### MANAGEMENT OF NATURAL RESOURCES

#### Multiple Choice Questions

1. From the list given below pick the item that is not natural resource

A. soil

B. water

C. electricity

D. air

**Answer: C**

**Watch Video Solution**

**2. The most rapidly dwindling natural resource in the world is**

A. water

B. forests

C. wind

D. sunlight

**Answer: B**

**Watch Video Solution**

**3.** The most appropriate definition of a natural resource is that it is a substance/commodity that is

A. present only on land

B. a gift of nature which is very useful to  
mankind

C. a man-made substance placed in nature

D. available only in the forest

**Answer: B**

**Watch Video Solution**

4. The main cause for abundant coliform bacteria in the river Gange is

A. disposal of unburnt corpses into water

B. discharge of effluents from electroplating industries

C. washing of clothes

D. immersion of ashes

**Answer: A**

**Watch Video Solution**

5. The pH of water sample collected from a river was found to be acidic in the range of 3.5-4.5, on the banks of the river were several factories that were discharging effluents into the river. The effluents of which one of the following factories is the most cause for lowering the pH of river water ?

A. soap and detergent factory

B. Lead battery manufacturing factory

C. Plastic cup manufacturing factory

D. Alcohol distillery

**Answer: B**

**Watch Video Solution**

6. The pH range most conducive for life of freshwater plants and animals is

A. 6.5-7.5

B. 2.0-3.5

C. 3.5-5.0

D. 9.0-10.5

**Answer: A**

**Watch Video Solution**

7. The three R's that will help us to conserve natural resources for long term use are

A. recycle, regenerate, reuse

B. reduce, regenerate, reuse

C. reudce, reuse, redistribute

D. reduce, recycle, reuse

**Answer: D**

**Watch Video Solution**

**8.** Given below are a few statements related to biodiversity. Pick those that correctly describe the concept of biodiversity

(i) Biodiversity refers to the different species of flora and fauna present in an area.

(ii) Biodiversity refers to only the flora of a

given area.

(iii) Biodiversity is greater in a forest.

(iv) Biodiversity refers to the total number of individuals of a particular species living in an area.

A. (i) and (ii)

B. (ii) and (iv)

C. (i) and (iii)

D. (ii) and (iii)

**Answer: C**

9. Among the statements given below select the ones that correctly describes the concept of sustainable development

- (i) planned growth with minimum damage to the environment.
- (ii) growth irrespective of the extent of damage caused to the environment.
- (iii) stopping all development work to conserve the environment.

(iv) growth that is acceptable to all the stakeholders.

A. (i) and (iv)

B. (ii) and (iii)

C. (ii) and (iv)

D. only (iii)

**Answer: A**

**Watch Video Solution**

**10.** In our country, vast tracts of forests are cleared and a single species of plant is cultivated. This practice promotes

- A. biodiversity in the area
- B. monoculture in the area
- C. growth of natural forest
- D. preserves the natural ecosystem in the area

**Answer: B**

11. A successful forest conservation strategy should involve

- A. protection of animals at the highest trophic level
- B. protection of only consumers
- C. protection of only herbivores
- D. comprehensive programme to protect all the physical and biological

components

**Answer: D**

**Watch Video Solution**

**12.** The important message conveyed by the 'Chipko Movement' is

A. to involve the community in forest conservation efforts

B. to ignore the community in forest conservation efforts

C. to cut down forest trees for developmental activities

D. government agencies have the unquestionable right to order destruction of trees in forests

**Answer: A**

**Watch Video Solution**

**13.** In our country, there are attempts to increase the height of several existing dams like Tehri and Almati, dams across Narmada. Choose the correct statements among the following that are a consequence of raising the height of dams

- (i) Terrestrial flora and fauna of the area is destroyed completely.
- (ii) Dislocation of people and domestic animals living in the area.
- (iii) Valuable agricultural land may be permanently lost.

(iv) It will generate permanent employment for people.

A. (i) and (ii)

B. (i),(ii) and (iii)

C. (ii) and (iv)

D. (i),(ii) and (iv)

**Answer: B**

**Watch Video Solution**

**14. Expand the abbreviation GAP**

A. Governmental Agency for Pollution Control

B. Gross Assimilation by Photosynthesis

C. Ganga Action Plan

D. Government Agency for Animal Protection

**Answer: C**

**Watch Video Solution**

**15.** Select the incorrect statement.

A. Economic development is linked to environmental conservation

B. Sustainable development encourages development for current generation and conservation for resources for futures generations

C. Sustainable development does not consider the view points of stakeholders

D. Sustainable development is a long planned and persistent development

**Answer: C**

**Watch Video Solution**

**16.** Which of the following is not a natural resource?

A. Mango tree

B. Snake

C. Wind

D. Wooden house

**Answer: D**

**Watch Video Solution**

**17. Select the wrong statement.**

A. Forests provide variety of products

B. Forests have greater plant diversity

C. Forests do not conserve soil

D. Forests conserve water

**Answer: C**

**Watch Video Solution**

**18.** Arabari forests of Bengal is dominated by

A. teak

B. sal

C. bamboo

D. mangroove

**Answer: B**

**Watch Video Solution**

**19.** Ground water will not be depleted due to

A. afforestation

B. thermal power plants

C. loss of forest, and decreased rainfall

D. cropping of high water demanding crops

**Answer: A**

Watch Video Solution

20. Opposition to the construction of large dams is due to

- A. social reasons
- B. economic reasons
- C. environmental reasons
- D. All of these

**Answer: D**

21. Khadins, Bundhis, Ahara and Kattas are ancient structures that are examples for

- A. grains storage
- B. wood storage
- C. water harvesting
- D. soil conservation

**Answer: C**

**22.** Pick the right combination of terms which has no fossil fuel.

A. Wind, ocean and coal

B. Kerosene, wind and tide

C. Wind, wood, sun

D. Petroleum, wood, sun

**Answer: C**

**Watch Video Solution**

23. Select the eco-friendly activity among the following

A. Using car for transportation

B. Using polybags for shopping

C. Using dyes for colouring clothes

D. Using windmills to generate power for irrigation

**Answer: D**

**Watch Video Solution**

**24.** It is important to make check dams across the flooded gullies because they

(i) hold water for irrigation

(ii) hold water and prevent soil erosion

(iii) recharge ground water

(iv) hold water permanently

A. (i) and (iv)

B. (ii) and (iii)

C. (iii) and (iv)

D. (ii) and (iv)

**Answer: B**

**Watch Video Solution**

## Short Answer Type Questions

1. Prepare a list of five items that you use daily in the school. Identify from the list such items that can be recycled.

**Watch Video Solution**

2. List two advantages associated with water harvesting at the community level.

[Watch Video Solution](#)

3. In a village in Karnatka, people started cultivating crops all around a lake which was always filled with water. They added fertilisers to their field in order to enhance the yield. Soon they discovered that the waterbody was completely covered with green floating plants and fishes started dying in large numbers.

Analyse the situation and give reasons for excessive growth of plants and death of fish in the lake.

**Watch Video Solution**

4. What measures would you take to conserve electricity in your house?

**Watch Video Solution**

5. Although coal and petroleum are produced by degradation of bio-mass, yet we need to conserve them. Why?

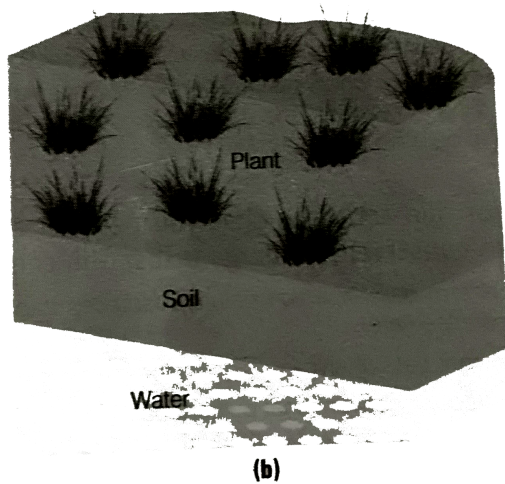

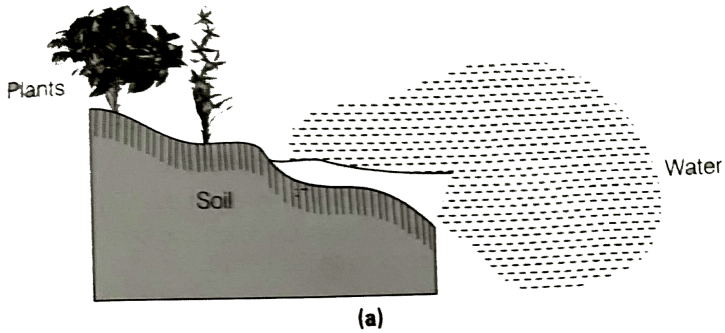

[Watch Video Solution](#)

6. Suggest a few measures for controlling carbon dioxide levels in the atmosphere.

[Watch Video Solution](#)

7. I. Locate and name the water reservoirs in figures (a) and (b).

II. Which has an advantage over the other and why?

[Watch Video Solution](#)

## Long Answer Type Questions

1. In the context of conservation of natural resources, explain the terms reduce, recycle and reuse. From among the materials that we use in daily life, identify two materials for each category.

[Watch Video Solution](#)

2. Prepare a list of five activities that you perform daily in which natural resource can be conserved or energy utilisation can be minimised.

**Watch Video Solution**

3. Is water conservation necessary? Given reasons.

**Watch Video Solution**

4. Suggest a few useful ways of utilising waste water.

**Watch Video Solution**

5. What is the importance of forest as a resource?

**Watch Video Solution**

**6.** Why are the Arabari forests of Bengal known to be a good example of conserved forest?

**Watch Video Solution**
