits, 1,2,3,4,5 if no digit is repeated ? How many of these will be even?

[Watch Video Solution](#)

224. How many words can be formed from the letters of the word DAUGHTER so that The vowels always come together? The vowels never come together?

[Watch Video Solution](#)

225. The Principal wants to arrange 5 students on the platform such that the boy SALIM occupies the second position and such that the girl. SITA is always adjacent to the girl RITA. How many such arrangements are possible?

[Watch Video Solution](#)

226. How many numbers between 400 and 1000 can be formed with the digits 0,2,3,4,5,6 If no digit is repeated in the same number?

 [Watch Video Solution](#)

227. In how many ways can the letters of the word FAILURE be arranged so that the consonants may occupy only odd positions?

 [Watch Video Solution](#)

228. How many words can be formed from the letters of the word SUNDAY? How many of these begin with D?

 [Watch Video Solution](#)

229. How many words can be formed out of the letters of the word, ORIENTAL, so that the vowels always occupy the odd places?

[Watch Video Solution](#)

230. How many words can be formed out of the letters of the word, ARTICLE, so that vowels occupy even places?

[Watch Video Solution](#)

231. How many words (with or without dictionary meaning) can be made from the letters in the word MONDAY, assuming that no letter is repeated 2) if 4 letters are used at a time? 3) All letters are used at a time? All letters are used but first is vowel?

[Watch Video Solution](#)

232. How many three letter words can be made using the letters of the word ORIENTAL?

[Watch Video Solution](#)

233. How many different words can be formed with the letters of the word MISSISSIPPI? In how many of these permutations four I's do not come together?

Watch Video Solution

234. How many permutations of the letters of the word APPLE are there?

Watch Video Solution

235. Find the number of different permutations of the letters of the word BANANA?

Watch Video Solution

236. How many different words can be formed by using all the letters of the word ALLAHABAD? In how many of them vowels occupy the even positions? In how many of them both L do not come together?

[Watch Video Solution](#)

237. Find the numbers of arrangements of the letters of the word INDEPENDENCE. In how many of these arrangements. Do the words start with P? Do all the vowels never occur together? Do all the vowels always occur together? Do the words begin with I and end in P?

[Watch Video Solution](#)

238. How many numbers greater than a million can be formed with the digits 2,3,0,3,4,2,3?

[Watch Video Solution](#)

239. There are six periods in each working day of the school. In how many ways can one arrange 5 subjects such that each subject is allowed at least one period?

[Watch Video Solution](#)

240. If all the letters of the word AGAIN be arranged as in a dictionary, what is the fiftieth word?

[Watch Video Solution](#)

241. If the different permutations of all the letter of the word EXAMINATION are listed as in a dictionary, how many words are there in this list before the first word starting with E?

[Watch Video Solution](#)

242. Find the number of words formed by permuting all the letters of the following word: INDEPENDENCE

[Watch Video Solution](#)

243. Find the number of words formed by permuting all the letters of the following word: INDIA

[Watch Video Solution](#)

244. Find the number of words formed by permuting all the letters of the following word: SERIES

[Watch Video Solution](#)

245. Find the number of words formed by permuting all the letters of the following word: INTERMEDIATE

[Watch Video Solution](#)

246. Find the number of words formed by permuting all the letters of the following word: PAKISTAN

[Watch Video Solution](#)

247. Find the number of words formed by permuting all the letters of the following word: EXERCISES

[Watch Video Solution](#)

248. Find the number of words formed by permuting all the letters of the following word: RUSSIA

[Watch Video Solution](#)

249. Find the number of words formed by permuting all the letters of the following word: CONSTANTINOPLE

 [Watch Video Solution](#)

250. In how many ways can the letters of the word ALGEBRA be arranged without changing the relative order of the vowels and consonants?

 [Watch Video Solution](#)

251. How many words can be formed with the letters of the word UNIVERSITY, the vowels remaining together?

 [Watch Video Solution](#)

252. Find the total number of arrangements $x^3y^2z^4$ of the letters in the expression when written at full length.

[Watch Video Solution](#)

253. How many words can be formed with the letters of the word PARALLEL so that all L's do not come together?

[Watch Video Solution](#)

254. How many different signals can be made from 4 red, 2 white and 3 green flags by arranging all of them vertically on a flagstaff?

[Watch Video Solution](#)

255. How many number of four digits can be formed with the digits 1,3,3,0?

[Watch Video Solution](#)

256. How many different numbers, greater than 50000 can be formed with digits 0,1,1,5,9.

 [Watch Video Solution](#)

257. How many words can be formed from the letters of the word SERIES, which start with S and end with S?

 [Watch Video Solution](#)

258. Find the number of numbers, greater than a million, that can be formed with the digits 2,3,0,3,4,2,3.

 [Watch Video Solution](#)

259. There are three copies each of 4 different books. In how many ways can they be arranged in a shelf?

[Watch Video Solution](#)

260. How many different arrangements can be made by using all the letters in the word MATHEMATICS. How many of them begin with C? How many of them begin with T?

[Watch Video Solution](#)

261. In how many ways can 4 red , 3 yellow and 2 green discs be arranged in a row if the discs of the same colour are indistinguishable?

[Watch Video Solution](#)

262. How many numbers greater than 1000000 can be formed by using the digits 1,2,0,2,4,2,4?

[Watch Video Solution](#)

263. In how many ways can the letters of the word ASSASSINATION be arranged so that all the S's are together?

 [Watch Video Solution](#)

264. Find the total number of permutations of the letters of the word INSTITUTE.

 [Watch Video Solution](#)

265. The letters of the word SURITI are written in all possible orders and these words are written out as in a dictionary. Find the rank of the word SURITI.

 [Watch Video Solution](#)

266. In how many ways can 4 letters be posted in 5 letter boxes?

[Watch Video Solution](#)

267. Write the number of 5 digit numbers that can be formed using digits 0,1 and 2.

[Watch Video Solution](#)

268. In how many ways 4 women draw water from 4 taps, if no tap remains unused?

[Watch Video Solution](#)

269. Write the total number of possible outcomes in a throw of 3 dice in which at least one of the dice shows an even number.

[Watch Video Solution](#)

270. Write the number of arrangements of the word BANANA in which two N's come together.

 [Watch Video Solution](#)

271. Write the number of ways in which 7 men and 7 women can sit on a round table such that no two women sit together.

 [Watch Video Solution](#)

272. Write the number of words that can be formed out of the letters of the word COMMITTEE.

 [Watch Video Solution](#)

273. Write the number of all possible words that can be formed using the letters of the word MATHEMATICS.

[Watch Video Solution](#)

274. Write the number of ways in which 6 men and 5 women can dine at a round table if no two women sit together.

[Watch Video Solution](#)

275. In how many ways can 5 boys and 3 girls be seated in a row so that each girl is between 2 boys?

[Watch Video Solution](#)

276. Write the number of numbers that can be formed using all four digits 1,2,3,4.

[Watch Video Solution](#)

277. The number of permutations of n different things taking r at a time when 3 particular things are to be included is

a. ${}^{n-3}P_{r-3}$

b. ${}^{n-3}P_r$

c. ${}^n P_{r-3}$

d. $r!{}^{n-3}C_{r-3}$

[Watch Video Solution](#)

278. The number of five digit telephone numbers having at least one of their digits repeated is 90000 b. 100000 c. 30240 d. 69760

[Watch Video Solution](#)

279. The number of words that can be formed out of the letters of the word ARTICLE so that vowels occupy even places is 574 b. 36 c. 754 d. 144

[Watch Video Solution](#)

280. How many numbers greater than 10 lacs be formed from 2,3,0,3,4,2,3? 420 b. 360 c. 400 d. 300

[Watch Video Solution](#)

281. The number of words from the letters of the word BHARAT in which B and H will never come together, is 360 b. 240 c. 120 d. none of these

[Watch Video Solution](#)

282. The number of six letter words that can be formed using the letters of the word ASSIST in which Ss alternate with other letters is 12 b. 24 c. 18 d. none of these

[Watch Video Solution](#)

283. The number of arrangements of the word DELHI in which E precedes I is a. 30 b. 60 c. 120 d. 59

 [Watch Video Solution](#)

284. Number of all four digit numbers having different digits formed of the digits, 1,2,3,4 and 5 and divisible by 4 is 24 b. 30 c. 125 d. 100

 [Watch Video Solution](#)

285. The number of ways in which 6 men can be arranged in a row so that three particular men are consecutive is $4! \times 3!$ b. $4!$ c. $3! \times 3!$ d. none of these

 [Watch Video Solution](#)

286. A 5-digit number divisible by 3 is to be formed using the number 0,1,2,3,4 and 5 without repetition. Find total of ways in which this can be done.

 [Watch Video Solution](#)

287. The product of consecutive positive integers is divisible by a. $r!$ b. $r! + 1$ c. $(r + 1)!$ d. none of these

 [Watch Video Solution](#)

288. If ${}^{k+5}P_{k+1} = \frac{11(k-1)}{2} \cdot {}^{k+3}P_k \cdot P_k$ then the values of k are 7 and 11 b. 6 and 7 c. 2 and 11 d. 2 and 6

 [Watch Video Solution](#)

289. The number of arrangements of the letters of the word BHARAT taking 3 at a time is a. 72 b. 120 c. 14 d. none of these

 [Watch Video Solution](#)

290. The number of words that can be made by re-arranging the letters of the word APURBA so that vowels and consonants are alternate is 18 b. 35 c. 36 d. none of these

 [Watch Video Solution](#)

291. The number of ways in which the letters of the word ARTICLE can be arranged so that even places are always occupied by consonants is 576 b. ${}^4C_3 \times 4!$ c. $2 \times 4!$ d. none of these

 [Watch Video Solution](#)
