

# BIOLOGY

## BOOKS - NCERT BIOLOGY (ENGLISH)

### LOCOMOTION AND MOVEMENT

#### Multiple Choice Questions Mcqs

1. Match the following and mark the correct option

Column I

Column II

Fast muscle fibres

*i.* Myoglobin

Slow muscle fibres

*ii.* Lactic acid

Actin filament

*iii.* Contractile unit

Sarcomere

*iv.* I-band

A. 

<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
1	2	4	3

B. 

<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
2	1	3	4

C. 

<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
2	1	4	3

D. 

<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
3	2	4	1

**Answer: C**

**Watch Video Solution**

2. Ribs are attached to

A. scapula

B. sternum

C. clavicle

D. ilium

**Answer: B**

**Watch Video Solution**

3. What is the type of movable joint present between the atlas and axis?

A. Pivot

B. Saddle

C. Hinge

D. Gliding

**Answer: A**

**Watch Video Solution**

4. ATPase of the type muscle is located in

A. actinin

B. troponin

C. myosin

D. actin

**Answer: C**

**Watch Video Solution**

5. Intervertebral disc is found in the vertebral column of

A. birds

B. reptiles

C. mammals

D. amphibians

**Answer: C**

**Watch Video Solution**

6. Which one of the following is showing the correct sequential order of vertebrae in the vertebral column of human beings ?

- A. Cervical-lumbar-thoracic-sacral-coccygeal
- B. Cervical-thoracic-sacral-lumbar-coccygeal
- C. Cervical-sacral-thoracic-lumbar-coccygeal
- D. Cervical-thoracic-lumbar-sacral-coccygeal

**Answer: D**

**Watch Video Solution**

7. Which one of the following pair is incorrect?

A. Hinge joint-between humerus and pectoral girdle

B. Pivot joint-between atlas, axis and occipital condyle

C. Gliding joint-between the carpals

D. Saddle joint-between carpel and metacarpals of thumb

**Answer: A**

Watch Video Solution

8. Knee joint and elbow joints are examples of

- A. saddle joint
- B. ball and socket joint
- C. pivot joint
- D. hinge joint

**Answer: D**

Watch Video Solution

## 9. Macrophages and leucocytes exhibit

- A. ciliary movement
- B. flagellar movement
- C. amoeboid movement
- D. gliding movement

**Answer: C**

**Watch Video Solution**

10. Which one of the following is not a disorder of bone ?

A. Arthritis

B. Osteoporosis

C. Rickets

D. Atherosclerosis

**Answer: D**

**Watch Video Solution**

11. Which one of the following statement is incorrect

A. Heart muscles are striated and involuntary

B. The muscles of hands and legs are striated and voluntary

C. The muscles located in the inner walls of alimentary canal are striated and involuntary

D. Muscles located in the reproductive tracts are unstriated and involuntary

**Answer: C**

**Watch Video Solution**

**12.** Which one of the following statements is true?

A. Head of humerus bone articulates with acetabulum of pectoral girdle.

B. Head of humerus bone articulates with  
glenoid cavity of pectoral girdle.

C. Head of humerus bone articulates with a  
cavity called acetabulum of pelvic girdle.

D. Head of humerus bone articulates with a  
glenoid cavity of pelvic girdle.

**Answer: B**

**Watch Video Solution**

**13.** Muscles with characteristic striations and involuntary are

A. muscles in the wall of alimentary canal

B. muscles of the heart

C. muscles assisting locomotion

D. muscles of the eyelids

**Answer: B**

**Watch Video Solution**

14. Match the followings and mark the correct option

Column I

Sternum

Glenoid Cavity

Freely movable joint

Cartilagenous joint

Column II

*i.* Synovial fluid

*ii.* Vertebrae

*iii.* Pectoral girdle

*iv.* Flat bones

A.  $\begin{matrix} A & B & C & D \\ 2 & 1 & 3 & 4 \end{matrix}$

B.  $\begin{matrix} A & B & C & D \\ 4 & 3 & 1 & 2 \end{matrix}$

C.  $\begin{matrix} A & B & C & D \\ 2 & 1 & 4 & 3 \end{matrix}$

D.  $\begin{matrix} A & B & C & D \\ 4 & 1 & 2 & 4 \end{matrix}$

**Answer: A::B::C::D**

## Very Short Answer Type Questions

1. Name the /tissues in human body which

(a) exhibit amoeboid movement

(b) exhibit ciliary movement

[Watch Video Solution](#)

2. Locomotion requires a perfect coordinated activity of muscular.....systems.

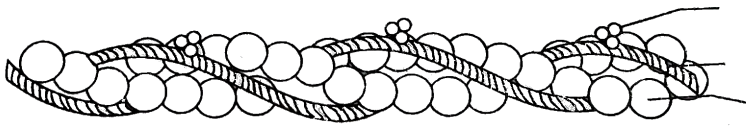

[Watch Video Solution](#)

**3.** Sarcolemma, sarcoplasm and sarcoplasmic reticulum refer to particular type of cell in our body. Which is this cell and to what parts of that cell do these names refer to ?

[Watch Video Solution](#)

**4.** Label the different components of actin filament in the diagram given below

**Watch Video Solution**

5. The sequence of ear ossicles starting from the ear drum is

Or gt What is the right sequence of bones in the ear ossicles of a mammal starting from the tympanum inwards

OR

The sequence of ossicles starting from outside to inside

[Watch Video Solution](#)

6. Difference between bone and cartilage is of

[Watch Video Solution](#)

7. Which tissue is afflicted by myasthenia gravis? What is the underlying cause.

[Watch Video Solution](#)

**8.** How do our bone joints function without grinding noise and pain?

**Watch Video Solution**

**9.** Give the location of a ball and socket joint in a human body

**Watch Video Solution**

10. Our forearm is made of three different bones. Comment.

[Watch Video Solution](#)

## Short Answer Type Questions

1. With respect to rib cage, explain the following

(a) bicephalic ribs (b) true ribs

(c) floating ribs

[Watch Video Solution](#)

2. In old age, people often suffer from stiff and inflamed joints. What is this condition called? What are the possible reasons for these symptoms?

[Watch Video Solution](#)

3. Exchange of calcium between bone and extracellular fluid takes place under the influence of certain hormones

(a) What will happen if more of  $Ca^{2+}$  is in extracellular fluid?

(b) What will happen if very less amount of  $Ca^{2+}$  is in the extracellular fluid?

**Watch Video Solution**

4. Name atleast two hormones which result in fluctuation of  $Ca^{2+}$  level.

**Watch Video Solution**

5. Rahul exercises regularly by visiting a gymnasium. Of late he is gaining weight. What could be the reason? Choose the correct answer and elaborate.

A. Rahul has gained weight due to accumulation of fats in body

B. Rahul has gained weight due to increased muscle and less of fat

C. Rahul has gained weight because his muscle shape has improved

D. Rahul has gained weight because he is accumulating water in the body

**Answer: B**

**Watch Video Solution**

6. Radha was running on a treadmill at a great speed for 15 minutes continuously. She stopped the treadmill and abruptly came out. For the next few minutes, she was breathing heavily/fast. Answer the following questions.

(a) What happened to her muscles when she did strenuously exercised?

(b) How did her breathing rate change?

[Watch Video Solution](#)

7. Write a few lines about gout.

[Watch Video Solution](#)

8. What is the source of energy for muscle contraction?

[Watch Video Solution](#)

9. What are the points for articulation of pelvic and pectoral girdles?

[Watch Video Solution](#)

## Long Answer Type Questions

1. Calcium ion concentration in blood affects muscle contraction. Does it lead to tetany in

certain cases? How will you correlate fluctuation in blood calcium with tetany?

[Watch Video Solution](#)

2. An elderly women slipped in the bathroom and had severe pain in her lower back. After X-ray examination doctors told her it is due to a slipped disc. What does that mean? How does it affect our health?

[Watch Video Solution](#)

3. Explain sliding filament theory of muscle contraction with neat sketches.

[View Text Solution](#)

4. How does a muscle shorten during its contraction and return to its original form during relaxation ?

[View Text Solution](#)

5. Discuss the role of  $Ca^{2+}$  ions in muscle contractions. Draw neat sketches to illustrate your answer.

[Watch Video Solution](#)

6. PECTORAL AND PELVIC GIRDLE

[View Text Solution](#)
